What is a Sawyer Pana-Vue Slide? How does it differ from a 35mm. 2"x2" slide? Outside, both the Pana-Vue and the 35mm. slide measure 2x2-inches—both fit the same standard 2x2-inch projectors. Inside, the actual picture area of the Pana-Vue Slide is 84% larger. The big, square Pana-Vue picture fills your square home screen or viewer, although some 35mm. 2"x2" projectors made several years ago may crop in slightly at the corners when Pana-Vue Slides are projected on them.

Just as important is the tremendous photographic quality of each Pana-Vue Slide. Each Pana-Vue Slide is a direct optical print from the original color negative and will match or surpass your own originals.

## Sylvania SUN GUN

The first new development in home movie lighting in many years!  
 The Sun Gun makes use of a quartz iodine lamp with light output equivalent to four R-30 photofloods. It gives 35,000 center beam candlepower, using only 650-watts, as opposed to 1,000-watts required by four photofloods. It operates on 110-120-volt AC, and draws 6-amps. The life of the Sun Gun ranges between 10 and 15-hours, compared to only 4-hours for photofloods. Further, the Sun Gun maintains both its light output and color temperature over its entire life. The beam from the Sun Gun is broad enough to be used with most wide angle lenses. It provides adequate light for shooting with Indoor Kodachrome. Camera shown in illustration not included.  
 (See listing at bottom of col. 3 for Dichroic Daylight Filter)

## SAWYER'S 500EE 2"X2" ELECTRIC EYE SLIDE PROJECTOR

The first electric-eye slide projector. Has all the features of the popular Sawyer's 500R projector plus an electric eye aperture control. Located directly behind the lens the electric eye reads the density of each slide and automatically adjusts the aperture built into the lens barrel. If the slide is underexposed, and thus dark, the aperture is opened fully to permit maximum light through. Conversely if the slide is overexposed and thin, the aperture is closed down proportionately to reduce brightness and glare. SLIDE STIFFENERS**  
for use with  
2 3/4 x 2 3/4-inch  
CARDBOARD MOUNTED  
SLIDE TRANSPARENCIES

It has been found that 2 3/4 x 2 3/4-inch cardboard mounted slide transparencies do not perform well in automatic slide projectors because the cardboard frame in this larger sized slide is not rigid enough to hold the film surface flat. Bausch & Lomb now has the answer to this problem in an inexpensive, easy-to-use slide stiffener that is a thin steel frame into which a cardboard-mounted transparency is inserted. This frame prevents buckling and eliminates jams in today's automatic projectors capable of handling these larger slides. 15-31, package of 24 slide stiffeners for 2 3/4 x 2 3/4 ready mounts, 4-ozs., only **98c**

**FILMAGIC SILICONE CLOTH**

USE IT TO CLEAN, POLISH AND PROTECT YOUR FILMS

This Filmagic Silicone Cloth is treated with silicone to apply an invisible but highly lubricated surfacing to your 16mm. and 8mm. films. This makes them more resistant to scratches and blemishes. New prints so treated will run through the projector much more steadily than a "green" untreated print. Polishing both sides of the film channel at the film gate of your projector with this Filmagic Cloth will also give further protection to your films and make for steadier projection of new prints.

for the conditioning and protection of your movie film and color slides!

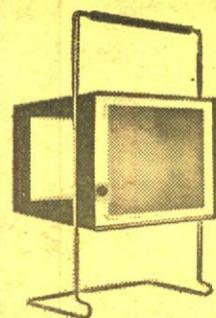

Filmagic SURFASET is a perfect conditioner when used on newly-processed film. The conditioners in SURFASET will make older film flexible, removing "set" and allowing steady projection under most adverse conditions. Filmagic SURFASET gives perfect results when used on magnetic sound tracks (8mm., 16mm. or 35mm.).

A treatment that has a pleasant odor in dispersion, is usable in any climate, under any condition of heat or humidity, and which is proof against mildew, fungus or film embrittlement.

A treatment that provides a buffer against abrasion during handling and projection, resists oil spots or dirt, stores indefinitely without excessive evaporation, and protects the film against loss of inherent moisture and color fade.

A treatment that is easily applied by wiping, spraying or dipping, under local conditions. The chemicals employed are of low toxicity, harmless to normal skin, and easily removed.

**STEAM RAILROAD MOVIES**

Photographed by Fred McLeod

These several railroad films, all photographed in the late 1940's and early 1950's, were shot with an Auricon camera with the sound effects (available in our 16mm. sound version—these 8mm. versions are silent) recorded in synchronization with the scenes. Because Fred McLeod was out to get sound movies, and had to carry both camera and recording equipment for some distances from the highway, the difficulty of getting to the best possible locations from the standpoint of lighting sometimes forced the shooting of scenes from the shady side of the train. This reduces the detail of locomotive side rods in these particular scenes, which may be objectionable to some of you.

**BETWEEN SHOWERS**  
with  
**CHARLIE CHAPLIN**  
**FORD STERLING**  
**CHESTER CONKLIN**

"Between Showers" is one of Chaplin's earliest films, released on February 28, 1914, just two months after he left the touring Karno Company in Kansas City to report for work at Mack Sennett's Keystone Studios in Hollywood.

