The HMH Foundation Moving Image Archive

Harm brings no more justice
than heat brings cold.
Hence to injure the sinner
as we do in our penal systems
is wrong & can only seem wise
in the light of this punishing
preventing any further acts of
sin. But if an ounce of
prevention is better than a
pound of cure great savings
in both wealth & misdoings
would be made if we attacked
the problem of misdeeds at its
source instead of at its end.
Misdeeds are done for want
of happiness - either the
want itself should be made
non-existent through plentifulness
or if the want &

acquisition are healthy
drives then the desirous one
should be schooled in the
healthy, char, honest + in the
easiest way of its whole acquisition

Chocolate Girl

You ain't never ^{gon} to find
a little chocolate girl like a

They in

cause he man, he
but ~~hes~~ for another fiesta
That just aint they ^{no} made

There ^{you} ~~she~~ got the wiggles
the giggle of

She's got style the smile

She's just my chocolate girl

Eyes like the night
with of pearly white

Time similar
to that of
old man River

will be

Ballad of the slaves

When it's work & its toil
& its sweat broil

You heave + sigh

you lunge + cry

with a blast that the lord

that will shake the masters

awake the bastards

till they see ~~us~~ that a

man must be free

in the sun

drunk in Gods air

Run + have fun

+ make love to the power

For a man will toil

he'll sweat + he'll broil

(with a laugh + smile)

mill to after mile

to make him + his loved ones
freelll!

They are going to have one year of military conscription after the war. If run properly can be good if not so good. - after 10-15 years when peace is more of a surety I believe a program of right living & good manual labor similar to William James' idea would be excellent. Lots of public works created & better more valued male specimens would result -

How about a story of about a child who is the product of the union of physically & mentally - (in love) - perfectly brought up. - Have him meet

what he could have been.

little rivers flow quicker - little states cultures flourish faster?

Intuition - expression - the part of artist - then if you think it is beautiful - it is because the material expression has succeeded in diving to the depths of your intuition.

U.S. Cinematic Arts
The HMMH Foundation Moving Image Archive

Socialism crushes individuality - balcony - only if a man knows he is secure can he soar like a lark on any fancy & become more the animated individual - He need not conform to social traditions of dress & action because it is no longer a matter of ^{life} salary & livelihood.

One must travel & study the growth
of the Earth

Greater temporary happiness is
achieved if one studies & reads of
ideas & news that concern
with one's own & builds a ~~copy~~ palace
away from all opposition - but if
action if a true end is to be truly
achieved it is better to be truly
~~and~~ unhappy to move deeper &
ferret out the core of all opposing
beliefs - they are there they should
be faced - & whether the result
be reinforcement, conversion, or
synthesis - the happiness in the
end will be serene ~~and~~ because
of the knowledge of a complete
grasp & true action will be

James D
5/2/1915

more effectively realized.

Sociology is the last, & most
human of the sciences. When
we learn to apply the same
intelligence, scrutiny, & intolerance
that we apply to the natural
(Physical) occurrences - the
we shall come to build a
more ~~and~~ happier society &
civilization on earth - it will
come in time you must
help it, Education, Politics
Law, Justice, Art,
International development,
peace - must be studied
hypothesis reached - experimen-
tion - true conclusion & then applica-
tion

Here I see the efforts of Adam
Smith, Karl Marx, Sociology
& Social psychologists + judges,

Taboos that have survived
have a function - In our
efforts to be natural
about our sex impulses we
are being unnatural (maybe)

The women want us to
be well versed in sex technique
yet our schools nor our parents
teach us it, therefore we are
forced to the prostitute of Victory
girl actions which are both
dangerous & socially smered
at.

because of as as as a cause & result
of my socialism women shall be raised
to equality with men to work - They shall
spread their natural maternal affection
throughout - help dissolve this abnormal
male individualism which she as a
parasite instigates - & give a purpose
& direction to her all education &
employment other than being a club

layer
she should obtain leave of absence
for child bearing, birth, & 6 year
up bringing on govt pay

The goal - happiness - health, pleasure
- happiness - better individuals make
for a happier society

Health - good food, shelter, clothing,
occupation & medical

Pleasure - free time - art & creation - health

Will we extinguish ourselves
because the life of the
mind & delayed & prohibited
self-exercise is causing
our adrenal glands to press
into atrophy? Health
is on the rise.

Real love is too deep for words
& little jealousies. Off
during The HIMM Foundation Moving Image Archive
husband & wife would maintain
the same ego & independence
& beauty of body & character
that made their love so complete
during courtship. There
marriage would & should
be one continual love affair.
A beautiful setting for normal

healthy (psychologically & physically)
children. Marriage shouldn't
fade into a humdrum platonic
relationship after a few years.

An expert nursery for children -
while mother works at enlarging
career - she becomes less dependent
on husband & love, ^{marriage} becomes true
& voluntary or non-existent
sincerity not
legal & economic bondage.

Learn the real evils - that
we might reckon with them
in time

It is necessary for the maintenance
of the state that I call myself

an American - but it is
not necessary for the maintenance
and of the worship of god
that I call myself a Jew -
I am a theist - I believe
in God as an enlightened
human being - not a fable
loaded secular Sunday
school boy.

There are ~~many~~ things that
I have known to want to do
& yet I refrain from doing them
But at some future date
I do do it. I attribute this
to the later acquisition
of some fact or confidence
though it be conscious or
unconscious which ~~was~~ was

open sesame for the pent up
desire that I previously did
not possess.

- for example conviction to
1. call myself a theist & write
such on applications
 2. To have a report published
 3. Sexual behavior

Knowledge +
experience - & you will gain
surety & then will act.

