It seems if a doctor orders a dose of 100 mg/ml per week this would mean .5 ml injection of T-C 200 mg/ml. OR 1 ml injection of T-Cyp made 100 mg/ml. So the question remains is the common dose dr's and guys are referring to, of 1 ml of T-C, T-Cyp 100 mg/ml ;Which would be a dose of T-Cyp 100 mg/ml.

1-testosterone (dihydroboldenone), or DHB for short, is an anabolic steroid that has some unique properties of interest to bodybuilders. Interestingly, in spite of the fact that the name can be confusing, in no way is DHB testosterone. In fact, it is simply the 5alpha reduced form of Equipoise (boldenone), which acts in a completely different way.

I was wondering when and how many dosage you take to get your Testosterone levels back to Normal. The doctor told me as long as I am taking pain medications my levels will stay low. However, he gave me 2 injections. 1st It was 1 ml @ 200 & then another injection the same. The total is 400 mg. So I didn't know if you take every 2 weeks or a month [check out the post right here](#)
