In 1971, the group received a tip and treasure map explaining that U.S. Coast Guardsman were growing a patch of weed and had to abandon it and it was ready for harvest. Tangie Auto seeds can provide you with just as high THC levels as the original in a shorter amount of time. Auto strains begin flowering after a few weeks compared to traditional photoperiod strains that require a certain amount of light to start the process. Tangie thrives in outdoor and soil-based environments. #growers #cannabis