"Between Showers" is typical of this early period and may well have been worked out on location more or less as the film was shot. It seems that Charlie and Ford Sterling are competing for the privilege of assisting a rather helpless female—Emma Clifton—over an extremely large puddle of water resulting from a heavy shower. There's typical Keystone horseplay in the process, with Chester Conklin, as a cop, on hand to keep things within limits. Background material shows some of the Los Angeles trolleys of the period and quite a scattering of automobiles of the day.

**D. W. Griffith's**  
**THE FEMALE OF**  
**THE SPECIES**  
with **MARY PICKFORD**

Also features Dorothy Bernard, Claire McDowell and Charles West. It had never been Biograph's policy, up until its last few years, to identify the cast, director or photographer of any of its films. Thus, in 1912, the movie-going public knew Mary Pickford only as she was billed by the nickelodeons, as "Blondielocks", "Goldielocks", "The Girl with the Curfs" or "The Biograph Girl". And the public had probably never heard of D. W. Griffith, who directed *The Female of the Species* or G. W. "Billy" Bitzer, who photographed it.

Griffith considered *The Female of the Species* one of the best of his early films. Billed by Biograph as a "psychological tragedy", it must have been beyond the understanding of many of those who saw it at the time. Thus, *The Female of the Species* is typical of Griffith, and a noteworthy addition to any collector's library.

**THE MYSTIC MESSAGE of**  
**the SPOTTED COLLAR**

Chapter One of Thanbouser's famous serial, "Zudora" starring Marguerite Snow, James Cruze and Harry Benham. Zudora was Thanbouser's follow-up serial after *The Million Dollar Mystery* which had been so sensationally successful during the earlier months of 1914. But, Zudora was too strange and mystical for movie audiences of that day and appeared to be headed for failure at the box office. A contributing factor in this lack of acceptance by the public was the casting of James Cruze, who had been the hero of the earlier serial, as the villain in Zudora.

So Thanbouser quickly changed gears, and with episode ten identified it as Zudora in the *Twenty Million Dollar Mystery*, and, thereafter, as simply *The Twenty Million Dollar Mystery*. And, an additional part was written into the story for Cruze, who then appeared as the newspaper reporter-hero as well as the villainous Hassam All.

Blackhawk's conversion to 8mm. and 16mm. covers the major part of chapter one. Print quality in both 8mm. and 16mm. versions is of high calibre.

## NEW 8mm. and 16mm. FILMS of special appeal to COLLECTORS

### **THE TOLL GATE** starring **WILLIAM S. HART**

"The Toll Gate" is one of William S. Hart's films made early in 1920, produced by his own company under his personal supervision, and originally distributed theatrically by Paramount-Artcraft, although reissued later in the 1920's as a Sandee Picture. Many individuals consider "The Toll Gate" to be one of Hart's best films. Certainly its story thread is razor sharp—characterization surprisingly realistic and vivid—and the finished result today is an outstanding offering for collectors.

To quote from the original press book: "William S. Hart is at the . . . . Theatre this week in one of the best pictures of his career. It is called 'The Toll Gate' and is a thrilling and unusually appealing story of the rugged days of the olden West."

"Mr. Hart appears as Black Deering, head of a bandit gang, but an honorable man beneath his rough exterior. Deering is anxious to abandon his life of pillaging, but Jordan, his chief lieutenant, urges him to one more hold-up. It is a frame-up and Deering is captured. But he manages to escape and performs several thrilling and hazardous feats in order to elude the sheriff's posse that is trailing him.

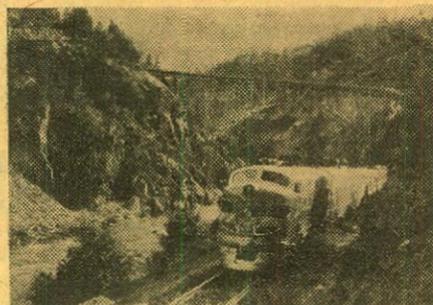

"Eventually Deering reaches safety in a clearing where the cabin of Mary Brown is located. She proves to be the deserted wife of Jordan. Under her influence, Deering resolves to do the right thing and gives himself up to the sheriff.

"Anna Q. Nilsson makes an appealing leading woman. Bill Hart's famous Pinto pony comes in for a good share of the attention and takes a notable part in many of the thrilling scenes."

Blackhawk's version is copied from a 35mm. print in the Gatewood Dunstan Collection in the Library of Congress supplemented by two sequences secured from individual collectors. While it is not absolutely complete, it is substantially so—definitely so in all essentials. There is slight mottling in several scenes as a result of decomposition in the available materials from which this edition was copied.

810-288, 8mm. version, about 850-feet on 5-reels, 3-lbs. .... **\$24.98**

### **THE CALIFORNIA ZEPHYR**

"The California Zephyr" was one of the first films in Blackhawk's Railroad Series when that long run of now famous railroad films started in release. It pictured the run of this famous streamliner from Chicago to San Francisco over the Burlington, Rio Grande and Western Pacific and was released in black and white in both 8mm. silent and 16mm. sound.

