Future Factory - the future, delivered today

Future Factory is Asia's global award-winning think tank, helping companies create business impact through innovation and design. We create remarkable products, services, and experiences. Creating stakeholder value in a time of change. We are a full-service studio offering four services: Design Research & Strategy, Industrial Design, Digital Design and Innovation & Technology.

Our Design practice delivers remarkable designs, through a 3 pronged that spans end to end.

- User research giving direction on what to make next
- Conceptualizing designing remarkable platforms, products, and experiences
- Delivering designs, all the way past development to scale

Over the past two decades, our work has won some of the most globally coveted awards. We have been awarded over 15 patents and are at the forefront of design, as many as 9 global design awards in 2018, including the prestigious Red Dot Design Award.
