Description. Buy Sustanon UK. Sustanon® 250 is an oil-based injectable testosterone blend that contains four different testosterone esters: testosterone propionate (30 mg); testosterone phenylpropionate (60 mg); testosterone isocaproate (60 mg); and testosterone decanoate (100 mg). Sustanon® is designed to provide a fast yet extended release of testosterone, usually requiring injections once. Starting from the 2nd to the 6th week, 500 mg of Sustanon and 300 mg of Deca should be administered for seven days. From the 7th to the 9th week, the recommended doses of Deca and Sust will be 100 and 250 mg for 7 days, respectively. From week 10 until the end of the course, use Primobolan and Winstrol 100 mg per week.

Description. Buy testosterone enanthate UK. Testosterone enanthate is a slow-acting injectable form of the androgen testosterone. Following deep intramuscular injection, the drug is designed to provide a sustained release of testosterone into the bloodstream for approximately 2 to 3 weeks.

## **Boldenone Undecylenate**

Testosterone Enanthate 250. Rated 5.00 out of 5 based on 2 customer ratings. £ 30.00. Testosterone enanthate 200mg/ml. Testosterone propionate is medium-chain ester of testosterone. Used by various athletes in many different competitions, probably most well-known for its stability, "mild" onset, action and convenient injection frequency. [visit here](#)