How about a brief but accurate
& complete code of ethical
living covering such phases of life
as nutrition - sleep - washing -
clothing - housing - recreation -
education - sex - vocation etc.

I would have appreciated one
a long time ago.

Temperance the key - moderation
Human health & happiness +
creativity - the goal.

after college there will be no
exams or teachers - why
become used to them? - voluntary
desire for a life long education
should be in full practice at
college - S.H. completed in H.S.
because most as yet don't
reach college.

Oswey - there is no distinction
between science & morals
there is no static morality

of man it is ever changing
Experimental science is as
humanistic as are the "liberal
arts" - Greece adored natural science
- barren medieval Europe had to
dip into into the fruitfulness of
ancient Greece & obtain all its
knowledge through literature - this
carried over to the ~~static~~ literary
state of modern ~~static~~ Europe
& ~~dogmatic~~ ancient morality is
the cause & product of our distorted
social existence - what we
need is the extension of the
scientific method born in the
natural studies to social prob-
lems.

actually the culturalists &
the scientific educators

agree without realizing it
They both hold education
as the key to individual
happiness & creativeness which
directly creates & results from
a happy harmonious, creative
society.

The individual to gain the
perspective necessary for
experimentation must
read of & study of the past -
its thought - moods & activities
not as indubitable authorities
but self explanatory roads to
builders of the present from
whence he will seize the torch
& march forward. In the
natural sciences one can
at will cause experience to

parade before his observance e. i.
plan - execute & conclude from an
experiment - not so the social
scientist - although he must also
obey the dictates of experience
& occurrence his experiments
are ones that transcend his
own lifetime hence the reporting
of many must be poured
over or order completely
perceive the transactions &
significance of great human
adventures - hence the importance
of studying the past - books -
art - manuscripts

The culture of the past must
be known if we to advance
in either natural or social
sciences. It now remains

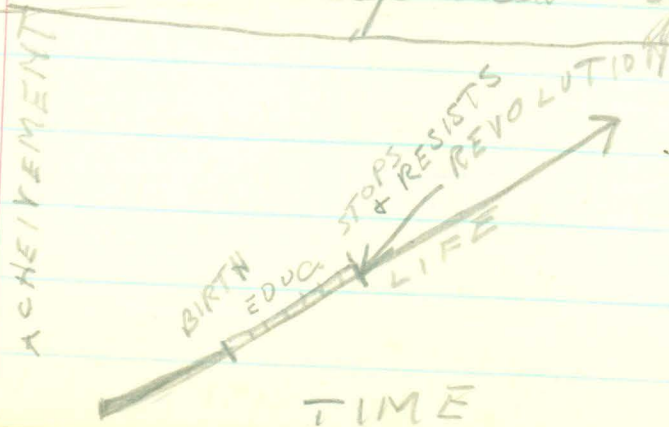

for the the social science
to march forward with as
much a scientific attitude
as prevades the natural
sciences to -

What we want -

What experience & reason

tells us to the best
way of achieving it

Then ~~perhaps~~ ^{perhaps} ~~the~~ ^{the} ~~more~~ ^{more} complete
experimentation with more complete
control - correction - then
widespread application

Why should ^{millions of} women, incapable
of swaring a man by her natural
beauty & hemmed in by the
narrow sex taboos of church ^{be}
denied the pleasure & joy ^{of disbelieving & multiple} for which ^{her}
she craves & is physically & [♀]
financially capable of ^{child}
propagating.

always advancing & the female
in a way withholding that
establishes male sex experience
as a virtue of conquest & power
& female sex experience
as a fault of weakening &
submissiveness.

Logic & life are not one
The logic of total female

equality, so perfect but
it is not psychologically
acceptable to the married
man, who ^{has} ~~needs~~ ^{psych demands} dominance
at least in his sex life.
Schopenhauer says
that we rely too much on
logic - ~~place~~ ^{place} ~~more~~ ^{more} ~~importance~~ ^{importance}
at that. ~~The~~ ^{The} ~~HMH~~ ^{HMH} ~~Foundation~~ ^{Foundation} ~~Moving~~ ^{Moving} ~~Image~~ ^{Image} ~~Archive~~ ^{Archive}
course since it is
one of ~~feels~~ ^{feels} aspects of mind
we must control. (or think we
do in consciousness) why
shouldn't we. It is the only
key to advancement - until
today when we understand
some ~~essentially~~ ^{essentially} the sub-
conscious emotional drives.

In love matters it is not
we who fall in or out of love
it is the totality of our subconscious
greater self that breaks out into
conscious action & leads the
conscious being about as by the
nose. He is helpless. Because
he is helpless & because the
animal human being has a
this insecurity
& humbling of reasoned self control
he hastily sets his observational
powers to work supplying
reasons to bolster up his
emotions with what seem logical
reasons. Hence glorification during
love & fugidity when losing it.
Eventually, after fugidity, the
pendulum reaches the neutral ^{point} ~~point~~

One govt, one religion, citizens
of the earth, all living under a
system of socialism is the
ultimate goal - life first becomes
free then + happy + progressive
but in our peace conferences
I hear no mention of these
goals. Several systems
contend for domination.
First present ^{then}
a period of each system
showing its stuff - the
best will succeed - then
throw away + education
the rest will follow -
Economic unanimity now
attained we will have
political + eventually cultural
unanimity - that is very

human being will enjoy a fond
pride in the creative genius
of any other regardless of race
 creed or color.

