art is ~~an~~ ^{the highest} human act of coordination and attention. It combines imagination, memory, intelligence, feeling into a unified form to create a ~~desired~~ ^{an effect} argument. Every human act is an act of coordination - driving an automobile, eating, making love - but none spans the width, or demands the perfect organization and clarity that art demands.

In this respect art is the highest act of consciousness ^{and attention of a long period of time} of Western Man. It is the mystical experience of the West. Art reaches up into ~~the~~ ^{planes} trying to catch the most elusive intangibles of human experience and ~~organizes~~ ^{organizes} them in a whole, bringing them down to physical concreteness with perfect form.

~~All other activity~~ The results of other activity can be haphazard - attention can lapse - energy can flag - conception feeling can stray off the standard. is not so demanding. But with art the standard is high & delicate - slipshod approximations cannot succeed. It either is or isn't.

The wild fruitfulness of shoots of imagination must be held within form. ~~Very difficult~~ - to break off into new ground - ~~difficult~~ say something new & seminal at the same time holding it within an overall form that embraces the past.

A pain in the stomach is a lesson in ~~the~~ the relation of the body to spirit - all physical ~~concerns~~ well being - physical exercises are ~~for~~ ^{solely} to provide the best working conditions for the spirit - One grain of spirit in proper action can build a world of physical good in proper action. The word or the action before the thought is characteristic of the day - The thought is the fork in the road without its first second - all energy & time is wasted - It is the first premise ~~which~~ ^{upon which} ~~structures~~ ^{structures} can be built but which if false will ~~collapse~~ ^{collapse} fall into the void as surely as a tiny tent.

Each age has its life
its experiences
its joys
its lessons
and its sorrows.

Each age should be lived fully - not for the passing
joys it holds ~~joys~~ but for the wisdom they leave.

