(Not doubt this book has been brought
to your attention by hundreds of similar letters
but in ~~ignorance~~ of them I feel I can do some
small bit by writing.

Therefore I (probably in conjunction with
hundreds of other people who have written
similar letters) in view of the urgency of
this message + plus your proven willingness
to strike out on new paths I ask you to
carefully consider a production of "One World"

Mr Disney -

I am an American student in Paris -
I am writing by candlelight with numb fingers, Paris
is suffering from the devastations of the last war plus
the confusions of and ~~some~~ disagreement that seems
to be the preview of the next (war) - The people are
miserable and tired as they are everywhere in the
world and they have ^{nothing but} more despair to look forward
to - Like other students I have been trying to wend my

I am an American student in Paris. I am sitting in a ~~cold~~ heated room writing by candle light because because the political struggles of this unhappy city have precipitated confusions and strikes that are denying the people the necessities of life. Nowhere ~~there~~ has the struggle between Democracy + Communism become so openly violent — nowhere are the resultant miseries of such struggle more apparent.

~~I am in search for truth explanations available for way out of this ^{stage} ~~stage~~ by a mountain of heartbreaking, inflamed passions exaggerated meaningless use of terms — subjective ~~logic~~ rationalizing logic — have been ~~able~~ to find truth — a ~~clear~~ voice that could a way out short of war~~

→ This is preview of the inevitable conflict between America + Russia — I have found ^{only} clear voice whose reasoning is so clear whose argument so sound — and voice so impartial that I can feel I can be of no more service to the ideal of peace that help bring Mr. Reves ideas together with yours

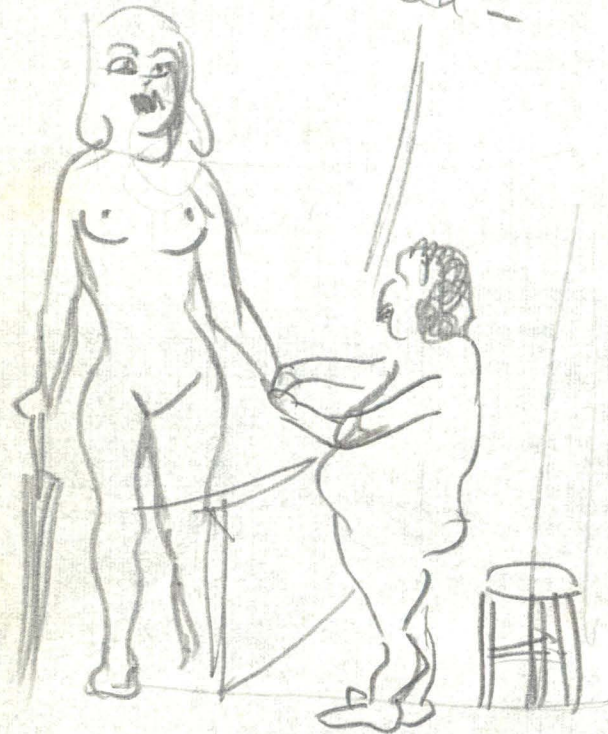

if I committed murder

Knees bent tears flooding
I'd call guilty up to the judge's ^{stare} granite face

If I have learned anything in these days of agonizing indecision it has been to lean from the stunts of my own mind the total width of the extremes ^{of interpretation} one mind can make for the same conditions. There is a war between self & self - man & man & action group & group. How ^{from} amongst a sea of facts half can be chosen to completely support one action & the consistent half for a completely opposite course.

If I leave Paris it will be more a rebellion against the monstrosities of the ~~modern~~ modern city. The din which presses in on the sensitive reflecting mind to crush it - makes its fluent

opulent tenderly wandering
pseudopods contract & roll ~~themselves~~
up into a hard protective knot
to criminal ^{part} condition of man's
~~own~~ self destruction - that I hate

are bought with the price & the
price is too dear - It is not that
you stand to lose as much time
missing a train as you had
to gain - but to live successfully
in the modern world of timetables,
appointments, tickets, bagains,

mens beliefs cannot be ^{constructed} ~~effectively~~ ^{fully} contained ~~to~~ described by dividing into the 3 main groups.
The differences between men of one group is greater than the differences of groups - also a major beliefs change -
And the working living part of a mans faith is the road ^{The HMH Foundation} ^{Moving Image Archive} that faith embraces it - All the the internal inconsistencies -
on life, death, nature, right, wrong, justice, selfishness, sex, health, nature, adventure, work, purpose, duty, ways of the world, means, ends relationships, justifiability, novelty, expediency etc - ~~are~~ ~~that~~ ~~mens~~ ~~beliefs~~