This week in Washington - Radio
television - W P photographic
illustration + explanation - (Charts
how your representative + Congress
work) - President
Write him + tell him what you
think

The fact that a thing happens
is testimony to the fact
that there are whole reasons
why it happened - else it
would not have happened.
If we are puzzled - it ^{is} remains

to discover these reasons:

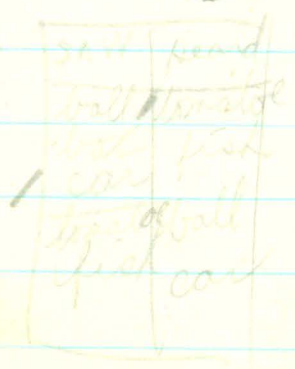

When I read I find myself listening to an inner voice pronounce the words before my eyes. To ensure clear communication by means of speech I have been trained to speak with measured speed & distinctness. I do this because conditions in the inner voice proceed at the same articulate rate, hence though my eyes can fly comprehension is retarded until tortoise-like voice can catch up. To disentangle the two paths of reception

that of the visual from the ear.
Experiments

1.  printed word on film strips simultaneous showing of word & pronouncing of an altogether different concept.

might start with pictures then the must try to grasp both

Test sheet

Then flash word phrases rapidly on the screen. Time exposure too rapid for oratorical translation but not too fast for visual reception.

stretch to sentences & paragraphs
To test first on several
new fresh similar phrases
one of which is the original
have student ring buzzer
when he believes, correct one
to be reached. This avoids
translation of visual impression
into oral expression.

If children had these
mouths fixed upon their
prime means of communication
were the printed word
the it would be just the
reverse i.e. sound impressions
would first have to be
transmitted (by the minds eye
of course) into pictorial (visual)
impressions - reading would

go like the wind.

I have found that a truly
great achievement + a bit
of kindness can make
a poor man, an ugly man
beautiful; for with this additional
bit of information the observer
reads into the physical makeup
of the person a uniqueness or
individuality which if you
will, is not possessed by others.

Although admiration + respect
are the daughter of a great
peerlessly perfect individuals
existence, I find that fear
& jealousy are more their
sisters than is love.

although one admires, one also
dislikes (indirectly) a sample
of seemingly human perfection
because in this world of pretensions
it is natural that a man
dislike anyone of anything
that by virtue of its excellence
lowers his worth on the scale
of human values & wounds
his narcissism & deflates his
Ego. ^{But} ^{the} ^{HMH} ^{Foundation} ^{Moving} ^{Image} ^{Archive}
on two is mixed in with the
excellence the individual being
appraised is knocked of his
Godlike pedestal - is reduced to
the status of human being he
is made more the recipient
of our human love - also

this weakness is the escape
route of our narcissism &
helps us to rectify ourselves
if only in our own eyes.
Hence we have what makes
for love - a human recipient
with weaknesses that bolster
our self esteem & with qualities
of greatness enough to make
this an excellent mouth watering
topic of flattering discussion
& being that you are the bearer
& deliverer of this news -
& that this ^{noteworthy} individual is your
friend, both of which again
inflate your Ego, you
can & do love him or like
him anyway.

There no better way to make a sufferer
of any sort feel better than to tell him
that others are suffering more than he.

Thing
↓ Attraction first
↓ Infatuation second
↓ Love last

Later when I feel the time
more ripe I shall write
of predetermination to my
profoundly to my experience
well based belief in it.

Your thoughts more directly
reflect your reading
material than any other
environmental cross current.
(Read a lot!)

It is when you are engaged
in the humdrum seemingly
usual routine of your work

life that most is happening
to you & you are achieving
the most.

simplification vs. amplification

if they say that socialism or
socialism or a planned human society
is unnatural
of our balls
When we
have surpassed the fighting
stage & they or any other
effort of human planning
present under a deluge of blind
criticism are securely established
we will look back with embarrass-
ment to think that we, haughty
human beings that we are
were stupid, could have dealt
so stupidly & stubbornly with such

beneficial necessity. These
future plans are ~~not~~ more
unnatural ^{than planned sanitation} & in the future
our amazement will be the
same that accompanies any
contemplation of human labor
in this purely beneficial direction
(human plan). ~~The~~ ~~of~~ ~~the~~ ~~world~~
according to nature ~~does~~
~~not~~ mean to stop our clothing
run into the jungles & let
disease & death run
rampage over us thus
becoming martyrs ^{to the cause} of the natural
equation by giving our
lives to maintain the balance
in nature. This in itself
is unnatural - it is by

far more natural that we
like all other & earthly species
strive to persevere & expand
ourselves by forging ahead
progressively & adopting every
measure ~~which~~ (themselves
the product of our natural
process of thought)
which lead to enhance this
preservation & expansion.
This is more natural. The
plan natural reach by a
brain that was naturally
developed after natural
conception. Stick to your
love of nature, only really
stick to it & plan &
live with all your naturally

USC Cinematic Arts
The HMH Foundation Moving Image Archive

advised reason & wisdom -
Do not let your one great
advantage your brain
act imperfectly against
you - let it be nourished
with complete knowledge - let
it exercise complete reason
& let it wield complete
force. We are on one road
there is but a forward
a backward ~~no~~
Let our reason drive us
forward at breakneck speed!

