Written material

Intuition is an immediate grasp of the significance of a situation without taking time or trouble to understand quantitatively i.e. scientifically the elements that make up the situation. The fact that is so does not mean that the intuitive & scientific are completely unrelated having completely different objects & yielding different results — intuition is the first comprehension of the whole. Then analysis begins to question why and causal chains are connected — then a final scientifically enriched synthesis is made

The Struggle for Health -

Man - Health - his harmonic relation with Nature - Getting his optimum

Factors - Food
Sleep
Exercise
Sunlight

Etc. Bad - Food
& principles of
Science

The history of mankinds struggle with disease & Nature - & conditions

The great & appalling picture of today - The resistance - the simple cures - the tragedy - the solution

32 for the mere lifted up has
been the ruin of a class —
The great passionate mass
Battles of humanity have been
completely drowned in the smoke
of bourgeois pill — adultery — suicide
aristocrats — and all this stuffy rubbish
will be swept aside by a realist
~~at~~ the ~~old~~ rotten old orchids before a
fresh wind — a false stuffy unreal
world swept aside — by the
real shining hard passionate dangerous
Truth.

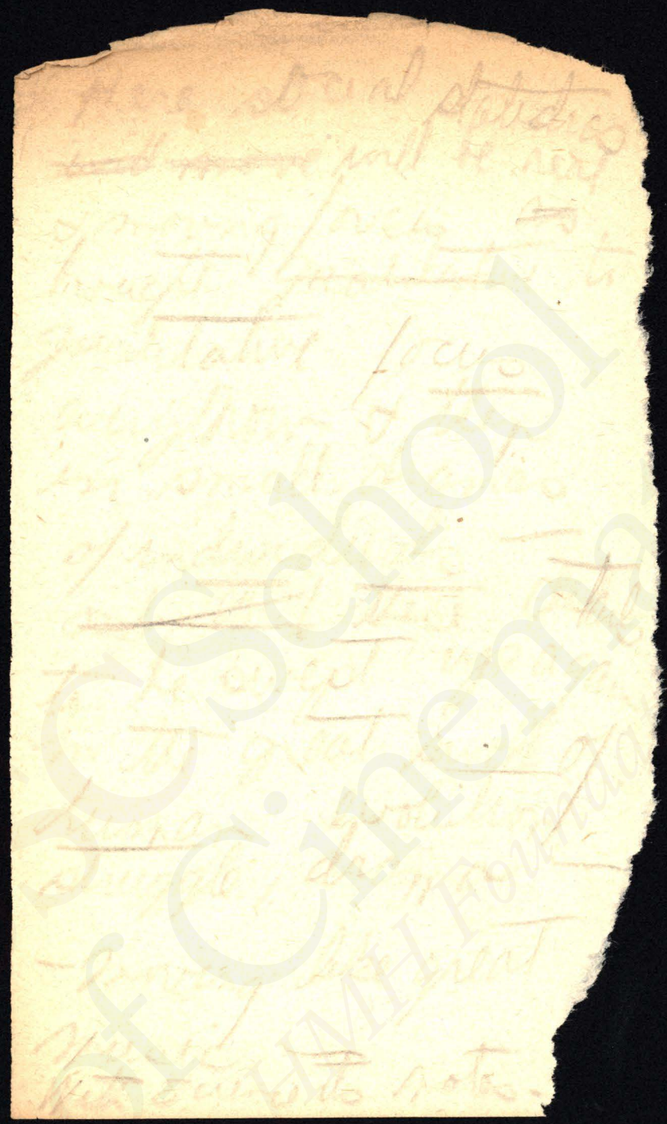
Human
struggle

for they are only
piercing the
connective tissues

found
& then
produced by out
of
new concept &
against nature as to
life will call for

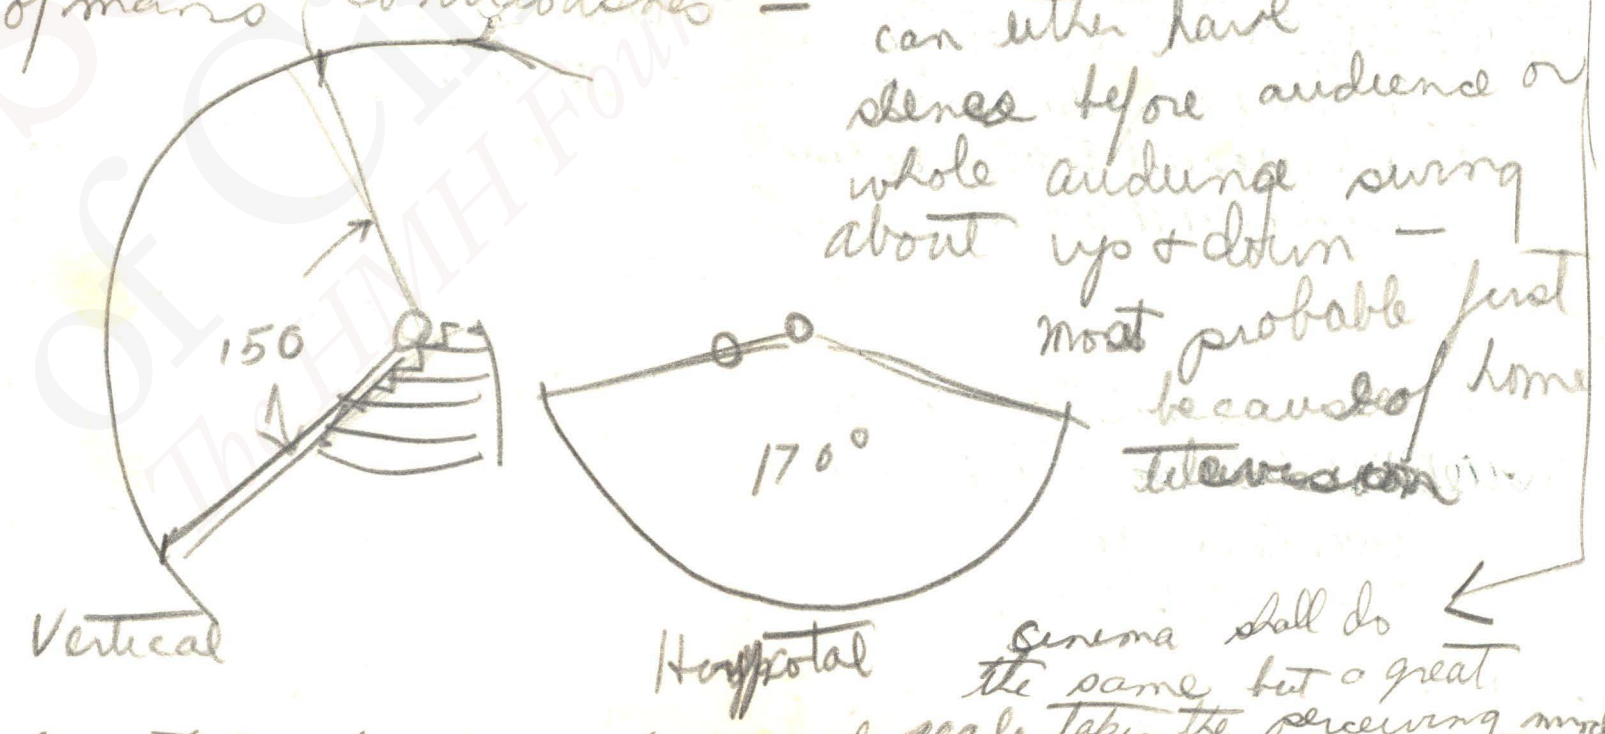
the great role + aim
of cinema will be to
go to fold up a mirror
to humanity — yet
it can still do a
great deal



Cinema ~~will be~~ is the extended mind of humanity
Through the machine it will extend the psychical consciousness
till the new psychical sphere achieved by the machine
First it will only report - take cognizance - then
it will digest this new world take sides - think & feel
about it - then love it - take it in & become it
~~Cinema~~ cinema should be constructed as if the ~~new~~ lenses
& microphones (and all other sense receivers) were
a man - Today man feels himself to be at
the center of a sphere - the universe - possibly
at the ~~point~~ contact of two spheres - The outside
& inside -

We reduce all realities to our form of perception even if they don't belong as soon as we become conscious or imagine something - for example electrons yellow balls or magnetic

Cinema should exactly duplicate the parts & forms of mans consciousness -



can either have
scenes before audience or
whole audience swing
about up & down -
Most probable first
because of time
interval

Cinema shall do the same but a great universal scale Taking the perceiving mind of man to the depths of the sea - inside a flower, through an electron & out into the Universe

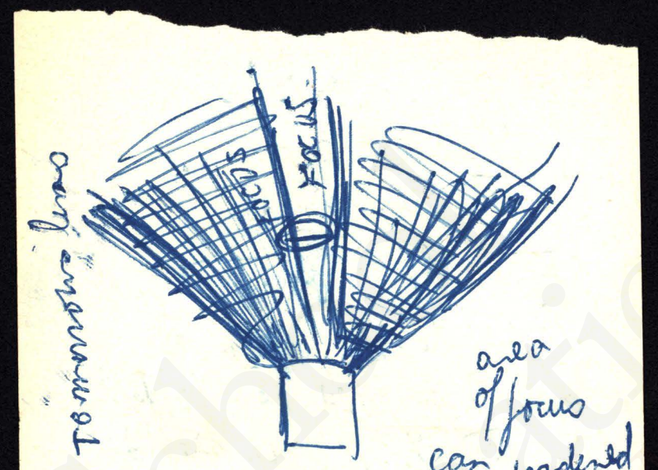
psychic realities.

For Cinerama—
there will be partial
focus lenses where a
desired field can be put
into focus—in areal
depth—while still feeling the
surroundings—same for more
explosive.

Today's zero



area of focus can indeed narrowed or shifted at will

In this way 150° vision can be maintained ~~Do to~~ without sacrificing the ~~close~~ up-

~~Selection~~ shifting of attention

Ignorance - no defence before the law (Statistics Scientific experts History)

Normalcy -

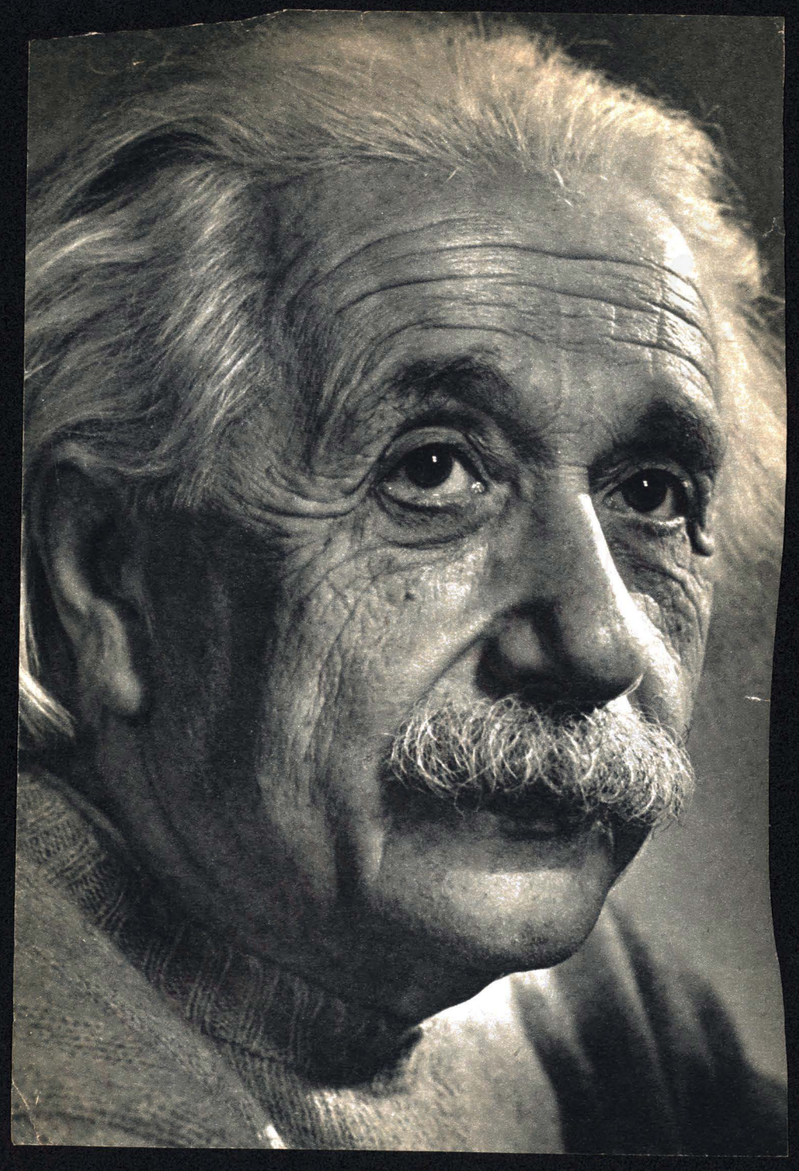
Robbery & Murder - By Taking profits we kill as surely as with a knife

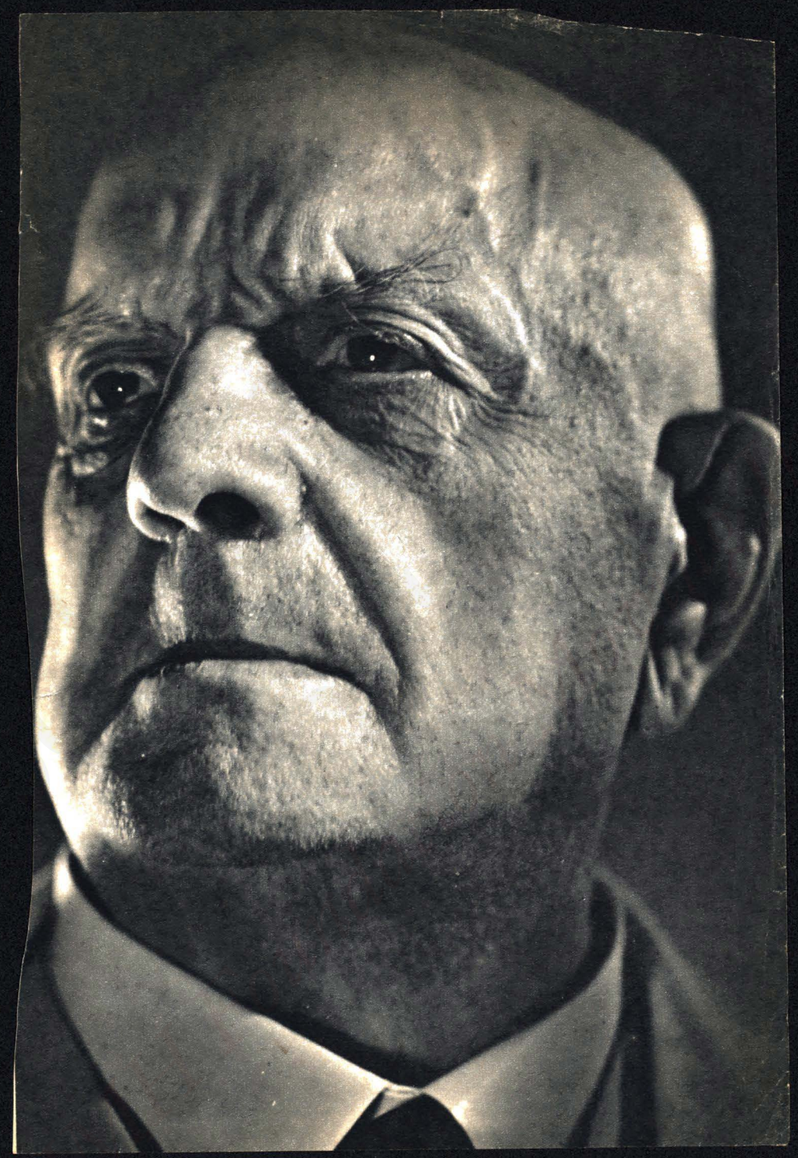
The equation of Energy

a short ~~sea~~ comedy exposing in all its classical forms the argument between Socialist materialism & liberal capitalist idealism -

(science) thirsty (water) first preferences contact with life

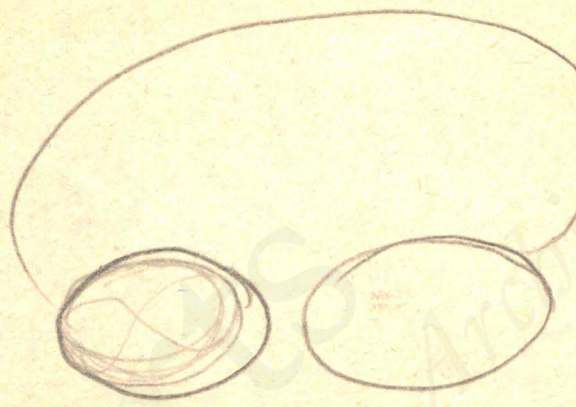
prejudice & hypocracy - segmentation - no preference lost

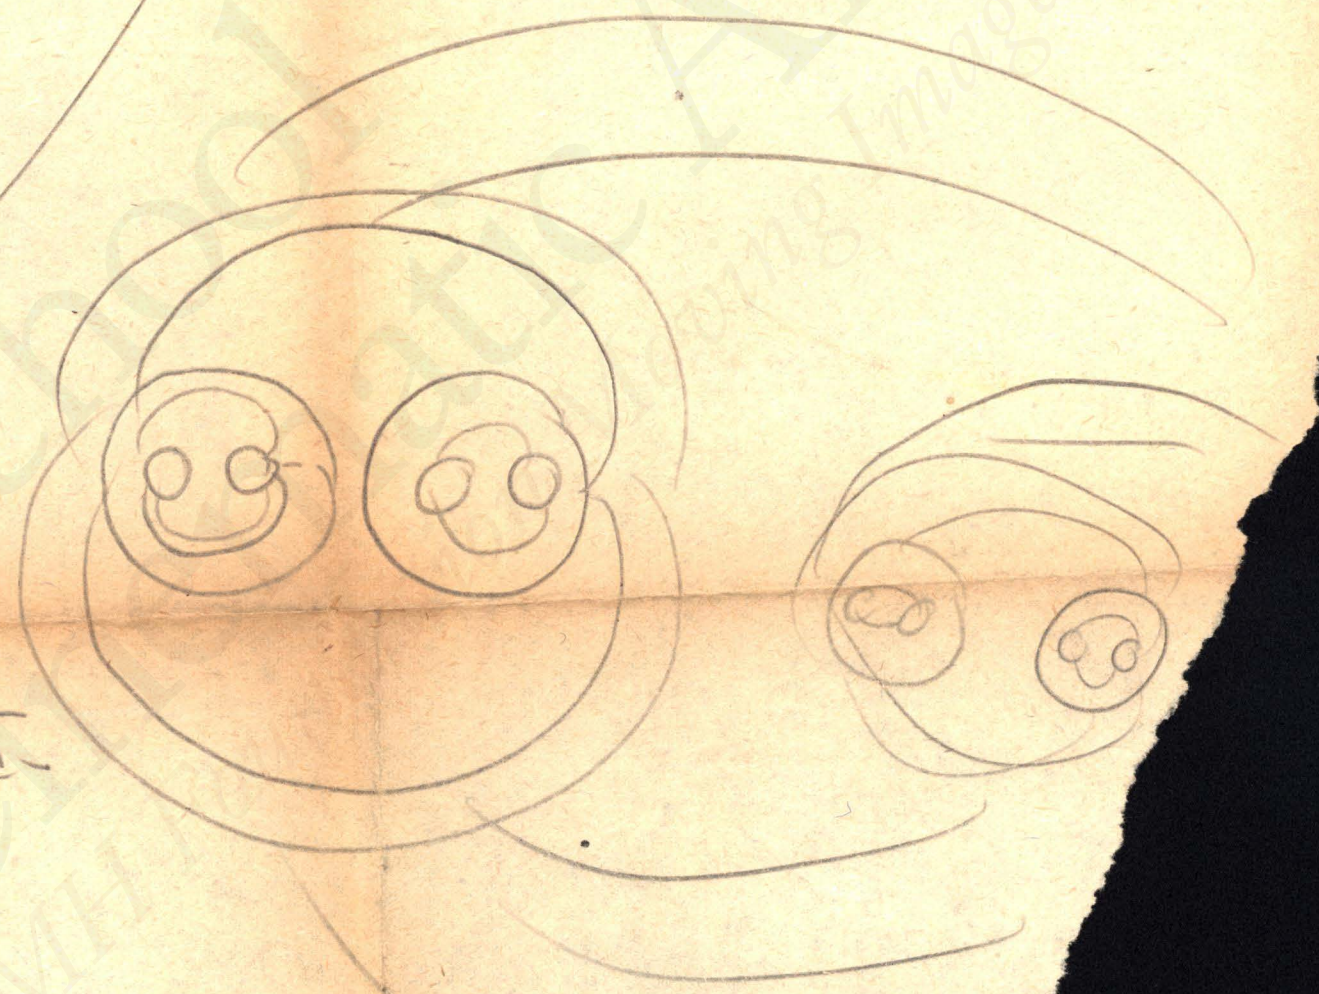




our conception of
once the relations
~~of~~ Justice, Truth, Beauty, & Health, & Goodness
are closely & clearly related to ⇆ Human
life - we can extend ~~our~~ our
understanding or cast the line of our
research into more abstract fields with
more assurance of real value & fruitfulness
intricate - direct & necessary
The great higher concepts (theoretical
spiritual values theories etc - ~~must be~~
~~intricately~~ to the tiny detailed physical
emotional realities of life - must
be revealed -

These are the source & mother ~~form~~
the force & value giver of our
theoretical work - They are
not detached but one -
Dig deep into the earth & with
your roots deep you can ~~reach the~~
stars





Man ≠ dissad

Russia - German

Life - Death etc-

etc - & ~~d~~ so the association of atoms or the building up of cells - a greater ~~con~~ richer complex ~~spiritual~~ realization of reality is built up -

The relation of the individual to the Universal is a relation something like the lines of magnetic force about a magnet.

Today's subjectivity is yesterday's objectivity

We can only safely tread into the realm of objectivity by intensely ~~living~~ folk the subjective drama of the struggle of our life against death.

a work of art is (like) an equation describing the unity of a piece of reality
particular (spiritual)

The essential point is that one cannot immediately jump to the second — if one it is anchorless rootless & unsound — but only by intensely experiencing & peopling ourselves in the first category. The ~~Ideally~~ Practically can we even in spite of ourselves — by extending & widening its spheres enter into the realm of

The relation of individual person to the Universe

Materialism — Spiritualism

Subjectivism — Objectivism

Art & Science of the first category — Art & Science of the second category —

Ideal — Practical — law — theoretical etc

Passion — Action contemplation
drama

Free Will — Determinism necessity

The second — 5 fingers — Iron necessity

Todays whole fight - becomes
an actor on the stage of
reality for tomorrows
~~ed~~ students -
first
Life must be ~~sweyed~~ surveyed - then
in time the enemy had to behave
so - or there is no law or
~~connection~~ in the universe
only ~~out~~ ignorance & conceit & lazeness do we
~~tad~~ attempt to ~~ofpose~~ embrace reality
through ideation - it asks no the
labor of hard humble honest work - its a
short cut - intuition - open to the
esoteric few - a tool of fascism -
& a palliative - to ~~cata~~ comfort troubled
souls - but all in illusion -
only by living life intensely - wagering
its battles - ~~opposing~~ its with hard work
& humbleness - & only when through savouring
maturity & time we extend the limits
of our battle our subjectivity can we objectively style
the realm of wider greater ideas bantered
about like ~~ideals~~ football ~~as previously~~ by
ideals - We must not jump
to conclusions - but calmly humbly
& humbly & sincerely work on towards them

our free will is the softness of
a flowers petal - but like it
can be caught in the ~~trap~~ rhythm
& necessity of electrons

revelation of process

Psychic raw material for study & processing

as we come closer to closer

to Nefast aesthetic visions

we hold today - which ~~is~~ have themselves of course in

attempt to continuous evolution —

you must apply Marxist materialism

to art - in particular cinema

i.e. not only the contents of art

~~i.e. the form~~ defend the ruling class

but the very forms themselves instead

of springing from the ideals of visions

of mankind (which has always been

~~a~~ lifelike & ~~hopeful~~ & dynamic) springs

from the material possibilities of the types —

technique etc - subjective painting etc -

↑ understanding how we must use

as much as possible the technical

Television is the chronical - the superficial perception of the pure reality - but only the control of cinema can give it deep meaning -

At first like in the beginning of Science we will collect & edit material from over the earth - analyzing the scientific period of classifying data -

To create the more intellectual concept Then we will find ways of creating deepening - creating life into the concept - on human terms -

The drama of elements, nature individuals, masses, ideas, machine all wrapped into one structuring climb.

