Primo 100 - is an anabolic steroid with low androgenic and moderate anabolic activity. One may buy Primobolan in tablets or in vials/amps, it is worth noting that the injectable version of the drug has a minimum load on the liver. Primobolan 100 is most often used in the drying cycle, to draw the body relief. 400 mg per week is recommended for beginners. Advanced users can take it as high as 1000 mg per week. Bodybuilders usually stack Primo with other steroids such as Testosterone or Sustanon. Keep the cycle between 8 to 10 weeks. Watch out for side effects such as hair loss and aggression. In severe cases, Primo can cause liver intoxication as well.