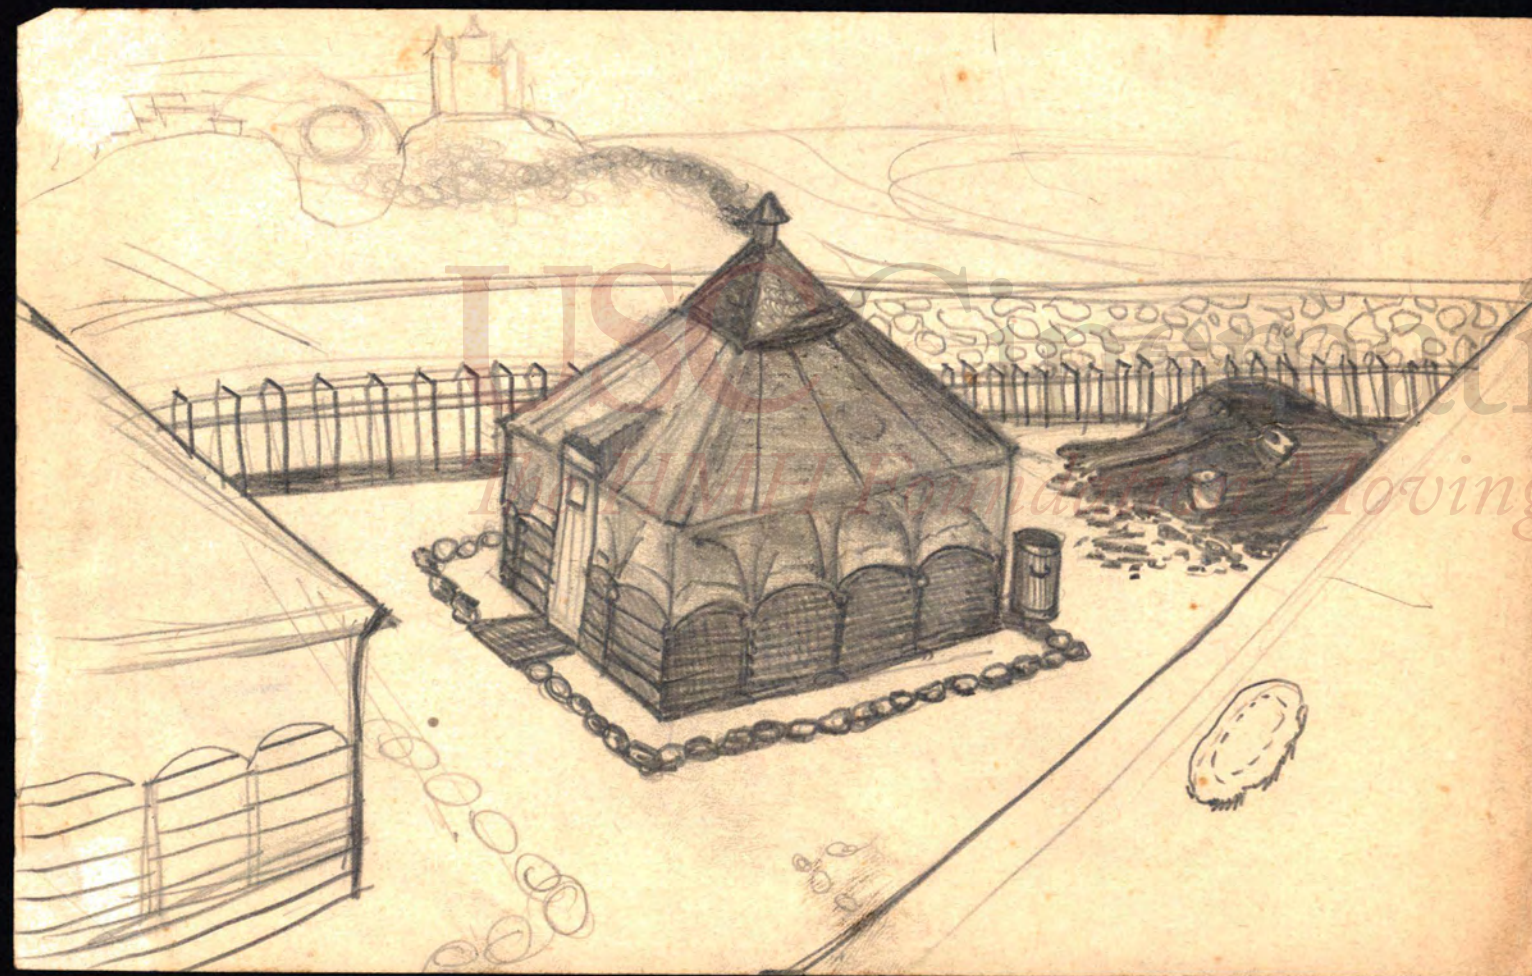

First there is the coming
Then the opening of the eyes
Then the million ^(little) discoveries
and the ~~years~~ years
Then the sucking of the love
the taking of the fondling
Then the playing - the dutying
and the making friends with butterflies
Then the sudden opening
the wild ~~unquenchable~~ eyeless thirst
Feed it, Feed it watch it grow -
the root of a lifetime being planted now
Then growing in & out
Then ~~the~~ youth manhood coming fast
Then hard work with the body -
that the body stretch its prime
Then hard fire in the mind
Burn Burn work work -
feel life leaping to its prize
Then the lust - the laugh
Then the rough ~~hand~~ handclasp

Then the first lick of defeat
Then the glimpse of life's crooked streets
Then the mellowing of love
A world of sweet rich treasures
 lies behind a young ^{sad} face's smile
Then the height of love - held up sound bodies fed to
~~the~~ ~~giving~~ ~~sound~~ ~~you~~ soul
 complete.
Then the ~~finding~~ - giving & the trust. Then the finding of the path
Then with child's bliss The setting of ideas
Then the giving and the care
~~Then the sharing of a child's~~
Then the having of a child's need
Then the guiding
Then the pride -
~~Then the sharing with~~ ^{hide} ~~the~~ ~~comparability~~ ~~of~~ ~~with~~ ~~the~~ ~~other~~ ~~children~~
Then the watching of the ~~steps~~ first steps
The missing of good by ~~with~~ ^{with} hopes
Then the settling down of the thoughts
Then the telling of old tales
Then the love that is ~~the~~ ~~same~~ ~~just~~ ~~there~~
Then the gathering of the lessons
The the sight of beauty round
The the ~~waxing~~ ^{owning} gray and fire
Then the respect
Then the ~~finding~~ ^{finding} of the path
Then the peace
^{And} Then the death-

of ever ~~the~~ I have seen ~~a~~ the symbol of a dying order it is in
church of St. Apollinare Nuovo - exquisite mosaics -
a rich - sagging ceiling - buckaback - boards strewn
disrespectfully about the altar - everything laden with dust
barren - but above the the raspy cackling of the
pigeons in the eves echoing through the deserted hall
our dying orders.

A New Model of The Universe - P.D. Ouspenski

Esotericism - hidden secret knowledge ~~is~~ above & beyond all ordinary thought

The existence & search for this knowledge is expressed in a thousand different symbolic mythologies - Aldras lamp etc.
In occult knowledge - surpasses 5 sense & ordinary logic & only partially narratable.

The esoteric group - a group of men who glean the best advances of knowledge of each civilization - preserve them after the civilizations decline and introduce the whole body of esoteric knowledge ~~to~~ a new civilization when the people are ready & willing to learn - Christ, Plato, Aristotle - of few members.

There have been many more civilizations in existence than we realize - Civilization vs. Barbarism

These are not the things of the knowledge of state but the emotions & ambitions behind their use
Barbarism is at the helm now in West Civil

Fascism - Communism (Russian) organized barbarism

Civilization is realized through the efforts of the individual

The collective group does nothing

Western civilization is drifting the way of the ants, bees & termites whose societies are the result of an intelligence that no longer is needed. The individual being nothing but a robot piloted by instinct - These have been experiments in evolution

that stopped when they organized themselves perfectly ~~to meet~~ ^{to meet} limited needs & demand - sacrificing the very source of their evolutionary growth - the individual intelligence - any change

in environment & they will be wiped out -

The esoteric method - the method of higher intentional mind -

by nothing and always connects every given thing with the whole.

The logical
psychological } minds & methods.

Esoteric

Communism & Fascism are organization for man as he is.
But man as he is is not good enough.

The Idea of Superman

all legends of brave knights, magicians, Sherlock Holmes, Napoleon, etc - are effort to portray & express the idea of Superman - the idea old - but forgotten & renewed by Nietzsche in "Thus Spoke Zarathustra."

~~Evolution~~ only change exists

Evolution may be up as well as down

Evolution towards Superman can only be a conscious effort made in the light of the idea of Superman

Man is the transitional larvae of Superman whose life finds meaning only in relation to the goal of Superman

Modern western man is trying to develop all his natures simultaneously, this impossible. Superman is possessed of a mind of complete

& perfect intuition (4th Dim) existing in a perfect eternal state of ecstasy - in touch with the infinite - in full possession

had moment of all the feeling & knowledge that all our art & science merely hint at. Above all he is internally united - ^{thus he has} _{had got to will}

He ~~is~~ exemplifies the highest state of that trait which man alone possesses in the Universe - consciousness.

Superman is not a highly cultivated man - a being on a completely new level - leaving all the small petty vulgar interests of man behind him

with - harmonious development of mind feeling & will.

Isn't it about time that the ~~newspapers~~ news articles
& editorials of your papers & all ^{U.S.} papers in general
stop referring to Russian activities as Unscrupulous
underhanded - treacherous etc. These adjective

The problem is more profound than that.