There is no reason why science should not enter the field of psychical phenomenon -
From material it has gone to Social & now it shall turn its attention to so called immaterial spiritual phenomenon - In fact it already done so -

Western science will find in East an abundance of material to investigate & systematize -

After revealing processes it will with the application of technology facilitate the production of our spiritual food as it is doing now with our material food - but machine will never be able to replace man as up till now it cannot replace the soil - (but only manipulate its natural forces more efficently) because the brain & spirit of man is the soil in which all his spiritual must be planted & reaped -

a great film in color on wide screen - The history of Soval evolution - The magnificent epical of over extended revolution & class struggle - as that the spirit of growth is the main actor - we identify ourselves with it feel its rythmo and it physically pray for it & suddenly see ourselves in the broadest - historically & geographically - i.e. true perspective - & see how we in the U.S. are reactionary to be inevitably surpassed - see the line of movement as the future is clear.

With beautifully dramatic animatic maps - & visions -

IT kindly to conceive this development as
its profoundest - truest - most moving - dramatic
human terms - The struggle for the
spiritual development of mankind -
The expression of this is ~~the~~ Art
the great Art of Socialist humanity
of Tomorrow.

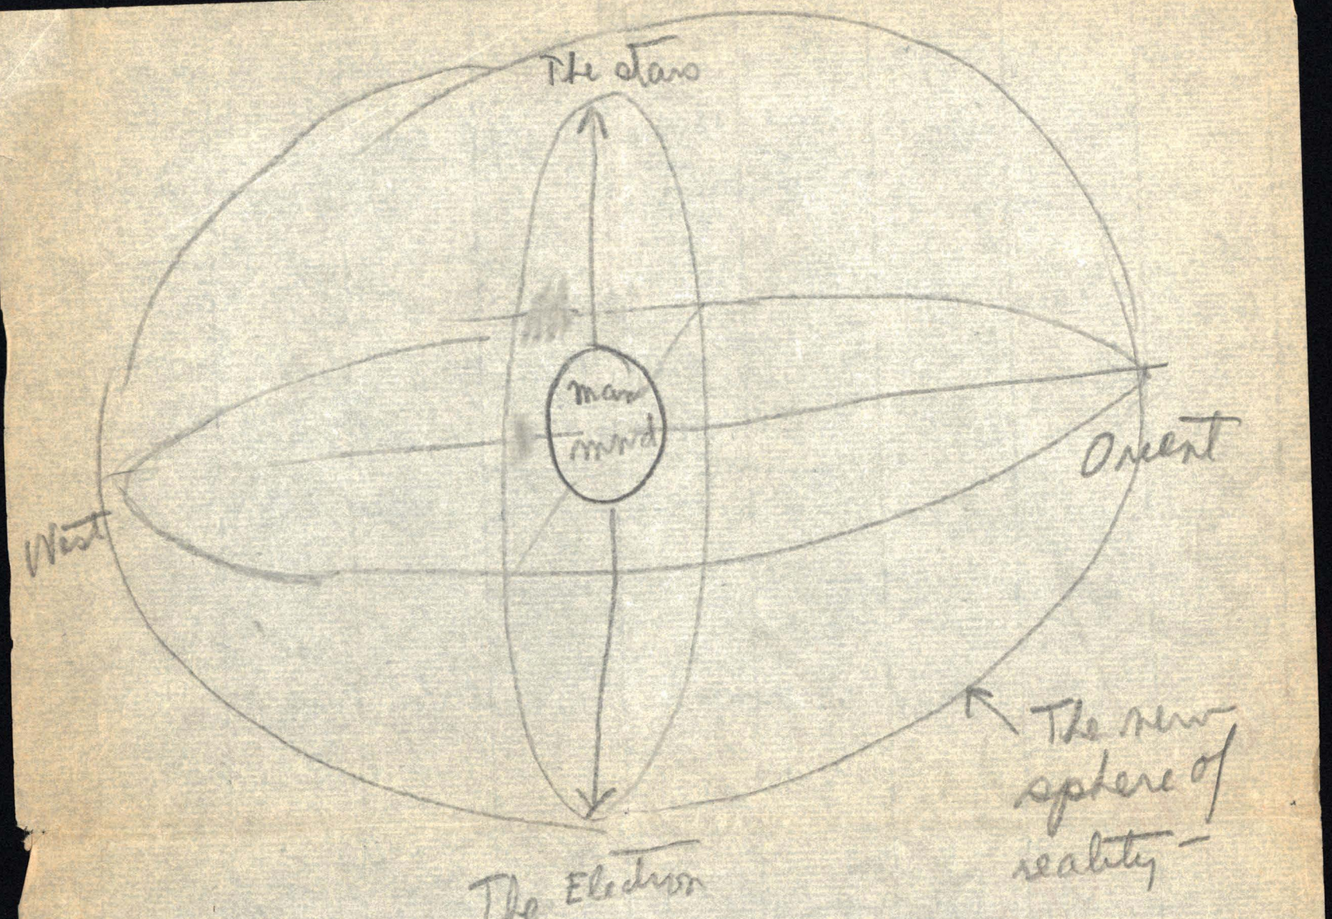
1. E
1. Depth - Summit
2. Movement
3. Drama - ~~Exp~~ Human Spirit

Relatively superficial but from a more social sense - true

Reality	art Exp.
Ext appearance	- Painting
Internal Human Mood	- Music
Human interaction	- Theater
Internal Human History Thought	- Writing (< novel, < Poetry)
Mass Humanity	- Dance
Elements - among Things	- None

All these realities meaningfully united & systematized - condensed

Their appreciation only in the greatly extended & deepened Cinema of tomorrow



a new reality that at first glimpse seems fantastic
untrue - but only so because far wider & richer
than the egotistically conceived phenomenal
nonsense sphere of reality

There is a ~~simple~~ task - first of making
more profound - the static 3 dimensional
instantaneous conception of reality - the
~~the~~ second the setting of the whole conception
into the stream of ~~of~~ Movement & Develop

"The Builder"

Then in agony he sees the flyers & the bombs — Mike is warned & searches for him trying to stop him — the dedication is ready to do him honor — Mike in filthy work clothes carries in the dead body of

Young commercial artist - happy go lucky — life easy

War - hot pilot bombardier — Blanket raids — Coca Cola — not Americans & americans — but they up & down

Shot down - prisoner in Japan — Bitter loves his actions endures several raids - sym at others

in the ruins — the boy awakens — horrible pangs of guilt

& a buddy & a desire to pay back his debt build - build - build

Studies architecture — city planning with a socialist

and playgrounds etc - put through school by his

natural buddy who is a mason —

Brilliant young architect — Take all jobs together - one

the head brains the other the spoud.

awaiting smock — The calm & beauty of ages ended

sign at night - Dark and

just rumbling of war clouds — - a slum clearance

The big dream project from govt. - a huge housing

project — he studies in the slums talks to people

wants to build for them — they love him - he they -

he guides all his inspiration as the energy of his

officers training air force training school —

as an

fight — the dedication draws near - Next decades

(New character) day before - War school

Steve walks through at night loving all the scenes of his

Note to the producer.

This film is an attempt to exploit the extroardinary haunting character of Venice in midwinter when it is deserted of tourists and romance. We have taken the elements of wintry mist, long black gondolas, and pantherlike movements of cats and tried to weave them into a pattern of perfect atmospheric horror.

The lush interiors of Venetian palaces as well as the long shadows and the fantastic reflections that fill the Venetian night, water offer infinite possibilities for a hypnotic black and white photography.

In addition a cat whose body is the quintessence of cinematic movement can here for the first time be exploited in all its magnificent potentialities. To save time and money 95 % of the shots of the cat can be done seperately before or after the regular film is shot.

As we selected places that exist in reality the whole film can be made on location.

There are only two directors living today able to realize the above possibilities completely, but modesty forbids us to reveal their names. prevents them from

However their telephone-number is: 31412.

Then again the mute silence of this water-cushioned city punctuated only by the slow lap of oars, mottoscaffo-motors and howling wind innumerable eerie catsounds can become in the hands of an imaginative sound-engineer orchestrated into a natural soundtrack of tremendous expressive power. In short this story can become one of the finest mystery films ever produced.

Numitori worker head of Atom Bomb project
~~Atom B~~ Hydrogen Bomb center -

& visits the wards -

The growing forces - & Onward =

The art of tomorrow
will ennable man to
walk down the street
of truth - of Spirit
of God - as visibly
and palpably as he
walks down - a
common street -
~~[illegible]~~ converting the intangible
to the psychically
tangible -

~~test~~ it will not be an individual man —
but "Social Man" = reality
after even beyond-life-God. He
who walks down
street of ~~life~~ is not a single life - but the life of humanity —
in the company of trees
forests - wind - animals
electric & God - with
all the passion - drama
& poetry of his struggle

pendulating maya —

a offering Spirit not
whole — but in elements
~~of air~~ food for the
dialectical completion of
mans psych — just
as a seed goes to
is apprehended by a
~~the~~ man ascending
it —

& in struggle to master
the means of the
concrete situation - we will
finally understand.
how a man does
orient & agnize/ as he
walks down a street -
Through memory & intuition
we can remember the
story of our evolution -
Science + internal
memory -

First the journey
then the beginning
& the end
individual man has awakened and
Essentially the Socialist
Revolution - represents
the awakening of
Social Man from
Unconsciousness to
Consciousness — I'll call
your attention
I will make it's role in

Further Revolutions will
be to Upper room of
spiritual ~~Spirit~~
connection - Psychic
consciousness (of truth)
To all Flora + Fauna
Rocks - elements -
Stars & electron
etc —
Dodo - All
act representing the growth
in the most direct Easy for human assimilation

The beloved is the window through which the lover is poured against the Universe.. (frames the world)

Naturally a concentrating all attention on one element permits a more precise & intense perception of the movement of that element. Each element has its montage which represents the unity of the object & the person observing

a complex of elements has its montage different - depending less on each element - but on the complex - equally repeating the spiritual reality of the situation

the

More The Mervpts - the more we
approach ~~to~~ common perception
of reality - the common the
baser - the more vulgar
the impression =

This - primarily because
dialectical (completing) response
of the spectator is excluded -
he must not complete the
world from his fantasy - it is
already whole - he remains passive
- but it only runs along with the act of completion
that the inarticulate longings of his
soul are
brought up -

Therefore we can & will approach
reality — but we must do it with
such real understanding, control
& restraint — such understanding of
the most economic interelement montage
that the spectator = active collaborator
is necessary — Then we will express
& space his soul — we will have
fulfilled the artistic function.

My ~~teeth~~ are rotten
My clothes are rooted -

~~My life is not~~

& live in a torn & tattered
world -

Sparks of ~~quiet~~ life within my
~~soul~~ heart reaches out across the
~~black~~ dark & touches
moments of sweet beauty of
the world that is waiting -
that has always been -
& that for each soul ~~is~~ ~~made~~
~~a corner of darkness~~
~~filled~~ flooding every corner of the
with its radiant happiness.

In order to abstract & substitute artificially we must understand first

We turn to nature — once we understand & can artificially

return to nature again but in a more concave ranged — selected form — as they

Canton

Agenda

Latin force dead life

in a much prettier & better way than to stage

There is the interaction of
Humanity with Nature
in search for life

The interactions are complex - crude
unconscious - wasteful - suffering
Complex speculation - the act of
Compact abstract special given
the mind to understand forces
- the processes to gain
effect even and
radicine - endurance

When processes are
understood - we
enter the period of
regeneralization -
during these processes -
in a more natural
form - akin to the first
but

A great film on the flow of
"Human Energy"
to creative workers the great
Sources - development - human ideal
frustrations - how one individual
robs energy from the next -
how one Group - a class or
a nation - lives off the
energy of another great group
- The great crying injustice
whose profound correction is
the ~~ford~~ ~~foundation~~ foundation
stone of the new morality of the
new society
The first assumption - Life and Social
- First Consciousness of relation
Energy realities
Second The Moral Choice -
Third - The enactment & enforcement -
Socialism

Creating the Socialist
The future

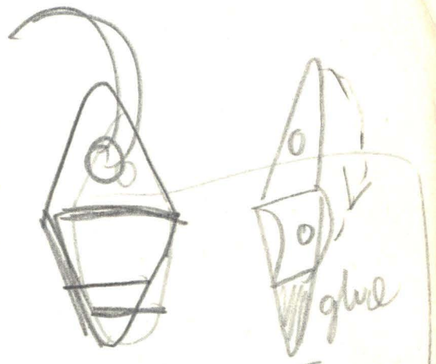
formerly abstract - It's crying human drama
of humanity struggle for a
higher justice
for more
life

Sound that kills -

The quiet country - Head of man mechanism of sound selection & hearing head moves across space & time into a sea of modern noise - motorcycles machines, crowds - 99% unwanted Collapse of nerves - slow upgrowth adaption - but at price of enormous energy - up to a certain point then exhaustion - deafness - our modern destroyed world Vetoed - destroyed by word one enjoys saving but dates hearing nose - The new social sense - What can be done silence - the world become peaceful - & man become calm again - mature evolved person complying to nature.

The Nazarene
by Sholem Asch

~~Jesus~~ I was a man of Nazaren
500 pages — the 1934



with 2 tacks pictures that can either be pasted onto walls — hooked on wall nails or put on wall loose leaf.

Sell d dea to book companies — (/or calendars) for free distribution as loose leaf book lets under different headings —

Scienc
Art
Biography
Novels etc.

a collection of paintings, wood cuts, photographs
i.e. illustrations should be made with
very characteristic lettering that
capture the essence of the great books
— Beautiful illustrations with author
number of pages of book & statement
of these — to hung books out of the
verbal abstract & develop a taste in the
a person for reading an appetite

Ultimately — often people read books because
they are excited by the sight of them.
People cant afford to own all the
important books & put them on their
bookshelves & they wont trouble to go
to the library without a wetted appetite
To bridge the gap a compromise should
be made in the way of these exciting book
illustrating tablets — that can be talked on a
Wall or baled through — while one is reading
to trip to the library & the actual reading.

a conpete with its least—
Actually the birth of Socialism is
the birth of "Social Man"
the latest & most complex animal
in the ladder of Evolution—
whose body consists of Men
machines — & materials — in which
thoughts & nerves & imagination
is object — art — films etc —
whose egg is the earth — whose
home is the Universe — —

civilization is the
process of building or
growing — =
Social man
(~~civilization~~)
Too many
affinities with ob.

Social animals — bees — etc — & species of
Fauna
Flora
its earth & many differences which must be
studied & revealed
tied in a net about

Here there is a seeming ~~loss~~ opposition
a chord to make —

The incorporation of all within the made
independent form of individual man —
~~external~~ i.e. concretized his
experience — within his body — in his
very tissues — a concretize &
facilitate his experience without his
body — clothing, tools ~~etc~~ films —
etc — applying possibly weakening the
individual all to build up the
corrective tissue of Social man —
— The conflict is seeming — Life learns
no choice — profound study &
understanding — will reveal — a
mutual development — & find a
harmonious way of applying it. —

But there is no escaping the fact an isolated live cell cannot survive
as an amoeba — a highly civilized man cannot survive in the jungle

precise laws of existence & practical ~~ways~~ ways of
development - This is why we always say an
artist looks within himself -

The things inside man are his personal development
The things outside man - is a very real
environment - tools - senses - &
thoughts of Social Man - a great
organism we are painfully building up.
We individual cells & are analyzing ourselves to
a more complex animal -

We do as best guarantee of the
ultimate unity of Social Man
we should try to contain as much
development as possible within our
individual selves - so that the
ultimate complex will be firmer -
(Chain link - House brick etc)
Free ourselves as much as possible from clothing
cooking - capsuled Experience etc - & develop
as much as possible the indispensable forms of
social man - Dams - Canals - telegraph etc

these characteristics are related to internal - chemical conditions which are the basis of sickness or health.

Millions of years of material bodies interaction have drawn these conclusions & passed them into being & then passed them on in matter making it an inherent law of the physical being - a very dimension of its existence. Life is is the changing of the cycle of Energy - Matter energy - into a Spiral - ~~raising~~ condensing energy up to higher forms of matter which in explosion release higher form of energy etc

These truths delivered by the idealist intuition do not something you either have or don't have or something that drops from the sky - (in the last case all idealism is an egotistically ~~lack of~~ sophisticated form of ignorance) but something that concrete material origins ~~create~~ ~~have after process of~~

Physical action
Seeing
Smelling - Hearing
Tasting
~~Feeling~~
Love making
Eating
Sleeping
Breathing
Energizing
Desensitizing etc

+ also feeling - thinking
understanding - passive
consciousness + being.

So called
Intuition - is a power
we all have + by which we
guide 95% of our living.
It is the experience - the
one [redacted] knowledge
painful problems of the
race - solved + raised to the
level of being -

Science is the method of opening up
the very processes + laws of experience so that
we can ~~use~~ control it, condense + use it
for our own purposes -

For example - When we see a face with
black circles, pale - wrinkled etc - we
called it ugly - we intent that its meaning
illness - ~~we draw away~~ - we call it ugly
Thought Sentiment - art
Science
we draw away - Yet we do not know
action - practical

in a modern scientific sense why or how

cause & effect relations between - man &
universe - between man & work - between
one part of the work & another - between
the work & the spectator - between the
spectator & the universe.

Education ~~as~~ should be the development
of individual man - so that ~~he~~ life ~~has~~
~~contribution~~ to should be as long & full as
possible - full meaning contributing to the
maximum universal & development of Social
man. all man's faculties can be developed
& extended from material to spirit - from
nature to art - from unconscious &
subconscious - to conscious mastery
by reproducing in condensed form the
conditions & functions by which ~~long~~ life &
nature brought them into being &
developed them in first place.
This applies to all faculties - but their
development must always be conceived
in the proper dialectical relationship to
the development of social man.

To lose one harmony before finding the next
is the terrifying thing - & yet it is inevitable
~~in~~ as in everything that grows that this
moment of pain — this shedding off of the old
skin — this bursting through — shall occur —
This moment of pain — is the inescapable
~~[illegible]~~ companion of growth —
This anguish of being lost is the necessary
price of freedom
in every moment of change ~~[illegible]~~ the
deepest pain comes not from the content
of disharmony (~~Hook~~ ~~can't may be~~) - but a
disbelief in harmony itself. The
~~Atoms~~ ~~casts~~ man leading into Chaos where
effects are unrelated to causes — where
intelligence is useless ~~applied~~ effort the ~~[illegible]~~ of a
fool — Terror, panic & disintegration of
~~his~~ personality follows ~~[illegible]~~ ly.
Every ~~[illegible]~~ e work of art regardless of its
superficial content — Every finding of accord
is a reaffirmation of harmony as against
disharmony - The very act of painting or record
presupposes - harmony - Harmony - Law abiding

~~It is/ooked to pay~~

The develop of Social man is a fact - inevitable
expression ~~of~~/manifestation of the interaction of the
overwhelming forces & forms of our reality.
Our conscious can not effect it basically it
can only complete its efficiency from 70% to
90% - reducing our pain & suffering that
much.

It is/ooked to that the organism of
Social Man is a great animal & try
consciously to fell our duties as ants do
- or to say animals are miniature Social
Mans - The analogy serves only as as
a tool of understanding - the only
real relation is ~~that~~ common subservience
of both Organisms to the abstract forms
of our Reality - Space - time - movent
gravity Adhesion etc.

Through a profound analysis of these abstract forms we discern definite laws of health & disease that apply equally well to the organism of man & the organism of Social man — Nutrition, Circulation, movement - necessity of growth - flexibility - disinfection etc - The more abstract the form the more universal —

War is a Poverty is a cancer War is a fever etc — are true — not in a literal sense — but in their common relations to more abstract forms - of matter, space, time & energy that govern our World.

Priest brings them paper & pen

Car - Papa - describes wealthy bourgeois life disagreement with fascist father - student days - meeting - Anna — looks at them pardon anti fascist group

Priest enters - says they will put in a demand for pardon - takes confession of young peasant -

She talks to - Wall - pardon me my love for bringing us here
then days love - nights in bed
feeling the children in her womb - life itself

Her listening to the silence on the other side of the wall -
~~suddenly tears start into eyes~~
~~they murder the babies~~
~~two armed guards~~

Suddenly a bolt jams open & his dream father is cut short - Two armed guards come to him - pull him to his feet & take him out -

She listening by wall suddenly hears bolt & shuffling she runs to shutter door - hears cry of her name - runs to door (as he pulls away & call to her)
She hears no more pounding

She frightened pressed against the door & begins to weep
fade out ~~in dark~~ in tears & to
or the beginning of their courtships how young & handsome - their love - the political ideas she didn't understand ~~father~~ him as a young father ~~she talks to children~~ asking ~~to study to study they~~ on his flesh to understand & carry on

Housing and clothing which are our outer skins (1
should be as flexible as our skins are flexible
and adaptable as organic animals — i.e.
approach more the organic —

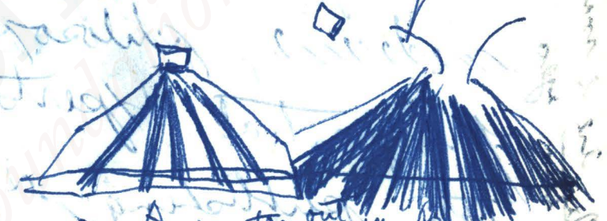
Walls should go up and down at will —
Roof open — close — admit or shut off light —
hot & cold —

a closed study with culture of World Machine
must undertake this silence their influence & learn from them
& should & will create a real
democracy of ideas & production —

Here the whole people should be
invited to send in their best ideas for
clothing, housing, machinery, sports,
medicine, philosophy — where a board
of impartial experts would review, criticise
then publishing & putting into effect
the best of them — & like many they should
send in stories, paintings, films + suggestions
etc — That most important ideas of
everyday organization so that we have a true
real flow of spiritual intellectual creative power
as we do political power to

This population are a mine of Great Ideas — put about the most trade

The great news - Up & Down - dialectical (2
flow of ideas will become a reality when
we analyze and follow the Concept
of the Social Animal - Every cell
living ~~accumulating~~ fighting death
accumulating experience - sending
it to the central brain for
evaluation & integration - awaiting the
common diffusion of the ~~good~~ value
created by all the other specialized
units - The Social Animal
analogy - Physiology - Sociology
in Sickness & Health - a useful
guide to action -



- ~~Then~~ We must give the people
~~opportunity~~ of expression - When we lift the lid from
the top - When idea will have a listener as
critic - as real creative living use - the
great thinking ~~power of the~~ mechanism of the people
will be set into motion - (Nature never

practices or creates what cannot be used
and the people will think of millions of
ideas - Socially organized Culture
will have as great a rise in ~~as~~ quality
& quantity as the Socialized production of material
goods - Every human being ~~shall~~ will
be a thinking unit as well as a working
unit - (as a matter of fact they will)
be united & indivisible)
but the thinking will eventually predominate
and these thoughts he should offer
as freely as his labor & The whole
realm of spiritual assimilation, digestion
comprehension of reality - will be as scientifically
understood & conscious as are physical
realities - and ~~the~~ spiritual wealth will
be offered to best of each ability - ~~and~~
organized & distributed to the whole of
humanity freely according to each need
(along the same lines as social collection & distribution of material goods)

and there will follow a rise in the spiritual power of humanity as unprecedented, steep & glorious as the rise of our modern materialist power

Today the solution of material wealth of this equal animal to the great problem - but tomorrow the great problem & task of humanity will shift ever more to the great development of the ~~Spiritual~~ (conscious - Supernormal Spiritual wealth of the Social Animal - Spiritual material

This should be the basis of your great study

socialism 1950 2000

"The Spiritual Wealth of Humanity"

First make a careful study of ~~evolution~~ creation, organization and distribution of material wealth - as solved in the latest forms of Scientific Socialism

Spiritual Wealth

Material Wealth	Form	Spiritual Wealth
Transport (land sea air cargo Central Storage Depots	(5) Collection offered willingly joyfully to the best of ability	Communication – Telefone Telegraph Post Television Cargo Transport Central processing Depots
Assembly	(6) Organization – impartial by experts (well trained experienced always developing)	Boards of impartial experts = criticism of televisions = intellectuals = artists Writers etc selecting – weeding combining into more conscious forms.
Food clothing Housing Medecine gadgets Dyms Transport – community stores – every few blocks – Hospitals	(7) Destribution To all of humanity according to need – according to desire & ability	Education of Books Journals – Films Foto – Music – Theater – Opera Ballet – Training of interpreters Miniature Gallery of Whole world (museums – etc)
Cooking – eating restaurants Wearing clothing Living in a Dwelling ~~Hospitals~~ – Clinics Medecal Curing Labor saving devices Dymnasties etc. Physical Health	(8) Consumption ~~Scientific study~~ Most efficient Consumption for maximum nutrition from each given quantity greater LIFE of the Social Organism	The art of Reading Thinking Looking at a film painting Play Music listening to absorbing & uniting all Goods ~~Cultural~~ Spiritual Being

Preparation – Planning – Time – Order – nation – Conservation – Economy

A) The great discovery of ~~would be~~ Bourgeois culture was to begin rendering steps ① → ⑧ conscious for the individual

B) The great work of Socialism will be the rendering of material wealth ① → ⑧ conscious for the Social Animal

& the realization of the

C) & the great work of Communism will be the rendering of ① → ⑧ of spiritual wealth conscious for the Social Animal.