One's narcissism acts
adaptively - directify myself
before the athlete by maintaining
I am more intellectual than

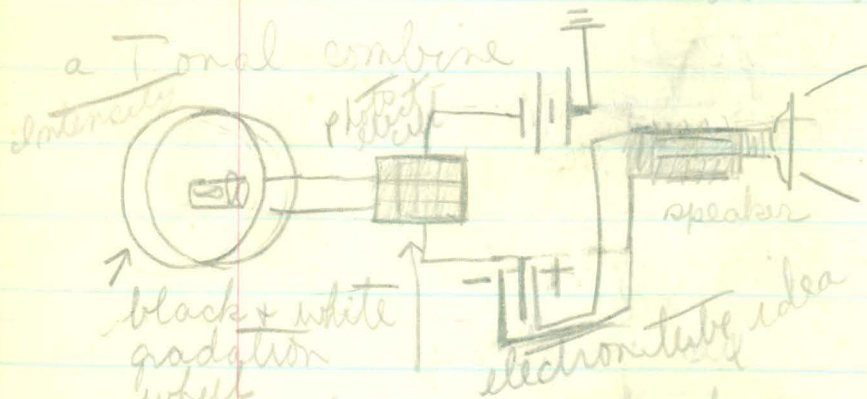

he & likewise before a true
intellectual that I am more
athletic & sociable than he etc.
The sum total & combination
of my abilities constitutes
my narcissism - I must
always be met & defeated in the
paradise of my own importance
I usually manage to
squeeze out a new & unique
a swift & quite injurious
boot in the Ego.

The mind whether as
physical as the body or not
is certainly akin to the body
in its glorio for self-
defense.

How about a sound and sight abstractionator, i.e. with abstract the real visual world into the art world & the real noise world into a musical world
 + an interpolator

a combination {

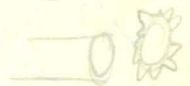

Real visual to abstract visual
 to musical
 Real sound to musical sound
 to abstract visual