These are judgements that spring from a western
Christian morality that believes in the sacredness of
the individual, honesty, & the ^{peaceful} triumph of truth & love
in the end - but the communists simply do not share
this morality -

Blood curdling adjectives, black villains are fit
for morons, Bolsheviks & low boy serials but the
free people ~~enlightened~~ ^{more reading public} people of the western world deserve
something ~~more~~ ^{more} ~~actual~~ ^{closer} to core of the problem.

As a world ^{together} where cultures even civilizations are
rushing with the speed of the latest airliner - we have
found provincialism to be our strongest temptation &
greatest enemy - & to judge another ^{mortality} philosophy in
terms of your own is sheer unadulterated provincialism.

The problem is more basic & terrifying than
this & the people have a right to know it.

If the Russians ~~still~~ ^{concerned} leaders still operated against
the background of Christian morality than we ~~would~~
~~yet~~ would still have a common ground of appeal - But
they are completely outside of it or ~~if~~ have changed
meaning & interpretation of doctrine so much as to be almost
the same thing.

The greatest growth in man must be not intellectual but ^{emotional}
most of what we take for logic ^{and} conclusions are merely
the aims of desires & reached by an obedient ~~with~~ rationalizer.
This is very very true & very important.

Education of the Emotions

Ideas are ~~more~~ real - very powerful - only the properly educated
Taste are not - weak

Idea + Spirit real forces

completely new idea -
keep it always in mind

should receive them that they
not be distorted or to great
a disaster for a mans mind
- misunderstood poisoning his
life.

Man contains Heaven & Hell within himself

within man is infinity -

True knowledge - embraces Contradictions (Dem & Communism)

He needed turn the page

The breeze came along & performed the task for the
venerable sage

The Prostitute

Send me your men on Saturday night
Flushed with dancing

You behind your doors seeking lovers
arms from a chair in the dark -

chaste yet in doubt ~~man's~~

Tript sunbrowned eager & tight

he is standing before me

Be he tall & slender like a white birch
or square & muscled like a roan
or young & tender or old and limp

The white fire that your lips engendered
will find out & be mine

A kind word a little show of cleanliness
and the flood is upon me -

fevered lips - lids ^{supper} sled in a dream

Even tender embrace -

Then the storm that is man descends

a bit of coyness a coyness but not

false remarks to cut its pace -

(Unto myself comes all ~~the~~ your
white wine.

Winding & panting on a feeling so pure
Then in a great ~~and~~ giving from the

O you woman so chaste
Who have blocked clean desire with a smile
The town has its cobbles its baker
I have my place

I listening still in the rainbows
of the ~~parting~~ storm

Sweet kisses of belonging (thankful

Poets formulate the dreams of men - in this
way they rule them - for all things follow the
surge of the spirit.

He who tries & does a little ~~for~~ does more

Come up the path sweet girl
I have found a shady spot
No muddy rocks - no rushing stream
no towering cliffs or choked underbrush
shall remind us of our nothingness
Here a quiet plot - ~~the~~ swaying
trees with space between -

Some gentle hand has smoothed the ~~down~~
ground

As our ^{mother} on a wintry night
turns the cover down
for her ^{boy}
with loving care

And with another thought of grace
has sprinkled flecks of green ^{intricate}

~~Propelled~~ soft as law

path - The rushing tide - the pressing
force so slow, so quick, ^{and} I feel
it waiting for me ^{and} my eye it
hangs to take my carbon place
But with each rustling of the
twigs such thoughts do flee

Another root - another stem
a hungry bee ^{within my brain} ⁱⁿ a flower ^{finds}

Another life within me grows
Come my strong brown legs approach
On ^{my} ^{feet} ^{poesy} I be well fed - ^{my} ^{fat}

Speak not - ^{or} say hello

a death I believe can be so sudden that
one is never in the least aware one is
dying - a death still violent but
slower so so terrifying because the
mind is still in a healthy state

and with a mind still fresh with the
memories of vivid living must preside
like a parasite ridden spider & preside
over his own consignment - the
fading death of illness, or old age
in a way ^{is} most kind for the
sick & tired body makes its own
philosophy about the pointlessness
of live & as it slips in ^{some} finds
dreams & sweet memories to fill the
souls last earthly minutes with
peace.

Existence is truly way beyond the
power of words to describe -
but words - art - can give us
part of others experience - ~~extend our~~
Art extends our powers of feeling
the way the telescope & microscope
extend our powers of seeing - through
art we can feel richly the manifold

wonders of the world through the
collective heart of man.
The soul is all

On doing things in a spiritual
way -
so slow - be calm. relax - look
without trying to find - feel the
grace of your limbs - when
you swim don't churn the
water like a propeller screw
but relax and feel the smooth
flow over your ~~the~~ ^{of the clear water} grass like limbs
the way a fish must feel it -
Every moment of life no matter
where or when can be spiritually
equally rich if on doesn't ~~my~~
doesn't ride (these give ^{some} limited
spiritual enlightenment) but walk
a slow gently rhythmic walk through
life - the slight motion carrying

thoughts before them like a soft wind.
The desire to get somewhere -
the anxiety for the hastening of time
are but the desire for death -
life is in the slow rich consciousness
of being - a country glade
schools us in this way - a
subway rush ~~is~~ the opposite
Thus the spirit versus the machine
The machine is a means - imitating
it our lives have become the
means to the ^{only} end we know - death
Thus by nature close company with
the machine is adverse to the
development of the soul & the soul
is all

to work off the initial steam
of youth that won't accept ~~restraint~~
anonymity & death but its
warpedness & limitations should
be consciously realized & all efforts
should be made to outgrow this
abnormal state - achieve balance &
produce real art in a state of
harmony - art looks like the

I saw two goats this eve
both contained goats
both on the same road
One a tiny imp of a goat
feeding half-footed bedding the goats
home -
One with their great horns

were almost her heart
Yet with her light little stick
& pattering feet & ~~at~~ thin little voice
she was the master of them all
The second a boy ~~was~~ a bit
taller than girl
Guiding a small goat to its pen
He patted the ridge of his back &
his neck -
In the unconscious awareness of
an ordinary moment -
His palm felt warm hair & the
jostle of another life beside him
on the road -
Then dusk fell -

It is possible that the world is full of fancy
futility, stupid experimentation, moods,
goods & evils - a heterogeneous mass
collection vying personality - instead
of being a complex interconnection
of purpose & law.