Each stage ① → ⑧ must be studied scientifically & continually perfected theoretically & practically

① → ⑧ flow continuously in a natural & uprising dialectical circle (using spiral) —

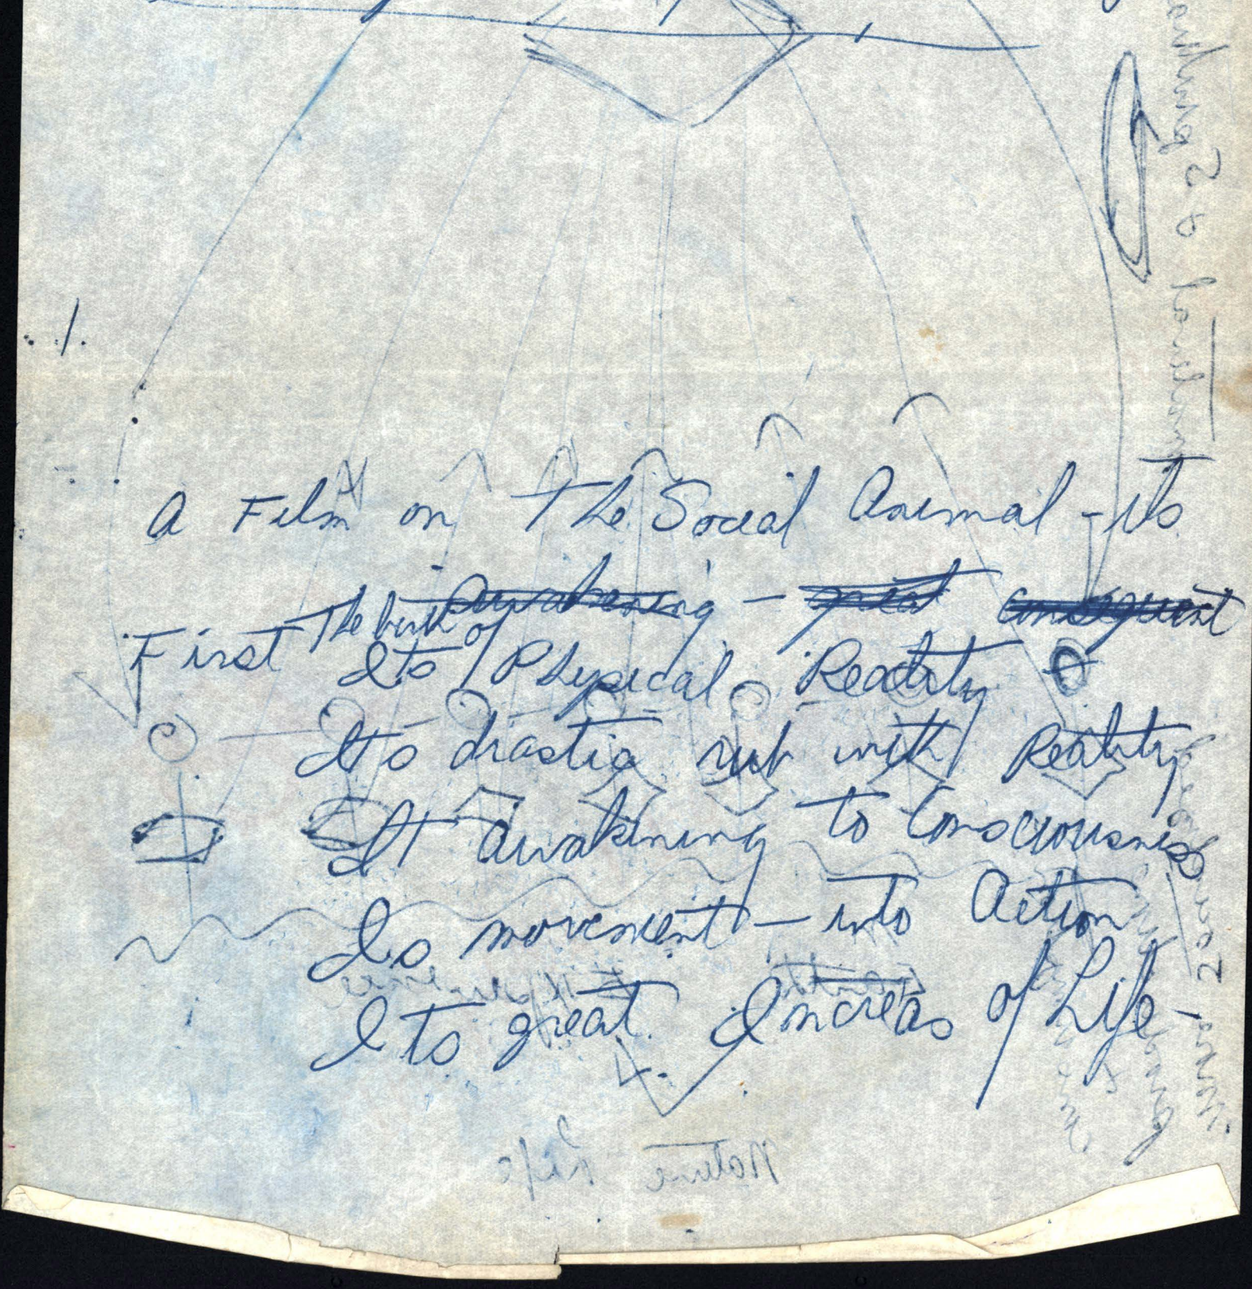
And then of course there is the same organic & dialectical relation between the

material & Spiritual worlds of production
The distinction is purely theoretical yet
exceedingly clarifying & useful in that
form
a third work must be devoted to
the integration of the two spheres
or better yet — the central
theory of production of Life
of the Social Animal must
be studied elucidated &
eventually realized (in practice)
as one organic unity —
The great march of
humanity ~~is~~ forward
greater & fuller LIFE!!

(8)

(7)

T.A. The great development of modern times is the awakening of the Social Animal to Consciousness — & its full application of its powers must follow naturally.



A Film on The Social Animal — its

First The birth of Physical Reality

It's drastic war with Reality

It awakening to Consciousness

Its movement — into Action

Its great Ideals of Life —

There is are fundamental processes of growth ~~which~~ (let us say life) that ~~always~~ never cease operating —

They are curiosity - investigation
attention - understanding -
~~[illegible]~~ —
drama - struggle -
excitement - expression

The human being to live in the exercise of his vitality - in the self conviction of his vitality ~~to~~ carry out the process in fertile or infertile grounds in healthy or unhealthy persons - but he will carry them out or die - it is the very essence & law of his existence

When man cant find drama color truth - expression in love he will find it in war but he must have it - if he can in art he cant find it in contemporary vital theme - he will breath

USC Schoo of Cinematic The HMH Foundation Mo

The difference between the pure & minor arts or art and artiganary is that in the fine arts / the materials are arranged to manifest a spirit message - i e the spirit dominates whereas in artiganary the artisan uses his sensitivity to discern the form most naturally or expressive of the qualities / of the material - i e the peculiar qualities of the material is the starting point not the living soul of the artist.

pure arts express ideas & feelings of primary importance for the survival, progress & joy of humanity whereas the artisan tries to give pleasant harmonious form to material objects of utilitarian character

The limitations to her originality, address & variety are much greater because he has as well as/or to satisfy the demands of his concrete materials & practical utility.

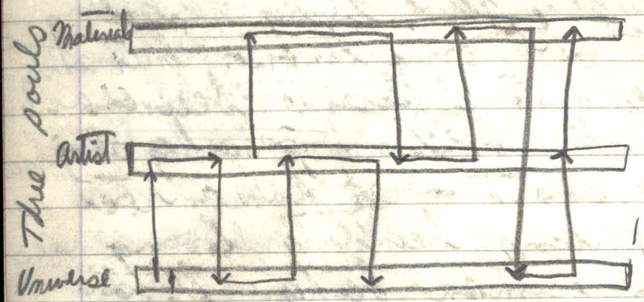
A work of pure art is great or beautiful in so far as it perfectly, accurately, economically & completely expresses the profoundest of true spiritual realizations.

The beauty of work of art is only less in the extent to which the form utilizes the peculiar nature of the material & fulfills its utility.

But why the human heart responds to certain abstract forms as beautiful and others as not is more difficult to understand. In the long run the reasons must be the same. Though the feeling may not concern society humanity or God, it is now the less a real & valid feeling - a feeling deep in the subconscious in the laws of our limbs & senses and the extent to which the form manifests this feeling economically, accurately, fully it has the power to organize similar feelings in our consciousness and adding to energy & vitality - our life it gives us pleasure makes us happy & we call it beautiful.

In art the flow is always two ways & mutually enriching. Between the Life & the Artist & the artists soul soul soul

and the materials soul.



When you have discovered the spiritual essence of the thing and are full master of your materials (media, techniques & materials) you can begin the passionate labors of building your work of art.!!! ★

When you talk about something you can have opinions — "think about it" and even have illusions that you know — but when create the physically spiritually alive thing — you must not only know but be — It is like the difference between a thousands books & graphs about literally about — a human being and a living breathing loving crying human being — the stream of energy & life is limited out of the just limitless out of the second. Which do you think is more difficult, more electric, more worthwhile realizing?

Cinema is somewhere between music and philosophy (science)

There is no question that all contributors to a film are valid artists insofar as they [redacted] manifest a general state of feeling in the particular - and only in the particular does zero become infinity. There is a qualitative difference however - & the artists become more or less artistic or creatives to extent of the breath of their generalities & magnitude of possible particulars from which they can select to express their generality. In case of cameraman, actor, cutter, photographer [redacted] may succeed in expressing deeper significances with more subtlety than even the director contained - it is usually the director who focus directly the deep ocean of life - formulates of conclusion and weaves with a million cinematic elements & possibilities to give it life. [redacted] Then he avails patterns of his concept which until or film is still general to artist - collaborators who lend all the talents & means at their disposal to concretize & particularize more & more until the idea leave theatre or film

Since the ~~[illegible]~~ concept is only portion & their means though manyfold are limited - the significance, difficulty & creativeness of their work is less than that of the director - but still infinitely important. Remember these are only silly quantitative words - the important thing in life is to do the best you possible in your field - say something (& die in peace).

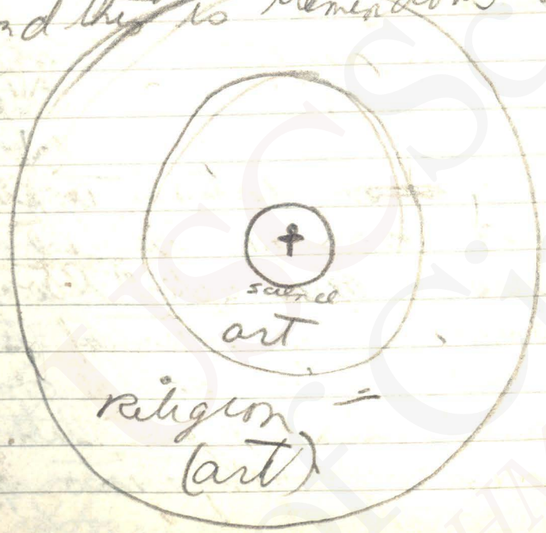
Cinema is not picture that move - but movement that manifests itself in ~~[illegible]~~ images - ~~[illegible]~~ because images are exact & often contain exact ideas & associations - an element of philosophic ~~exact idea~~ exact ideas is inherent

in pattern of pictures or of things moving

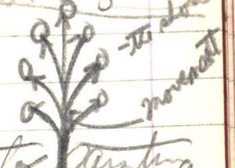
to cinema - but shots are like notes of music - large notes - rich with thoughts all the better - but ~~[illegible]~~ that fundamentally should be used as quickly & fully as musical notes to manifest - a movement - a dynamic mood - a living, breathing, growing - ~~[illegible]~~ and dying! - spiritual flow.

Art is not merely language in the sense of communicating what is known - but is a ladder - a search - a help to thought & feeling - a tool which must be used & aimed to realize - Art portrays for man - the whole - the whole of life & universe - and all its dilemmas which man knows exists feels reflects about - but yet in

with his science & logic
cannot weigh measure
or understand or in his
practical everyday affairs
cannot express or dramatize
– Religion fulfills questioning
& wondering – & ecstacy
of all that lies outside the
growing field ~~of~~ knowledge
and thus is timeless



ancient art has restricted itself
from the full range of religious
feeling but will expand again
~~to its natural subject matter~~
~~& use~~ ~~and itself~~ occupy
itself more directly with
its natural subject matter &
source of inspiration when
the raging confusion is
cleared and the terrain is
sures underfoot –



Cinema ~~is an~~ contrary to existing
is not concerned with the
expression of character through
an analysis of external shapes
& colors but by an analysis
of ideas internal functioning –
dynamic-changing-forces system
& impulses –

For example - Painter
to express ~~a flower~~ the
sweetness of a flower
shows its light any colors
- the translucent petals
graceful habit and of its
lights etc a creative artist
~~can~~ can express the
same sweetness through
the burst of life from the
seed - the unfolding &
anxious yearning of
leaves for sunlight - the
seeking of its rootlays
for water - the gentle
toss of its stalk in the
wind etc - its closing
petals away from the cold
etc

Reality is Reality - one
& whole - each

art manages to express the
whole - through expressing its
past ~~in~~ its ~~time~~ - ~~slightly~~ its
concentrated essence - ~~which to~~
~~be~~ which a superficial
comparison will seem to be
over expressed - over stylized
slightly characterized - but
in reality isn't - It is only
that in life all elements /
color, line, movement, sound
etc compete for the spectators
attention & ~~from~~ the
~~Critic~~ accuracy of his perception
therefore remain on a very
superficial general plane -
a developed artist - manages
to exclude all extraneous
aspects & to profoundly observe
& trace the one he has chosen
condensing it in time & space -
a sort of specialized ~~observing~~

a fear of own imagination — the timidness of possibility - this lies the yoke of tradition in

Cinema is specialized in movement — evolution change, flow — growth decay + function & interchange.

I am convinced that great talent exists everywhere it is only millions upon millions of individuals leaders lacking the time & means are completely unaware of simple ideas that once comprehended like a small key would open the locks & release floods of talent - a thin veil of ignorance mistaken for a thick wall

Bourgeois individualism tries to make us believe that

← They don't climb the heights because they don't suspect they exist
← knowing them is half the climb!!

If a man has talent - it will come out under the most oppressive condition & the poorer he is so much the better for his art & soul when he starts — They say this to placate our anxiety over the tremendous waste of creative genius in our slave society. But this just is not so — Today we must free mankind materially & even then great seas of creativity will await the arrival of an idea - Here the Flow — / Reason, Logic, Intuition Such ideas - are - God, Soul, One, Universal, Consciousness, Quality Quantity / Art, Science Religion, Society / General Particular - Brotherhood - etc — It is in the spread of evolution & and above all the spread of such ideas that the word civilization has its meaning -

Like the flesh of a human being is the material manifestation of the spirit (moving) so the shot is a manifestation of the cuts (etc) movement -

The spread of a process or idea - deepening - overflowing from one container → one man → an institute → Society

Life

Christ — The Church - Society
Pastern — Pastern dust - Society

One man → several men → (specialize & collaborate) → an institute (reject & collaborate) several institutes → Society → Humanity - Life -

Jesus - The Disciples - the Church
several churches organization - Christian society - Humanity

Cinema
Lisandr - Cinema Center - General production - Society Humanity

Ideal cinema construction -
clearly blocked in action that conveys a definite ~~act~~ rational idea ~~to the next~~ cut is correctly dynamic montage. I.E - the montage is still like music arrange to create emotional effect & atmosphere but the notes are like little packages containing idea -
The content of each shot tells the what - the (~~montage~~ relation between shots tells the how.

Montage is the music of ideas

idea idea idea idea idea

Lens is the relation of thought + feeling
present + art
of the meaning of Philosophic music
Within the plot - the rational
intellectual
philosophical
idea (not)

arrangement of - The emotional
Plot atmosphere
artistic reality
of human living
reality of the time.

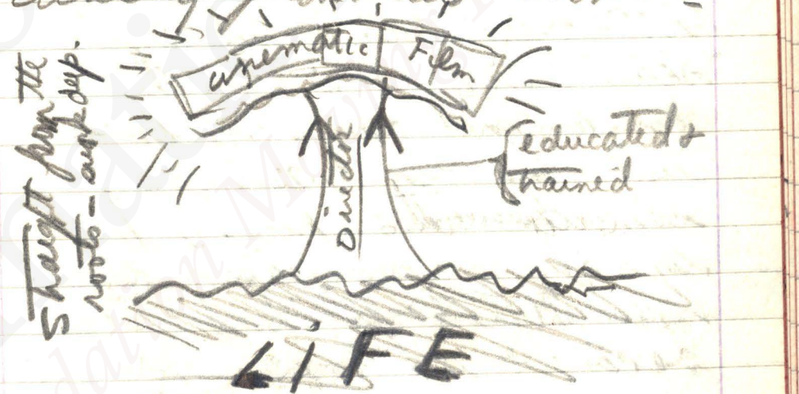
Based on religion -
drawn from life, expressed
through
Lifes scientific drama
by a western
Yoga.

severed vivid exalted profound
living human consciousness

The director should never work
from a script or book -
but draw his impressions from
the pulsing face of life -
He should read books
about his theme only to
extract rough principles which
can guide
his first contact with living
people & places. They to
all the difference in reading
about a scientific discovery
& learning it from the lips of
the discoverer. There is a
telepathic fire - a transient
impulse which he or any animal,
plant, rock or star in the
real particular conscious
reality that flash makes on
a white page can only palely reflect.
And this is the first vital fact

of ~~the~~ real spiritual creatures
& not merely a dull, stale
mechanical reflex of a
mechanical reflex of a
mechanical reflex. And
only by making the goods
of life with his own two
feet — can the film artist
stay fresh & creative
& vital and, above all ~~that~~
enlarge his cultural &
philosophical & humanistic
horizon — ~~keeping~~ keeping the
spiritual evolute that
becomes as complex &
profound as the painters
poets or musicians.
Leave the studios & the
scripts — take to the roads
with your bare feet —
What of it if you make

10 good films instead of 50
lousy ones.
~~With~~ With culture only
as a guide might live fresh &
and be the midwife that ~~gives~~
~~birth~~ cinematic forms
directly from its womb.



Fresh intuitive — from the
open womb — !!!
Wisdom, free courage —
& Work — up !!

How ridiculous and unnatural it is to keep or plant lying a tot to bath all day. depriving it of all movement + muscular + nervous development. a modern room is dangerous with high chairs - sharp ~~tops~~ angles & objects that can fall on baby or doors that can open suddenly or run all this should change — Everything should be rubber soft - low + round — no loose objects small enough to eat — gay colors - plenty of light & fresh air —

slide doors with rubber edges etc —

page 22 The best of all of course is

just a free open lawn — & let junior run as a sponge wild to his hearts content.

Two long "Films"
Wonder —
Man from moment of conception to decomposition of dust — The magic conception evolution of embryo — ~~The~~ Birth discovering a new world - evolution of infant - on all fours — head grip ~~and~~ feast feeding walking upright ~~fall~~ elders - the birth of ego child society - stool — The fever of growth - the birth of sex - the fever of knowledge development — First love rebellion intercourse - travel work — struggle for harmony ~~internal~~ external — Discovering Society Work - Hopes - ~~Seclusion~~ Marriage

Discovering death

responsibility - children -
disillusionments - suffering
(loss of parent or child - divorce)
maturity - career - politics
philosophy - authority
menopause - decline -
old love - Grandchildren -
sadness - Wisdom - acceptance
fear - death - Calm -
Universal love - Hope -
into darkness - Tears -
decomposition ~~- dirty~~
~~pity~~ culture & nature
~~soul~~
~~sadness~~.

Woman - evolution
menstruation - full power
love - a man - intercourse
marriage children -
household - quiet - struggles
- ideas - newspaper

love amongst children - hard work
old friendship - sweet flowers
death.

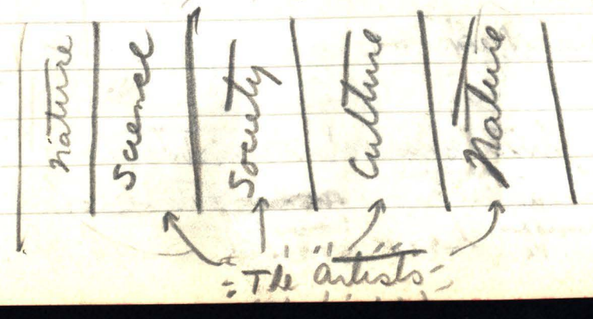
Man is the basis - the measure
of his environment & universe
Study his proportions & you
will understand his architecture
study his bones & you will
understand his engineering -
study his skin & you
understand his clothing
Study his sense perception &
you understand his art -
Study his logic & you
understand his science -
Study his soul & you
understand his religion -
Study his growth & you
understand his society -
Man consciously & unconsciously
is the maker & measure of his

universe - the natural laws
with ~~reason~~ & without ~~it~~
~~the case~~:
a simple act of learning
is nothing less than the
world attains to maturity.
The work men - artists
& scientist is to consciously
& more efficiently carry out
the ~~task~~ task of
evolution by depositing
experience - awareness -
knowledge & control - into
life ~~yto~~ the tissues of
mankind - The goal
we leave to nature to
reveal -
must to-date -

Every film should reveal
the scientific, social &
spiritual aspects of its subject -

as the three completely human,
(abstract - false) - ~~[redacted]~~
artificial ~~[redacted]~~ but very helpful
workable divisions of a single
(psycho - physical) reality
God!! - Nature!! The Universe
All!! is one!! Reality!!!

and the artist using all three
as roads of approach must
take the last steps of flaming
passion and piercing
intuition - evaporate all
divisions and embrace Reality
directly - The essent living Thing -
= reality =



The Perfect Working Day (Intellectuals)

8- Rise - Wash - Light Exercises - Air
8:30 Substantial Breakfast
9 Rest Raw-Fruitarian
9:30 Work -
12:30 Walk
1:00 Eat Raw-Vegetarian
2:00 Rest (Naps)
3:00 Work
~~6:30~~ Long Walk - Physical Exercise
~~7:00 shower~~
7:30 Eat (not too heavy) a bit cooked
8:30 Social relaxation - guests
cinema - dancing
11:00 Bed.

5 days per week - 2 day relaxation

The Working day of Man of Town.

8 Rise - Wash - Exercise
8:30 Breakfast & Rest
9:30 - Intellectual Work - Study
Creation - ~~Planning Adjustment~~
12:30 Walk
1:00 Eat
2:00 Rest
3:00 Physical labor for society
construction - roadbuilding etc
5:00 shower - change of clothes & rest
without stops & not hot.
7:00 Dinner
8:30 Social activities - concerts
choral singing - dancing etc
11:00 Bed

5 days per week -

2 days - complete relaxation
change of scene travel - free
reading - enjoyment - contemplation
& sex.

