You can buy Follistatin 344-1mg at only \$175.00 from Peptide Science. [Click Here](#). All of this company's products are high purity, US manufactured, and of the highest quality. They are the number one supplier of follistatin 344 to buy USA and other peptides. Plus, worldwide shipping is available. Follistatin 344 Peptide Vial Pre Mixed 1mg. Follistatin 344 peptide is a compound that is useful in combating hair loss due to the development of DHT. The peptide is considered to act as an inhibitor for the hormone DHT and acts as an inhibitor in the body of the enzyme five alpha-reductase. This means that it will make way for the production.

Follistatin is a single-chain gonadal protein that specifically inhibits follicle-stimulating hormone release. The single FST gene encodes two isoforms, FST317 and FST344 containing 317 and 344 amino acids respectively, resulting from alternative splicing of the precursor mRNA. Follistatin binds directly to activin and functions as an activin inhibitor.

Follistatin 315. \$93.15. 1 mg Vial. Follistatin 315 is a compound made of sugar molecules and protein. Follistatin 315 is mainly produced in the liver, but it's also found in many body tissues. Here are some clinical trials that show the benefits of follistatin 315. [visite site](#)