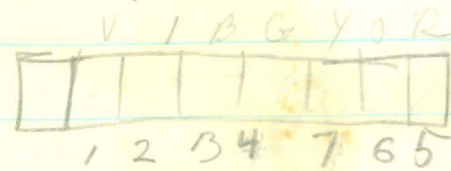

Intensity = loudness
 color = pitch
 quality = quality

if have photo cells that are sensitive to

two polaroid discs

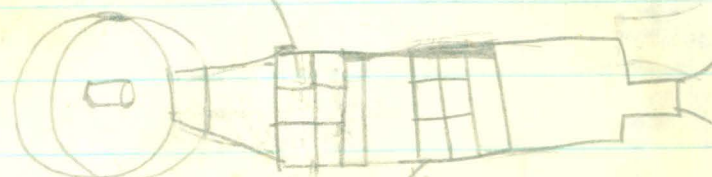

color-pitch

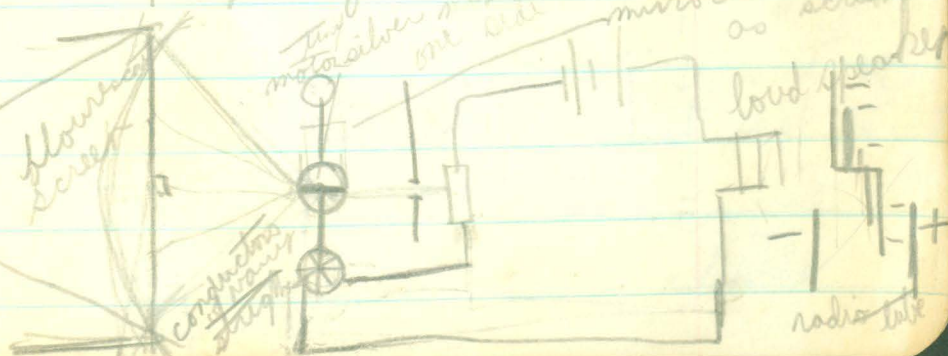

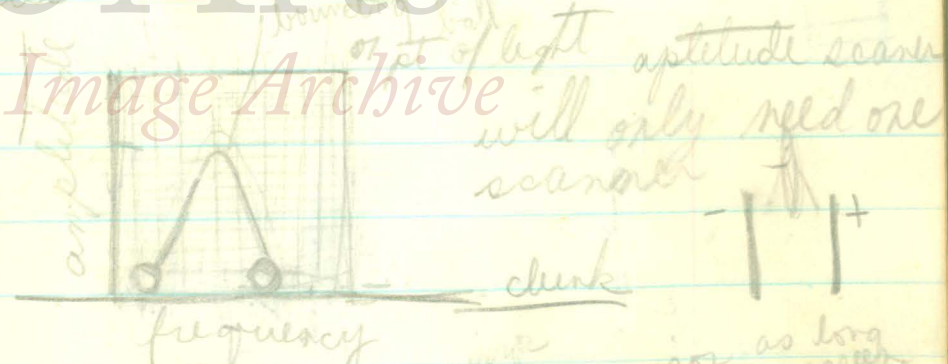

White all will act
 black none

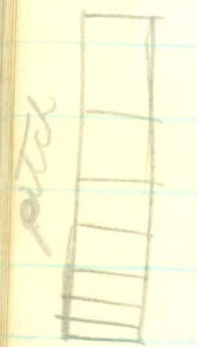

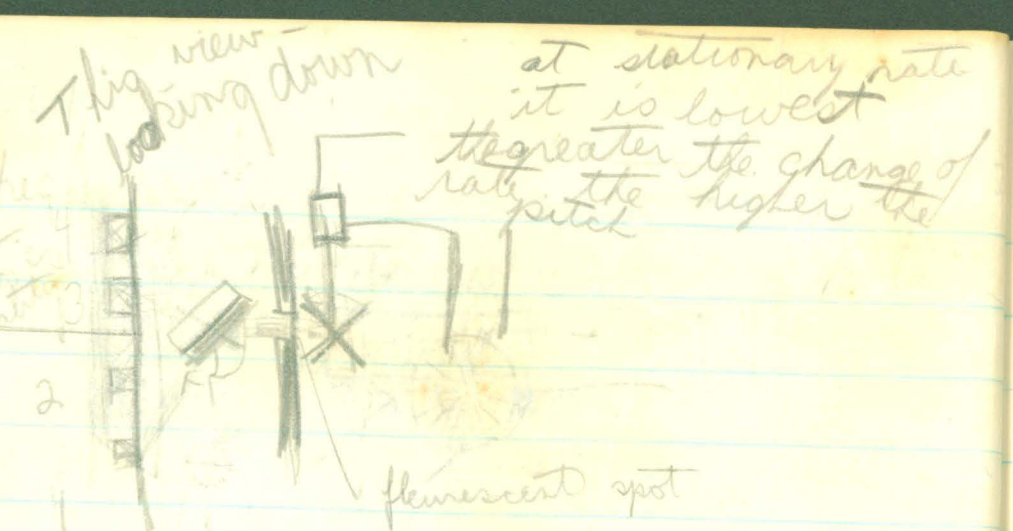

PITCH
 white
 yellow
 orange
 green

Red, Yellow, Blue, Black
rips, blocks
wiggles - circles
etc.

a water engine
 automatic lawn mower
 a golf ball that whistles
 bed maker
 ready cooked meals - week
 mathematically ^{for} whole family
 supplied
 a tide powered generator.

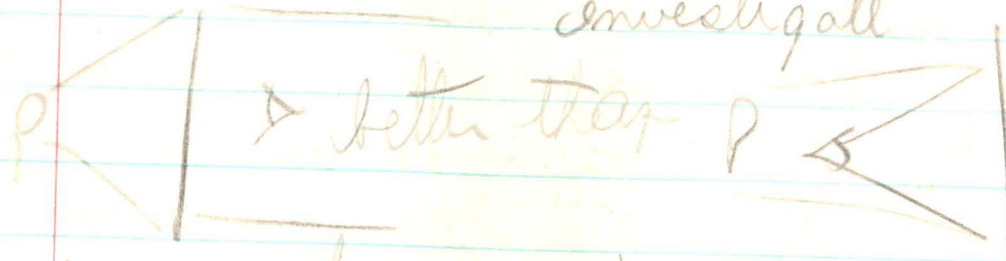

Because you are aware of your
 \neq go on anything else a human
 weakness is no reason to despise
 it - It was discovered because
 it existed - if exists it does for
 a beneficial purpose.

I hear tell that it is somewhat
 to a person's discredit to
 express the ideas of others
 as if they are his own.

No idea can be owned
 no original. If an idea
 is good I will accept it.
 In the course of discussion
 I lose track of the ideas
 introduction & if it lives
 I find fire within me
 I shall not hesitate to ^{call it} my idea

Eye glare - trouble
investigate

light from for movies
behind better than light reflection.

Every action resolves itself
in some good - even the seemingly
bad ones - for tho. no good
can be detected ~~with~~ ⁱⁿ ~~the~~ ^{the} ~~action~~ ^{action}
serves a good end in that stimulates
dislike of cruelty & more sharply
define the bad from the good
& initiates good action now
more clearly defined.

Facts the ^{as} wrong road yet
the right for without them abstract
are unwhole - Embodied

Page ripped out

intellectualism helps achieve the goal
of pacific harmony -

Every effect has a cause
Every effect fits into the scheme
of good reasonable things

Only I maintain with our
unique human foresight we
should be able to transcend
principal events tho they be
desires & get to the good faster

USC Cinematic Arts
Foundation Moving Image Archive

I find that sit blithly
back to blame all (especially faults)
on pre-determinism is to
hamper definite repudiation &
correction of the fault - To act
with our utmost initiative
is itself a phase of pre-determinism

Tolstoy says in his Confession
of belief that the only way
to find meaning in life
is to have faith - the faith
of the poor, ignorant
workers who kept on shipping
& refrain from the pleasures
of the rich. If this be so
what will happen when
everyone has a higher
standard of living than those
rich - There will always
be need of the poor -
education will bolster.

I have just read account
which supported Socialism.

as against capitalistic waste
& misdirection of resources
illustrated by pointing
out that in 1929 steel was
purchased for unneeded(?)
skyscrapers while home building
for the slum dwellers lacked
steel. The author was not
a good businessman - for if
he were he would realize that
edifices that would be impossible
to build during normal or
prosperous times.
Supply & demand is not
at fault - Socialism
no - I am a socialist but
let's use sense.

social phenomena are ^{as governed by physical phenomena} more determinable by human action than ~~are~~ physical phenomena - they are the same. There is a natural grain which if opposed or changed must be done in accordance with ^{other} natural grain.

Why condemn emotion with regards to social ideals. Such condemnation is justified if the involved emotion is so powerful as to cloud the vision from a better ideal. The best of scientist will defend

what they are convinced to be right with emotion if such is ever called into demand & so the social thinker once convinced of a right fights with emotion. If the social ideal be beautiful enough ^{emotion} & the work & mental effort it brings the greatest factor in making that ideal become a reality. Ideals don't just happen - they have to be worked & fought for.

But also remember once attained - emotion dies quickly reality doesn't - & the ^{reality}

isn't fundamentally
correct & workable it will
collapse like a deck of
cards.

Emotion & reason can be
reconciled. Where you
have sympathetic emotions
for your slave there is
a reason for it. Pure
reason if actually applied
tells you men will cooperate
better if treated fairly &
that human life is too
short & unimportant in the
huge scheme of things not
to be kind & happy (two
psychologically inseparable
attributes of mind)

When reason sells the
light first - emotion
springs to its defence

We are forever turning the
microscope upon ourselves
& banning thereof.

Truths learned can be applied
to a baby
learns to talk by listening
so now do not teach
languages to adults
with amazing success -
How about all other
learning processes.