---

all types of therapy consists of artificially creating an immediate for the malfunction (in its own level of existence & malfunction) that are normally the manifestations of its function - that will awaken dormant

-help the organism or reflex take the first few steps to reorganizing its life force whereupon it will proceed to cure itself through its own functioning-

Functioning leads to development according to natures law of adapting to met the need Meeting the need if only incompletely corrects the patient of his basic abnormalcy - restores curative powers - generally reaffirms his faith in his own virility and natures friendliness - a very ½ of the cure - the first & last elements - very important

Repeating -

1. Subjectively - Consciously recreating - external manifestations (outside - to inside)
2. Immediate environment on own level
3. Help take first few steps
4. Self cure through function
5. Reaffirmation of personal normalcy vitality & recuperative powers.

Examples - weak ~~muscle~~ paralyzed muscle

1. Heat, sweat, movement - objects
2. Man - around affected muscle real objects normally would fit in life
3. Carry & devices through first contractions
4. Give muscle excuses to do -
5. Rebuild faith in patient not by asking for it but by explaining facts & statistics & yielding practical results.

Heart - could be rebuilt like any other muscle - Rest - desensitization retraining -

Sexual impotence

1. Heat + moisture - erotic excitation to bring on orgasm -
Relations with Prostitutes - (or Males, Female) gradually bringing the stimulants closer & closer to normal - educating the nerves & muscles of the body back to normal

4. Give every encouragement + opportunity to serve
Gradually if all other elements of patients life are normal he will naturally drift towards the most spiritually elevated relations -

Trying to talk him into normalcy in the cold rectangular office of the psychiatrist is a flagrant violation of all the rules especially no 2. talk is not of the same level as orgasm

all psychological & spiritual ills can be cured in the same way — First rest - general diversification - country calm - a general vegetarian - hard sleeping, peaceful, outdoor. Clean background should be provided to everyone as a matter of course to specific - immediate environmental measures applied -

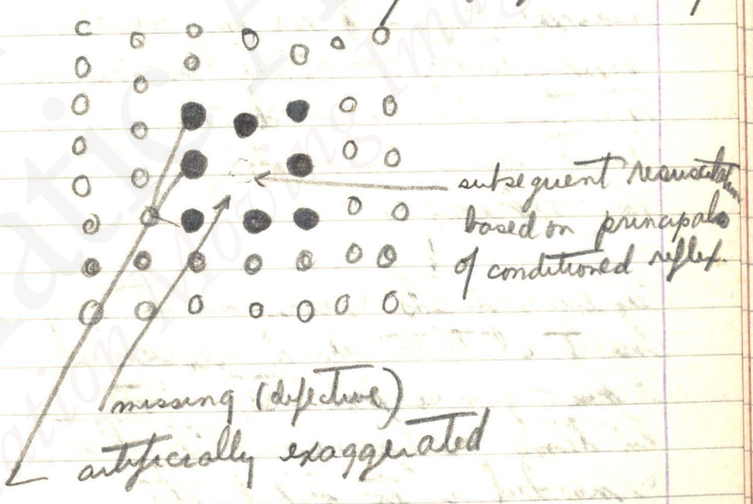
a cynic - General health requires people & things that will love him - appreciate him - (the normal results of his love) this kindles his capacity to love which should be exercised by placing the individual where there is a vacuum of love - where people or nature hunger for it & pay it back tenfold. (sunshine - dry earth cotton sheets)

This is the principal help of alcoholics anonymous Christianity etc.

Many cures are merely a question of patients, doctors + society willingness to concentrate enough time & energy on its application — to the exclusion of other things — & very rare is it base knowledge itself so lacking.

By immediate environment is meant all that called surrounds to an organ or function both in time or space. All that is needed is to find the organ or function place in the matrix of forces that surround it in the healthy organism. When this is understood both healthy man or animal

temporarily, spatially — physically & psychologically — then all that needs be done is to slightly exaggerate these surrounding elements to resuscitate (replace) the missing link back into the normal chain of life functioning



Little example of time-malfunction of stomach — normally — Man Hunts & works — Eats Rests & Works again.

so-much excercise - Little Light
simple food - Rest - More exercise

Love - Tenseness - erotic arousing
Determination - Respect - affection
exposure -

Thinking - Real problem - energy
& quiet - application - criticism
discard.

etc etc

This applies equally well to all activities of inter cum or development - For example in teaching it is pointless to feed a subject when the student - feels no need to learn & can do nothing with it when learned. This is pointless because it is completely out of the natural context of things - i.e. the way a child learns naturally picks up dialect when in Italy

& desire

He must first fill the need by being convinced of its importance for his personal survival & spiritual development Then have the chance to complete the second half of the learning by applying (Using - teaching it - communicating it) as one Lowest man said - there is no better way to learn a thing than teaching it (i.e. evoking it's expression in harmonious form - Art)
When the proper conditions are set up - very little will power or self discipline is needed - Nature acts - following the flow of her character (her laws) & easily & naturally fills in the gap - (Nature abhors a vacuum) a vacuum can only be understood in relation to Natures normal contents = if you see the vacuum you must un-

consciously understand the continuity — as in the statement — Nothing to extreme the golden mean — with a little thought & patience the continuity will come out & the depths & corners of your mind & reveal itself clearly —

In cinema — we must confined all action to single actions & these exploit & penetrate till the spiritual point of reality of it (in relation to the whole) is made (i.e. has penetrated to the soul of the spectator) the hand immediately & go to the next.

You are not making a scientific exposition of material geometric or temporal facts but a scientific exposition of spiritual facts — They are [illegible] equally valid & exact but art is concerned with discovering & revealing the soul of a thing, man, [illegible], or situation and describing its height weight, color — chemical composition, dynamic forces, complete temporal history — what it does every second of the day all its life — Even science must select — abstract & eliminate as art does — the only distinction are their motives — function goal.

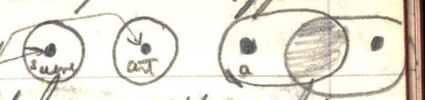
Science seeks to one slice of reality in its temporal cause & effect relations — with the eventual aim of interfering at one or several points & guide the course of actions along lines that will yield results favorable to his survival & well being till today

responsibility - material - physical well being. Each camp can invade the other - but always remaining bounds

The motive art is to reveal the total spiritual reality of a thing person or situation - To penetrate the illusding veil of maya - To reveal - the real eternal - fixed - essential of things behind the mask of change There is little or no desire to change the essence - The necessary moral changes will spring spontaneous from the human heart once a thing is completely revealed. Its lessons & guides to action are evident - it is always the expression of a pure spiritual force (God) struggling to free itself of paradox waste, ignorance

fundamentally on its own grounds - approach - method & ends.

The central plot is essential!!



confusion - of harmony seeking to assimilate chaos & fill out the universe in the most exalted spiritual levels - a seed that returns to root - a drop to the ocean. If the struggle is shown in its entirety - normal men will take sides - because they are born in the camp of disharmony into their family - their nation, their brotherhood their caste - The soul of artist & his work - & the soul of the spectator are left & right hands of the same fighting force. It is natural they respond to each other sympathetically - & work side by side.

Science is beginning to study the soul & art is describing science - (especially in documentary cinema)

1 e. Science study the phenomena of art & art can obstruct - describe & glorify the activity of science & the findings -

but the raison d'être - approach method & goal of each must never be lost sight of no matter how much they overlap or they duty thru become subtle if they are not to lose their essential variety, & fruitfulness

The raison d'être of film? method? Goal?

also & yet a progression over other arts - you must study & work this art

Redcroce etc.

Between Pure Science & Pure Art - there are dozens of activities - which partake of both in a mixture whose

→ each can be the content of the other but not the method or form - (or end).

ends - approaches & methods are equally mixed. They are not vulgar are not original sources of energy & have less importance.

Pure activities

energy sources direct reality — Types of — Spiritual — Soul / Physical — Body

original sources of energy & consciousness & enlightenment	Science —	Mind Logic	Rest Observation
	Philosophy —	Wisdom Moral	Induction
	Art —	Feeling Heart	Deduction
	Religion —	devotion Soul	Expression
	action —	Body — Nutrition	Love Action / Action / Passion

Mixed activities - all others - weaker - more diffused & vulgar - passing

each of these partakes - feeds & nourishes on the other 4 - but operates consciously & cleanly with its own methods & for its own ends.

each of these activities has their own physical center - at birth in the future a child will be examined will be coached to follow the career for which his centers are most highly developed (larger) predisposed Then men will be bred & ~~used~~ trained & used by society to extend its short-

Cinema is the first of the natural art forms for the artist whose sense of reality is stimulated not only by the superficial static aspect of a thing but by its - dentified causal - philosophically relational aspects.
Blake, Breughel
Boesch, (Leonardo)

where artists in this tradition but cinema was not available to them - now it is - & it is only the beginning we shall follow - coming closer & closer & giving fuller expression to the superior mind whose whole being intellect, emotions, soul & body is swept up into a state of super life upon contact with a more total reality -

The art that will bypass the beginning - before the abstracts of science, philosophy, art or religion or action are made - life - reality the total essence - (Rod.

Youngsters born into this mad world of roaring motors, gas telephone radio & neon lights accept it and all the toxic fatigue frayed frustrated nerves as perfectly normal — Thinking that life has always been & always will be so — everywhere on the planet & that the friendliness, closeness & cheating for a little health / stability + pleasure are rewards for the lucky few. All this is crazy — / as far from the truth as possible — Health calm / peaceful pleasant / stability — / are the natural heritage of man — The heritage of all plants + animals — / the heritage of every peasant & workman until 1900

spread

with the invention of the Automobile — mass production factory system — electrical communication — the rapid the skyscrapers metropolis — the millions of unknown faces passing in the flux of the crowd — the thousands of contacts — useless superficial meaningless the sedan, pleasant flows & quiet disappeared — and man has become the neurotic toxic, frustrated animal he is today. Times are distorted and man is distorted — His Condition is strictly pathological — far from normal + should be recognized as such — The cure to change of environment. And this will come after 50 years — when real sense + real creatures return with

society - when science & technology are tailored to meet man's physical & spiritual needs - & when man returns to nature in all respects housing, clothing food recreation & love - taking only the ~~best~~ minimum best that civilization offers. Then life will become not only normal again - but a great step above the animals - free of fear of violent disease, hunger - & will burst forward in a flower of education art, science, & contemplation. Real civilization human civilization will then start - not before - These are the black years of the next 100 years:

all men are suffering - but in particular - the thinker, creative ~~artist~~ & especially the artist whose work of synthesis requires the maximum quiet & concentration & surplus of energy. Unless today's artist realizes he is born in the just the 100 years of maximum material & spiritual confusion - the world has ever or will ever see & realizes he takes extreme measures to safeguard his place - quiet & purity of body & spirit - 9/10 of his energy will be eschewed in storm & he will produce only 1/10 of the quality & quantity of what he is capable. Extreme measure to counteract an extreme environment.

an artist today living in the city amongst a million distraction amongst hundreds of freely given laboring wonders at the heights of quality & quantity of art achieved by artists of preceding ages — The elaborate Leonards — the quantity of Tintorettos, — he marvels because he must sweat & strain so to make one little mediocre painting or write one little mediocre story or song — He believes they must have been men of superior self discipline to resist so much temptation & work so much & that their talents were much greater. Their talents may have been or may not have been much greater

But I say no. Their talents were not much greater & their energy & self discipline certainly not. Every generation of mankind is crawling with Michelangelos Dantes, Einsteins, & Leonardos literally hundreds of them! But they are born & die in some dirty village — tied to the land or a machine — drilled by ignorant parents — ~~crippled by modern education~~ & the their talents never kindled. The genius of past started at the age of 10 led extremely peaceful & regular, healthy lives in some country village of quiet & calm. Their genius had 10 years of magnificent training & 70 years of peace & thus it produced what it did.

You cannot inject [illegible] the exception of faculty of a pattern of acting after both i.e. cannot rearrange the proportion of nerves – or quality of muscle-fiber &c (This can be created through surgery)

And you cant teach art anymore than man can directly teach anything to another man & one anything is another may. The man always teaches or cures himself all the leader or doctor can do is set up optimum conditions for the process to occur. Now if all of humanity was awakened & living in plenty and all the youth were given careful examinations to determine their natural predispositions & then the most creatively talented were placed in art schools that replaced the old maestros – encrusted in providing only the best environment for the child's artistic talents to grow & function in & then when the environment of his family & social life is quiet & spiritually nourishing – hundreds of Leonardos & Michelangelos will be producing an abundance of beautiful spiritually invigorating works to dazzle the soul – & reduce the past to a drop in the bucket.

I am convinced that logical analytical observation & synthetic creative faculties are like any

muscular quality – that through proper training i.e. nourishment & function they pass qualitative & quantitatively way out & beyond their origin al forms – & like the muscle system – reach a point of enduring whence – they function with the utmost of ease – requiring no/or of full power – on the contrary – like a trained muscle loaded with sugar years to exercise – function – discharge their energies – & doing this yield the utmost of joy to individual. The golden period of full & controlled creation of the nature artist – tomorrow this period will

stretch from 25 – to 130 & we will normally live to 150. What a golden period? We are only at the beginning!

Drinking wine for artistic inspiration & not taking drugs as stimulants for spot – its contributes to illusory – negative not positive – it ~~already~~ without in any way strengthening the creative faculty & it merely deadens the fiduciary faculty so one has the illusion of creating wonders – when actually the toxic effect of wine diminishes creative powers – Drugs do not add to muscle energy – They wholly depress the nerves that act as an autocratic brake warning the system to stop when the muscles are saturated with fatigue toxins – So the athlete is merely an upset he drops dead – It can be used

for one type but a great artist as a great athlete must produce continuously & liquor like drugs with only shatter his nerves poison his system & ruin him — He may produce one work — but not be life's work.

In your work you must penetrate to the reality!!

The important clarification to make in regard to all East West debates on Culture is this —

First — do you take a moral stand — have you a philosophy of life & religion

Second — If you do — you have a criteria of action — a point of judgement from which first things come first!!! Everyone makes a thousand daily decisions on this principle but we refuse to bring it out into the light & give it the respectable mantle of philosophy There is no escaping it — when a lion is attacking you you don't want to be about the rotation of Jupiters satellites no matter how true — because at that moment it is not only not interesting but positively painful That doesn't mean we must ban all speculation about Jupiters satellites but we shall devote time & energy to it only when all more urgent needs are satisfied. Today the world is in dire

crisis - millions are
dying of disease, malnutrition
and are flinted with
global suicide - all our
means of study & communication
must be devoted to this
problem. When they are
solved - & when we have a
surplus of energy -
science, art for Arts
sake will become sensible again
The only difference between
Social Art & art for Arts
sake is that one takes a
more immediate moral
contraption the other more
indirect & over a longer
period of time - With the
emergency so critical naturally
death to the second all
for the first - later when the
storm has cleared 90% for the
first 20% for the later in ever

greater proportions - because truth
& beauty [redacted] i.e. spiritual
& not material values will
become the new needs of
mankind. Like all elements
of bourgeois society we offer
the [redacted] cake & ring - while they are
starving for bread - !!

Short term, immediate material needs	Long term Spiritual needs
Engineering	so Pure Science called Pure art
"Social" Art	
Pleasure entails Quick Return Capitalism.	Virtue Long Investment Socialism
Low-stage of physical energy	Saturation & overflow of physical energy
Musical-Cowboy films	Great films - etc. (Energy & Time)

As in economic groups there are two completely different courses of action — one for profits and the other for social contribution (adding to) the real energy of the society.

So in individuals there is two completely different orientation of living & thinking — One is to excel & to stand above which like a sort of psychological money is esteemed as a value in & by itself — something of inherent worth — just fame, be pointed out — dominate; and you have succeeded in life. But this a completely relative which may or may not coincide with the real contributions (value) of the individual.

The achievment depends on the consideration of other men — there are sources of appraisal within the man himself — & since the judgement of one's fellows is often false & capricious & because propelled by the same desire for superiority which is being a relative thing [illegible] can also be achieved by destroying others — this esteem, respect, admiration is rarely or justly given & the majority of men are condemned to a perpetual state of inferiority, frustration & malcontentment. Only when man's "real contribution" to social energy contains within himself the truest eye of criticism & judgement & will he work humbly, quietly, & render — accept and strive to

himself — when the job is well.
His sense of fulfillment will
have bound within & of
not without him — & he
having accepted the
allegiance & value of
embroiling to as against the
Taking from the store of
[illegible] energy — he will be
at peace with himself
in short — a happy —
well balanced — healthy man.

I am quite convinced that
sound as a primitive means
in technique to film as
casting wood or or Duluth
gold paint was ~~a~~ in
painting — and that
cinema artists will eventually
withdraw from it as the painters
did.

When trying to understand
the material way any given art
should manifest itself one should
take into consideration 3 things.
1. the organ of perception
2. The building substance of the art
3. Purity of concentration
& complexity within the limits of purity

	Music	Poetry	Painting	Cinema
I	Ear	Ear	Eye	Eye
2	Sounds	Words	Color	Vision
3	Rhythm Movement	Verbal Rhythm (Meaning)	Color Harmony	Visual Movement
4	Symphonic music	dramatic poem	Painting	Silent 3 dimensional color film

Each art as well expanding
man's soul extends the
horizons of sensitivity of his
various perceptive senses
(organs) by concentrating all

attention to the exclusion of all distractions or that one process carefully + penetrating as deeply as possible -

Man can extend his powers increase his knowledge, control efficiency only by at any one time concentrating all his powers on one object, activity or thought. This is a process of specialization — 1 of sharpening the gear or it into to make deep thrusts into the enemies rear —

In fine arts there are 2 kinds pure + integrature — the pure is the avantguard — the ground breaker the revolutionary — shorting off sharp shafts of mans consciousness

the integrature arts try to secure drama of the ~~impressions~~ advanced in ~~form~~ content + especially form - made by the pure arts. The cinema like other arts has the pure + integrature forms -

Pure - Music	Dance	Poetry	Silent Cinema
Integ - opera	Ballet	Theater	Sound-Smell Touch-Cinema

The pure forms can be graded from less to more complex forms as - both in conception + means of execution

Music - Simple vocal humming → Symphony

Poetry - Simple Poem (one reader) → Dramatic Poem Several readers

as do in cinema's pure form we have

Silent Black & White
Silent + Color
Silent Stereo <Black & White
Silent Stello Color —

Since movement is the goal of cinema — Stereo which can deepen the space so necessary for movement. (if it is to be completely free & expressive) is so much more important & helpful addition to pure film than color — & certainly than sound which has no place in pure film but serves only to distract & vulgarize.

The discovery & general deepening of perception, meaning & taste of movement will then be adopted by integrative cinema to increase its expressive power — & it will be the strongest & most fruitful sound of growth of integrative cinema.

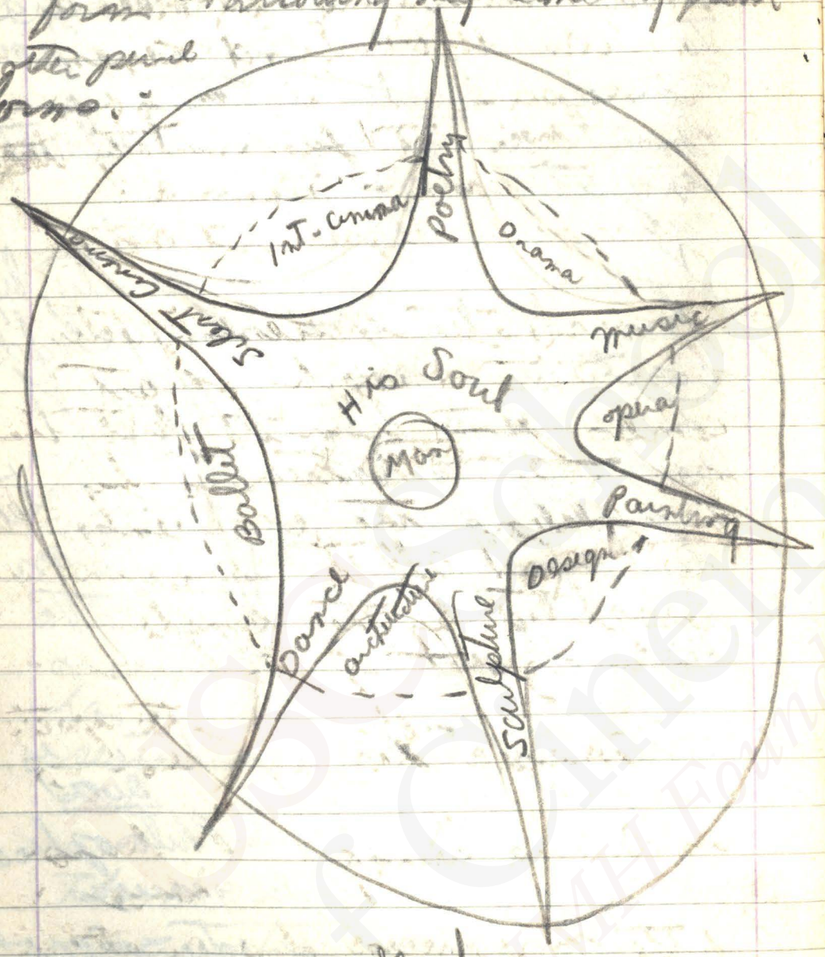
You can only achieve purity, height of form — leave the heavy clodded earth and fly on the wings of the soul to the Reality of God only by so called limitation & full powered concentration on one point —

The key to the limitation is the organ of perception —

— The integrative by nature is more dramatic — Dual
Ideational — Philosophical
higher conscious

— The Pure is more — Impressionistic — monolithic
abstract — emotional
subconscious —

The integrative - spectacular forms always lean principally on one pure form - borrowing only secondarily from other pure forms.



If you understand the other arts you can understand cinema - it superficially its laws & processes seem new but fundamentally they are the same - There is a difference in degree but not kind.

The dialectic excitement between spectator & work of art comes from the fact that spectator actively contributes by completing the experience the reality and all the sense manifestations suggested by the single sense aspect of the work - the spectator sees - & smells in Music or Hearing - he hears & tastes in Cinema only seeing - he hears & senses forces & the more precise & accurate the clearer the total image & the truer.

one might say that till today there are 3 basic types of films —

Thought Films

Dramatic Films

Feeling Films

Type	Motive	Natural
Thought —	Intellectual Understanding logical clarity intellectual education	Sound
Dramatic —	Passion — moral education	S
Feeling —	education of feeling poetry extension of abstract subconsciousness	

But in a way these are old & restrictive formulators — the great films of tomorrow will find a way of combining logic passion & poetry into a great new version — ?

Subject matter	Elements	Form
Sound	Electrons atoms, Stars Animals — diagrams etc	Stereo - Color - Smell etc Didactic monologue conceptual evolutionary editing
Society - Man	Men & Women houses, clothing cities — (men & their settings)	stereo color Direct Sound dialogue — opposition cutting
Introspective impressions about life in its most immediate abstract aspects	Dreams Nature Man & Man Made Works →	Silent (Pantomime - dance) place cutting

Make a program of three short films that will have in very clearly defined way these three different contents communicated in three basically different styles —

then make one feature film attempting to combine all contents & forms.

The three basic types of movements are —

Scientific — evolutionary change — movement.