Blackhawk is now pleased to announce a new 8mm. color version of "The California Zephyr" on which prints are now available and a revised 8mm. black and white version. This new black and white version contains up-dated scenes and additional factual information over those incorporated in the original edition.

### **RIO GRANDE SOUTHERN** **and the Trestles of Ophir** Photographed by Woodrow Gorman

Our film is edited from original material photographed in the years immediately before World War II, and in 1950, when the shadow of abandonment was closing in on this fabled narrow gauge line. It is a collection of scenes that are typical of the road in its closing days of operation, with vintage motive power and rolling stock mixed with that leased from the Denver and Rio Grande Western. It spectacularly pictures the most fabulous stretch of mountain railroad that ever existed in the United States, which reached its pinnacle in the Ophir Loop and the four breath-taking trestles of Ophir. Available in both color, and black and white. The color version contains most, but not all, of the scenes contained in the black and white edition.

### **BACON GRABBERS** with **LAUREL & HARDY**

"Bacon Grabbers" is one of the Laurel and Hardy comedies produced by Hal Roach during 1929, the last year of the silents. In it Stan and Ollie are process servers in the employ of the Sheriff's Office and their assignment is to retrieve a radio from the home of one Collis P. Kennedy (played by Edgar Kennedy). Of course, Collis P. is no lamb, and the boys have a determined character to work on. In the doing,

locked out of the house, they tackle the second story by means of a readily available ladder, which leads to some typical L & H horseplay. At one point along the line, Ollie, completely frustrated by Stan, exclaims: "That hot Corsican blood of yours gets us into all kinds of trouble!" And they do get into all kinds of trouble—but as much of it is Ollie's fault as Stan's.

**THE OL' GRAY HOSS**  
with  
**HAL ROACH'S**  
**LITTLE RASCALS**

Another of the delightful comedies in the series originally known as "Our Gang". This one went into release through M-G-M in the late fall of 1928.

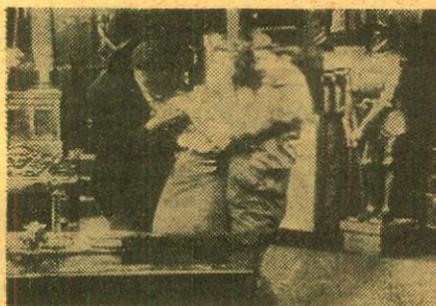

It's the story of old Chief Cummings—retired—penniless—forgotten—and the Gang that idolizes the old man and loves his old gray horse. The Chief's problem is that a new taxicab is moving in on the route he's covered for many years with his horse-drawn hack. But the gang believes in action. They shout: "We'll put the taxi man outta business! We'll eradicate him!"

They get to work on Duke the horse "to renovate him for 'business reasons' ". And then they start to compete. In the end, the taxi driver wants no more of that competition.

The climax of this film is a runaway-like chase through city streets in the Chief's hack with the gang in the driver's seat. It's reminiscent of some of the greatest chases in the old silent comedies and adds immeasurably to the enjoyment of this one. You'll like it!

PRINTS ARE AVAILABLE FOR SHIPMENT ONLY TO POINTS IN THE UNITED STATES INCLUDING ALASKA AND HAWAII

810-305, 8mm. version, about 400-feet on 2 reels, 14-ozs. .... **\$11.98**

**THE HIDDEN VOICE**  
starring **PEARL WHITE, ARNOLD DALY** and **CREIGHTON HALL**

Another thrilling chapter from the original "Exploits of Elaine". Our chapter opens with these intriguing titles: "Craig Kennedy, the scientific detective, experiments on his friend, Jameson, with his new Vocophone, a recently invented loud speaking phone," and "Kennedy decides to install a Vocophone in the home of Elaine Dodge, who he is vowing to run down the mysterious criminal, 'The Clutching Hand'."

Of course, of special interest today, is Kennedy's use of the "Vocophone", nothing more or less than an intercom unit, but in 1914 as fantastic as today's science-fiction. The idea of such a device, and the part it played in the climax of this chapter, was sufficient to build up quite a thread of suspense, and provide a punch-packed climax.

This chapter has more than the usual number of elements of appeal for collectors, and is one that audiences generally will appreciate.

**GERMAN PANZERS**  
**ATTACK WESTWARD**  
**1940**  
EDITED FROM CAPTURED GERMAN ARMY FOOTAGE

This motion picture shows the historic "Panzer" or tank attack across Western Europe. General Heinz Guderian, perhaps the most important individual in the development of Germany's "blitzkrieg" tactics, commanded the German Corps. In seventeen days, the components of this corps swept from western Germany across Luxemburg and southern Belgium into France and then to the English Channel.

Our film shows the entire campaign from the command to attack on May 9, 1940, to the capture of the Channel ports of Calais and Boulogne on the 25th and 26th of May. In less than three weeks, the explosive force of German armor had cut through the French and Belgian defenses, dismembered the defending divisions, and had all but cut off the retreat of the English Army. Germany's Panzer troops had proved that World War I-type static defenses could not resist the armored columns of World War II.