To see accurately & draw
To hear accurately & sing

sculpture
material
texture
subject
must go
together

erecting
female
figure

Did Rodin
do a sculpture
of the sex
act - he
should
have.

How about sculpture
about inconceivable emotions
i.e. serene calm feral
face with sword coming
right at it. or a
body having arm twisted
with a happy smile on
the face. etc.

We don't know that we
or any thing else actually
exists. Words can actually
describe subjective ideas
such as "book" but are
entirely meaningless when
applied to abstractions i.e.
reality, existence, truth etc.
They are acceptable for the purposes

of the practical conduction of
every day life but for
other purposes they are mere
sounds.

The science of Semantics
Study of symbolism - one
such semanticist has applied
mathematical theory to non
mathematical fields - for the
purpose of aiding man in
reaching a logical conclusion
the words & twists of which
are too profound for his
intellect

Truth (in its daily use
at least) is merely a belief
that has survived the
battering of time i.e. earth
center of universe - sun the center

what will be future truths
Dream as Everyday life
Everyday life as Reality

same illusion may exist
relative example

What is good logic - is
it completely divorced from
the human intellect as is
truth or as ~~the~~ ^{is}
it a purely a relative term
which the common people
or even the experts accept
as the reasoned solution
of the most brilliant human
mind who possess knowledge
of the truest caliber of most
of the factors that enter
into a given situation

I think best is best because
there is no better + worst
worst because there is no
worse - consequently ^{good} logic
which itself is a fabric of the
human mind is good because
there is no better
^{actually} ^{because} only God knows
the truth about everything
& because everything is involved
in a given situation can be
be the source of the only
perfect solution - of the only
"good logic". And so a given
effect issues a cause because
it was a perfect result of the
cause - if it weren't it
wouldn't have occurred -
only the perfect result -

perfect p. i not in the
light of human desires
but in the light of Gods
will (Laws of nature) —
can occur.

Plato, Dr. Alexis Carrel
& most Democratic Socialists
agree — since perfect solution
of social ills through good
logic is unattainable by
humans ^{The HMMH Foundation Moving Image Archives} we should at
least use the best logic
available — that of the most
intelligent with the greatest
education (knowledge of problem)

Because some idealists
goals are so lofty, i. i.
the attainable will be so only

after great extinction of time, ^{they} turn
to the seemingly indirect yet
actually most direct means
of achieving these ends —
the field of education —
intelligent voters — begets
intelligently administered
society — which in turn begets
the educator's ideal.

Same egotistical outlook
Men & Lawyer — No Law — no
workable society. Scientist
— civilization follows in the
wake of science — etc.
Obviously we all need
each other — No one is the
strongest link in the

chain of civilization - we
are all equally strong in
the chain - none can give nor
co, conquer.

about marriage -
most industrial travail
of men points to the happiness
of a home - a well chosen
wife is very important.

Any one of the ~~100 million~~ ^{100 million} Foundation Movers
is capable of falling in
love with about a million
others of the opposite sex -
in America at least
50,000 - Chance
plays the rest - e. i.
which one you meet first
& marry

Just what is the difference
between love of girlfriend &
eternal, everlasting, mature
love that (if that ideal exists)
should exist between man
& wife.

There are many more subtle
ways to happiness than
sacrifice, charity, self pity -
martyrdom - make one
happy - although in a less
obvious round about way
also, such actions of seeming
self denial would not
take place

after seeing such a tremendous exhibit of scientific & industrial progress as I did today in Chicago I stop & wonder "Where to old man? That is where are we heading. Schopenhauer - to devise is pain - complete satiation is impossible if were, the life, would be a bore. & repeat "Where to old man?"

Well, I say, were a long way off from any near complete satiation - Half the worlds still illiterate - were all ignorant working slaves

millions unemployed & hungry & we have wars every generation. Plenty to do yet & besides by the time we reach reasonable satiation we will have devised new means of enjoying our (leisure) life time. I can no more be content with that reasoning than could Tolstoy as a student who believed that have great knowledge is to get closer to the meaning & reason for life - & it until he arrived at a humble workmans faith in God. Where to - I believe that freedom from fear

work & ignorance & plus
a grand philosophy &
conduct of life that
educators can unearth &
inspire with (spread the gospel)
can definitely make human
life highly enjoyable & pleasant

Capitalism ^{is} ^{because of} deceptive - ^{not} ^{to be made} in new fields - expansion
that expansion because of ^{incentive} ⁱⁿ ^{new} ^{fields} ^{of} ^{expansion} fewer

Invested money drawing
of interest - & reinvested
removes consuming \$ which
causes slackened production
less consumers \$ etc -
Depression.

EDUCATION

SEX IN education - should be open
& frank - education for life's
happiness - not business of making
a living - taught on basis of
medical & psychological facts
open - cogent - schools should
not be reformatories - but
intellectually stimulating

Socialism only solution
Money can't earn money
because have same incentive
chances for at least
reasonable riches - - Amassed
go to philanthropy somehow
(bad conscience) a paradox
because their amassment
caused need for charity

With a balanced economy
& reformed social law -
could have greater research
& education than
ever dreamed of. It
so damn obvious & such
common sense. Someday
these ignorant fetish-
conquered people will be
made to see the light.
Amen.

5 stereotype - museum of history
& industry - Pto. & let
cell - Television - study
these & invent.

Never generalize about
human beings or their
achievements because
you'll bound to be
wrong - learn the facts.

Men in their rightful anxiety
for freedom confused the goal of
their fight. Freedom - yes but
not freedom to help himself individually
at the expense of others but freedom
to help ~~others~~ collectively
& cooperatively.