Social — movement of people in the frame —

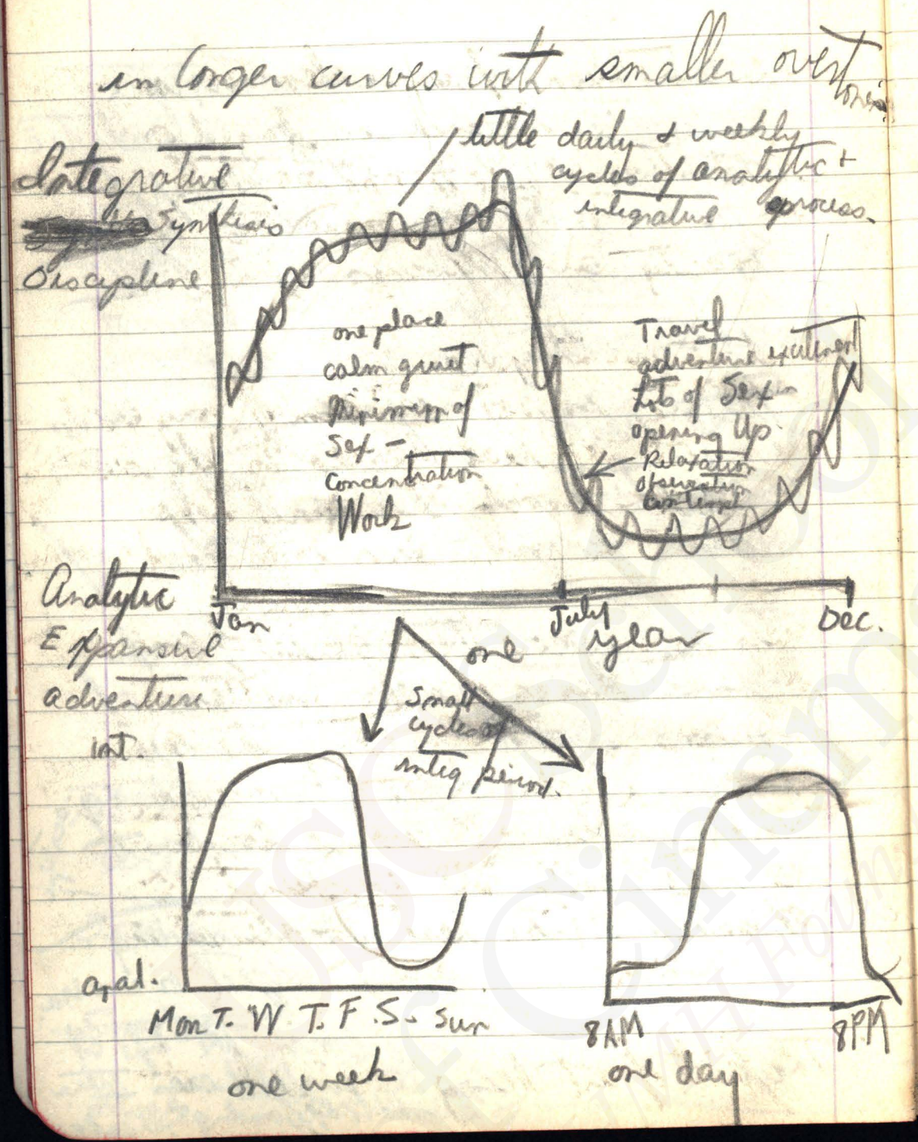
Poetic — movement of camera about object — subjective.

These thoughts are scientific, deductive, analytic — they are helpful — they clarify — they can destroy obstacles prepare the ground but they cannot create — they cannot grow or live. Head remains / or art / for the inductive, synthetic part of man —

These are the systolic & diastolic movements of mans spirit (consciousness) / opening — closing — absorbing — squeezing out (art) & so does the universe happen & contract / changing form within frame without moving object or camera.

& so in the life of the civilized man there should be expanding & retracting periods.

in longer curves with smaller over



The limitation of sense elements in art or in science is based on the fact that nowadays we tacitly applies the attention to the possibilities for truth & beauty are always infinite -

I don't want praise
Flattery is not the aim of my work -
I want the real desire to do substantial work - work that will help other people - live & do good work.

Film is as more the material of cinematic plastic discs are the material of music - If Anything the material of cinema are light movement world sounds which eventually resume into the inspirit spirit of man. (the real material of all (+world) arts.

The fact of art being realized &

expressed through a machine
should be accepted positively &
not minimized negatively / the
all the marvelous powers of the
machine should be exploited to ~~the~~ full
developed ~~exploited~~ to the full
— we should embrace them as
new ~~[redacted]~~ releases of
Frankenstein's daydreams.
When the eye of intuition
penetrates distances the machine
is his miraculous slave — while
~~machine could do all the~~ mind
has no vision — no feeling the
machine will be his master
We are still in the cinematic
dark ages until a single
cinematic unit does not contain
ten times the flexibility &
precision of human perception

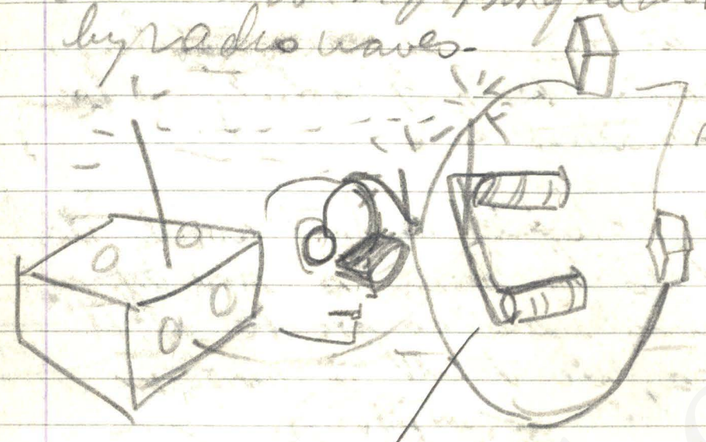
The ideal unit should have —

Huge - luminous viewer - with universal elbow - for any direction
Trans focal lens - 12 - 1,000
Gyroscopic head - smooth - with baby tripod legs
Dark Lensdle tripod - for ground w/o ft.
Changeable Stereo
Changeable color
Changeable - speed
all shutters one shot - automatically adjusting other / Elements

Stereo sound -
changeable volume
" tone
" speed -

The fixing unit should be in one cage in the corner or even in the studio The art should work only with the recording instruments & hand the vision & sound of what is fixed before his eyes & in his eyes while recording - impulse

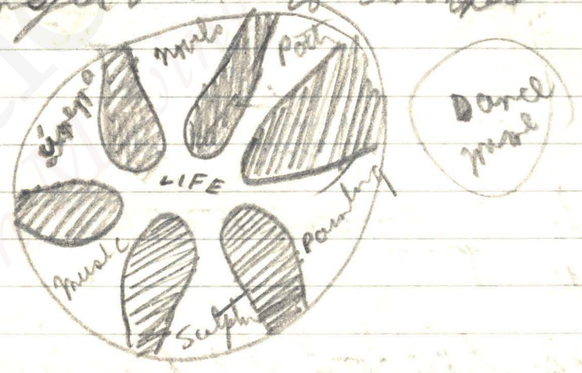
are sent to the flying radio by radio waves-



Throat microphone for l/f direction

The childhood of Art is finished. Art shall become - adult - wise & firm - tremendously productive creative - life giving - It shall become conscious of its of its past - its laws of development its methods - its purpose - its future - its materials - its basis in the [redacted] - being of man & being of society & being of nature !

The more fully one art avails itself of its medium the more difficult I would say impossible is it to transfer it to another



There is only one value or reality which we / sell - give / [redacted] or not from each other & that is life - Nomatter what

The object or action is no
merely a closer or more
distant manifestation of life.
and life ~~under God~~ seen in its
more spiritual nature

You must do a careful analysis
of the distinction between
psychological space & time
& ~~social~~ real space & time.
Psychological Space & Time are determined, I believe, by
the quantity of spiritually
significant detail -
by change & revelation

2 meters of detail seems the
same time as 6 meters of a
long shot -
2 meters of a still pose seems
equal to 6 meters of a
rapidly moving pose.

These things must & will be carried
in a careful scientific study of
the process of perception &
Expression - (psychology)

Energy, time, and space are
interchangeable quantities - i.e.
different aspects of the same reality
which ultimately is life of man &
the universe.

a detail of 2 meters is longer in time than
a long shot of 2 meters -

a long shot of 2 meters on a big screen is
longer than a long shot of 2 meters
on a small screen -

An machine (editing) on which an artist
can compose scenes, colors -
movement, space, natural

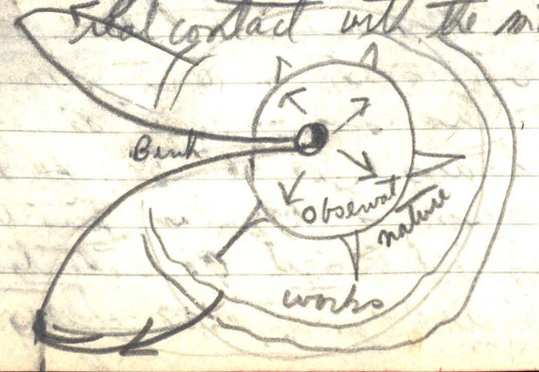
sounds, dialogue etc as
one composes on an organ
arena
The real artists composing instrument

First from film – which when
composed is automatically spliced
in a second – later on
tape which can record &
cancel each composition.

Experience with life – practical
physical materials – real
situations in time & space –
perceived through proper
perception is the real root
of civilization – But can
first causes – can the Upon
the flavor or it all be found
that way – God – The ultimately
think is based on intuitive
experience – i.e. observation

?

& evaluation of a reality that enters
of our consciousness from within us
rather than from without. They are
both fundamentally the same & when
talent has been developed for them
equally valid – They are mutually
effective – but the first voice –
flowing up through conception
& instinct speaks from within
choosing the level & form of our
outer experience & directing our
evaluation – This is the dream –
the first spark – the flavor pre-
dupes me to years of patient &
self sacrificing work – Only in
final contact with the material



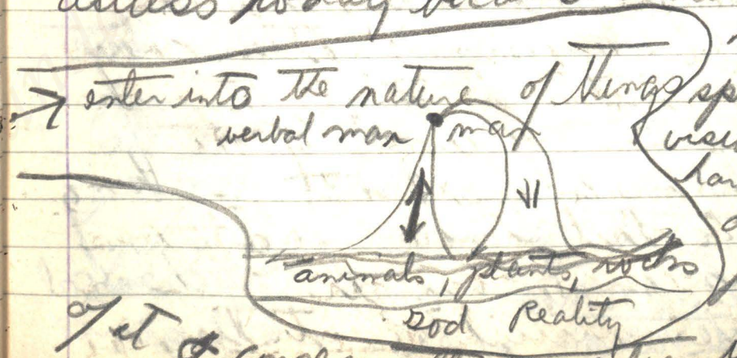
aspects of
the Universe
can a solid
road of
progress
be found.

The so artists intuition consists in penetrating the spiritual force which breaths life & harmony "sense" into things

Art can enter directly & express directly without having recourse to logic or verbal articulation i.e. grammatical construction — and doing this both artist & spectator experience a fulfillment which is integrated & complete and for which no part of them being feels the necessity of justification, qualification, explanation — i.e. orgasm. When man lives this he enters into the manner of living of all animals, plants, & things who don't know i.e. articulately & consciously — but are — in a rich ambient of intuitive orgasm which the stuff of life —

is reality as we know it.

The spiritual force animating things permits us to understand this harmony — Until this depth is penetrated all understanding is superficial & misleading. Man as all other parts of Universe has a spiritual reason for himself & each part of his life — These can only be seen harmoniously & then lived harmoniously — i.e. artistically when the spiritual essence is clearly perceived. Life is completely artless today because there is no



spiritual vision — harmonizing our perception of it & consequently our actions in it.

The spiritual tie between -
Man & The Universe
Man & Nature
Man & Society
Man & Himself -
/ must be found in order for mans works to

Cowboy film, Gangster film, silly boy meets girl, Musical, comical film

To bear fruits of beauty & life:
and this new vision shall not be created today in this period of intellectual expansion and social chaos - it will no longer be constructed by individual mind divinely illuminated - but by the social brains of thousands of men working together - in full collaboration with all mechanical extensions of his intelligence the machine -

1. E- Religion, Virtue, Harmony & Beauty will come back into life only after 200-300 years of Socialism.

I made a mistake when I called ~~the~~ cinema philosophical music ~~to~~ Frank philosophy ~~and~~ is the skeleton but art is the leafs and flowers - that leap into the creative world and penetrate reality in any period, even though ~~the~~ the dry cold verbal concepts of philosophy can do no more than to varying degrees of closeness.

Our gross materialism prevents us from tracing the lines connecting artists in the artists with our present state of soul - In the physical sciences humanity gratefully acknowledges Faraday & Edison - but we do not realize

yet that we are kinder richer more human, more fully alive, more aesthetically rich because Rembrandt painted or [redacted] Beethoven wrote his music — one day when the subtle but non the less potent laws of psychic reality are understood humanity will give thanks to these great architects of the soul. It is the egoism of man to think he is physically & ~~spiritu~~ psychically what he is as a result of his own evolution — Physics, Biology, Sociology, Evolution, Physiology & Medicine are giving man a new & huge orientation with regard to his physique only now with Psychology Jung & the meeting with the East is man beginning to scratch the surface of understanding the origins & history of his psyche & when he understands this he will give new homage to the men who sent their lonely lives to ~~achieve~~ development towards harmony & life. [redacted] the day of the artists & philosophers, & moral prophets will return.

Writers have possibly had more socially recognized effect on humanity through the ~~ea~~ Council of easy dissemination — With the new craft of culture dissemination using modern means & ~~[redacted]~~ learns how to ~~[redacted]~~ circulate music, painting & sculpture throughout the world as faithful to the originals as a copied book or film these more abstract & immediate arts will have a tremendous ~~[redacted]~~ educative effect on humanity

& perceive a harmony of man to himself
a harmony by society
but as yet no harmonizing design
relating humanity to the Universe
— has not my eyes or filled my
heart —
Man relation to ~~the~~ the animals
insects vegetation & elements
of this planet — mass
relation to all the other
planets & their forms of life
mass relation to every
electronic mass of stars
a million times bigger
than the earth — more
relation to the electron
the atom — the bacteria
& the immensity of blue
universal night —
a new relation
a new religion — book
or study thought & inspiration
an artistic creation.

strengthening life — giving man
a more of these basic elements
he craves for —
1. closer touch with Reality
2. Energy &
3. The Ability to Function —
& develop through function
Development — side product
happiness? Contentment with
life & death.

The Soul of Cruelty

I looked at the two black rolls of
film lying so neatly on the desk of
the editor ~~[illegible]~~ and
said to myself — inside lying layer upon
layer of that celluloid ~~[illegible]~~ and lenses
lies ~~[illegible]~~ — the ~~heart~~ heartless heat
& passionate life — the mystery of the
universe — ~~[illegible]~~ the play underside —
and around the ~~[illegible]~~
life is coiled — like mysterious & wonderful

Modern science and technology have built a physical bridge over which it is possible to transport the physical act of prayer & action to a physical action. (Appliances etc) and only with the help of scientific technology can we bridge the gap between the soul of the one and the spirit of the other - the human & the divine. The great religious problem is a spiritual relationship - bridging the gap between the finite & the infinite - creating a new [illegible] and making it possible [illegible]

Plato the great sage & artist of [illegible] - Cannot [illegible] to the [illegible] at all [illegible] and [illegible] to the call of the [illegible] relating and revealing the numinous reality as it has the phenomenon.

Save the trees

Ask simple fundamental questions - and want simple fundamental answers - but I fear our thoughts are lost in the squareness of living the square room we are born in - the square crib - the square classroom & the rows of necks & clasped hands - the [illegible] states of the

city walls the straight lines
of the gleaming tracks - and
when we suffer & we suffer the
agonies shipwrecks when square
money bills should be & when
the bills are torn - we lay on
the clean picked bed - Before
the roar of pen capons & watch
a the elastic hypo & snapping
evenly down along the path
and say - dark happy -
this is life - and this is
the saddest part -

Life is hanging thick in the
history of many soul the top
is tossing wildly of the top
of one out a million waves -
it is mending the shafts
silently between the grains of
sand - in the water
beneath the great
oceans to/or -

It is in the wild helpless
glassy look of lovers dying
orgasm - It is in the cry of naked
viscous foetus & the spasky
of a formula flowering into
a giant machine.

It is the right way for an
artist to swallow well
being with great pellets
materialed mouthfulls -
To the gut with sweat of man
- the light of electric lights -
the objective cruelty of beauty
of nature wherever he
can lend them -
and then complete master
great demander of his medium
build his visions - whole & true
& give them to the people - that

feed on life — and wash the germ of lies & ignorance from their soaring souls.

I went to the Biennale — (international art E.H.) as a hungry man might approach a restaurant — but I found no full meal — nothing that roused the the I many pocketed guesses, half sensations momentary reflections — already forgotten — nothing that cleared all this moulded the into one round ball as sets the body does a boil — and bought it whole cooled — about out of my head — out of my testicals — out of the fevered bed of my brain — out of me alive a the great giant elephant baby of my soul out of my existence — and once taken out thrilling me & filling me again with ~~my~~ resurgence — finding a new elevation of place & serenity — a fullness that will make me a many months & a fertile danger of life.

No painting did this to me — but great art must fulfill this function must goad mind to something harmonize — & feed till the appetite — is completely satiated

& humming over with
~~the~~ traces of joy & life
~~of the~~ older form of life
will not take up this
challenge and discharge
it - cinema will?
Right ~~private life~~ - ~~Last Study~~ - ~~Last Study~~ listening to ~~the~~ - ~~the~~ - ~~the~~ - intuitive directions
(always) - courage -
wandering wasting of
means - 1000 real art
is born.

I wanted to hear about
the least - enemies - politics
~~hopes~~ - send -
~~epidemic~~ - subjections
~~the electrons~~ the
time stopped flowers

beauty & Einstein - but I
found only pale color daubings
on a small square canvas ~~by~~

~~The less obvious but probably the saddest~~

to subtle but exact voices in
your soul.

more
~~less~~ subtle - less obvious - but ~~and~~ the
way ~~The~~ financial, political and
technical heaviness of cinema
is a rather direct & obvious
way to preventing cinema
from achieving the ~~the~~ status
of great - true art - but
I believe ~~the~~ ~~weakness of~~
is caused by the
~~heaviness~~ ~~[illegible]~~
~~[illegible]~~ ~~[illegible]

by
way ~~of~~ cutting off the
artists from the sources
of inspiration - sapping
his physical energy &
~~deadening his~~ paying
his nerves & deadening the
imagination by a
pool of intellectual &
moral mediocrity.
artists cannot grow
great in the ambient of
cinema as it is today -
& the artist is the absurd
of all art - without im-
passionate, imaginate
profound & alive -
~~& cinema cannot be~~
fecundating, directing,
controlling & giving purpose

cinema cannot be a
great art no matter how
many machines & companies
amass.

The public as the expression
artists - & will follow in your
straight & toothless path into
into the stage night of
feeling but only if you
are deadly sincere - true
& talented - & will follow
you eagerly opening myself
like a female - trusting
anxious to be utterly
purged - but & will not
be tempted with made of
betrayed - & will keep
skin like a leather shell & not

[illegible] To make one false step
[illegible] accustomed to.
the [illegible] disappointed
I walk — a faint glimmer
of [illegible] always burning
before me.

Real fruitful intuition —
embodied in rich talent —
first step —
rewards — the second
[illegible] path is open
& the voyage is on, —
beautiful

Most of the [illegible] of "reception"
of [illegible] of our subjective
[illegible] into nature to
keep himself entertained
through [illegible] of [illegible]
with [illegible]
[illegible]

The major principal to follow in
the creation of tomorrow's artistic
machinery is [illegible] "easy isolated
recording of each of man's perceptive
senses [illegible] 2. [illegible] easy
precise [illegible] way of
recomposing them into a whole

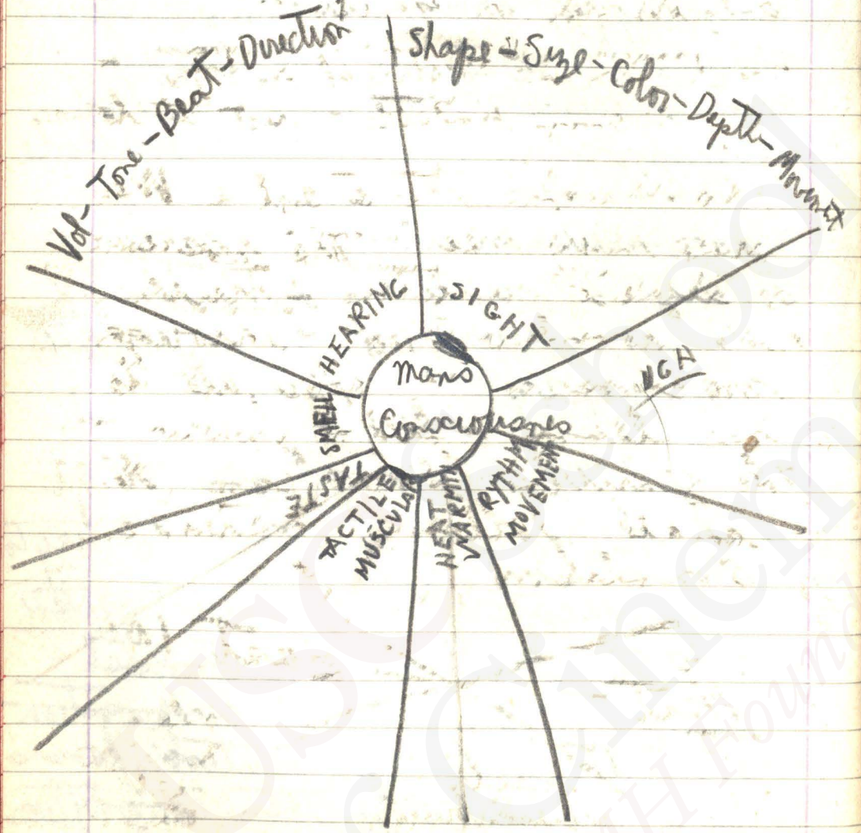
~~Sound cinema~~

There are 2 forms of art —

1. The abstracted or exclusive
arts that try to communicate the whole
through one perception form.

2. The composite arts — that try to
communicate the spiritual content
of reality by ~~idealizing its total~~
~~form~~ idealizing all the composition
~~of all its forms~~ perception forms
and particularly their composition

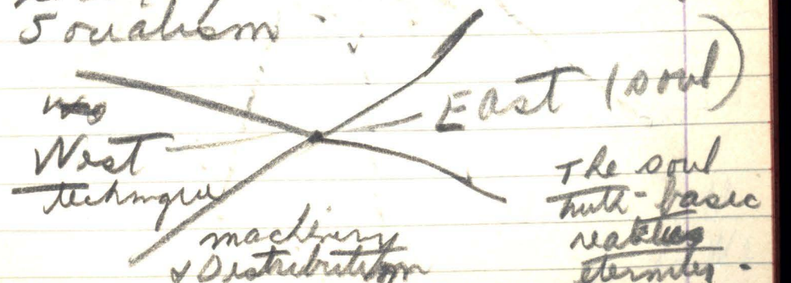
Artistic machinery will enable progress in both roads but particularly the second



These /sss are the arbitrary ones we subject to name - they must be relocated →

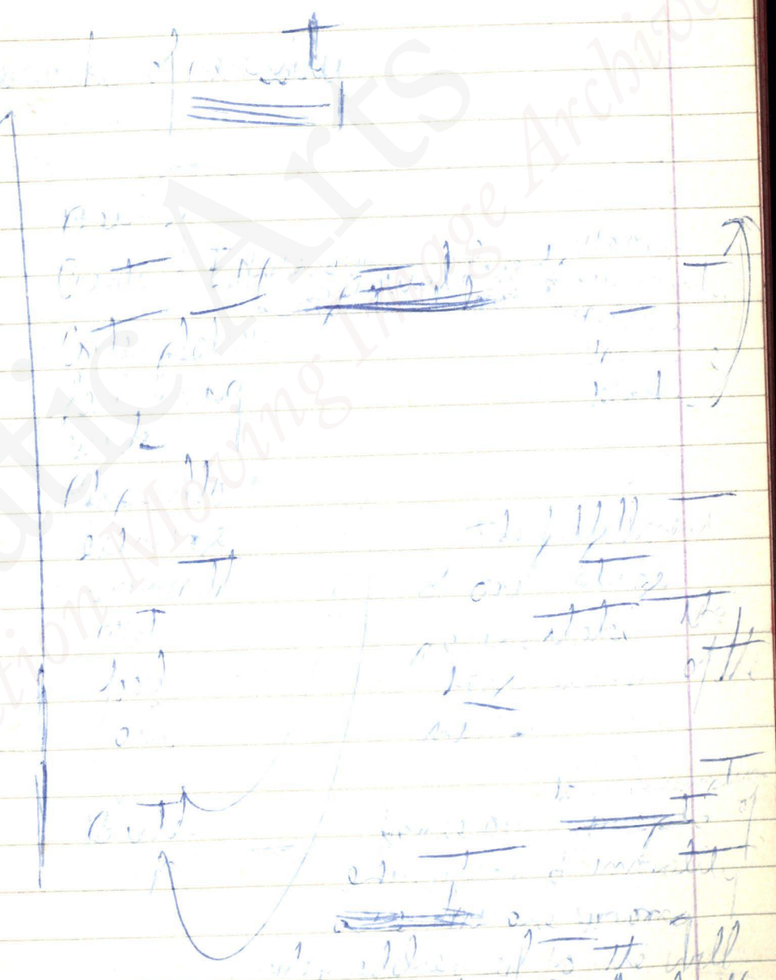
We must study the facile registration of each element & then facile composition - we can achieve it only through machinery - registration all electrical on tape - only receivers portable - not at home

This is where the East & West shall really meet - the expression of deepest realities & truths of the soul & God - through machinery - for all to see learn - feel & know - The spiritual Socialism that shall follow material Socialism.



upon further examination

UCSC Arts of the HMH Foundation Archive

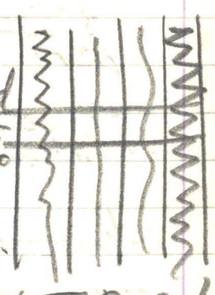


The simultaneous mix is too much of a lay hazard to create a really artistic sound track. The sloppiness it carries away the preparatory work of months. There is no reason why the technique of cinema should be so that an artist who has a crystal clear of the effects he wants cannot realize every last nuance of them to the nth degree.

