PHARMA TEST E 300 (Testosterone Enanthate) is one of the best mass building anabolics known to man and is highly recommended as the base of any mass building cycle. Proviron is a derivative of dihydrotestosterone. In clinical practice it is used to treat sexual dysfunction of various kinds, which are most often caused by a low level of endogenous testosterone. It can enhance potency and sexual interest and, in some cases, increase the sperm count.  
- Zinc deficiency is readily treatable and important to consider since it may mimic treatment-refractory atopic dermatitis, impetigo, and other eczematous skin diseases.  
I've been absent from this account for a bit as: Just over a month ago I got married, I got AND quickly recovered from Covid, then my wife and I moved into our apartment. It's been an adjustment, but life's pretty good, and God's been good to us.