800-4, about 50 feet, 8mm. black & white (2-oz.) \$1.99

## BEAR

Both Brown Bear and Grizzly Bear are shown in this Wild Life Film—the closest you'll ever see them! 820-16, about 50-ft., 8mm. color version (2-oz.) \$3.99

## BIRDS OF THE FOREST

Here are the common forest inhabitants—the Nut Hatch, Clarks Jay, Woodpecker, and Mountain Raven—plus the Blue Grouse, Wild Turkey, Owl, and hard to photograph Golden Eagle. Also, a rare scene of two Trumpeter Swans on their nest in the middle of a beaver dam deep in the heart of the forest.

## ELEPHANTS and RHINOS

Photographed by James R. Simon in Africa's big game country, this short film picturing close-up and action shots of two of the biggest species of animal life on our planet is an interesting one. In sharp 8mm. color, we don't want to mislead you on this one, for there is not much colorful in the appearance of either elephants or rhinos—but color adds a realism not present in a black and white print.

820-4, about 50-ft., 8mm. color version (2-oz.) \$3.99

## GIRAFFES!

Africa's big game country and close-up views of two varieties of giraffes taken by James R. Simon whose work has appeared in many of Disney's True Life Adventures.

## MOTHER BEAR AND CUBS

This film brings you close to the "Madonna of the Wilderness". Sequences of these bear mothers, rarely photographed, actually nursing their babies. Life to them is precious and when hungry, the mother feeds them just like any human mother. Everyone loves to see bears, and especially baby bears.

820-15, about 50-ft., 8mm. color version (2-oz.) \$3.99

## BLACKHAWK'S 8mm. WILD LIFE MOVIES in color!

Blackhawk's 8mm. color prints are clear, sharp and brilliantly colored—not heavy or washed out or fuzzy. Those in our "820" and "825" series are produced by the negative/positive process in brilliant Eastman Color. Those in our "805" and "815" series are printed by the reversal process in the traditional manner on Kodachrome-type color print stock.

We've exhibited some of the 8mm. color prints in our "820" and "825" series to persons who felt they were as sharp and brilliant as the average original 8mm. color film taken in the average 8mm. camera—a tremendous step forward for an 8mm. color print. Others have expressed the opinion that on a modest size screen, for which 8mm. is intended, the picture quality of our "820" and "825" series films compares to that obtainable from a 16mm. print of the quality turned out only a few years ago.

We are now converting, just as rapidly as possible, all of our 8mm. color printing from the old reversal process to the new negative/positive color process. Switch-overs on individual titles are now being made on a month by month basis and, within the months ahead, most of our color subjects will be available in new Eastman Color.

### THE C. & S. CLIMAX SPUR

High in the Colorado Rockies—the highest point of any standard gauge railroad in North America—is the C. & S. Climax Spur over which a lone Consolidation with a bright red snow plow is the only motive power unit. The red provides an outlet to the outside world for the molybdenum mines at Climax via Leadville, on what was once a portion of the fabled C. & S. narrow gauge. Our film shows scenes in a day's operation. Photographed by Mac Owen.

820-2, 8mm, color film, about 50-feet, 2-ozs. .... **\$3.99**

### THE CHALLENGERS AND BIG BOYS OF THE UNION PACIFIC

Selected scenes of the Union Pacific's famous 4-6-4 Challengers and 4-8-4 Big Boys photographed over fifteen to twenty years when these two types of steam locomotives were the real "power" of the U. P. The same scenes, in black and white form, are included in Blackhawk's long film, "Big Boy and His Brothers".

820-26, about 50-feet, 8mm, color (2-ozs.), only .... **\$3.99**

### CLIMB TO CUMBRES

Photographed by Mac Owen. Shows the Rio Grande's narrow gauge line along the Colorado-New Mexico border where it ascends from 7,863-feet at Chama to 10,015-feet at Cumbres, and how a little east-bound freight has to be put over Cumbres Pass in two cuts—little Mikado No. 499 on the head end, No. 488 as a pusher on the rear. A spectacular bit of railroading.

825-5, 8mm, color version, about 100-feet, 11-ozs. .... **\$8.99**

### DONNER PASS

Up into the spectacular Sierras and over what has been one of the toughest stretches of railroading in the United States. We see heavy freights with 4-unit diesels on the head, another 4-unit locomotive cut into the train—just moving up the grade toward Norden, Snowsheds . . . Cape Horn . . . the Overland!

815-4, about 100-feet, 8mm, color (9-ozs.) .... **\$7.99**

### DOUBLE-HEADERS on the BALTIMORE & OHIO

Here is a beautifully photographed short film that does not duplicate anything previously released by Blackhawk in 8mm, black and white form. It shows a number of B. & O. passenger trains, principally on the line between Vincennes, Indiana, and St. Louis, all powered by double-headers of the B. & O.'s graceful breed. Of special interest is the assignment of two Pacifics to take the Diplomat from Vincennes into St. Louis back in the days when only a few diesels were around. Our film shows the diesel being cut off, the Pacifics coupling on, and the train departing for the last leg of its run.

820-11, 8mm, color film, about 50-feet, 2-ozs. .... **\$3.99**

### MUDSONS of the NEW YORK CENTRAL

The striking excerpts from our longer black and white film of the same name that were originally photographed in color. You'll see a range of various varieties of the Central's mudsons from some of the earliest units turned out until some of the last, including one or two with the sleek streamlined sheathing intended for the engines that were regularly assigned to the first streamlined Century.