The mixed sound track will only become precise when some way is found to lay in sounds one at time.

I. E. Either by discovering Volume numbers separately which will be played automatically by a machine (with hand volume controls for slight adjustments —

or by having a multiple sound track - where each columns is laid in separately either on the side or on top of each other (when recording one hears all columns but records only one) like this →



which is scanned by a photoelectric electric unit & mixed in the electricity & speaker.

Precision CONTROL!

Laser Record of the day Record & Record on tape - until you get a perfect mix then transfer to film.

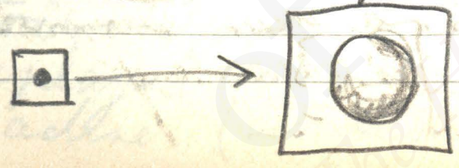
No Subjective time

The number of subjective time units (re-the feeling of length) is inversely proportional to the number of subjective sensations - i.e.

observation - shot all same length — Subj Time Units

detail still	▢	10
detail moving	∝	6
long shot rel. still	▦	4
Long shot crowd moving	▦	1

enlarging a given observation shot permits more subjective sensations



than it should seem longer i.e. have more

This is why movies should have large projection screens as a working principle — all working processes should be as close to the conditions of the final viewing experience as possible -

both in shooting the film - the movie - & cutting it

The movie must run at exactly 24 fps and have the same size as the projection screen

To understand the language & process of art better a careful study must be made between objective & subjective units - creating a new terminology if necessary

Subj. Time Units
ST 0

Time
Space
Color
Event
Greatness etc.

The soul has d believe its irreducible quantum (atom) of experience which it absorbs - consists of d ejects. ??

The form & content of art will in the next 400 years goes as far (from the conventional poem & painting) as atomic energy has from the spinning wheel.

Great new themes - Great new scientific forms of expression Philosophy guiding - conscious discovery of the process -

existing social energy - great monuments of human expression & consciousness & feeling

material Production	Art
Unconscious - conscious	Uncons - Conscious
Primitive - Technical	Primit - Technical machines
& individual - social with and dead	& - Social with and dead
Private consumption - Humanity	Private - The human race.

(The revolution of the material forces will reproduce itself in the spiritual -)

You must follow up the scientific revelation of the psychological spiritual - (artistic processes - (science & philosophy) apply technique & machinery (engineering - invention - workshop) enlist energy & intelligence of many men — and

create /one capable of
reproduction – the readiest
& surest consumption /or
humanity & durable ~~(thing)~~
/or humanity to
come – (Wider ~~in~~ through
space & time)

This is what you
are doing!

Science

colors -

The marvelous miraculous
strange & enchanting
truth.

Im so many ~~of~~ & the ~~f~~
argument ~~of~~ dont disconcert

the two ideas of purpose to human life & (as we imagine it) and objective harmony of the Universe ~~are completely~~ are indiscriminately confused and mixed. By proving that ~~and~~ the universe obeys fixed laws in a harmonious pattern in no way proves that all this harmony is directed to the glory & happiness of man.
There are many alternatives -
There is design in the Universe
There is no design
There is no design to ~~human~~ human life
There is a purposeful harmony to human life different from the one we egotistically or hopefully imagine.
~~It~~ It coincident with the demands of the greater harmony whose purposes & ends are unknown to us.
There is the harmony and morality most commonly upheld - what is

the universe is a cradle & ~~map~~ for man.

or last but by far not least of all that all our diverse concepts of harmony law, design purpose — human & universal ~~the~~ time space etc are so ~~[illegible]~~ distant from even the farthest that its & conclude beings or reality could to begin speculations in these terms

these preceding alternatives can be paired in many combinations.

Oriental ideals want us to repose back in the feather bed of a Universal harmony that has every consideration for

more happiness. The attitude negates too many of mans natural talents, & denies too many cruel facts

Western humanism — sees man growing alone an ~~ocean~~ of chaos out of which he build a path an island of safety & meaning. depending only on his own strength & resources — working expecting nothing from the darkness but indifference & difficulty & death. This position also suffers from an superficial understanding of the real sources of mans powers & denies too many mystical experiences of thought

Both systems suffer from being extremes of one central idea.

My belief is as follows -
at first I believe there must
be a rigorous semantic &
psychological reexamination of
the basic words & concepts
~~the~~ ~~with~~ which we ~~are~~ investigate
& describe the Universe -
The sensing instrument of
mans consciousness must be
tuned to a fine point of
dynamic equilibrium - the
dynamic because many truths
reveal themselves only to
the ~~certain~~ certain passage.
The when conceived in more
universal & profoundly rooted
terms - I believe in the design
- the harmony of the universe -
Then I believe in many
harmonious places in it -
but on completely different
terms than he would like

To believe - When seen through
the rosey colored glasses of
our romantic idealism life
seems cruel & sadistic. We
cannot reconcile the ideas of a
fatherly god, of a universe created
as a garden for man - with
death - war - floods - fatal
accidents & persecution of innocent
people - disease - as with the
billions of species unrelated to man
ones alive on the earth & the vastness
of the universe & millions of other
planets with the probability of
other forms of life.

We must look the universal
design frankly squarely - with
bold ~~[illegible]~~ - unbiased eye
The first shock is bitter & hard -
for our place is much lower &
smaller than we would like to

think — the safeguards of our welfare much slimmer and the meaning of our existence much lower & cruder than we would like to think. Life is rough hard & real. Yet this is real — That's all.

But I for one to turn on the hard fire of reality — this is the supreme test of my art I will try to in two books & to connect the public directly — to the universal that they may have this hard paradigm of joy also.

→ But after the first cruel shock — we are better prepared to build our way — & our real happiness will increase tenfold! and we will no longer be completely

disorientated by death or accidents disease & floods — for our ~~expectations are not set on these things~~ ~~it is a conscious system of ideas~~ ~~that we have chosen to~~ expectations will include them and our construction of ideas explain them

in other worlds human ideals subjective & universal reality are completely separate ~~things~~ & have absolutely nothing at all to do with each other one sphere floating loosely about in another and until both ideologically & materially they are hooked up for greater connection — inevitably there will be painful collisions — when

many ingenuities ~~[illegible]~~ feathered concepts ~~[illegible]~~ clash up against the brick wall of reality — in those moments reality seems aggressive enough tugging the rose petals of our dream world like a rough ~~[illegible]~~ steel cutting file - The collision is real enough but is we who have aggressed ~~[illegible]~~ in our ignorance & vanity & the wall is deaf ~~[illegible]~~ but not rough & for its hardness so much the better to build a house on

Concepts & feelings ~~[illegible]~~ out of which these thoughts have been built but which must now be articulated & elaborated in detail

Humanity as one living organism-colony living & yet unachieved purposed with other organisms - in an objective world of forces neutral to the welfare of life but harmonious to it because life itself has built itself out of these demands.

The huge universe & other life in it - uncanny

The universal natural feelings of humanity which flow as an incessant stream beneath all philosophies -

desire for life
avoidance of death (illness & death)
Personal development - ambition
& the exercise of egotism often
necessary to / it along & protect it

The universal paradox of romantic idealism + war death accidents disease, disaster, cruelty

~~The inconsistency of~~ ~~Consciousness~~ the thought that death + disaster happens only to the other fellow + the realization that ~~it~~ to them must occur to some fellow who thought like this.

~~Not~~ Consciousness (now) that natures logic is more profound than ours — that she forever cloaks the mind in thoughts conducive ~~to action~~ + ~~fatal~~ fatally to action — she guards against the wanderings of imagination that conserves ~~for~~ for the moments of disaster as they really are + can only fail into morbidity which can only paralyze action + this when no danger is present. In moments of disaster + death — the natural situation sets off a new chain of thoughts which since the universe ~~is~~ the organic social energy — is in good way ~~but~~ but into the great design as equally valid intellectual

I.e. Logic is always consistent + sensible to the human mind + thus in its strength + limitation — feeling + intuition which in the narrow spectrum of subjective human morality seem inconsistent — are perfectly consistent elements of a higher logic — they are the unconscious.

for they are directly from life which is the only truth.

The first phase of a true artistic development is the documentation — i.e. the intake — the copying the objective phase — treated through it as much as possible with the a language ~~of~~ moving against — but as long as based on a principal of photographic gradually relative Expression results the principal should not be denied but adapted followed to the modern — ~~the artist~~ — The world like before the would be a great part of original be stupid there / indeed a parody — taking from the — microscopic photographic

[illegible]

Fact, pictures — from people — factories facing into Lenin with [illegible] Lenin counting for the world photographic from [illegible] the writer, against the class Show / take copies of the modern — Fight — from into a type of [illegible] the surface (through the agent) — ~~[illegible]~~ the ~~[illegible]~~ of the image Depict from what the document would be film should come from the picture to be of a United Workers ~~of the~~ of the great and [illegible] [illegible] man is typical of the [illegible] [illegible] engaging mechanically — But there more of the image more apart to moving

and the sound track should play
be just a matter of adjustment — take
— but that too from student
to student — some of sound
that wonderful sound recording
made a few of —
Sound recording — Advanced
Amateur Talk — Commercial Ora —
Using all home
selected recorded tracks
from the great

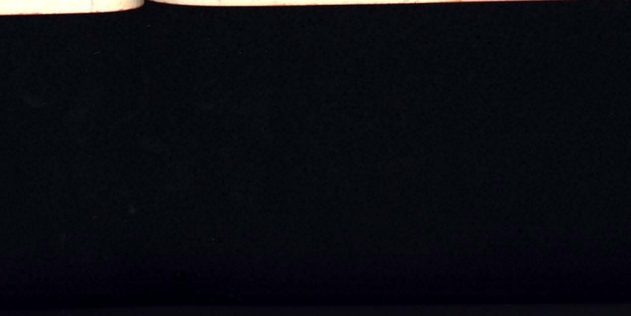
then the mechanics of recording
instrument are accurately
put aside and used only as
the last necessary step of
having the creation of the
artist in mind.
We can do for the cinema to
the creative from photography to
movement — from typography
to painting — from sculpture to



The mistake of literal art is the assumption that the spectator is an empty vessel into which any plainly colored liquid can be poured. This is sufficiently true to apply to Bourgeois, Aristocratic audiences who because of their luxury & lack of philosophic consciousness are out of the vigorous vortex of life. But the larger mass of humanity who victims of misery, oppression, & hard work are fighting vigorously the struggle for life + or whose moral sensibilities have not been sludgeoned into a protective indifference by the injustice of their own lives - these are not empty vessels - but positive forces who hungrily look to art to barely reveal - their sufferings - to the all the

lose ends of their confusion into a superior harmony - meaning To reveal the spiritual content of their fragmentated, monotonous confused lives - The set in the audience a thousand variables - all seeking the magic ~~of the curtain~~ as the light dims they become fused into a great lake + the curtain the concrete wall damning them up. As it rises with a slight seems anticipating delight they pray that the, still silence & movement they all will be the ones to release the tons of their energy - The artist like the Scientist does not create the feeling - the reality - he only finds the right key - the true key to release us to the elemental forces. This is

what is meant by audience participation — Art is a piss of between humanity & God — between microcosm & macrocosm — between the people & reality. The European audience consists of people burdened with very clear fears & neuroses & preoccupations — stuffed ambitions material & spiritual problems that are insistent — and an art which is so unconscious of these problems & avoids them cannot penetrate them & indifference (by now a protective shell erected to safeguard the believing soul against all the false values being sold.) It will roll off them back like water — they will yawn & applaud politely but it has not gripped them at their throats — sobbered their hearts & made it beat more fiercely it has given them nothing — liberated, nothing clarified nothing given them nothing — it is not art —

Through control & democratization of the external we will set up conditions for the discovery & development of the internal. — First the period of expansive artificial complication — the often much unnecessary work & confusion - a few simple principal axes espied. On the field of food we have delegated all sorts of machines, & cooks (external spreads) to do our cooking & digesting for us — but when the real machinery

of food cultivation, & distribution is perfected & when the real nature of nutrition is understood each citizen will again come close to nature in his conception of food as the animals do - & so it will be with the consumption of spiritual food i.e. Art - Now poor miserable, uneducated citizen [redacted] for whom a richly detailed existence is completely beyond reach hop down specialists to do his studying & feeling for him & serve the results up in tasty, concentrated pills & pills - i.e. works of art - to be digested, on the fly between [redacted] train-to appointments [redacted] his meals - And so the near future will

see the increased mechanization & specialization - in art - deeper penetration & wider dissemination - [redacted] & in the effort to achieve external mastery the true process of spiritual nutrition will be discovered simple & natural beneath the superstructure of specialists & machinery - & this simple process will be taught to all men - and they will be able to bypass the specialists & return to nature & life for their beauty for aesthetic refreshment & for their spiritual nourishment - and with the natural [redacted] & psychological necessities caused by Socialism

(Travel agencies - Work projects
Adaptations 10% of plans for
Work places in factories farms
Training others over)

the real art will become the art of living — and the work of art many life — and the greatest lives will be the masterpieces. — external works of art valuable in so far as they contribute to the supreme Art. — and while specialized artists will continue to break new ground — most of our creative energies will be bent on cultivating each man as artist — & enabling him through culture — travel — communal work — folk art expression — Experience recordings etc — to embrace life directly — daily aesthetic experience

directly from the source-life and make the beauty & harmony of individual & ever expanding social life (men - animals - plants elements - stars) the supreme work of art —

(& outwards - then a reversion inside out) — completing the circle - back to the animals plants & animals — they make no works of art? only exist in the most harmonious & perfect way possible — to an evolution they don't understand — but taking

often uncouth chaotic & haphazard existence & in the illumination of his enlightenment transforming it into a thing of human (extended) & beauty unconsciously allied to the upward evolution of spirit & life -

(so the summary reflection & seed of Art (concerns) humanities engagement with reality - (interaction) with humanities struggle for life & development - ~~and~~ Great art is universal because humanity is one - one species One related organism. We should describe the workers peasants masses in our art - not because Marx said so but because they are humanity -

their problems struggles & hopes are ~~the~~ humanities - The Bourgeoisie & the aristocracy number only 3% of humanity - their problems, hopes & fears, when reflect their parasitic existence figure only as tiny ~~atoms~~ elements ~~in~~ in great mind of humanity - a humanity - simple & sound who know no other way to preserve & extend life than taking reality & ~~it~~ directly in their hands & working - (as do all animals) Work in the future shall not be a synonym for drudge - sacrifice & misery - but beautiful ~~and~~ & deeply satisfying (because it is ~~opening~~ life) ~~and~~ activity of the day as harmoniously incorporated with the rest of the life procuring activities of the animals is blended smoothly with the whole - there will be more work - but living -

Think of the greatest man ~~[illegible]~~ Jesus Christ, Newton, Michael Angelo Napoleon? — not more than 30% of humanity has ever heard of him not more than 5% know of their lives & thoughts & deeds — So what — the important thing is not fame — not a name on people lips — but life in their veins — this contribution of man to life be it material or spiritual will far ~~[illegible]~~ in space & time beyond our distance

fame — and this no matter it should be — a man should find adequate gratification for his labors in this — Most ~~[illegible]~~ better so than the reverse where his fame is wide spread but his real addition to life is nothing — Just so the false value education of capitalism teaches us that profit is more noble than service it teaches us that fame is more noble than creation (work) & sets all of its youth in the traps of neurosis — giving them ideals of fameless ~~[illegible]~~ Complexes & setting them off in the ~~[illegible]~~ great of fame which like profit is exclusive not inclusive — creates hatred jealousy — requires an enormous expenditure of energy in which the observant creative spirit of man finds no deep — ~~[illegible]~~ satisfaction — return of energy —

We are amidst at a papier mache being not a silent — obscure but real doing — and the real personal private & intensely democratic ~~[illegible]~~ (to it no doubt for all men & at it no exclusive) being that follows real doing —

We should not hesitate to embrace three dimensional color ~~cinegrad~~ - three dimensional sound - and all other sense perceptions to be incorporated into the cinema of tomorrow as a means of extending the ~~word~~ field of market. It will be shortened - ~~internal~~ & superficial only if we make it so - ~~at first~~ all sense impressions have equal importance on the mind of man upon ~~the~~ first stepping into a place or situation (a reality) but so soon as he begins to examine more carefully - the penetrates & taste - then as he begins to feel they may or may not be recomposed but in a very carefully controlled & measured way.

Even today but certainly tomorrow we must say greater ~~use~~ much greater variety & freedom in the employment of elements -

- Movement
- ~~Plastics~~ Graphic
- Color -
- Words
- Sounds
- Music

Even today once we introduce an element we afraid to shut it off whereas the psyche completely excludes all other elements but the one it is conscious of at - the moment letting memory build them into a montage of ideal reality

arena cont should do the same turning elements go off with complete freedom leaving the final montage construction to be created in the mind of the spectator -

So when movement is important we should see only abstraction of movement - color - words sounds & music should disappear - & when words are very important - we should hear only words & the screen should be black -

To ~~create~~ create of creative impotence we mechanically ~~apply~~ lay one element over the other & once we have started them they become like the tail that have the dog - we tempted to shut them off - so the music sound effects & color movement etc - waits on & on even though they have absolutely no functional purpose whatever - only clutter up the spectators head - making the whole film over rich & indigestible

The finer the observation - the more penetrant the more exclusive That is why the finest arts are the ones of single elements & the greatest control by the mind of one man - Ballet opera Theater are secondary arts because only joining elements they haven't been able to separate

then & there is little
control - Color or ornate
statues & 3 dimen relief
or paintings failed because
the artist did not have enough
control over the observation
of the spectator to introduce
& withdraw the new
elements with the control &
refinement & characteristic of
the rest of their work -
But now cinema can do
all this & we can have
an art that contains all the
~~[illegible]~~ elements of mere perception
~~[illegible]~~ & psychic because
the machine - isolated -
recording & precise composition
have given us infinite
control - to use them with

~~[illegible]~~ economically &
functionally -

To my knowledge animation can
not achieve a convincing 3 dimensional
effect - it may be that the
role of original in the total
cinema of tomorrow will be
to portray the subjective
in 2 dimensions against the
3 dimensional background of
objective reality

Therefore we are not afraid
of totality because we
have discovered selection
and Unlimited variability -
with strict control -
(through the machine)
we can be total real - & yet penetrate to
rights & depths of fine art.

finest meaning. Thus - selected
aborated - selected

Cinema is not an art of
memory & but of the
literal. Lived experience.
Therefore the spectator should
not identify himself with
follow the man after but be the
main actor hero
music - all space &
Time must be brought
vividly to his mind
- & they should be knitted
into universal concepts
& forms & the same
by which the mind is
conscious of the body -
only its body is the Universe
now.

"The Lady of the Lake"

or "The Spiritual Atomic Bomb"

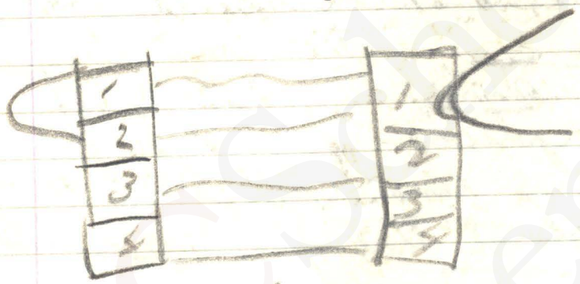
complete transfer of experience -
of a state of consciousness,
realization, feeling from
one person to another -
Requiring social means & so
powerful for good or evil that
it must be subject to
rigorous social control -

Must study the science of
perception - perception is
based on sense impression -
We must through analysis -
divide these sense channels into
units - & find means to record
& transmit them separately -
as we have done with sight &
sound - we must do with

a means of subjective "life" to & through the

smell - taste - internal &
external feeling -

First possibly by putting on
a ~~rubber~~ suit - a second
skin divided into thousands
of receiver & transmitter
cells which can communicate
senses of heat pressure &
texture - V



air pressure
heat cold

V Ultimately a radar
system must be found

for directly stimulating the
nerve endings of all the
bodies perception nerves -
even those of the eye -

~~The Science of Art will be
a pure and applied science~~

The Science of the spirit will
be dedicated to the comprehension
of spiritual & psychological -
emotional - i.e all so called non
physical reality -

& the Science of Art (communication)
will be ~~a~~ the science of
agriculture be an applied science
dedicated to utilizing mans
creative powers in the most effective
way to provide spiritual food.

You must analyse the relation of hunger to nourishing food- This will teach you a great deal about the connection between spiritual hunger and the artistic food that can satisfy it - for in the hunger for an indication of the food necessary to satisfy it - and the spiritual hunger we feel clearly & deeply can give direction to the nature of the fulfillment - what we perceive only vaguely -

Soc. Each question contains

The film University of tomorrow will have for use of its student every instruments employed in the world today to render reality more sensible perceptable to our senses

i e

telescopes
microscopes
Election microscopes
Slow & fast motion
X Rays
Microfones -
Thermometers etc

} for continuous photo observations of nature

- Note - Science reduces almost all qualities to a measurements of sight - a number, graph - etc -

- the germ of the answer

Study the penetrating hypnotism of single element — pantomime, music etc.

The fantastic is truer than the banal and yet it is foolish to say so — For miraculous, fantastic, strange etc. are words that have meaning only in relation to the consciousness — the knowledge of man — All in Universe is calm & normal — without tension — held in grip of necessity & laws of their own existence — Beautiful is that which adds to man's life — gives him courage —

Truth is that which man perceives & believes — at the moment Beautiful is that which adds to man's life — All is relative & meaningful only in relation to man — he is the measure of all things for himself

The individual & the collective are parallel to the same unity and goal of totality

also in the psych

ontogeny repeats phylogeny — but in the reverse way

I believe the mind (psych & spirit) of social humanity repeats (the macrocosm) the development of the mind of the individual (the microcosm) at first humanity is unconscious — the infant

Then identified with all beings considering itself inferior — & subject to outer forces — infancy —

Then the ego is born it — Humanity distinguishes itself from all other beings — the child — & feeling its great youthful potential & to compensate for an unconscious brooding sense of inferiority — egotism is born — man is the center of the universe — all its plants animals & elements exist only for his gratification — for his pleasure & investigation Garden of Eden — Adolescence —

Man's powers mature — yet death, disease & disaster are less present — & man discovers that nature is harmonious only through man — he exercises his youthful vigour to manipulate nature to secure his own physical existence —

This where we are now in the period

the lead of the mind — & detach themselves from immediate situations & respond to more abstract & general realities — It is the role of art to delineate the new actors on the stage of life & to educate human sentiments for the correct response

Color — 3 dimensional, sound — all neither inherent qualities of nature nor durable — but are realities only for man & durable only because of the separate nature of his sense perceptive organs or because of the technical development of his art — means of recording & communicating consciousness.