~~concern~~ ~~the~~ ~~areas~~ of are the segments of experience that a mans beliefs concern ^{of which} the vague momentary conclusions are the mental & moral basis of mans action daily actions. Depending on circumstance & subjective mood - education, example age & personal experience, physical & psychotic makeup - these beliefs change from moment to moment - day to day - age to age - a belief more often than not is a rationalization for ~~more~~ existent emotional desire. There a great moments of mental lucidity - internal consistency & unflinching logic in mans life ~~but~~ and in these moments

problem or superstition

a man might reach the conscious
beliefs he would say were
his if asked to submit a paper
on his beliefs - But for the
most part - for the
most intelligent of them -
these conscious beliefs have only
a remote bearing on the mass
everyday conduct of men
by which these are determined
by the H.M.H. ^{instincts} of biological
& tribal taboos absorbed as an
infant - fears - hopes - a catch
word - slogan or phrase -
accepted & acted upon as
naively as a child - afraid to
reveal ignorance of what is
- not knowing what is

proper & expected - It is this vague
unconscious polyglot of
ignorance, fears, taboos,
superstitions, and simple
rationalizations that moves men
through their million & one
pts of reflection & moments of evolution
decisions - ~~And this~~

~~The importance of unconscious
behaviors that account for 99% of what we do
is the subject of the book 'The Unconscious' by Sigmund Freud
which has been a bestseller for years.~~

It is this great unconscious
polyglot that accounts for 99% of the
actions of the Hon. S.W. Longhorns,
the Benny Carderos, and the
Norton Heelings of the world.

The importance of this has been
tremendously underrated & it has
been neglected, understudied
hardly suspected - Forward!

All individuals in the diversity
of the specialized achievements
show the ~~the~~ ^{the} great the great
volume of perception & achievement

potential to the human being (person
mind) if it had sufficient energy
to devote to all these ~~attention~~ ^{attention} which
have been achieved by highly concentrated individuals

i.e. the horizon of human experience
to consciousness if power being
enlarged, discovered, pushed
back - by highly concentrated
individual thrusts. A talent ^{thing} ~~thing~~ ^{it}

it is discovered - then it comes to exist

These men like ants - using their

Structural evolution has created today the human brain of today. These men are working to progress the brain's functional evolution - i.e. exercising it till it reaches its greatest functional height within its structural limits.

but the odd unique & thrilling thing about this is that it is the nature of human knowledge (product of brain function) to dampen with the sources of its own existence - thus the more extended the brain the function the more the brain structure be developed so as ad infinitum

The breeding of intelligence of genius - & its upbringing under ideal conditions - excellent food health - education - discipline - mudras saving - expression in this ~~the~~ self knowledge is the tragedy & greatness of man's existence - For the first time in

evolution a man can control his
own evolution - can heed
himself - he can harness
can understand & harness the forces
that of his own existence -
the forces of his own understanding
& harnessing - This
like a man ^{improving} being able
to reach out & pull himself
up. The TIMM Foundation Moving Image Arts

The strength of man ^{foot}
lies not in himself but
in his ability to release
& use the great forces of
nature as his intellect
perceives them - Thus
the will can be strongest
when it is placed in a

position friendly to its operation
towards a given goal. Thus
the greatest will in the world
will not make a man healthy
if he is staving - But that
the same will - intelligently applied
by moving the man to where
God is does make the man
healthy. Thus man
stands ^{with the} flood of forces of
a great dam - with the
touch of his fingers he
directs nature's forces -
intelligently his slaves -
ignorantly his jailer and
against him his masters.

This applies very well to the
problem of the fruitful use of the

Friendship - regard
mind - good food - ^{love} health
warmth - quiet -
occasional stimulation - leisure
& materials are all
necessary requisites
without which the mind
can make only part of
its ^{potentiality}.

One must love doing the little things in ~~the~~ life, i.e. ^{only} ~~the~~ must breathe well they are exercising - for these things are not only preparations for life but / life itself - one must love the voyage for the voyage is life. But in a realistic scale of values little things seem worthy to gemmify better moments. The trouble with modern life is that it is cluttered up with too many little things - & these we do ~~act~~ as half lived as if not to admit we were doing them. This is the way some people eat - disgusting.

