And, of course, that's when things start to happen. Here's a great subject for almost any entertainment purpose!

**TWO GREAT SPORTS FILMS**

by Van Campen Heilner

You've seen Van Campen Heilners work in sport and ad-

CinemaScope and Warner Color in his great series of War-  
ner Brother shorts in the sport and adventure line.  
The two subjects by Mr. Heilner that we offer here are  
neither in CinemaScope or Warner Color—just regular  
screen size and just regular black and white—but very,  
very satisfactory films to Mr. Heilner's usual high standard.

prints are priced at only . . . . . **\$14.95**

Heilner's fine style. Length about 500 feet, 16mm. sound,  
black and white. Excellent used prints are available, priced

Good used 16mm. sound prints, about 500  
feet in length.

Here's a most unusual film in the Armchair Adventure  
Series telling of a river in southern France that disappeared  
into the earth, and into whose caverns a daring group  
finally made its way. They found that the river travelled  
for miles under the ground, and while even yet its entire  
underground course is not charted, by means of fluorescent  
dies they ultimately found where it again came above  
ground and thus revealed that what had been thought to  
be two rivers was in reality but one. Excellent under-  
ground scenes.

collection.

**THE HALF-BILLION  
DOLLAR MOSQUITO**

in the series: "The World Through  
Postage Stamps"

Length about 500 feet, 16mm. sound

How many of you, in addition to being movie fans, are  
also stamp collectors? Whether you're one or both, this is  
a most unusual subject. It takes the whole story of the  
Panama Canal, from the time of its attempted construction  
by the French, and shows how postage stamps have played  
a part—both in the planning of its construction and on  
the chronicling of its history. The film also shows many  
actual construction scenes, shows us how the canal and  
locks operate, through animated diagrams gives us an idea  
of the lift necessary to get a ship across the Isthmus.  
In short, it a most unusual subject—fine for any audience—  
and adaptable for either entertainment or education. It is  
effectively narrated by Bob Trout.

Excellent used prints of THE HALF-BILLION  
DOLLAR MOSQUITO, about 500 feet in 16mm.  
sound, are available for only . . . . . **\$18.88**

### 400-foot reel good used 16mm. SOUND FILM

Here's one of the "mostest" for the "leastest" we've ever offered. Good used 400-foot reels filled with a full 400-feet of good used 16mm. sound film. This 400-foot length isn't an uninterrupted strip from the same film—but it isn't made up of a big batch of short lengths spliced together. Actually, these 400-foot lengths are portions of feature pictures and short subjects saved from complete films—a part of which had been damaged. The damaged sections have been removed—the good footage remains. Quite occasionally you'll get the entire length from a single subject—more often the footage on the reel will be two to four lengths from as many different films.

But it's all good used sound film, and a real bargain at Blackhawk's price. Each 400-foot length, our "Item No. One"—only ..... **\$2.77**

Length about 500 feet, 16mm. sound

Here's an interesting film in the "American Portrait" series, the unusual story of Paul Hoyt—sculptor, photographer, artist! Hoyt, as a means toward gathering experience in sculpturing, devised a method of working with blocks of ice at below freezing temperatures and thus gained for himself in a few seasons what would have taken him fifteen or twenty years to do by traditional means. ### LAUREL & HARDY in

#### TWO ON A TEAR

Length approximately 550-feet, 8mm.,  
on four 200-foot reels.

Price, complete, only..... **\$12.98**

We've had many requests for feature length pictures in 8mm.—and this is our first offering. It's a side-splitting Laurel and Hardy comedy edited from their talking feature, **BLACKHEADS**. It's the story of Private Laurel, so dumb he didn't know when to come out of the trenches—Laurel, found twenty years later when he tried to pick off with machine gun fire a low-flying French plane. Back in the states, his old buddy, Oliver Hardy sees his picture in the paper, and goes around to see him at the Soldier's Home. For his own good, Ollie shouldn't have done it—for the association wrecks his car, ruins his garage and breaks up his home. But for the audience, it's one big laugh after another.

## Blackhawk's PACKAGE OF 13

GOOD USED, 100-FOOT REVERSE-IMAGE "SOUNDIES" MUSICALS

There are three different packages available—LUCKY 13, INDIAN SUMMER and BAKER'S DOZEN—each containing 13 different, good used 100-foot "Soundies" musicals—and none of the three overlapping with either of the other two packages. The titles making up each of these packages are largely ones on which we have but a few prints left, and quite a number in each package are from the top popularity groups normally selling at \$1.29 and 99c a print. If you purchased the thirteen films making up any one of these three packages individually, you'd pay somewhere between \$10.00 and \$15.00 for the films. But by buying them in this package form, you get thirteen of our selection for only \$6.89.

## ON THE TRACK

700' 16mm. sound, in full color Kodachrome. Prints are used but in excellent general condition.