When will intelligent Americans
stop having inferiority complexes
about intellectual activity - thinking
Ideas & creative activity
Throughout American periodicals you
find intelligent men explaining
deeply felt - carefully thought out
often profound feelings as if they
were between ~~two~~ tobacco chews
speaking to a ~~group of~~ ~~people~~ to
a pool room shark who was
going to enter their remarks in
~~competition to the~~ ~~with~~ some Bob
Hope comic contest.

American humor - American
simplicity has gone to far - Form
is a very important part of content
but we not only laugh at our lack
of form - a aversion to artful
expression that will keep alive the
rich value & subtlety of an idea - but
we encourage it as a positive
skill of its own right - The

also upon reading a periodical
it is apparent how ^{an American} Hypochondriac
& over zealous about the state of their
livers the nation has become - This to
counterbalance the shallow
material orientation of interest - short
little pellets of spiritual enlightenment
on how to stop worrying
Where to find God

The Habit of Prayer
are supposed to perform the function

Haute Vulgarization - doesn't vulgarize - it just
says a ~~thing~~ a ~~thing~~ thing
poorly
of bible study reading, ~~study~~ a little
of ~~the~~ feeling - observing suffering
& searching - which even in an age
of ~~intellectual~~ spiritual paganism,
intellectual tangency, & social
degeneration ~~may~~ still may not suffice
to give spiritual foundation & direction

ugh!
Man in leaving material behind
must depend / soul + soul on
intelligence survive - it is the
tragedy where material rarely fails
that ~~is~~ is wrong intelligence / often
one is wrong

From Reading Louis Bromfield's account
of Malabar Farm I have learned
that basic source of people's health
^{growth} energy - ability to resist disease
etc is good soil - Everything
men eat vegetable, fruits, meats, Dairies
& fats Dairy products directly or
indirectly come from the soil - if the
soil is rich, healthy, well balanced - the
grass, the ^{will mineralize} milk, the vegetables,
fruits will be ^{rich} - the body of the man fed from them will contain
~~it~~ a strong natural resistance to

Man doesn't derive his energy from his sex glands
There is a correlation but it is ~~not~~ causal
to only a small degree - ~~His~~ His energy
sexual & general is derived from
general metabolic efficiency.

To lift a weight quickly requires more
energy - than to lift it slowly - a weight
over the same distance - the same work
yet more energy - is this because velocity
time is displaced - the less time the greater
distance (Apo a)

Sometimes reading poetry is a ritual
through which we feel our own feelings
(not the ~~poet's~~ poet's)

When have I been between waking & sleep

In the twilight is each light like a

the truths of the twilight are the most objective
& universal.

Strong must be men to stand the

The smell of all mucous membranes is
fairly strong - distinct - lasts a few days
& all resemble each other not ~~at all~~ but
in dried aged ~~fungus~~

No rigid timidity, no false modesty -
or cold pride - blocks ~~Roth~~ European
from being human - little things do
unnerve them - excite them - they
are above them - middle aged women
ride on the rear of motorcycles, 70 year
old mothers roll down hills with
their babies - girls sleep in the
same room with boys or hiking

trips - Boys & girls change clothes
& occasionally reveal reveal more
~~of~~ secluded parts of their bodies

highest ^{the} maturity is the ~~best~~ process of placing
thought & feeling together with

practical life ~~is~~ naturally
& as matter of course without
being self-conscious or ashamed
of it. This Latin Europeans
have & Americans do not.

Weakness must act in extremes -
it takes strength to have control -
People of low metabolism either have
blank, dead expressions or burst
out into a wide radiant smile.
There is not enough of a steady flow
of energy to illuminate the face
permanently - they either feel great
or ~~are~~ wonderful or terrible -
usually terrible - they have tricky
giddy sense of humor - & when they
being naturally shy introverted &
afraid do an extroverted action -
it is usually with extreme flourish
& on completely different plane of being.

sensitivity - They ^{appear to} have high cheek bones
which the likes to Indians only
because they have small receding
jaw - their weakness can be ~~so~~ usually
a permanent stimulation to intelligence.

The Tragedy of Man -

Man can only think & act in extremes
- Man is a dramatic animal - only
extremes can appeal to his emotions for
group action.

Specialized Man ^{can} discovers more than he
can integrate - i.e. it is easier for one mind to
concentrate on one thing & discover than to learn all & integrate.
- Curiosity - the desire for novelty - adventure
grows with intelligence - the ^{more} areas
more intelligent the greater areas of ^{the} sin
i.e. self-harmful activities within given interests.

that exploited

- The memory of men are short - & the emotional force attached to it even shorter - they cannot remember past errors they cannot fully recall the beauty of the country or the horror of war until they are in it -

This is the theory of the physical lag - the whole body psychic & emotional apparatus of man was developed under primitive conditions - it is geared to individual rounded individual action in small groups - here the illusion of ego can ~~persist~~ exist - it was not meant for millions & one straightjackets that civilization benevolently imposes ^{physically} & man can & has changed - but always slower than civilization - always he is moulded

be conditions in his ^{past} youth ~~by~~ which are already ~~the~~ which are surpassed & leave him inadequate in his active maturity hence 'dab' - (style) The cultural lag important - but the physical lag from the long view even more so -