820-12, 8mm, color film, about 50-feet, 2-ozs. .... **\$3.99**

### THE L. & N.'s 4-8-2's

Effective close-up and action shots of several of the L. & N.'s 4-8-2 Mountain-type locomotives photographed by Mr. Miller over the past 25 years. None of the scenes contained in this color film are included in any of our other subjects—these scenes are all different.

820-27, about 50-feet, 8mm, color (2-ozs.), only .... **\$3.99**

## BLACKHAWK'S 8mm. RAILROAD MOVIES in color!

Blackhawk's 8mm. color prints are clear, sharp and brilliantly colored—not heavy or washed out or fuzzy. Those in our "820" and "825" series are produced by the negative/positive process in brilliant Eastman Color. Those in our "805" and "815" series are printed by the reversal process in the traditional manner on Kodachrome-type color print stock.

We've exhibited some of the 8mm. color prints in our "820" and "825" series to persons who felt they were as sharp and brilliant as the average original 8mm. color film taken in the average 8mm. camera—a tremendous step forward for an 8mm. color print. Others have expressed the opinion that on a modest size screen, for which 8mm. is intended, the picture quality of our "820" and "825" series films compares to that obtainable from a 16mm. print of the quality turned out only a few years ago.

### MIKADOS of the NEW YORK CENTRAL

Photographed—some of it almost 25-years ago—by Gene Miller on the Terre Haute-Evansville line of the New York Central in Indiana, and the Chicago-Cairo line in Illinois, this film shows nine different N. Y. C. Mikados at work. There are some very effective shots including one of some length of the locomotive operating at speed caught from an automobile running along a parallel highway. Drive road detail in this sequence is excellent. None of the scenes in this film are included in any other subject.

820-31, 8mm, color film, about 50-feet, 2-ozs. .... **\$3.99**

### NARROW GAUGE ACROSS the WASTELAND

At Owenyo, Calif., the narrow gauge Keeler Branch connected with the standard gauge of the Southern Pacific, not long before the operation of the Keeler Branch was discontinued, little No. 9 was called on to pinch hit for the diesel. Mac Owen was on hand to catch motion pictures of the day's operation, the highlights of which are included in our color version, while the black and white version is quite comprehensive.

820-13, 8mm, color version, about 50-feet, 2-ozs. .... **\$3.99**

816-242, 8mm, black and white version, about 200-feet, 11-ozs. .... **\$6.98**

### NARROW GAUGE TRAIN TO SILVERTON

"Narrow Gauge Train to Silverton" is a film beautifully photographed by Mac Owen that tells the whole story of "The Silverton", the summer passenger train on the Denver and Rio Grande Western's Durango-Silverton Branch that last summer carried more than 38,000 tourists and rail fans.

Our film shows the train as it passes "Ah Wilderness" ranch—as it takes on water—as it winds through the canyon of the Animas River—and as it pulls into Silverton. There are scenes along the rushing river, inside the train and the final arrival back at Durango.

825-2, 8mm, color print, about 175-feet, 11-ozs. .... **\$19.98**

### ON THE TRAIL of the OLD SAN JUAN

In recent years there has been a special run of a passenger train at least once a season (taking a three-day period) over the Rio Grande narrow gauge from Alamosa to Durango and return, and return. Mac Owen and his camera were on hand to catch the action and we have edited the footage covering the return trip from early morning at Durango to evening at Alamosa on the run made famous by the luxury San Juan express of yesteryear, the narrow gauge passenger with parlor car and diner!

825-6, 8mm, color film, about 150-feet, 11-ozs. .... **\$14.96**

### PENNSYLVANIA STEAM LOCOMOTIVES

This new color film incorporates many of the action locomotive shots that appear in our black and white film, "Ten Wheeler to Duplex". Shown is a spread of Pennsy steam power from the ten-wheelers and Consolidations to the mighty duplexes. Excellent coverage on the Pennsy's famous K-4 Pacifics are included. While this color footage was taken back as far as the late 1930s, the color quality is surprisingly good.

825-8, 8mm, color version, about 100-feet (9-ozs.), only .... **\$8.99**

### RAMBLES on the READING

This "Reading Ramble" starts at Williamsport, Penn., with one of the Reading's beautiful homemade 4-8-4's, No. 2124, on the head end of this rail fan special. The train rolls along beside the Susquehanna River, through Lewisburg and Sunbury. After a brief stop at Shamokin, the train heads, via Reading, for Tamaqua, where the steam locomotive is dropped off and replaced by two diesel-electric hood units. And, No. 2124 then backs from Tamaqua to Reading to call it a day. Very effectively done, with the kind of photographic coverage that rail buffs really appreciate.

825-13, 8mm, color film, about 100-feet, 11-ozs. .... **\$8.99**

### SAN FRANCISCO'S CABLE CARS

Both the Powell and California cable car lines—both from the outside as well as from aboard a car. In addition, we go inside the power house where the cables are propelled, and to the car barns to see how the cars are placed in service.