We can't even approximate
freedom - the word is an abstraction
which is impossible & unreal -
& yet since we believe we are

enlightened wiser men - as our
University heads - especially
our Medical Association of
America.

In a University quotas
march under the guise of
meeting representatives of various
creeds & countries - but the
atmosphere is never fostered
wherein these differing beliefs

& heritages are openly aired for mutual
edification

In American medical or other
professional schools it is
pure shame ^{hypocrisy} that anything
else than capability should be
the criterion for acceptance.

Shame because we are
supposed to be the most

Democratic country & because blood
was spilt to make us so &
hypocrisy because by ^{these heads} making
anything else than capability
the criterion for acceptance
& training show that advancement
of their chosen fields is not their
prime interest as they so loudly
claim it is.

If we are to have institutional
regardless worship - let us
have it so that it preserve
the privacy of the individual
& inspired - instead of
supplanting - further private
worship. - More Darkness

Better perspective
5 along your own

capable of advancing towards
& because we feel we are doing so
we have glorified the word
freedom & in so doing we
have belittled the concept of discipline
because discipline is erroneously
made the antipode of freedom and
like opposite ends of a seesaw
when one end goes up the other in
goes down. ^{Actually mutually}
Beneficial discipline is the
 requisite of any freedom for one
individual in a society.

University, Army, and marrow
schools have distorted the signifi-
cance & meaning of discipline
That which is completely binding
is imprisonment not discipline.
Discipline is the tempering

of wild uncontrolled master forces
to the state where they are the
willing slaves of a master of
reason which directs ^{them} towards the
goals of human happiness.

As the individual being
needs & is acquiring this type of
discipline - so is his ^{society}
by virtue of ^{the} disciplining of
its parts in need of & acquiring

Prejudice can be understood
excused & even pitied if held
by ignorant people - but what
is incomprehensible is the
prejudice against minorities
held by supposedly educated

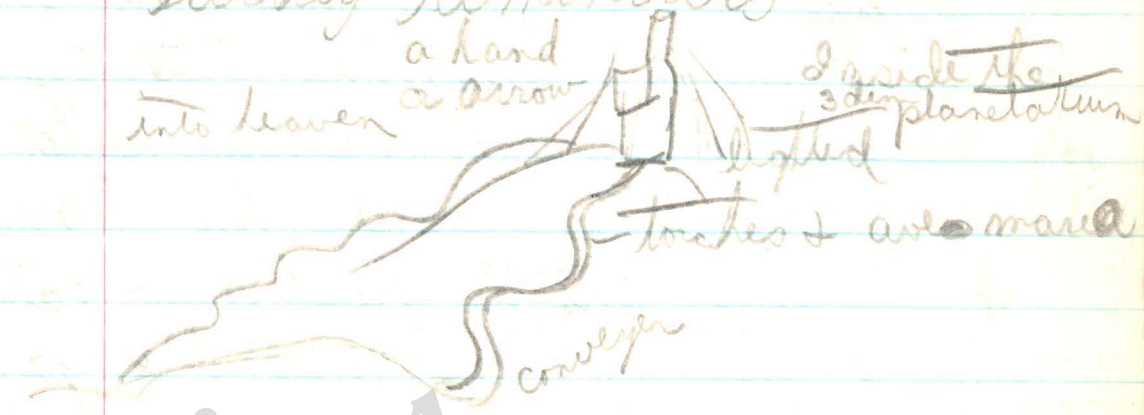

earthly diminitiveness -
& petty-ness - love of God
through wonder - & appreciation
for the joy of an awareness
of his greatness
a pattern of God's achievements
life.

Long silent upright approach
in a sort of decided
conveyer

3 Dimensional planetarium
projection - looking
down on earth - musical
organ - single voice
in space - progression
silhouettes of different
facts to the same
light -

Baths & powdering

& white sheet to leave behind
earthly reminders
into heaven

shower powder -
sheet like robes
music soft lights
simple 0 or 2
of all

Perfection in every phase
is important - especially
presentation

I am somehow glad that I have
but one life or if in actually
& have more than one I firmly

believe that I have but one
life to live, for that firm belief
of one life furnishes the spring-
board from whence my wild
surgeatistic soul can bound
& leap into the fresh new categories
of life which demand a gamble
before allowing entrance. I have
but one life - we all have but
one life - I am not morbidly
suppressed by the thought, but
I am delightfully ^{challenged} to have as one
hell of a good & dashing creative
time as I can - the devil take
the hind most. Hell if there were
any one or any group that from
the pedestal of immortality could
mock my short life or if there were

a way of peritannical subduance
by which I too could climb their
pedestal or worse yet if we
who had expected & planned for
a life of ~~immortality~~ were suddenly
granted immortality - I think
all the ginger & snap ^{out} of life -
and like the white fluffy fragility
of mountain peak snow we would
melt & fizzle down the mountain
sides & become prisoners of the
heavy sordid volume that ^{is} so
the ocean. No even the still
^{who} with dull eye & firm jaw that
takes ^{all his days} ~~to~~ ~~condemned~~ is offered one
tempting bite - one bite like -
a bite which I so voraciously
take & devour - & if he doesn't open
his jaw for more than to say

"Tsk" he will be the loser & a sorry
one too late - not I. If without
that challenge without that
limit for all action ^{life} would be
imperceptibly dull - a giant
redwood life's literally lives the
relative eternity of several thous-
and years - yet I who expect
an average life of but 65
would not change places with
it for anything - because awareness
is more beautiful & precious &
existing than is mere existence.
It is this attribute awareness that
makes the tiny human being
greater (through no fault of his
own tho) than all the astronomic
giants of the Universe - we are
aware - they are not.