Civilization may be ^{the most foretold} an act of self destruction which is inevitable because ~~it is~~ doing back or status quo would cause ~~the~~ ^{by nature} ~~is~~ ^{possible} i.e. We may be civilizing ourselves up away from the physical roots upon which our very existence depends - the glorious try which has meaning not in the end but ~~the~~ itself & process.

thus a man cannot visualize all the intensity
extending results his actions actually
have - Thus a crook a racketeer a
politician - an arms manufacturer

his mind couched in a few simple
lazily formulated rationalizations &
justifying clichés - can ~~not~~ indulge
in actions which for thousands or millions
of people ^{of people} ~~individualized~~ mean personal
human tragedy - suffering - misery
with him being emotionally imperious

The action must be based on bias feeling -
Highly developed thought goes about feeling

Modern men live timidly in comparison with men of ~~the~~ the past — they loved, feasted, worked, worshipped with great appetite & fervor. Solomon had 3000 wives & concubines & Michael Angelo ~~was~~ covered acres of walls with their great sweeping vitality —

The great had a simplicity of life that let them concentrate on the things that matter & reward in life —

Love
Work
Study
Worship

Now we have spread concentration, appetite, vitality wider ~~but things~~ but things — the artists, lovers, workers, worshippers today carry a timidly ~~feeling~~ of devotion towards

their ^{desires} goals that shrink to ridiculous shabbiness before the flood of the ^{glory of} Greeks & Italian ~~paintings~~ culture

Is it possible that mankind on the verge of objectively comprehending ~~the~~ ^{inspiration} revelation shall release ~~in~~ ⁱⁿ ~~the~~ ^{the} great flood of efficiency & concentration the spiritual & ~~the~~ creative energy which reached mankind only spasmodically & wastefully through individuals struggling up ^{through} against the ~~barbs of fate~~ ^{barbs of fate} life — that as much artistic & spiritual (psychical) progress shall be made in the next few hundred years as was made in the last 900 ~~4~~ years in the material world once the ~~method~~ scientific method had been outlined & men's concentration & energy turned in that direction. The psychical experience & values of the world must be examined

This will be the true flower of

The big question is - do man
caught in a vice - an essential
paradox - where one started on
his way (to a particular type
of civilization) he can't turn back
& yet the at the ~~an~~ end of his
going on is automatic extermination

Civilization must be defined -

Maybe we must think in entirely
different categories - To think in
terms of quantity & quality -
of physical health - cessation pain -
mental & spiritual vigor -

salvation - peace - maybe even these
value one or all of each which are
to be found in all ^{part} prevailing
civilization - even these the most

subtle abstract underlying
thoughts of our existence which
knowledge - love - life - we accept

as self evidently wise are yet
the self impressed values of
a specialized tangent of being

- the work of our ~~civil~~ human

ours status as animals - living things -
or ~~things~~ existing things in a
3 or 4 dim. world -

no matter how vague or

has more than we can imagine
^{Does this make it all}

is this bad - is it the only road to
something great - a ^{purely} human desire -
is it of value -

No two men see one thing or one face the same way anymore than a full-sighted & a color blind man see green the same way. There is no way of communicating or exact ascertaining this difference ~~to~~ by special tests & the different treatments different artists give the same faces provides the test - Each artist abstracts from the ~~face~~ million faces of the ~~the~~ subject the face that is his own.

One can look at painting & tell what part of the artist's makeup he is most self-conscious about. Picasso is impressed by his big feet.

The question still remains -
do spiritual strength - and
physical strength aid or
antagonize each other.

I and Talla most ~~think~~ ^{think} that boys that girls
have beauty in their faces are
homosexuals - Why - which
caused which. I.E. appealing
to women did they have so much
they got tired, or because
being physically weaker & undeveloped

Bad art should be seen only
enough to know it exists
& to know what it is like

how to recognize it. But contact with it

that for one is trying to cultivate
good taste men being essentially
imitative in nature it does
more harm than seeing no
art at all. If a man is to
change his natural innocent feeling
with experience to a more formal
aspect let it be liberating, enlarging
& not debilitating. This is

the true of art literature & handwriting
- like speaking one language when trying to learn another

Maybe the ~~too~~ modern goal of
consciousness can be challenged -

Maybe a being of a less cerebral nature
a being of the tongueless soul is

~~Very~~ Artists naturally symbolize characters with the faces expressions gestures they have found them associated with in nature. In view of this it is interesting to note that most artists depict Christ the son the man - the spiritual inventor with a weak undeveloped ^{hardly befitting} face - While God the Father the administrator the ruler - is depicted with a magnificently strong developed ~~head~~ heavily bearded head.

This leads one to believe there can be found in art, an unconscious expressions of certain truths which were originally drawn or as obvious to illustrate more remote ideas but which in themselves may contain the most essential most important truths.

i.e. it not true or important
that ~~Jesus~~ Jesus ~~looked~~ looked
or God looks like represented
or that the virgin Mary
floated in the air above the
men just so - or that flocks
of angels or cupids ~~fl~~ flew about
~~about~~ in such grouping - but that
the ~~types~~ ~~relations~~ physical
types, the human relations

This is alone ~~the~~ ~~most~~ ~~important~~
tremendously important &
significant in its own right
& certainly the only thing we know
~~about~~

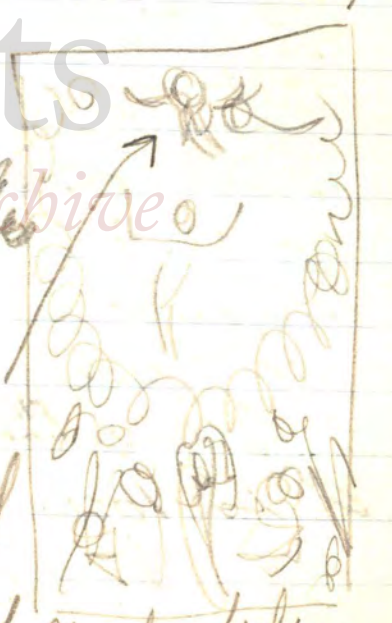

1. 2. The allegory has a second

2. Women are vessels of simple feeling
wonder & love - above ordinary men
3. Children are always about around

between our feet - innocent
adoring the mother,

7. ordinary men - are less
developed ambitions & adore the
woman

Naturally a wide cross section of
pictures must be studied -
then the direction which have

been unconsciously been
drifting must clearly

authenticated & valued - meaning
truth must be placed where they really exist.

