We would like to show you a description here but the site won't allow us. Growth hormone peptide fragment 176-191, or HGH Frag 176-191, is made from amino acids 177-191 of human growth hormone with an additional tyrosine amino acid. Although growth hormone is well known for accelerating growth, a role for the protein in breakdown fat was first documented in 1959 [1].