825-9, about 100-feet, 8mm, color (9-ozs.) .... **\$8.99**

### LOGGING RAILROADS OF THE WEST SOUTHWEST LUMBER and RAYONIER

This 8mm. color film incorporates most of the original scenes dealing with Southwest Lumber Mills of Flagstaff, Arizona, and the Clallam and Grays Harbor operations of Rayonier on the Olympic Peninsula in Washington State that are included in our 2-reel black and white film, "Logging Railroads of the West". You'll see 2-8-0 No. 2 and 2-6-6-2 No. 12 of Southwest Lumber; side-tank Mallet No. 8 of Rayonier's Grays Harbor operation; and 2-6-6-2 No. 38, Mikado-No 90 and saddle-tank Mallet No. 111 of Rayonier's Clallam operation—all in action!

825-4, 8mm, color film, about 100-feet, 11-ozs. .... **\$8.99**

### SOUTHERN PACIFIC—FROM SAN FRANCISCO BAY TO ROSEVILLE

Here is that most interesting section of the Southern Pacific from Oakland—east, north and south—shown in for a close-up look by our camera. Trains come in for a close-up look by our camera. Trains shown are the San Joaquin Daylight, Shasta Daylight, El Dorado, Cascade, Overland, City of San Francisco and the Klamath. Several of the important trains are shown in both the eastbound and westbound sections.

815-9, about 100-feet, 8mm, color (9-ozs.) .... **\$7.99**

### SOUTHERN PACIFIC STEAM LOCOMOTIVES

Here, in the operational area running out east of Oakland, we see some excellent examples of Southern Pacific steam power—the Daylight; two 4-8-4's on the Owl and the San Joaquin Daylight, 0-6-0 switchers, 2-8-0 Consolidations, a cab-in-front articulated on a westbound freight, 4-6-2 Pacific on the El Dorado, and a scattering of other units. All steam.

810-164, about 100-feet, 8mm, B&W (9-ozs.) .... **\$4.49**

### STEAM on the MAGMA ARIZONA

Some highlights in the steam operation of this little Arizona short line the star of which is the beautifully maintained 2-8-0 No. 5. Our film pictures sequences from one day's run of No. 5 and its train from Magma to Superior, Arizona, where it connects with the Southern Pacific, and its change of consist and return to Magma. Some very effective action shots are included. Photographed by Mac Owen.

820-10, 8mm, color film, about 50-feet, 2-ozs. .... **\$3.99**

### STEAM PASSENGER LOCOMOTIVES of the NEW YORK CENTRAL

Here, photographed by Gene Miller as long ago as the 1930's, are action scenes of eleven different New York Central steam passenger locomotives encompassing three famous Central types: Pacific, Hudson and Niagara. Most of the scenes included were photographed in the Chicago area, but a few were taken in the vicinity of St. Louis. None of the scenes in this film are contained in any other subject.

820-30, 8mm, color film, about 50-feet, 2-ozs. .... **\$3.99**

### THE UNION PACIFIC'S 4-8-4's

Here are some of the best scenes of the Union Pacific's famous 4-8-4 steam locomotives that were contained in our black and white two reel film, "Big Boy and His Brothers"—only these are printed in their original color form. No titles but the main end.

820-28, 50-ft., 8mm, color version, 2-ozs. .... **\$3.99**

### WESTERN PACIFIC'S 4-6-0 No. 94

On the fiftieth anniversary of the opening of the Western Pacific, America's last transcontinental railroad, the line made up a special three car train which one of its little original 4-6-0's, No. 94, pulled east out of Oakland to meet the westbound California Zephyr. There No. 94 coupled on ahead of the Zephyr's diesel-electric locomotive and headed up the streamliner's run to its Oakland destination. Mac Owen has captured the action highlights for this 8mm. color film.

820-9, 8mm, color film, about 50-feet, 2-ozs. .... **\$3.99**

### LOGGING RAILROADS OF THE WEST WEST SIDE LUMBER

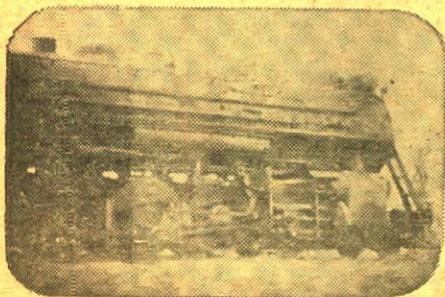

This 8mm. color film incorporates a substantial amount of the original material dealing with West Side Lumber of Tuolumne, Calif., that is included in our 2-reel black and white film, "Logging Railroads of the West". The West Side Lumber operation has, just this past year, transferred from railroad to highway trucks, and the picturesque logging road is no more. But you'll see the narrow gauge and standard power—the Shays and the Heisters—the lines sharp curves and high trestles—its long trains of logs rocking and rolling along through cuts and gashes in the forest—just as they did for so many years in California's High Sierra country. Beautifully photographed by Mac Owen.