Instead of saying objective & subjective — we might be more exact if we say subjectiveness of the first order & subjectiveness of the second —

The first would include the first universal, immediate, undramatic impression of reality which is the basis of our everyday living & we share with the rest of humanity — yet in its most rudimentary form is certainly different than the communal vision of the bees or beings on Pluto —

& the second is our individual — dramatic — distorted yet thereby more penetrant through time & space ingressions of reality which art one individual language struggles with great difficulty to communicate to others at best succeeding only partially —

It is great labor of art to raise the finding of the second level to the first —

make the second level part of the first

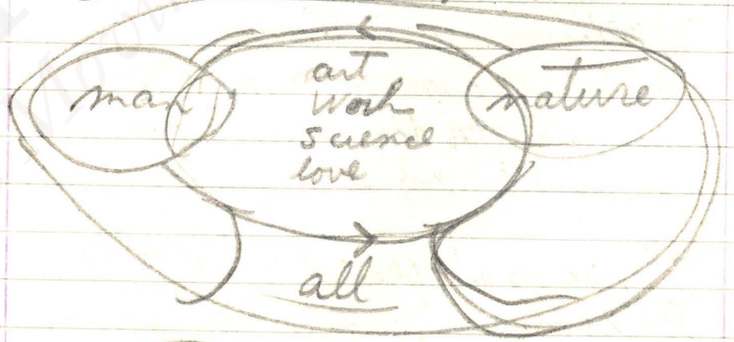
So called

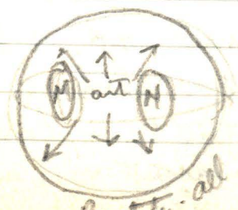
Movement exists when man is capable of perceiving it - & this he can do by arranging a system of relativeness which will convert the movement into space time dimensions palatable to the forms of his senses & perception.

i.e. we look up at the sky & say the cloud aren't moving & that we look at them again & coming & see that they are - Therefore everything is moving or static depending on the way man wishes to perceive things - which form of perception aids the struggle for life best at the moment - In todays epoch of violent progress, flight - social revolution & cultural evolution - it serves man best to perceive things in movement - & the art of cinema shall feel that

need - achieving a new equilibrium through movement - but in reality not achieving either movement or stateness which are only humanly subjective relative concepts - but man's life - the only real value - & given of memories concepts & abstractions.

Thus we must work from the spiritual needs of man's life - if we are to create real art.





Do in 3 dimensional stereo color -
mans interaction with nature
His birth - his discovery of
nature - his dangers - his
struggle to understand nature
his forms of control - clothing
housing food - navigation
industry - Social awakening
Spiritual Elivation - art -
The unknown future -

Wordless - man & woman -
naked - dance & mime -
sounds - a melodic music -
all in evolution -

This is too big - extensive - do
first mans interaction with
a specific problem - aspect of
nature & life - say - food
or Plant kingdom or
transportation - or Skeleton - or
Perception etc.

name signing - a preposterous egotistical
reflection of Romantic liberal individualism
that has no sound relation to reality

The product of individual handicraft production
carried the name of its maker - as the production
of material goods becomes social - i e produced
by many hands works - the consumer can no longer
know - therefore thank the individual workman
but now as with handicraft items - the essential
thing is that the item function well - he
real life gives - The real satisfaction of
the handicraft worker & anonymous
mass worker is essentially the one & the
same - honestly in light of their conscience
they know they have added to life -
and the silent unheard gratitude
of the consumer benefitting ~~in a practical way~~
for his creation is best acknowledgement
he could want.

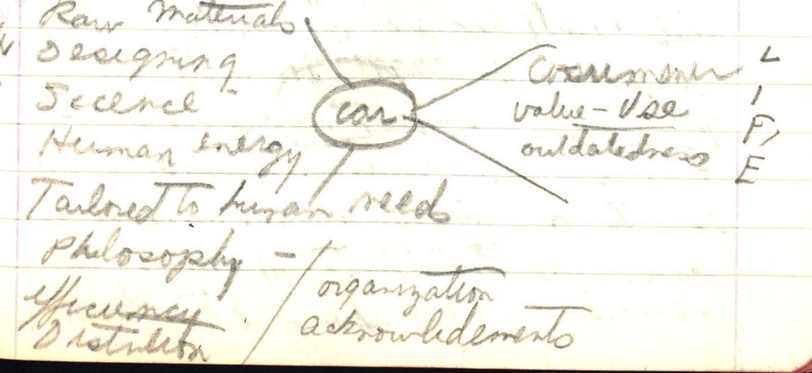
The same applies in the field of
spiritual values - to begin with it has
never been possible for man to stamp
his name or put a tag on his spiritual
wares - at best only a few thousand people
are conscious to whom they owe a shade of
a feeling - a perception - or a moral principal

and on the future when the production of spiritual life values become more & more social the only satisfaction of the producer & gratitude of the consumer will be the forms that ~~were~~ ever really existed – The joy of life given – its deep silent gratitude of life received ..

The job of making cinema – so already social in a material sense – but as it becomes more & more real cinema expanding to its potentialities filling its human function – the job will become so vast & complicated that it will have to become more & more social ever on the creative – idea side as the designing of steamship or car is the fruit of many minds – (but still piloted ~~by one~~ & ultimate decisions made by one man)

The important thing with cinema as with steamships is that it works – it fulfills its function – it contributes to human life. (all other considerations & acknowledgements etc are derivative, secondary – even superfluous)

For a guide to Socialist cinema production – study the complete line of socialist automobile production – from beginning to end –



The relation - of ingoing energy to outgoing - the relation of individual - designers & workers to the whole - the relation of the product to the consummer - Man

LIFE

The basic idea behind these thoughts is that the science, technique & production & consumption that invaded the natural sphere of life is now about to in fact is starting to invade & revolutionize the flower & healthy life. spiritual sphere of life -

We can learn many lessons from the first to apply to the second - to the laws of

conservation of energy & human sychology - the objective & subjective forces & molding human reality are exactly the same (?) the same many of the situations, struggles & / and will repeat themselves.

West invades East - The East will impact the West

The two essential protagonists that make for all drama are Death & Life - or life flowering & growing & Reproducing - which since life must flower & die is another form of Death

Forces against life & Forces for life

Good & Bad

Beautiful & Ugly

Intelligent & Ignorant

Kind & Cruel

Creative & Destructive

Peace & War

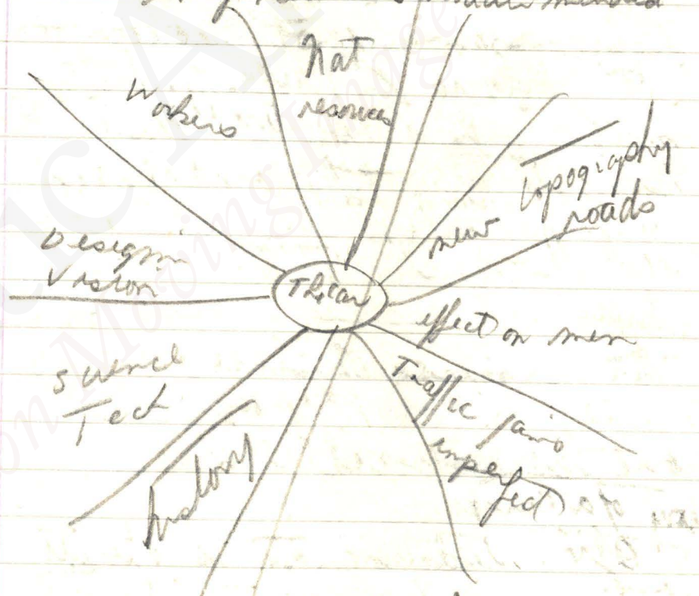
God & the Devil –

This is where cinema of the future – will deal more with elements & natural processes – not so much the figure of man – but man indirectly through the visual intuitive perception will find the sources of the drama – which has always been the source of drama – the human – but now – directly.

The Story of a car

After studying the production of the common car – even in the states – make a feature length documentary – in the light of these ideas – where inherently to understand the reality of socialist production – & the sole value – Honest

– the resistance of minerals bending to the gestures & industry of men –
The resistance & destruction of ignorant greedy individuals being defeated by the imaginative & broadminded men



Don't be so schematic –
– go directly from the first thrilling inspiration of conception to the completed form – cinematic

after you have the first first impression - then investigate exhaustively - change it if necessary - + redo entirely - but always work fresh & directly - from the moment of excited inspiration to completed form - even if mistaken scientifically in some - details. These can be corrected - but the overall structure can be sealed in no other way if it is to be Art - an instantaneous & whole & uniform

car minerals from all over the world - Natures have help killed by Man putting / on the raw material accidents

The best principle of education is to analyse the whole man divide him into basic faculties then cultivate these faculties separately & together - through function - so that the whole man flowers as a plant. ~~& the training~~ education is an important part of the training ~~is to~~ to carry on a fully developed life in world after school (P.S. ~~=~~ Socialism will break down the barrier between school & life - so that a school child will already be a part of life & life will be a school - although ~~Emphases~~ emphases may change from childhood to adulthood -

nature of Man	-	Arts of Cultivation
Physical	-	Gymnastics < food & sleep
Intellectual	-	Science - reasoning
Emotional	-	Art
Spiritual	-	Contemplation
Sex-love	-	Love making
Social	-	Social Interaction collaboration
Creative	-	Work

all of this acts have their use & out place — i.e. receiving & discharging of energy of ~~the~~ in each own plane — These aspects should be articulated & trained so that both receiving & ~~giving~~ giving are done with a maximum efficiency i.e. maximum transfer of effective resultive energy with the minimum of fatigue.

Especially important will be training to harmonize all these activities over a the period of a lifetime — a season of life — a year — a month, a week & a day — (in cycles)

as soon as we detach ourselves from the educative units of primitive animal like life — for deep realization of ourselves we must drive to other extreme — i.e. the road of art & ~~cultivation~~ (Civilization)

Men do not grade themselves by their control over men but by their control over things — nature — ignorance — the ability to render life — they yield not to any favorite — but only to whom who has ~~not~~ grasped truth — who has real power.

The idea of the "art of Living" contains
1. a good — a standard of value
2. knowledge
3. ability to apply knowledge

Non of these can, can be achieved individually — the civilized individual of today has already been torn by the stream of history from the control of his animal instinct or nature. He is born a all of a social being & only

through that being can he find the ~~way~~ way to his own healthy functioning -

The scientists must consider every ideological concretization - thrown up & widely believed by an age as its extreme containing its part of truth - which flows smoothly in greater underlying stream of development.

If they weigh moral systems in this light & go more directly to the minute daily life of the mass of humanity after prolonged & embraced study they to articulate the tongueless philosophy of humanity - I believe in large part they will find ~~Universally held values of~~ -

1. Length of life
2. Vitality
3. From physical to spiritual -

The correct interaction of internal nature with maro external to most fully realize the preceding values - required knowledge - but no more the individual ~~gives~~ knowledge of vehicles, qualities & soothsayers - but a scientific analysis of the essence of the mass of humanity & materialist expression in age groups.

Here again humanities interaction with nature must be considered dialectically i.e. - in the continuous flow of development of low to higher in quest of the preceding goals.

We must understand of laws of hereditary change better - & the civilized environment can change the physical & hereditary substance of man much more rapidly than heretofore considered by Darwinian - Mendelian science - i.e. Lamarkian - Lysenkovian science

although animals build, weave & cook staple have social order i.e. civilization more than we think

as general

they are more self contained, individualistic than mankind—

Each epoch of mankinds culture of housing, feeding, resting, exercising, cleansing, loving teaching & expressing himself will think to found to be extremes counteracting an another extreme to maintain the stream of truth & life—in development.

In any case civilized humanity aching to live life artfully are crying out for scientific knowledge—something broad deep extensive & solid—conceived dialectically—something which if not perfect they can trust in major part—as guides of action

We know nothing!! with any degree of certainty

How to eat
How to cloth
How to clean
How to sleep
How to house ourselves
How to exercise
How to make love
How live socially
How to work
How to study
How to express
How to think
How to grow & how to die
How to harmonize all the preceding—in the perspective of our developing life—in the perspective of the developing social organism.

& if we know—we know shallowly—excluding principles & consciousness from our actions—good & bad alike

And when science will tell us—when we know—we will want to apply our knowledge & only through society—through socialist civilization can we

do this.
Everything pertaining to
the preceding acts / presence
& requires / society —

Food & cooking / eating
Material & manufacture for clothing
Soap & water (warm) for cleaning
Bed, cover & security / for sleeping
Material & workers / for housing
Sports & Gymnasium (Material) for exercise
Time, Security - energy for love
& warmth & Fate
& doctors / in the consequence
Society for Social life & work
Books & condensed essences & / for study
thoughts - time & etc
Materials - sec & audience / in expression
technique
Logic - extended senses / for thought
Life - for observation
Life continued & love / for Growth & Death etc -

Only after these great study &
practical construction of means by
socialism will the art of /
living become possible for
the / mass of humanity - the
great human family / - the
one human organism.
For art will the process of
of mass interacting of the forces
internal nature with the forces
of external nature consciously —
in the light of scientific
knowledge, to / achieve scientifically
& determined goals —
& statically
The fusion of knowledge —
practice & goal in the
art.

& Today any part & all of it can
be achieved only in a / social
perspective. (

They are not to compared as mutually exclusive things

There is no sharp distinction between art & science - They are only extremes of a fully divided life - Art includes science - Science unconsciously comes from life & says yes to life - art comes consciously from life - & shares with every thing of its beings to ask repayment debt to life - Art is knowing & doing for life's sake - Science knows the part, art knows the whole - Science knows through the intellect art knows & does not only through the intellect but through every organ of the persons being (consciously) The artist knows & does through his hand - his heart, his pores - his testicals, his guts & his muscles -

Art - is the process of organizing & doing what is necessary in life

art cannot exist without Science & Science is worthless without art life is the great value containing both

It is because the organs of art knowing & doing are more valued - that art knows more completely - than science giving its spectator (who though receiving through only a few one sense reacts totally) life immediately - Science is the "intellectual knowing part of a greater work of art - Civilization - its work is more piecemeal - its road longer more indirect - ~~but its contribution to life is more essential~~ -

Science + love of life + practical application - = Art & its masterpiece is human life, = civilization -

This is what we mean when we say -

The art of medicine
The art farming
The Art of Engineering
The art of painting or music
& the art of living.

Humanity may never stop until it reaches a generally allow that includes the infinite distance of the stars — embraces death — and dispels the fears of the dark awakened at midnight.

Capitalism — value — property — gold (except) ~~is limited~~ land is limited & therefore must of necessity lead to conflict & violence & disintegration — but this is a false value — (the idea of the pie) the bigger you piece the smaller mind.

The only real value is human labor — the creative energy of man's brain & muscle — this is real & only source of life security welfare & happiness — the only redress — and this is Socialism — value — clear, direct & articulate — not a spilled fat an ever expanding growing force which unites man to man

man to machine, & both to nature & to all embracing sun — This is the new life value of Socialism with God of the new all harmonizing religion of humanity.

Poets sing its praise & all humanities heart will be filled with the new joy — their minds filled with the new light — their actions filled with the new love

Americans are trying to manufacture devotion, enthusiasm, sacrifice by proclaiming, promising & threatening & in the true American fashion they are trying a "gadget" solution instead of digging deeper for the real springs of spiritual energy — life. The hope is (as says) The last struggle

of their death agony will be a pity to behold!

— We have passed + any passing from age would [illegible] theor + philosophy to another

From **God control** — [illegible] Medieval catholicism / Oriental fatalism

↓ ↑ Fear — To [illegible] God directs all the world are of his favored children

Nature control — Renaissance liberalism Calvinism / Pantheism —

sanity self regulation of forces by which the talents of man are naturally provided for.

Man Control — Socialism Humanism

awakening clarity directly & completely — influencing recognition of the truths of disease disaster & death & only through work, thought & active love can man control & flourish — Only by [illegible] the ego & the flora & fauna of the earth to [illegible]

Supposing there was a philosophical theory which was the best explanation of the scientific facts known at the time - i.e. was the truest — which if logically put in practice would lead to the rapid extinction of humanity. The theory would be refuted or at least held at bay until a new one friendlier to humanity was formulated. Underlying the purely materialist investigation of nature is the assumption of coincidence - i.e. underlying harmony between nature / i.e. objective reality — truth & human welfare — which is [illegible] as clear see is a idealist transcendental assumption with no [illegible] solid scientific [illegible] materialist basis. Therefore as good materialists in the name of truth we must destroy ourselves or frankly admit that sole & only

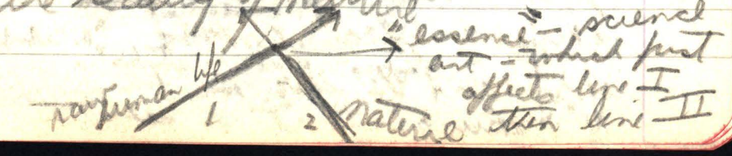
criteria of truth & beauty
as human survival - i.e.
we must consciously admit
what has been an unconscious
reality since the dawn of life -
& which so much a part
of each living organism - so
close to him that [illegible]
only with extreme difficulty
can objectify it.

Human life is the
sole value & content maker
of all human
thought, creation & action.

The complete "process" from
the of the race going to the
embryo - the Embryo growing
- the individual defining his
goal (value) discovering his
cause & effect methods (science).
combining the two in the discipline
of creative effort & creating

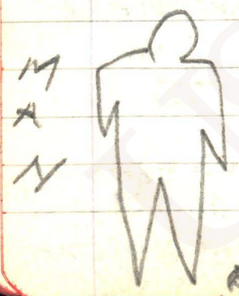
his
achieving goals which are gifts to
racial & universal life - This
"whole" process must be studied
& taught here by science -
in this sense the life of Moses
Christ Galileo Lincoln, Lenin
Newton Einstein all great
& all great men were artists
i.e. converting raw forces into life -
& their lives were artistic -

a correctly defined scientific formula
and a true poem are the same
as music & a word in them are the
same - accurate details that
truly represent the essence of the
mass - - essence is the exact
point where the interests of
human life crosses
the reality of nature

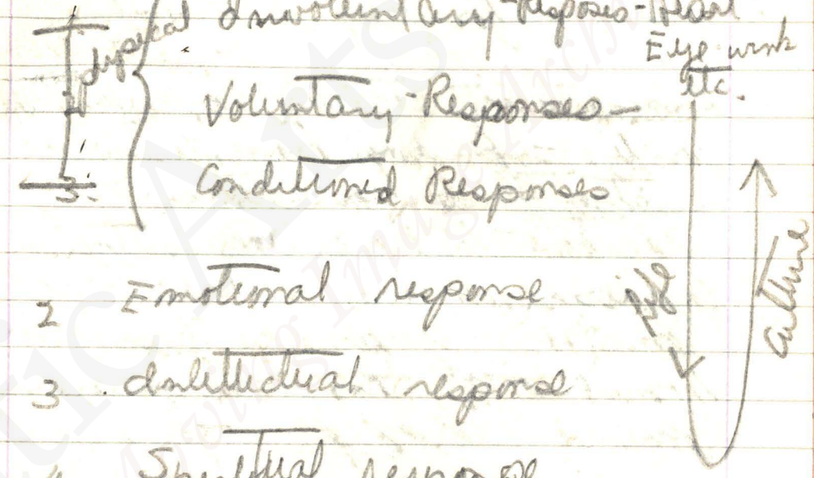


Everything which men think
in passing each day - upon
these two lines will be
traded, developed - substantiated
~~expanded~~ - into a great system
~~of~~ of knowledge -
method - ~~of~~ + creation (life).
Oh but to have more time
to pursue the many
flittering suggestions
(& connections) that pass my
mind - !!!! TIME!

The overall thing is the interaction
of Man with Nature to preserve
& develop human life -



Body - Pressure - Movement



1 Emotional response
3 Intellectual response
4 Spiritual response

Evolution continually makes new
fields of action & response - brings
new material within the range
of consciousness -
Culture is dedicated to the
digestion of new consciousness &
education of humanity so that
response to action becomes more & more

automatic - guaranteeing life more securely & freeing the ~~man~~ higher centers for new labors -

Books - art etc are no substitute for life - for impact of action & strength & correctness of reaction because they always approach man on one narrow zone or through one narrow window of his soul whereas life - real experience embraces him totally - engages his whole being as unified whole that knows no divisions

The art of the future will widen its approach & engage man totally - When an experience can be totally lived - removing some of the pain - & all of the danger - then we will have a real art of total communication -

- Then the "cultural lag" the senseless of our existence - can be quickly & painlessly closed - Then a healthy man will better understand a Black one - a sick a poor one - & armed revolution will really no longer be necessary to have the people embrace truth & put it into practice -

The ~~scientific~~ process of discerning truth (science) & speedily & totally conveying it to the people (art) - is the only basis - real peaceful evolutionary society - i e DEMOCRACY.

full Life experience - ~~a repeat~~ must circle the globe & penetrate mens hearts as quickly & powerfully as a rocket atom bomb otherwise we are lost -

On all the levels of mass interaction - with nature there are only 2 important distinctions correct & incorrect response - one leading to life - the often correct & that to death incorrect -

The great art of tomorrow will embrace all these levels in the strongest & furthest direction for life -

We would do everything by a quick injection - a pill - a gadget if we could - we try & we do - but we must take into account mass form of ingestion - for the widest mass of humanity The communication of ~~spiritual~~ ~~experience~~ psychically digested experience spiritual food -

I Man → Yogi - hypnotism Telepathy etc (go to India) → Man

groups of Men → art → large groups of humanity

Society

(art is the happy medium for today + Socialism)

life → Experience - all of Humanity

1/ we want wisdom

From this trip to Tacoma I have understood that there is no such thing in your "living cycle" of working "enjoying yourself". Because for to dance drink & make love in the liberal Bourgeois sense brings no enjoyment. Actually the cycle swings from one type of work, study & development to another. From film making & exploration — to reading — traveling — exercising contemplating & making love to someone very dear to you. The last is very important for the only thing that ties to the dreary senseless bourgeois routine is the need of it — a good woman will break this last link & enable you to carry on your development smoothly & at the same rate it proceeds while making a film.

Rest, recreation & enjoyment comes from the change in the form of development — not in the retreat (change) from development to destruction.

If we could understand how and why a white blood cell does its defence of the organism we can understand the reasons & process of the voluntary martyrdom of man.

Since clothing is a second artificial skin we should study the skin & make our clothing a compromise between skin, the necessities of outer Social living — clothing should be light — easy

electricity = The perfect suit to help men overcome & forget the problem

dust repellent — & above all electrically heated — with battery & separate enclosed decrease controls for each selection of the suit

Soft washable — shoe socks heater can be plugged into suit — hats & gloves can also be plugged in — eliminates all buttons belts — layers — weight

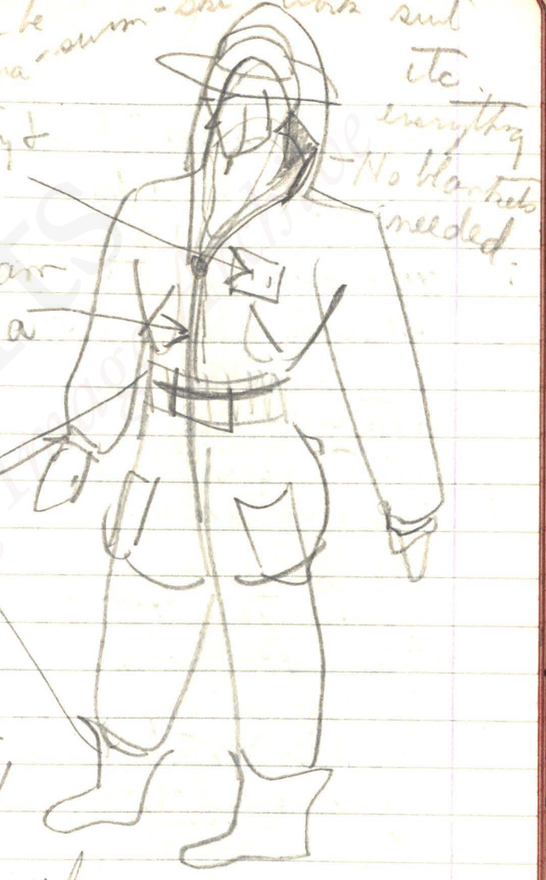
Can electrically change color & become water repellent

Zipper or magnetic connections can convert whole one piece bag and suit to just a pair of pants & shirts

suit proof — can be washed & dried by motor

of clothing — can be used for pajamas — sun-ski — work suit etc. everything — No blankets needed.

Electric battery & switch



Magnetic seam quicker than a zipper

Light foot wrist & waist cuff

suit is made of 3 basic color fibers — covered with colored yellow Hud or red plastic that swells when heated just a bit. — This swelling in different proportions gives all different colors — changeable like a chameleon

Realist all
sense cinema
Lead piece
for -
individual
consumption of
3 dimensional scene -
3 dimensional - sounds
odors - eventually a whole
suit for tactile impressions
so - you for you are
walking down a street
of spiritual abstractions
made as physically
palpable as an ordinary
every day street.