Maybe the congeniality of thought & desire between lovers ~~is~~ is telepathic. 2 First Principles - The Existence of our psychic selves
The existence of the outer world.

We don't see but feel the world

Kant - mid point between complete Subjectivists (Hume etc) + complete Materialists (positivism - science)

Our knowledge of the world limited by the nature of our ^{sense} receptors.
Our conceptions of space + time are highly subjective and partial descriptions of reality - we can never escape the ~~bound~~ prison like bounds of our senses.

Hinton - our senses the ~~the~~ doorway to reality - By understanding the relations of forms within the three dim. world and the relation of our senses to the world we discern patterns & on the basis of these extend our understanding into the world of higher dimensionalities

Ouspensky - a line is a series of pts (dots etc)
a plane a series of lines
a cube a series of planes
a Fourth dimensional figure a ~~series~~ ^{series} of cubes or ~~planes~~ ^{planes}

A dimension is an extension of space that is \perp ^{to all other dim} \neq not \parallel to ~~any~~ any ~~one~~ of them - ~~it also connects the~~

~~Time~~ Time fulfills this definition
Time is the Fourth dimension of space
like the line relates two pts. - The plane two lines, the solid two planes - an object of the Fourth dimension relates objects - a cube moving in ^{or existing} time is an object of the 4th

The minute to minuteness cause + effect and sense of time is an illusion arising from the very narrow ~~our~~ view of the Fourth dim. we are capable of. The illusion of motion arises from

all Events exist simultaneously on the plane of time but our limited consciousness permits to view one event at one pt on the plane - (at a time) thus arises the conception of past present future

merely descriptive of our faculty of concentration & not reality
a consciousness sufficiently elevated could view all phenomena
~~as~~ simultaneously thus it is the eternal now that unites all
things

The number of dimensions of reality may be infinite - an
evolving consciousness can discover them - (Mysticism - the
~~the~~ elevating through training and ^{that} will the consciousness of an
individual in this life - (Genetics will probably be more productive M.H.)
for this purpose - rising through dimensions
to discover & unite (or immerse oneself in
reality = God (Oriental Pantheism))

Time sense is the limit of space sense - i.e. the surface tension of our
between our view of reality & reality - at the fourth dimension imperfectly &
incompletely conceived Time / Time Sense - \rightarrow list tout ce que nous sentons.

a Fourth dim. body is created by the ^{tracing of the} movement of a 3 dim. ~~solid~~ body in space not
confined to 3 dim. space - i.e. movement or existence in time - because of the
limitedness of our sense receptors we see only ∞ infinitely small sections of this
new dimension or direction - the pt. of a line, the line of a plane, the plane of a solid
the solid at one second (now) of a fourth dim. body - The solids we see are
merely projections or shadows of their real selves (Plato's cave) ~~observed on our~~
~~level of consciousness~~ - on our plane.

a 4th Dim body is an infinite series of 3 dim. bodies.

on 4th Dim bodies can be real -

Man can feel & sense his own 4th dimensionality - i.e. the permanent
something - soul or ego etc that remains the same through to death.

Euclidean Geometry - geom of level planes \square Solid Geom } 3 Dim Geom.
Non Euclidean Geom - geom of curved planes \circ
Metageometry - Geometry of space of more than 3 Dim. - ^{our} point is a segment
of line of 4th Dim Geom.

as the 3 dim. of our space objective a subj.
Analogies do not provide direct answers
Examine the Faculty of Consciousness.

Sensation - Perception - Conception - Idea - art (Intuition)

^{higher} The animals exist in ~~realities~~ ^{language} of one or 2 Dim space (dog cat)
The lower animals (snails molluscs) etc live on a line between

Pain + Pleasure
i.e. they are one dimensional beings

Man - 3 dimensional being - Sens, Perc, Conception - ? - ^{still} cube in space
wada surface can remember 3rd dim (speech) like a
Dog, Cat - 2 dimensional being - Sens, Perc - Plane - angles motion
everything a plane - can't recall 3rd dim. machine ^{in time} because
irregular, are alive animated from within

Small animals - 1 Dim Beings - Sens - cube - pts - alive

Thus dimensionality of space determined by the receptivity of our psyches
~~the~~ motion ^{is} in time the lower dimensional being is fixed
spatial quantity of a higher dimension to higher dimensional being
To ~~time~~ to the motion time are relegated all the ^{illusions of the} unperceived
dimensions - ^{rather no}

→ if in us we discover ^{rather no} a fourth unit of reasoning higher than
perception we shall discover ^{simultaneously} the fourth dimension
of space - in which all objects & ourselves ^{are} no longer individuals
things but parts of a fourth dimensional object - ^{part of the whole}
motion in time will be the still fourth dim of space - (Time)
& from this perspective we shall see the world of 3 dim - as a complete
illusion & non-existent.