This is a Dudley Pictures Corporation production showing a cross section of railroad activity in the United States. You'll see streamliners and freights of most of the nation's railroads—action shots against a background of mountain and prairie—over bridges—along the main! It's filled with just what every railroad enthusiast enjoys most.

Last year's price was \$24.98. Buy now, while our limited stock lasts, for only **\$19.98**

## MUSIC IN THE WIND

Excellent used 16mm. sound prints, about 300 feet in length

The building of an organ at the famous workshops of Casavant Freres, St. Hyacinthe, Quebec. The development of the organ is traced from the pipes of the ancients and the early foot pump instruments. The making of the various parts of the organ is shown—the metal tubes, the keys, the woodwork—and their final assembly. The film concludes with the playing of Bach's Toccata and Fugue in D. Minor. Cost new, \$30.00. Blackhawk's real money-saving price. . .

Back again is Blackhawk's stock of this favorite railroad film made by Dudley Pictures Corporation of Beverly Hills. This time we have the black and white version of the production—prints withdrawn from television distribution. The film tells the operational story of today's railroads—the various kinds of cars, workings of the railroad post office car, how a dining car operates, the many types of accommodations available for overnight travel—and much about the various types of cars required for the movement of freight. Only a relatively few prints available—all in good used condition. 16mm. sound, black and white, about 900-feet in length, only.....

## "SOUNDIES" MUSICALS

YOU MAY PURCHASE ANY OF THE TITLES LISTED IN THE FOLLOWING GROUP AT

EACH: **\$1.29** ANY SIX FOR ONLY: **\$7.49**

These films, identified as 100' R-1 Sound Musical Films, are used prints of productions made originally for exhibition on Panoram coin-operated machines. Such companies as R.C.M. (Roosevelt, Coslow, Mills), Minoco, Cameo, Screencraft and Globe were listed among the producers. These Panoram projectors, projecting from the rear onto ground glass screens, required the photographic image reversed. Yet, these prints show quite acceptably on any regular 16mm. sound projector and the only point where the reversal is usually noted is on the main and end titles, which you may eliminate at the time you assemble your library. Over the last five years we have sold many tens of thousands of prints of these 100' films, and hundreds of customers reorder regularly.

The 100' R-1 Sound Musical Films priced at \$1.29 are, to a good extent, on reels and packed in individual cartons. This is true of some of those priced at 99c each. However, the balance of the subjects are not on reels, but in individual rolls. All are complete and in generally good used condition.

The films in this group should be order by number and title. Good stocks are on hand of most of the subjects—but our stock is naturally more and more subject to depletion. We recommend, therefore, that you always give alternate choices. We'll never substitute unless your first choices are already out of stock.

These prints are licensed for home and non-theatrical use only, and may be used commercially on coin-operated machines. They may not be televised.

## • USED 16mm. SOUND FILMS •

For the last four years this Blackhawk list of used 16mm. sound prints has been pounced on by collectors faster than you can say: "Send me that one!" We used to disappoint many more persons than ever got the prints they ordered. However, in the past year, a controlled system of listing has upped tremendously our ability to supply what is listed, and your chances of getting what you order in used prints is reasonably good — if you order soon after the list reaches you. However, please remember that we usually have only a few of a title — sometimes only one! This means that two or three weeks after our mailing of this catalog, more and more of these titles will have been sold. Keep this in mind when you order. Order early, and, in justice to yourself, give us as many alternate titles as you can. We never send an alternate unless your top choices are out of stock — and we do not substitute!

The approximate footage of each film is listed in parenthesis immediately after the title. Remember, this is approximate only. And remember, too, that footage indicators embossed on reel spokes are not completely accurate. Different makes show variations of 25' to 50' in the same print, sometimes even more in the case of 1600' capacity reels. Subjects of 50' and 100' lengths are normally delivered on 100' reels, but some trailers are delivered off reels. Films over 100' in length, but not longer than 400', are usually on 400' capacity reels. Films from 400' to 800' normally come on 800' capacity reels — but sometimes those running 400' to 600' will be shipped on a 600' reel. Subjects of 800' to 1600' usually are on 1600' reels, while all feature pictures are assembled on two 1600' reels, with the longest features on three 1600' reels.

All prints listed here are 16mm. sound, black and white, unless they are specifically shown as being in color.

## AFTER INVENTORY CLEARANCE OF USED 16mm. SOUND FEATURES

After our Sept. 30 inventory we found that on several dozen good features we had too many prints of a title on hand, and that a few of the titles were building up in inventory at a rate that considerably exceeded our rate of sale. So, to take care of this, we've cut the price—as you can see for yourself—and you thus have the chance to save even more by buying while this present stock of prints is on hand. All copies are complete and in good used condition.