825-3, 8mm, color film, about 100-feet, 11-ozs. .... **\$8.99**

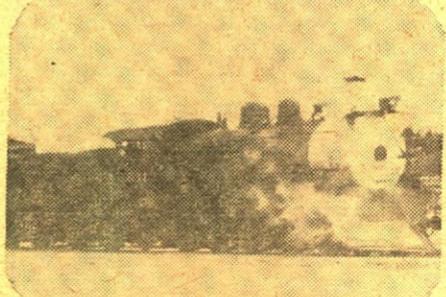

### WINTER RAILROADING IN THE SIERRAS

Here's a spectacular film of snow lighting on the toughest section of railroading in the United States—the Southern Pacific's Overland Route through the High Sierras. This film was largely photographed in the winter of 1951-1952, when snowfall set a record. You'll see the fight against snow when at least 50% of the power on the line was steam! And, you'll see the snowbound City of San Francisco being freed from the drifted snow that held it fast for several days! (These same scenes are included as a part of our black and white release, 810-214, "Winter Railroading on the S. P.'s Overland Route.")

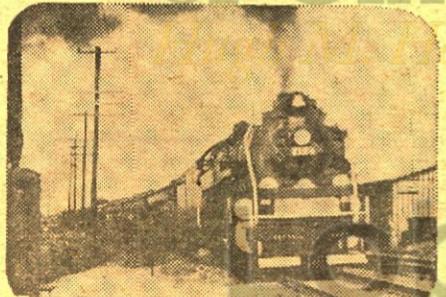

825-20, 8mm, color film, about 100-feet, 11-ozs. .... **\$8.99**

**AN EXTENSIVE LIST OF USED**  
**8mm. PRINTS AVAILABLE BY TITLE**

Shipping weights: 1 reel, 11-ozs., 2 reels, 1-lb., each additional reel, one-half pound

Blackhawk's volume of trade-in used 8mm. prints has now reached the point where we wish to experiment with the sale of this class of material on a title basis (just as we do used 16mm. prints) for all lengths of standard complete subjects. Thus, instead of selling this material in "Grab Bags" or "Packages" in a general subject area, without any selection of title, we're now making these films available on a title basis covering all subjects of a complete reel (100' to 200') and up.

Keep in mind, however, that while this gives you the advantage of selection, it also holds some greater possibility of disappointment, for Blackhawk has no control over when, or in what quantity, used prints of individual titles will be traded-in against other subjects, either used or new (see trade-in information at bottom of page). So, while at press time we have from one to eight good used prints of every title listed here, some of these will be sold out before some orders reach us. Thus, we recommend that, whenever you can, you give us alternate titles from this list for shipment in case your first choices have already been sold. But, so long as your first choices are on hand, we'll never ship you alternate selections.

# A FINE GROUP OF USED 16mm. SOUND INSTRUCTIONAL FILMS

From leading producers such as Encyclopaedia Britannica, Coronet, Young America and Simmel-Meservey—at savings of up to 80% from current new prices. As an example, most new films of 350 to 400-feet released by Encyclopaedia Britannica and Coronet today sell at between \$55.00 and \$60.00 for new black and white prints—double this for prints in color. But at Blackhawk these prints in black and white—all in good used condition—may be purchased at \$19.95, \$14.95 and \$9.95.

While all schools and educational institutions are fully informed as to the content of all of these films, and have full catalog descriptions readily available, if you're an individual not having this information, and possibly interested in purchasing a certain title, we'll be glad to provide descriptive information for you. *Of course, the best way to do is to order the subject and see for yourself its contents and condition—for Blackhawk's guarantee gives you ten days after you receive it to make up your mind.* If you don't wish to keep it, you may return it during that period in the condition in which it was received by you, and we'll apply your credit on another purchase, give you a credit memo which you may use later, or refund your remittance.

Shipping weights: Film up to 400-feet, one pound; 401 to 600-feet, two pounds; 601 to 800-feet, three pounds; 801 to 1200-feet, four pounds.

**BEAU HUNKS**

One of the few Laurel and Hardy films of feature length, produced in 1931 by Hal Roach. A lively and amusing production in a very different setting.

Ollie is in seventh heaven—he's going to be married to Jean, the loveliest girl in the world. But alas, a special delivery letter arrives the moment after Ollie has broken the news to Stan. Jean has broken the engagement.

Dejected, Ollie suggests that they join the Foreign Legion to get away from it all. They're soon sent across the baking desert to an outpost that has been repeatedly harassed by the Riffs. They no sooner arrive as part of a company of reinforcements, than the Riffs attack in force, and the defenders of the fort are picked off one by one. The commander, naturally, feels that Stan and Ollie are somewhat worse than nothing. But who saves the day? In messing around, the boys get involved with a barrel of tacks. And would you believe it? Those bare-footed Riffs are demoralized and the day is saved!

in  
**A CHUMP AT OXFORD**

Our boys are street sweepers. They wind up the mornings circuit one noon in front of the Finlayson National Bank and move over to the curb at the employees' entrance to enjoy their lunch. Stan tosses a banana peel onto the pavement. And that banana peel was thus the secret of their success, for at that very moment the bank was being robbed. What exit did the robber use? Right! And he slipped on the banana peel almost into the arms of Stan and Ollie who get all the credit for his capture, and the gratitude of the bank president as well, who offers them practically anything they might want as a reward. The boys indicate that they're short on education and they're promised the finest that money can buy. As a result, they end up at Oxford, wearing Eton jackets. Somewhere along the line it would appear that a little something is missing—like education—and the boys at Oxford figure that they're going to have a great day with a couple of chumps like the two that just turned up. ....