There are 3 alternatives not just 2
 in the relation of Christ's doctrine to the
 doctrine of the Church possible

1. Christ preached salvation for all men & the church's doctrine of salvation for all men is a perfect development of that.

2. Analyse Christ as a man
 Christ was a man - & as such ~~is~~ was

capable of the faults inconsistencies & limitations of men as well as the spiritual heights
 Preaching these heights does that transform him completely out of the possibility of fallibility

2. Christ preached salvation only for the elite the esoteric & the church doctrine of common salvation is different & is a corruption made unconsciously by common men for themselves & made consciously to appeal to common men.

3. Christ preached ~~the~~ salvation only for the esoteric & the church doctrine is different BUT is an improvement on the wisdom of Christ - more human more

subtleness
egocentric
vanity
The exornation of Vice
moderation

i.e. sometimes a common man is capable
(in a moment or two) of a more
balance
Just being a mystic ~~and~~ as an
man ~~is~~ man tended to receive
heaven for men of his kind mystics -
a natural law of ~~the~~ human ego & thought
thus ~~that~~ his followers men of different paths
The appreciation of Vice
Vice represents irrepressible
human ~~instincts~~ ^{instincts} ~~because~~
which are vices only ⁱⁿ the
detailed form in which they
manifest themselves happens
to be contrary to the
detailed form of order in
existence - But the abstract
form behind the particular vice
may be ~~the~~ part of invaluable
heart of humanity that with
the inertia of instinct reacts

valuable & necessary with the ~~idea~~ it fills many of us

the extremes of philosophers preachers
moralist - who using limited human
minds are defeated before they
start into recommending some
sort of "logical" straitjacket for
a humanity & nature who's
logic is so ^{more} subtle &
complex we ~~may~~ will never
be able to duplicate her.

i.e. This is a philosophy of the
existence - the instincts - the
repeated tendency - human
needs to worship more than
one god - to gamble - ~~to~~ to make
~~to~~ carnal love - to fight law
to be naughty - to drink escape -
Individually ~~and~~ individual
institutions - nations even
civilizations fall prey to this
stubborn existence of human

is natural
this egocentrism
out to include themselves
Special efforts for

nature but the flexibility of
life human life is preserved
all ~~is~~ is sacrificed to the ~~unyielding~~
pressing force of life & growth
& this has its own logic
reasons & goal
maybe - the force of life
is not insurmountable & maybe it
has no purpose goal - nor
needs any - human ideas -

What is needed is a careful full
fledged study of the existent
~~the~~ the cosmos - science
the human mind & heart
& human society -

Then to build a philosophy on the
basis of the abstract impulses
involved - to give it positive
release & expression - i.e. the
"cast light & evoke & liberate

the dark hidden forces - I am aware
that this is the heart of what
men scientist & philosophers are
trying to do - & at every point
as to what exists &
as to what interpretations &
meanings should be built from
our conception of what exists
there is nothing but
basic all out disagreement

This is healthy & has value too

Now we not only raise the
question but question the
world - to which it is addressed
the mind that asks the question

Not men & families but things as
imperishable as ideas - culture -

then the climb again - another flora - another
fauna, another name perhaps -
but life will find its way.

To glorify the common man - insofar that
he holds carries on the work of the
species - protecting feeding & growing
his young ones - loving, feeling,
thinking, wanting, building - he
should be glorified insofar as he is
glorious & no further.

There is much sense in the flesh sacrifice
- watching an animal die & burn to
smoke would the congregation conscious
of their own impermanence - their own
return to dust - that something more
than smoke inhabits them & thus they
owe to the lord & offer it up to
him at death -
perspective (good or bad.)

Art anticipates science in that honestly reports what it sees - making a rapid impressionistic sketch leaving the complex investigation of the phenomenon to systematic science.

Men were meant more to do simple things with joy than to think complicated thoughts unhappily.

The search for consistency is almost impossible.

Hollywood sticks to cheap gun play because the camera needs action & they don't know how to film interior action.

Internationalism & Anarchy

Our vision is more precise but less memorable - the quantum unit of sight is very narrow - a second - of conscious observation.

But the quantum unit of sound is much longer - even in concentration - we hear the past music living as a unit with the present - and impelled by the repeated flow of the rhythm we almost actually hear the future as part of this unity in our ~~total~~ expectation.

~~Essentially~~ ~~as actually~~ it is easier to recreate a sound - but recreate a scene great pains of detail color & line must be rendered.

