I had success with saizen. We did 3 rounds of ivf with no success. For the 4th round I did 1 week of a high dose of saizen. I got pregnant with my son who is now 17 mo old. We had left over embryos so we just did another transfer. The saizen increases the egg quality. I did have side effects, extreme swelling. But it did go away. #dridarolf125 #dridarolf #idarolf #rolfing #rolfer #fascia #structuralintegration #bodywork #health #wellbeing #wellness #Physiotherapy #Osteopathy #MyoFascialRelease #Therapy #Muscle #Medicine #Triggerpoint #Treatment #Rolfing #Chiropractic #PhysicalTherapy #Rehab #Sportsmedicine #Yoga #Sportstherapy #Massage #Fascia

Saizen® [somatropin (rDNA origin) for injection] is a prescription medicine indicated for the treatment of growth hormone deficiency (GHD) to replace growth hormone in adults because of either a deficiency that started as a child or started as an adult due to pituitary disease, hypothalamic disease, surgery, radiation therapy, or trauma. Saizen Growth Hormone Helps Infertility Adequate growth hormone levels are critical for good ovarian follicle development, and growth hormone levels are known to decline significantly with age.

I used to get very sore if I didn't stretch after so I definitely recommend!! At the end of my workout I also do hip and ankle mobility stretches but I will talk about the stretches more specifically in a different post!! I hope you guys have a great day! [get redirected here](#)

Second cycle was almost identical in terms of protocol. 7 eggs retrieved, 4 mature 3 fertilized and 2 blasts. 3rd cycle we added Saizen 5mg mixed with 1.5 ml of sterile solution and only use 1 ml of that solution every other day (1.5 dose from 5mg of saizen) + menopur 225 from D2.

Longer stim than prior cycles. 9-10 eggs retrieved, 8/9 mature, 7/8 ICSI fertilized, 4 5-day blasts, all PGS abnormal. IVF 4: same protocol as IVF 3. 10 eggs retrieved, all mature, all ICSI fertilized, 5 5-day blasts, 2 PGS normal (!), FET to follow. All this info to say I'm not sure HGH made a difference.

SAIZEN (somatropin) is indicated for the treatment of pediatric patients with growth failure due to inadequate secretion of endogenous growth hormone. #workout #fitnessmotivation #motivation #fit #bodybuilding #followme #training #health #lifestyle #instagood #fitfam #healthylifestyle #zoomsession #homeworkout #Weightloss #love #dailyexercise #fitness #unitedstates #fitnesslover #fitnessmodels #fitnessjourney I am a saizen believer. Single with secondary infertility, AMA, DOR, RPL. TTC started with four failed IUI's. IVF #1: converted to another IUI after 2 of 10 follies went rogue during stims --> BFN. IVF #2: 6 eggs retrieved, 5 fertilized with ICSI --> 3dt of 4 high grade embryos with AH --> BFN.