~~I can't say~~ Or is this all the
speciean smile in the face of death
the rationalization for the minds
well being of what has to be.
Couldn't a life eternal encompassing
an equal density of freedom be
even more joyous! Medicine is
reaching out for a longer life - but
it is the presupposition of eventual
end that motivates into actions
which make for the most of life's
color and enjoyment.

True we are equal in ^{our} eventual
end but not so for purposes ^{of}
living. The creative - imaginative
the radical is aided into action
by this limit upon acting time
but he is patient reserved
searcher after the truths of

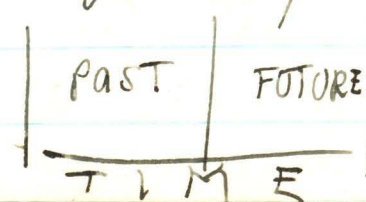

American childhood
Study
Time action
Past memories

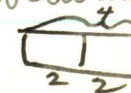

nature is frustrated & vexed
at the thought of ending life
with ~~so~~ so much of his work
& unfinished and curiosity unsatisfied
But even if ~~we~~ he were given an
eternity - he could never learn
the whole nature of God & on
the bases of his ^{now} advanced knowledge
his curiosity might be ^{greater}
raising with it the vexation &
sorrow of its inevitable non (complete)
satisfaction.

My life is like a moving line.
I think of my memories - they serve
no ~~no~~ value other than to please
the pleasant & throw a
searchlight on the future - My

past ~~is~~ & its works of achievement
are no longer for me to enjoy
but for others to enjoy - for to
them it is a present or a future.
& So I enjoy others pasts.
So the only real fun in life - is
to ~~have~~ have my mouth water at thought
of my future - taste in the present
& smack my lips at thought of the
past - but ^{past & even future} everything depends
on what you do in the present.
so - ACT.

Often I ask myself "present" ?
There really is no present. Time is
like a moving line of infinite
thinness

• A line ^{measured}
between two boxes
 it has no
area

Hence if there is no Present there is no time to act because obviously you can't act in the past or in the future. Hence if there is no time to act there is no time for ^{any} action hence we can't live nor does anything exist.

Baloney - action can be divided equally as fine as time & anyway what is infinite - it is negative - not ending.

anyway time is a fiction of the mind. The only things of ~~the~~ reality are change (motion) & space.

Time is a way of measuring motion through space.

I don't think ~~it~~ that (at least in America) boys (or girls) are brought up with an eye to own real happiness. A boy like to play, walk, sit idle eat - for those are the things which come most naturally & easy to him given today's environment. But I believe greater heights of sheer happiness are attained only after a short unpleasant exertion made in field of art, music, literature, thought, appreciation, dancing, singing, athletics e. i. being that we know this we should boost them through the thin veil of difficulty till they can see these splendrous worlds with their own eyes. Hence in the modern home there should be an abundance of

They should not await
the late & oft non-
occurring surge of
ambition to dig into
a dusty ^{scarcely}

library or travel to concerts & museums.

attractive & easily reached good
books dealing with all things.

Good musical records - good art
& plenty of instruction & encouragement
in home & school how to do physical
acts the right way e. i. swim,
dance, run, play ball, dive etc.
Develop man to his greatest potentialities
as a man.

Surrealistic movie - make
a negative of film & show
thusly -

"Le Génie Andalou" - first
surrealist film by Dalí &
Buñuel

Dialogue - carries the
breath of warm living

persuasiveness of reality - it
is much superior to ^{the} mere
monologue of the author
because even then I hear the
page talking - my self
talking - not the active
voice of a man in discussion

USC Cinematic Arts

Sci Phy Sci
Philosophy - Plato Republic
in Full
Socrates' apology
Mathematics

In a movie - one good friend
pushes other into clothes
at first angry self friend - happy

I pushes him in - they
both slap sticks in pool
with clothe on - happy

Do a Japanese like print on glass
with background paper - or several
sheets of glass for different distances or
colors

Do a reflection in a ^{tested} mirror
print or take a photo.

Life progresses why should art go
backwards - its a racket &
the nitzes eat it up. The frame is
just as important as is the
painting they must go hand
in hand.

In the way of museums - participation
& movement is a big key I
also have noticed that machinery
well designed, manufactured,
& displayed have become (& rightfully
so to a given extent) awe inspiring
things of beauty - especially for the
young, the mechanically unexposed
& the proud worker. I think the
combined efforts of common men
result in a different but equally
generous type of beauty with
respect to the fine arts creations
of individual genius. This
trend is very significant -
The machine is being glorified
& admired. Both arts are necessary
for a well rounded life.

Democratic socialism is
greater different than totalitarian
Communism. Real Democracy,
real freedom, real happiness
are myths today which are
attainable ^{only} in a Democratic
Socialist state. Many of the
selective + rewarding biases
of the contemporary Capitalist system
will remain - the who do not
to work with The FIMM Foundation
Small business will be private.
True Christians + Jews are true
socialists

Christians have a margin of
pure individual freedom - it does not
exist - although Christianity tends
to contend with the other determining
factors so that the ultimate decision will be but

Learn - Think - act - create - be
feel as hell + enjoy yourself

act.
Marty - Know what the
hell you are talking about
& believing in. Read as much
as possible - Go out a bit
& enjoy yourself - go out culturally
or to dance - Follow up your
art & invention interests.
Get a sound philosophical + theological
basis for practical belief & action.
Stick to education - it's the real
key - mass education - International
organized education for man
with a social aim - Learn all
the technical aspects. Read
a lot in the Army - sketch & invent
above all works & thereby enjoy
the fruits of your free - courageous
confident well founded action - Never
grow up to be sorry because you were
caught flat footed & didn't enjoy
doing nothing