Time - unclear sensation of time & motion in that space
Everything stable constant is space - the rest - the imperfectly felt
is referred to time - the inconstant as moving from past to
the very inconstant as life - future.

The space sense is the power of representation by means of form
perhaps in reality there is no motion at all - only the dimensionality of higher
dimensions - The same thing is different depending on dimensionality
of perceiver
Life - motion - stable dimensions
3 dim 4 Dim 5th Dim

As we go up in dim. the necessity ^{the need} of time as a factor in the explanation of phenomena disappears.

The idea of time recedes with the expansion of consciousness

movement within the psyche

Everything repetition of cycles on higher planes - spirals

The lower physical forces account for the existence of psychical energy
1. World is all rationally - Psychic action has much greater potential energy

The meaning goal of life - Knowledge - man, society, institutions
art, science, religion, morality all to serve mans acquisition

Intellect versus passion
Will versus desire
Mind versus heart

false distinctions - everything

higher nature -

Pure emotion are unmixed emotion - The purest are devoid
of the personal element - ^{to some} Emotion can have a destructive or
constructive relation to knowledge -

Pure knowledge is to be had only through the instrument of pure emotion

Morality is an aesthetic ~~is~~ an art - the purification, elevation & integration of the emotions whereby the sensations thoughts feeling & actions of man are brought into harmony & directed towards to goal of knowledge - true virtue.

~~The~~ art is powerful instrument for knowledge of the noumenal world - The aim of art is the search for new beauty - art dies when the search "the seeking" & discovering stops & ~~it~~ begins to reflect familiar forms to give pleasure. True art is the revelation of beauty feeling (knowing) where it was never felt or seen before. - Great

~~All that~~ Science, Philos - Religion, Art - are all analysis, synthesis, God, Beauty, feeling] forms of knowledge - consistent with & embracing each other - all for the purpose of enlarging mans knowledge elevating his psyche - enlarging his consciousness for the discovery of himself & God !! Great principle

What true of Math is true of Logic - Higher Math - Higher Logic -

To penetrate the world of many dimensions we need a new logic

The logical relations of the world of many dimensions judged by a 3D logic must necessarily seem absurd - illogical - the transition very painful & difficult & ~~at least~~ only momentary

★ → only that which seems absurd has the possibility of being True

The world is one - only the ways of knowing it are different - monism - Science ~~is~~ sensed the unity of reality but unable to prove - limited it to 3D in mechan.

caught between two worlds → Thus the difficulty of judgment & action in the phenomenal world of thinkers absorbed in the world of ONE.

The absent minded professor & reflectual intellectual
Because he is living in the real world & judged upon his ability to act in the unreal

Science is the infinite investigation within the limited 3 dimensional world - but to discover in the other worlds where true causes are to be found science because of its dependence on 3 dimensional forms of space & time - their investigation by the 5 senses - then calculation by a limited constant mathematics - & synthesis by an equally limited logic ~~cannot~~ is impossible for science.

Science is a huge internally consistent system of knowledge floating in the air.

To extend knowledge in the higher spheres it is necessary that we first extend the modes of perception -

i.e. investigation of phenomena because phenomena themselves are unreal can only give tentative knowledge

expansion of consciousness

We must turn in - investigate the ~~spirit~~ consciousness & strive to simplify - to shed the shackles of the d - till we raise ourselves to a pt where time stands still - the drop is immersed in the ocean - the ocean in the drop - ecstasy - experienced rarely & only in moments

The subjective is actually objective reality - Facts
The objective - the phenomena science studies ~~are~~ actually imperfective subjective picture of reality - The perception

Knower & Known are united - The Vision with Ourselves - Vision of God etc.

