Samen: The advantages of automatic cannabis seeds Grown outside, automatic seeds can produce two or more crops in the course of a normal summer. Under lights, 'autos' can go from seedling to fully mature plant in as little as 10 weeks.

Had the honor to start doing some of my own plant processing with @dankman\_ dan this past month.

Not only is Dan the man, but he is also gaining immense knowledge and skill in the cold room. [my explanation](#)

White Widow Auto is an autoflowering version of the famed White Widow strain, a pungent cannabis variety containing Brazilian and South Indian genetics. The White Widow auto fem seeds sold by ILGM are the most popular autoflowering seeds they sell. The plants reach a medium height and produce stinky indica-dominant buds covered in white crystals. As the industry develops, value-added products are gaining popularity. While a majority of cannabis consumers smoke flower, the proportion of users that only consumes flower is rapidly shrinking. From 2018 to 2021 consumers that only consume flower dropped -14%. ?? When it comes time for Autos, Seedsman knows them well, in fact we were the world's first seed bank to sell autoflowering strains. Now through 28th June, we're offering 3 for the price of 2 packs on top selling brands including Seedsman, Barney's Farm, FastBuds, Dutch Passion and many more. Just look for the "3 for 2" icon for all products on offer.

Hola amigos! Les comparto 2 de las diferentes formas que existen para germinar una semilla. Si tienes cocos del toston, ?echalos y que pegue el que tenga que pegar! Set to become a prominent and popular pot strain, AK-420 Automatic from Zamnesia Seeds is not one to be overlooked. Packing a considerable amount of firepower, this feminized hybrid is capable of surprising even the most seasoned of smokers.

A delicate mix of AK-420 and Ruderalis she gets to work quickly and abundantly - ready for harvest in just 9 weeks. #420nails #weednails #nailinspo #nails #nailsofinstagram #cannabis #weed
