8mm. FILMS . . . AN ACCEPTED LIBRARY SERVICE

No longer is the question, "Do 8mm films belong in the public library?" but rather, "When are you going to offer 8mm films to your patrons?"

Every week more and more public libraries are adding 8mm films to their collections. And the reason is simple. Library patrons like them. They use them. They ask for more. They tell their friends.

Blackhawk Films provide for you a wide selection of topics and titles. You can select from such general topics as comedy, drama, documentaries, and in many variations. And because of our large selection of titles, you can select those that will make practically all of your patrons happy.

The 8mm film is no longer a toy. It has come of age. It provides entertainment of the kind that people enjoy. It provides the means to teach by way of film in the home. And because the projectors used to show these movies are relatively inexpensive, most families either have a projector or know where a projector can be borrowed. (Statistics show that nearly one family out of every nine has an 8mm projector.) The results that libraries have had with 8mm films is amazing. Many report that films are circulating up to twenty times a year. In fact the results are such that libraries who do have 8mm films find that the film shelf is practically bare most of the time.

This list of titles, under the various subject headings, has been prepared for the librarian as a quick, easy reference. Of course, this source does not give a comprehensive de-

scription of the various titles, but in most cases it does give a one-line description. Where no description is given, the title is self-explanatory or the film is one from sources other than BLACKHAWK, but is carried by BLACKHAWK as a convenience to you.

Also, for the first time, this listing carries all of the titles of BLACKHAWK'S famous 35mm 2" x 2" Color Slide Sets. No description is given, but in practically every case the set title does give the subject matter of the slide set. We ask that you consider these sets as a further addition to the services you provide your library patrons.

For more detailed descriptions of any BLACKHAWK 8mm film and 35mm 2" x 2" Color Slide Set, write to Blackhawk Films directly. If you'd like, we'll also send to your library the BLACKHAWK Bulletin published for thousands of individual movie enthusiasts who regularly purchase for their private collections. As a further service, BLACKHAWK will continue to send on a regular basis, detailed descriptions of the additions to the BLACKHAWK film line. This listing will include all of the new releases made in the period after the publication of this, the annual listing of all BLACKHAWK films.

On all orders, be sure that the order is addressed to: The Eastin-Phelan Corporation, 1235 West 5th St., Davenport, Iowa 52808.

For other information, write: Robert Evans, Sales Manager, The Eastin-Phelan Corporation, 1235 West 5th St., Davenport, Iowa 52808.

PROCEDURES AND PROBLEMS WITH 8mm. FILMS

With the addition of 8mm. films to the collection of your public library you should require no more help than would be caused by the addition of the same number of books to your collection. With 8mm. films we suggest that they be put on the shelf so that patrons can browse through them just as they would with books. We also suggest that you **do not** take reservations . . . nor inspect the films when they are returned.

These procedures are entirely different than those associated with 16mm. films. But with the experience of over two hundred libraries, we can say that this procedure does work! In the case of one library with 70 films that circulated a total of 1400 times, only one film required any repair. And reports from many other libraries confirm this same kind of experience.

We would suggest that patrons be made aware that films will work only in the proper projectors. That is Standard 8mm. films will work only in Standard 8mm. projectors and Super 8 films will work only in Super 8 projectors. the new Dual 8 projector is designed to handle both. Also ask patrons to be sure to inform you of any damage to films when they are returned. This way you will be aware of damage **without** inspection.

With this problem-less procedure patrons will use your 8mm. films regularly and be pleased with your service. And if the experience of others is a measure, circulation will be increased substantially.

BLACKHAWK 35mm. 2"x2" COLOR SLIDE SETS

Blackhawk 35mm. 2"x2" Color Slide Sets are top quality and cover a vast array of subjects and places. And, Blackhawk is proud of the fact that their slide sets are designed to give "in depth" coverage of each place or each subject. Made by the more expensive positive-reversal method so that duplicates appear almost identical to the original, these are slide sets your patrons will be proud to show. Also, many schools use Blackhawk slide sets to vividly portray to students various areas of the United States and the world. A growing number of libraries have also found our slide sets to be a welcome addition to the list of services they perform for their community. Sets may be ordered by title and by stock number directly from The Eastin-Phelan Corporation.