The question is is the ^{dynamic} visual world dynamically assimilated or is it assimilated as a ~~series~~ ~~intuitive~~ ^{intuitive} connection between a series of sharp visual perceptions - I. E. is the ~~essential~~ ^{essential} matter of the visual art essentially.

static & contemplative - is the arena

~~What is the right to liberty?~~ ^{Could it}
~~Men have a right to liberty~~ ^{not be that}
~~insofar as animals & plants have it~~
and men have a right to work ~~and~~
i.e. right to food and shelter -
medical attention security in so
far as plants & animals have this.
Men have God given rights in these
things as far as other life has them
& no more ~~to~~ ^{the} ~~right~~ ^{the} ~~the~~ ^{the}

~~that~~ ^{proclaims} these rights is the doings
intellectuals & reformers anxious to adjust

noting having the diligence to dig deep

their indignation's ~~hasty~~ search around
for a blanket authority that ~~through~~ ^{has been revealed & set}
painful work of ~~proving~~ ^{in the minds of men}
other men
This is in the same class of falsehood
as both enemies invoking the aid
of the world ~~in~~ ^{carrying out} their
attacks.
By doing this very dangerous - for by
incorrectly identifying the name of
world with a concept that is a
fallible incomplete ~~firmly~~ ^{firmly} created
extreme created by men to ~~counteract~~
of the man made extremes - when
the ideas as it must come into
question & disrespect the name of the

God does too - Secondly it disconnects
an idea from its true origins making
any re-examination of its sources
its growth - any ~~static~~ dynamic
change of the idea in terms of the
changes of its origins impossible -
Men must have more discipline more
honesty & about all more energy to
search out the true origins reasons
for the things they know - ~~by~~
~~setting~~ setting forth one immovable
~~moving~~ mover ~~as~~ as the spiritual
father of an idea is a bastard
creation. Doing this we ~~bring~~
through a complete rounded proper
idea (theory) out into the
teeming seething sea of human
life - by its ~~static~~ solid unity
it will do wonders in the beginning
like any ~~static~~ institution - it
will become out dated - a source of

inadjusted behavior - a source of friction
& confusion. Such are the egocentric
ideas of man's ~~God~~ God given rights in a
large part of ultimately all things are
God given ~~rights~~ - ~~but~~ then observe
carefully & completely don't select the
& absolute murderous competition also ~~select~~ ~~the~~ ~~part~~ ~~of~~
of the animal plant world - then
honestly objectively draw ~~and~~ build
theories. But more closely to man
~~Render to Caesar what is Caesar's~~ Render to Caesar what is Caesar's
& to God what is God's -
Animals & plants ~~do~~ have a ^{individual} freedom -
under God in that no one individual
~~can~~ has the intelligence or means of
control to dominate other individuals
to the ~~full~~ extent & length that men
have over other men
Animals security involves finding food
if they don't the struggle harder or
die -

But

Men or not animals or plants -
Animals & Plants use their
full capacities to achieve freedom
& security men should not
bark from doing the same
evil. Use their intelligence to the
fullest advantage into making
nature satisfy man's needs.

An analogy is a living work of
art - it is an abstraction / an
idealization - a realization
& like good art it is not the
thing itself but the feeling
of the spring that sets off the
machinery of our mind - guiding
& fertilizing ~~it till the saturation~~
& memory of recalling fragments
of diverse experiences ~~having~~ guiding
them into a fresh new alignment.
The value of the analogy is in this

its ability to act as the springboard of a good
to reach thoughts it already ~~has~~ potentially known

→ that is maybe all civilization is the organized
browbeating of the ~~organized weak~~
weak against the individually strong.
(blood passion) merciless - the

melly coddled growth - something
to be seriously considered & evaluated
especially in the age of extreme

Capitalism.

The west has a point of view
The East has a point of view
They have developed into great forms
with rich detailed content an
aspect of the soul of man & its
relation to Universe - the fact
that ~~that~~ so geographically they
is but the East & West & that
the points of view complement
each other does not mean
that these 2 attitudes have
exhausted the soul of man
On the contrary - the fact of one
whole society developing a part
& differently from another prompts
us to believe that there are
infinite aspects to the human
soul & that because of excess
stimulation particular ~~or~~ early
thinkers excerpted one aspect
as the most significant if not

the whole - ~~these~~ having directed
~~our~~ attention ~~to one~~ of countries
other thinkers, scientists & artists
to amplify & fill in with detail
their opening wedge - That small
aspect of the soul rich & vast
& subtle enough to ~~not~~ occupy
all their labors

The East the West & other
individual cultures, societies
periods & their philosophies
glorify certain truths
Egypt & possibly many
other more ancient cultures
had cultivated completely different
attitudes -
We must study the past -
all values & systems & glorifications
- The levels aspects of the human

being - his V numbers & Rod are
infinite - each capable of being
the foundation & central
thread of a civilization -

Men live in kaleidoscope of shifting values
Their feet on ice on the blind - no foot is
The sky is shifting the clouds & colors ^{steadily}

The wind's blowing - the leaves
are tumbling & fly before his face
Standing upon the he sees other men
standing upon ~~ice~~ peaks & rocks
but from his height he sees the
the mountains themselves sinking
rising exploding - buckling
up from out of the curve
And in the mirror of his
imagination he ~~sees~~ sees his

mountain dissolving falling - changing

attitudes of the infinite soul

soul that changes - one truth
completely felt almost reveals all
- one taste - one attitude one truth
in one time - but out of ~~the~~ time
ugly, vulgar, false -

The human habit of making pretty
pictures, finding "eternal"
truths, finding causes & aims
when there are none. I sit and
wonder that we caught in these
great dynamic sea of changing change
that moves with the own
momentous ^{formless} rhythms ~~that we~~
~~are~~ equipped with false ideas
false goals, inaccurate theories
and conflicting emotions - with
never the possibility of perfection
that we suffer that our loved
ones are killed as we stand stupidly
by - that our dreams are crushed
by that our heart is eaten out

that we hoist tattered rags in the
jury - find them ripped off or driving
us toward reefs -

With thought & art we rest order ^{but} at
the price of truth - with sweat labor
& research we wield order - but the
expectation should never exceed the
accomplishment - the true careless
meaningless roughness chaos of
life should be ^{apparent} in mind - thus
shall experience less disappointment
frustration. Life by nature is not
ideal - realizing this we will cherish
its ideal aspects & accept its
~~stupid~~ senselessness as normal
rather than take order for granted
& be disappointed with tragedy -
This is the hangover of the
machine - age - the age of order
science - logicity.

