Description. Sermorelin 2mg. Sermorelin Acetate, also known as GRF 129 is a Growth Hormone Releasing Hormone (GHRH) produced by the brain that stimulates the production and release of Growth Hormone (GH). Sermorelin Acetate was first developed in the 70s, which is thought to be the shortest fully functional fragment of GHRH and has been used as a test for Growth Hormone secretion. It is often used. Sermorelin acetate is the name of a substance that stimulates the pituitary gland in the brain, which normally secretes somatropin or human growth hormone. So instead of injecting somatropin itself, sermorelin is used to tell the pituitary to produce more somatropin. This method more precisely mimics the pituitary gland's natural function.

The Sermorelin 5MG for sale here are intended for laboratory and research use only, unless otherwise explicitly stated. They are not intended for human ingestion or for use in products that may be ingested. Availability: In stock. \$38.99. Buy 5 for \$35.09 each and save 11%. Buy 10 for \$33.14 each and save 16%.
