Buy OXANDROLONOS / Anavar - Pharmacom Labs in steroids shop UK - Next day delivery. Anavar is an oral steroid that is more commonly known as Oxandrolone. It has an active half-life of just ten hours, which means it should be taken twice a day. The most common dosage is 75 mg per day for men and 10 mg per day among women. Gli steroidi AAS possono anche influire negativamente sulla pressione sanguigna e sui trigliceridi, ridurre il rilassamento endoteliale e sostenere l'ipertrofia

ventricolare sinistra, aumentando il rischio di malattie cardiovascolari e infarto del miocardio.

Buy Anavar 10 Mg Tablets (Oxandrolone) Once in the blood Anavar becomes active very quickly, as is common with most oral steroids, especially those of a DHT nature. Further, this rapid activity time is largely due to its very short half-life which is approximately 9 hours.
