

## Welcome to Ground Work

Dear J.P.,

Greetings! We are often asked, "Why should I consider Biological Farming in my operation?" We believe there are many reasons to farm biologically - here's our "Top Ten".

### Top Ten Reasons to Transition to Biological Farming in 2011

1. Reduce nitrogen expense
2. Reduce phosphate expense
3. Build organic matter in soils and improve long term health of the soil
4. Improve soil tilth and plant in a better seedbed
5. Less fuel cost per acre in tillage because of better soil structure
6. Reduce erosion and improve water infiltration due to better soil tilth and structure
7. Less yield variability as enlivened soils better buffer against stress
8. Lower corn drying costs as plant health improves
9. Higher quality of crops produced
10. Better bottom line