While "A Chump At Oxford" is actually one of the later Laurel and Hardy films, this version is tightly edited and contains a sequence or two in original material that are as funny as anything the team ever did. You'll be glad we were able to make this 8mm. version available.

All standard used 16mm. sound projectors listed here are delivered with 750-watt projection lamps, although certain of these models will operate satisfactorily with 1000-watt lamps. Power cords and speaker cables are also included. However, if empty film take-up reels are needed, these must be ordered separately as they are not included with the used projectors.

Projector prices are exclusive of transportation and projectors, because of weight, are not mailable. Railway Express is usually the most satisfactory method of shipment, but we'll be glad to ship by freight—either rail or truck—if you request. A \$25.00 deposit is required on C.O.D. shipments of projectors to guarantee transportation charges.

## BLACKHAWK WILL BUY USED 16mm. SOUND PROJECTORS

Yes, Blackhawk is always in the market for used 16mm. sound projectors—one or a hundred. Units must be complete and in operating condition, but need not be completely repaired or overhauled as we do this in our own shop. But, projectors shipped to us must be in condition to project and picture and reproduce sound. We do not buy models on which it is no longer possible to obtain repair parts. Write us what you have stating make and model. We'll immediately send our offer!

## SPEED-UP IN ORDER HANDLING!

Of interest to all of you will be the improvement Blackhawk has been making in order handling since the first of the year—not that our old standard was so bad, but that shipments today are clearing out on almost clock-like precision.

On Mondays, 80%-plus of the orders received that day will be in the mail that afternoon with the balance going on Tuesday. Normally Tuesday's orders are shipped the same day. On Wednesdays, our short day, half of the orders received that morning will be mailed by noon, the balance on Thursday. Thursdays orders will usually all be in the mail by that evening, and on Friday, normally, all orders received that day will be shipped by that evening.

There is, of course, always the hazard that on some item of unexpected popularity, we may have misjudged our stock requirements, and may thus be out of stock for a few days. But this, too, is becoming less and less frequent, and orders generally are zipping out to you not later than the next business day after your order was received—and most of the time on the same day.

## MISS UNIVERSE OF 1963

Depending on the day late in July or early in August when this Blackhawk Bulletin is delivered to you, back at Davenport our production department will have been concentrating on the editing of the 35mm. 2"x2" color slide originals that will have been photographed of all the aspects of the Miss Universe Pageant in Miami Beach, with the final assortment of sets either resolved or soon to be. As the Miss Universe Pageant for 1963 wound up just as this issue of the Bulletin was scheduled to go into the mail, it was not possible to give specifics of the new sets and their prices in this issue—all of that will be covered in Bulletin No. 138 out at the end of August.

However, for those of you desiring advance information about this year's Miss Universe sets, we'll have it for you almost immediately and will mail it to you on receipt of the coupon below. Just fill in and mail this coupon to us, and full descriptive literature will be sent to you almost at once.

## COMING ATTRACTION SLIDES

Over the years, Blackhawk has made available various assortments of authentic coming attraction slides from the silent days in 35mm. 2"x2" color slide sets. These have had mild popularity, but not anything like success of our intermission slides. But, a year or so ago, in the issuance of 8mm. color films picturing actual animated sequences of some two dozen intermission slides, we found we had just what collectors—and other 8mm. fans—wanted to add zip to their 8mm. programs. What we're now about to do is to adapt this same animated principle to the issuance in 8mm. color of one or more 50-ft. films picturing an assortment of great feature pictures—and possibly serials—from the silent days. We do not have the arrangement of these down to final form yet, and we may well end up with a 50-ft. film devoted solely to features of 1917, another film to those of 1918, etc., etc., with an entirely separate film picturing the serial material. We're hoping to have this project sufficiently far along to be able to announce some of the initial subjects by September.

To:

It is said that D. W. Griffith made *Intolerance* because of the storm of controversy that had swirled around *The Birth of a Nation*, and that it was possible because of his share of profits in that first monumental film. But while *The Birth of a Nation* was made for a few tens of thousands of dollars, *Intolerance* cost almost a million, and Griffith ended up by buying out his unhappy financial associates.

*Intolerance* was a commercial failure, perhaps because it went into release only months before America entered World War I, and the country was preoccupied with the war in Europe and in no mood to seriously consider the philosophical and historical aspects of intolerance—or perhaps because it just did not get through to a large enough segment of the public. Yet, *Intolerance* was an artistic success and has, perhaps, grown in stature with the years. Certainly, when all of the films of Griffith are considered, *The Birth of a Nation* and *Intolerance* stand at the top.

During the years since *Intolerance* faded from theatre screens, it has been available only for restricted use on rental from The Museum of Modern Art in New York. *The Birth of a Nation*, however, has continued in distribution to both theatres and in the non-theatrical field. Because *Intolerance* has been less in evidence in recent years, our release of the subject in 8mm. for home and non-theatrical use has created an uncommon amount of attention and interest, and we are pleased to make this announcement of its availability.

## "INTOLERANCE" TO BE RELEASED ABOUT AUG. 15, 1963