What really happens is that
the group & individual ~~exist~~
& augment each other - at
times they meaning completely as
separate things but for the most
part they are related - soaring
The individual like the airplane
has a million invisible but equally
real ties with group - physically,
educationally, ~~abstractly~~ - morally -
The group though it can take on a
~~mass character~~
a singular mind - ~~million~~ also
has ties to individual inspirations
- a million times given is still ~~pro-~~
The real ties must be evoked &
glorified & ~~respected~~ cooperated with
The group & the individual find
meaning & fulfillment in
serving each other - ~~There must be~~
The individual who works for humanity
The Soc that respects & cultivates individuality

as the richest source of its own
growth -
+ individual group & personal
devotions

Existence is not a neutrality
with the hosts of pain & pleasure on each
side
But a painful consciousness of lonely sorrow
When love is absent

Existence + love is life

All is not lost ~~when the~~ if the soul do
does no gain if the soul can rise to
know & express its miseries
But loss ~~is~~ in great grief
filled floods that drown the spirit &
submerg the hull of sight is naught but loss
- more clearly ~~channeled~~ - aided - respected.

Maybe, again the old fashion innocence
of calling men slim, shaly, ~~fat~~
fatso - made them realize the
unique values of their individualism
finding refuge & satisfaction of
their ego in this.

Through the power of the film
& journals & advertising we are
creating to rigid an ideal which
is robbing people of valuing their
intrinsic values & suppressing
their ego.

This is Type ~~the~~ Aryanism
All races & cultures have ^{great} ~~invaluable~~
intrinsic value & can make their
greatest contribution to culture
by compromising enough to prevent
ward them ^{from} being themselves ~~and~~
innocent of their own worth they
have had to accept the judgement
of the most articulate - who ^{are} ~~are~~

in power egotistically evaluate all things
in accordance to their standards - naturally
allother are inferior & do strut, jettied
We are learning the sword thro
with regard to groups -
Individuals are next - in each
age one type tyrannys over the
others though propagation of an
ideal made for their own image

Men would be happier were meant to
reach most of their contentment
through the will being & experiences
of the body (a Sick saint is unhappy
a healthy moron is happy)
City decadence deprives men of these
simple basic bodily satisfactions
thus they become neurotic, no
matter how well they know
themselves -
Bodily Pleasures experienced must

elevated from their low level of esteem
They are ^{part of} the indispensable ~~assets~~
immediate aesthetic continuum
that the religions of the orient
extol.

The forms behind -

It is not the solving of the last ages
last lingering problem
But the solving of the problems as we feel them
today

It is not the ~~wearing~~ wearing of the latest fashions
~~we cannot~~ ~~begin to imagine~~
but the well wearing & striving for the fashion
of the day -

The artist must not paint the last form
Nor the thinker think the last thought
For these we cannot begin to do & if we
do they are ours & not the last -
But to solve the problems of the day
to wear the garment well

To express the feelings we feel today
For this is not the content of our work
which is the golden treasure of our souls
but the residue of solving problems
meaning well & expressing sincere
feeling - that makes the man of equal station
to any age.

and man's inclination to perfection is his downfall

- These forms behind - the forms of love, hate, greed, fear, anxiety, gambling - devotion, expression - groupage, peace - ego ind. - somehow these will be purified & developed in their own right to what value I cannot say.

The Balanced man is good the man of total integrated feeling, living & expression & but this educated into consciousness will lose its flavor - & yet, consciousness of it, will reveal new things behind - only the isolated who interested in the doing

of the knowing & not, the doing of the doing should have this

False civilization is worse than ^{depersonalization} none at all. Real civilization is with life -

it is not ~~for~~ a choice but a must, the end of its drive is unperceived. The end of life must be in terms of the lost but in the life of each moment - age-generation Man to God.

On this age of ~~degeneration~~ ^{the good does out weigh the bad but being imperfect is going} degeneration, some book must be written on the advances we have made - ^{to reaffirm & publish the real} Not ~~our~~ methods of communication & records (this if anything has been ^{made of} ~~overdone~~ but in the real change in the state of mind - the climate of the soul - that has occurred - if any - ^{realization})

Ideas of man - God - Society - love - friendship
Man to Man - Man Woman - and Group

the dynamics of the situation - if the
bradiest - most abstract spiritual
conviction stands like a white
background before which all changes
~~take~~ take place.
When this goes -

The communists need not have a monopoly
of moral sanity - an unofficially ~~attitude~~
~~in~~ attitude of ridicule against the man
of clean living exists in the states - he
is simple - is not rough man of
experience - hasn't suffered
To have character a man must be a
drunkard - a whole monger & wasteful
man that has read de Maupassant -
Humorless ^{the} reforming has instigation
the reaction - But all this is false -
The simple - good & probably deepest person
is up against it.
Love is not wrong -

There are not only the two alternatives of dull
stiff shirt wall flower stuck in the mud &
the bar hanging, gambling whore
There is something in between with virtue &
yet color - love & passion
Experience - health - courage & stability
This can come only with experience & help
& the portrait of a new ideal.

The same statement ~~means~~ ~~is~~ no matter
how particular means ~~the same thing~~
to different things to different
not only because they are different
in body intelligence & experience but
because of the ability to feel the
full weight & color of a statement
~~the~~ when it is made - do thro
some understanding feeling a
statement or an argument
~~now takes~~ at the moment is as variable
as our ability to feel a picture painting

a symphony - a word - a sentence
like a work of art is a symbol that
passes through our intelligence &
drums up feeling - We think
with the heart - The consensus
of opinion over a period of time
can be depended on to evaluate
a statement as much as a
painting (the artist behind it more
than anything else is evaluated)
but at the moment feeling can
be capricious.
+ a complete lack of understanding
& strong headed conviction on other side
that they are completely right
results - ~~with~~ with the
freedom & power fight & war
results - No side of any struggle
has ever been completely right
There is a modicum of truth
between them the rest exaggerated