Math & Arist. Bac - Logic - both based on an inherently artificial ^{imaginary} picture of the world ~~is~~ ~~artificial~~ phenomena in time & 3 dim. Space

Both completely conditional ~~artificial~~ -

art, Religion, definite Math (determinate Logic) - are all closer to truth - & all seem illogical from the pt. of view of 3 dim world,

→ i.e. in nature there are no finite constant magnitude & there are no concepts

Thus the unity of the Symbol - art can express in symbols what our language is too poor to express

A is an arbitrary & given part of All - that can be ~~part~~ the whole - the whole without changing can be its own part etc like the lines with infinite No. of dots:
a series of religious experiences revealing the extraordinarily common qualities of mystical states.

Hindu Philosophy - Thou art That
The Soul is one with Divinity - God

The fall of man is the loss of this realization & separation
his redemption is the re-realization ^{of this} & re-unity with God

This means:

Mystical state - a state of expanded consciousness - where knowledge of the unity & form of the cosmos is revealed as no other method can reveal it - ~~the person~~ accompanied by feelings of ecstasy (or horror) being flooded with light - a peak & safe emotionless sanity in which the individual I is dissolved in the Brahma - where all earthly worries, fears, doubts & dualistic confusions ~~are~~ ^{are} resolved themselves in an all embracing unity - that seen is incapable of expression in our language of ^{which is} conceptual ~~with~~ being ~~types~~ conceptual - direct wordless intuitional knowledge - ~~is~~ ^{is} ~~perceived~~ ^{perceived} by insuppressible sense of ~~reality~~ ^{reality} as realness - of reality as great spiritual presence (Berg) incapable of any description that ~~pals~~ ^{puts} phenomenal world making it seem like a bad highly ~~is~~ ^{is} unreal dream - that is internally related according to the tertium organum - Where A is All etc - which exhibits striking similarities to all other states of spiritual inspiration & insight & which if judged by our 30m. Positivistic - Aristotelian, Baconian & logic phenomenal, ~~is~~ ^{is} Matter Spirit dualistic world is entirely illogical.

The closer men draw to God - The closer to each other like the spokes of a wheel to the hub rays of light to the Flame.

The Flower of the Soul opens

Positivism, materialism, socialism etc cannot fulfill the deepest greatest needs of man - no answer his simplest questions. Something more needed.

The Evolution of Cosmic Consciousness - Superman

P.D. ^{supple} Not an inevitable evolution but the wellfled discovery of all existence by conscious intellect. ^{the few directing} Consciousness of man's unity with the WHOLE. ^{the many - if not checked off} i.e. the Being of the living World existing in the Eternal Now of the 4th Dim or mod. ^{Thought is / idea} Consciousness - Thought motivates the Universe - Anything that stops Thought is / idea. ^{only then can we find the next} The meaning of life is in eternal search -

Textum Organum - P. D. Ouspensky's book was excellent - An excellent crystalline still that never loses its crisp vitality. It gave fuller content & better organization to the trend of thought that has been developing in me for several months -

From innocent unconscious Judaism - I drifted to Theism - then Agnosticism - then Atheism - then Agnosticism - & now Mysticism.

Psychical Research = Mysticism (oriental & occidental) plus all my personal feeling observations & in particular one clear experience which definitely suits the definition of a mystical state - & many recent probing into the nature & significance of art are helping to get into a doctrine ~~with~~ of great force - representing a completely new orientation for my thinking & acting.

There are many personal criticisms, ~~developments~~ ideas & observations & queries I would like to bring to bear on this central theme - and especially several developments & ~~the~~ relational discoveries I would like to make of my own.

I believe there may be many dimensions & that ecstatic state ~~may~~ possibly unite us with something far less than ~~the~~ God - this is ~~highly~~ highly ^{30 in} in its evaluation - That in the end just as much a horror as joy may be realized? That ^{conscious} Evolution may be dangerous not knowing all the factors involved - That we may lead ourselves into a spirit whole protoplasmic foundation is cut off - if we minded -

also that healthy marriage of the West & East
geographically & within the individual is possible

but above all Unity - but not simplicity
onward

that his theories
are basically & Unity -
wonderfully correct!
of Art, Science, Philosophy, & Religion

Why did they cry at Gandhi's good
death & not rejoice - didn't they believe?

Finally I believe the mystical state exists
in men more often than is supposed
i.e. everytime

artistic inspiration
Scientific insight
Very abstract thinking
Reverie -

• Certain types of waking &
sleeping dreaming
are in some respect mystical
states states of a higher dimension