Books I must read -

Lenin		Hourman became a poet
Marx		From atom to myself
Engels		Illusion + Reality
& all communist classics		Stanislavsky
		Bela Balaz
Don Quixotte		Georges Sadoul
Divine Commedy		Chaplin
Faust		
Promessi Sposi		
Iliad - Odyssey		All Sciences
Boccaccio		Classics
Virgil		Travel
War & Peace		Living - Love
		Sane living &
		Work.

The intuition immediately draws conclusions sufficient for the adjustment of the individual animal to the situation - This no ideal message from God but

natures way of saving man thought energy. The psychical attitude is subtle but extremely precise — of a profundity way beyond our science (the animal but without science of our type) whose precision ~~matter is clearly~~ is made clear by the directions of our actions & speech. We dont know why we are attracted to one face & repelled by another — but no the less we approach or draw away — We often dont know why a book much we are unhappy after wondering intellectually if we are happy or not — yet we grumble & feel miserable + or feel exuberant — sick & sing — — the difference being made & definite & the state of d'anima being as precise & dependable as the gesture it manifests — The connection is established & direct

After first immediate attitude is made analytical-science can delineate the causal chains of certain components these eventually contributing to a richer (more complex & extended) synthesis.

Cinematic works can represent either the individual, social or universal soul.

The only real & important & real thing in the reality is full bloomed soul & imagination of the artist. Camera & photography with sets & actors or + animations are two different ways developed in the attempt to express this — The well developed specialized techniques of extreme & technique when come together & blend into one — as in Cocteau, Clair

make the work too rich - would separate the spectator from a vital dialectical primitive radically democratic contact with reality & try to give him experience in little collop anchogs. Words & music being social creations are possibly more suited to rendering of the social soul.

Just as the material history of the race is repeated by the individual - Embryo - so is the spiritual history of race reproduced by the individual. Our being - Thus by projecting our profoundest & sincerest individual passions we represent those of the race & by study the psychology of individual we can ~~portray~~ uncover the psyche of the race of nature & God.

The stories - fearless, themes & morals & texts of tomorrows art - cinema will be those within reach of every human beings - The stars, clouds, rain, plants animals, machines, human body, death, love, thought - election emotionally laying down a new emotional path towards the democratic - art building of all citizens of Socialism.

Not the drama of kings & queens but the magnificent miraculous spellbinding dramma of the ordinary human being living in a natural - & man moulded surroundings - One day one life one race in the great realm of of the electric universe.

a 40 minute document on polm

The life of a drop or molecule of water -

Two Hydrogens - One Oxygen atoms united to form a molecule of water

Millions of molecules - a drop of water - billions of drops - the great Black sea - flora & fauna of the great vollmous sea - the flaura & faunas of the drop of sea water - flowing around with the ocean Currents - approaching the light of the surface - Hot sun rays - surface tension - agitation - evaporization - Rise & float up over the sea - condensing into tiny drops clouds - blown inland - more & more dense -

into called of
rolling over plains & cools - cold air from other side of mountain - black angry cumulous clouds - lightening - band together into big drops heavier than air - fall - to earth rushing up - melting into the packed earth - boring into the depths - melting worms - dissolving salts carrying them into root hairs & up the shoots of tree carrying food out onto its leaf - exopeyation - crystalling into snow - brings in white on the peaks, melting in spring flowing down into Oggers & bigger Rivers - drunken or eaten by an animal - flowing through his veins animating his tissues - (87% water) sweated out

pouring the big streams
flowing over the dam
electricity — into factories
steam power + washing —
cooking — feeding the mills of
the city — a thousand used
& finally flowing back
into the sea carrying refuse
floating with great joy
the bubbling rush of the
swollen waters carrying
fish & ships alike —
building deltas changing
geography & finally —
being invaded with
salt & joining the great
deep — endless — realm
of the sea — sinking to the
black quiet calm of its depths
— only to begin the cycle over again

as it has done from the beginning
of the earth 100 000000 years
ago as it will continue to do
until the end.

The great difference between
activism & creation
observation & love
knowing & (really knowing) being

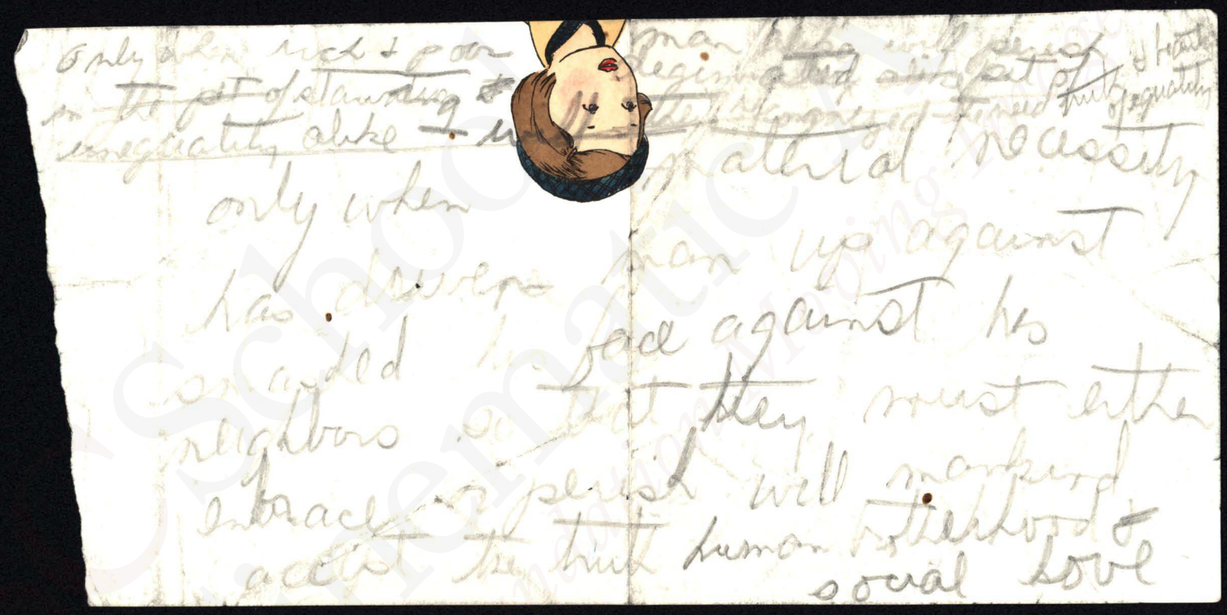
This latter comes from a man
profound ~~acquaintance~~ understanding
of life & profound acquaintance
with the subject at hand —
~~Not a part of~~ a profound intuition
co - sympathy
Italian word - convivente
i.e. - moving together —
identity of life. This is the
essence of love — This is the
~~the~~ substance of the universal
truth — the universal soul —

The foundation of human culture -

Only when life drives man materially down a one way road & when he has no alternative but to travel that road or perish — will he spiritually recognize this new path & set it as his ideal.

We must study the forces & tread its path more consciously & less painfully

Tie up with Buying material for



The moment of great artistic experience

feeling complete identity & conviction in a sphere of reality we have never before entered.

When painting the devil — evil Iago and death what should be devotion guiding us great rich & conscious hate or love —

Hate in this sense can only exist where there is great love — thus it is the other face of love — Love & hate are the two faces of consciousness.

The form of understanding the grain of sand by studying it the universe — or one city by visiting many cities or one idea by studying one idea — or one book of art by studying many or one woman — or love by living with many women — is all the same —

It is the way of understanding reality by observing its many different elements in the different places where they rise to the surface & exhibit themselves dramatically.

The easts method is to expand the microcosm with a great intensity of concentration & intuition to penetrate into false surface appearances & reveal in all layers of its being till it expands & melts into the macrocosm —

The wisest scientific way is to reverse the analysis of the furthest star to understand the pebble in hand

But these terms are confusing because the problem is not to understand a grain of sand or the Universe but to understand the reality that provides the being & equally permeates both —

above all we must eliminate the vulgar superficial conceptions of time & space — distance & difficulty which so easily confuse our thoughts —

distance = time & difficulty can only be calculated in terms of the real (psychic) space

The only two realities are the psyche of man & the psyche of Nature (God) — Given a certain preparation training & equipment of the psyche of man — a trip to the moon may be an easier, quicker, closer way of establishing contact with the mind of nature than studying the palm of your own hand —

Each psyche has not only the right nor the moral duty to take the least — most efficient path for itself — but you & always will naturally take the path as an expression of its nature & the psyche of the new

animal "Social Man"
will take no path too.

In a sense -
Art is the path of the individual
contact with the whole
of Reality. (East)
Philosophy

Science - is the way of the
socialy psychic contact
with (the) psyche of Nature
(West)

and philosophy is the Yoga of
connecting the two.

It is easier for us to build
cities, sky scrapers etc
than build a single living
cell or a seed - -
in this "real" living vital sense
- the understanding control
& creation for us of the seed
is pushed away & more difficult
in both time & space
than the building of the greatest
& most dazzling Empires

Life is a voyage - & on it in
a civilized world we need
to consume & use a great many
items - what we need
is a great - easy & complete
use system - whereby
everything can be taken or
bought used & returned
to say depot for cleaning
repair to be used again by
others.

This applies to homes, cars, clothing, books, paintings jewelry - radios, machinery utensils etc -
we do this already in reference to homes, cars & books - why not extend it to clothing & all the other private items -
We are once again [illegible] humanity now to our family - the next man out of ourselves permanent private property is a drudge a weight & a worry - We restrict our use of things so worry as to what to do with them later -
Nature consumes use & gives back with utter efficiency - Our garments are never weighted with useless baggage - attics crammed with junk & relics -
Each season - each need we should easily turn in & get out - remaining delightfully replete - yet always light -
With modern methods of sterilization at the last no superstition -
Start a great turn over service for all items -

The great difference between - the great advance - of - socialist materialist understanding (perspective grasp) & liberal idealist thinking is the difference between - the real & the apparent - the vital profound complete scientific artistic living reality & the superficial false artificial empty hot air & brassmongering -

The difference - between

Orangeade & Coca Cola
Work & Huckstering
Study & Filibustering
Love & flirtation

On history

The word "state" cannot describe a social cohesiveness - outside the sphere of exploitation.

In the past the state did not organize social economic & cultural forces in the modern sense mainly because men were unconscious of the existence & interaction of such forces - The states only existence was as its repressive laws, police & prisons & internal attack against oppressors & armies for protection & aggression against external agressors - When classes are eliminated - the state in this sense will be obsolete & disappear but a democratically elected specialists will work to coordinate & apply the findings of science & the creative products of labor for the benefit of humanity. I.E. The machinery for oppression i.e. state in the old ~~and~~ derivative meaning (state) Take from its only reality) will disappear but the

give way to a great body of democratically elected experts whose job it will be to coordinate & give direction to the manyfold activities of society. It will be the hand of the new social body.

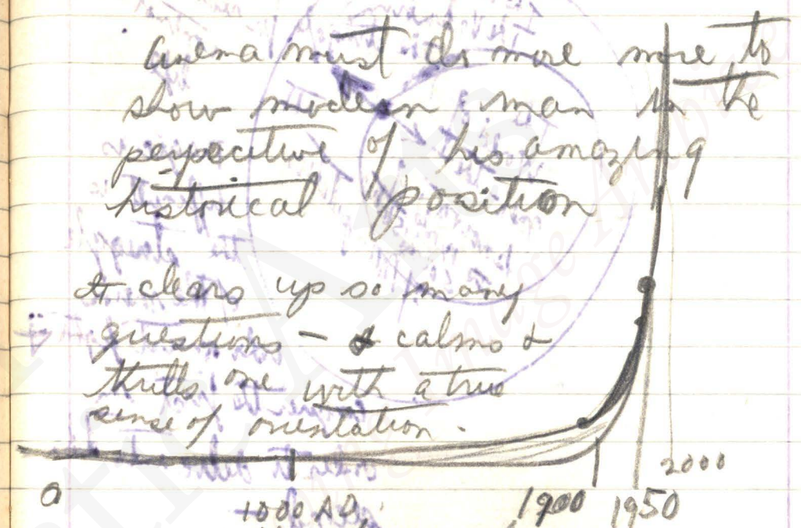
2/ for the first time it will take account of & act on the basis of —

climatology
Population Statistics (Bypology)
Land evolution — (Landology)
Mineralogy
Production Engineering
Mass Psychology
Preventive Medicine — Healthology
~~Historiology~~ Genetics
Culturology
Educatenology
Ecology — Biotechnology
Axiology

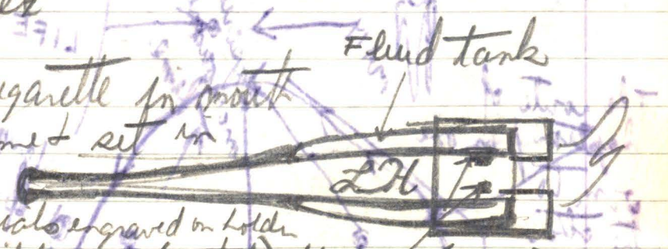
I.E. — the realities of wld we live in are known & consciously ~~about~~ — but about wld we are doing nothing to bring real practical social way!!

Guerna must do more more to show modern man in the perspective of his amazing historical position

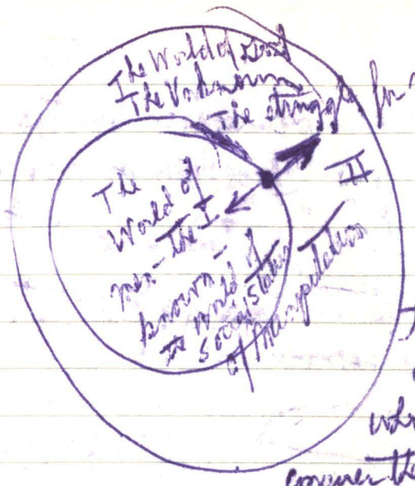
It clears up so many questions — & calms & thrills one with a true sense of orientation.



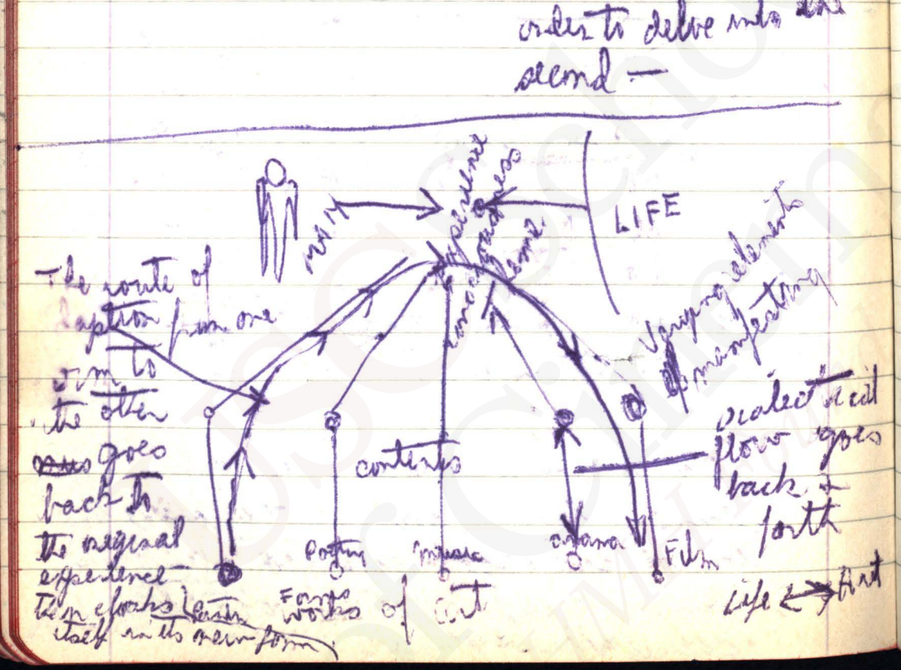
a cigarette holder that is also a lighter



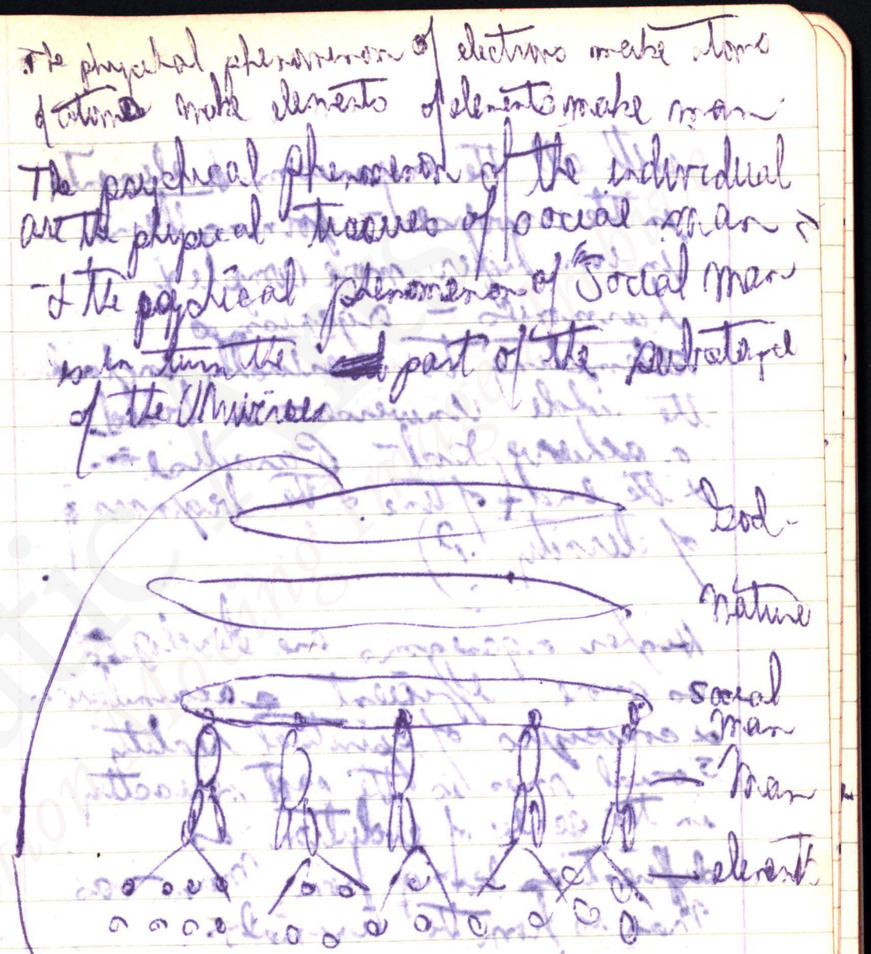
light cigarette for mouth
strut flame & set in holder
Initial engraved on holder
slidable cap (Metal) that uncovers benzine holes — has still purpose that ribbed flint caps intended on inside of holder — rotating with thumb — causes spark & flame.



Tragic is difficult to the struggle of the man who must fight + conquer the first in order to delve into the second —



The physical phenomenon of electrons make atoms + atoms make elements of elements make man
The psychical phenomenon of the individual are the physical traces of social man +
+ the psychical phenomenon of Social man in turn is a part of the Individual
of the Universe



In a way social Man is a great being now — His psyche is not yet conscious to any nothing of being developed — But when it is as it will reach out & make love

with all the organisms & elements
in the universal — forming the
ever higher more complex
harmonic — organisms
attempting to inclusively include
the whole Universe — a united
& achieved Kind — Paradise —
& the end of time & the beginning
of eternity. ?)

Higher organisms are developed
as more efficient accumulators
& conveyors of spiritual reality.
Social man is the next reality
in the scale of evolution as
different a being from man — as
man is from the animals.

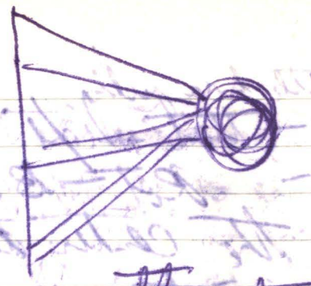
Existence

Stanford University Libraries



where one path enters and illuminates the other.

America thinking so steadily impotent — it has got tracked the course of pokey life — the well-spoken of its truth & reliability — it reverses state — artificial — it is the blenders of stuffy ginhouse living of its creators + it is rich that is as good as a rule.

It does not see the vital connection — of all things the dialectical vital play of all forces — the relation of all levels of experience & consciousness —

The two letters — life — art — Salard — Hastings & Nature.

It gave names to things without knowing the limitation of language + its kind of thinking typical of egotistical unreal the ideallest thinker — what else away from complex ever changing concrete reality — take up a handy word — exclaiming "I have explained it" — & the crowd cheers hero & preacher to the heights appropriate them as they came.

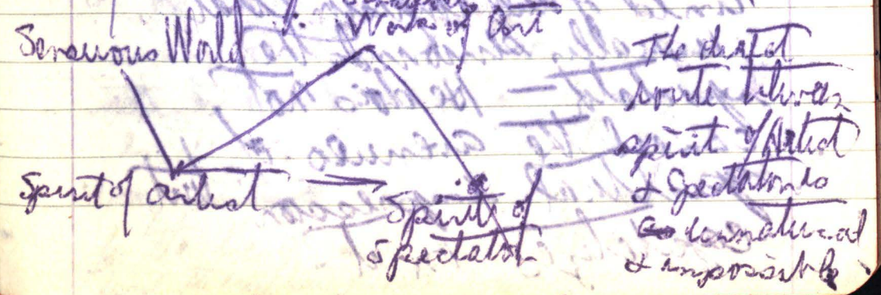
The truth touches everything where he must accept or be insane — Ponder what the empty nature of an image of matter difference of believe the work that has true — i.e. art — centrally all layers of resistance & hopes the most vital subconscious parts of them reflected & inevitably finds them in one accord.

No advance ~~praise~~ can prevent this & no ~~adverse~~ hostile criticism of attitude can prevent: Life will touch Life with a magnetic force that is beyond the power of any man of mechanism to stop — (i.e. ~~stop~~ directly — not indirectly by killing the artist) but the living the work — but the artist working and permitted to spread — to establish contact with the perceptive of the audience — once this is established not even the greatest effort on the part of the spectator can stop it — (a true work) from penetrating to the heart.

from birth to death

It is carrying human life in each age of its progress the forms of our vision on to all (our pleasant pains — securities & preoccupations) the ages yet to come & leave ourselves disorientated when we discover the new forms are completely different

The Spiritual Embodied in the Concrete is what really excites us — for it is the basis for the maximum dialectical response of our spirits



placing a truth ~~perpetually~~ before the spectator — ~~permits~~ a real democratic exercise of his whole being — ~~power of observation reproduction~~ deduction — thus making the message truly & exactly & profoundly his own as if he ~~had~~ created it from his own inner experience.

The artists substitutes ~~an~~ world of order & harmony — ~~superimposed with meaning~~ before the spectator — for the world of dull confusion that usually surrounds the spectator — he does not ~~cancel~~ the avenues of individual impression ~~capitalizes~~ on it.

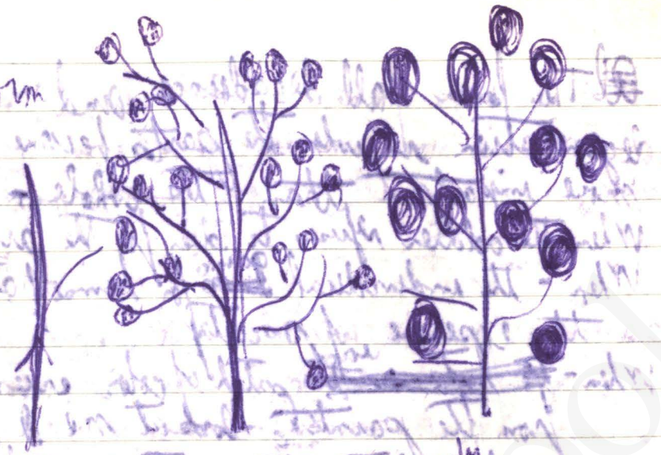
The sign of all decadence and degeneration is when the parts become more important than the whole — When the soldier refuses to die for the army When - the individual ~~gains~~ for himself at the expense of society

When - ~~the~~ ~~paint~~ color cries out for the painter - look at me I am independent - the most beautiful.

When - the cell refuses to fulfill its role in the organism & starts a cancerous rampage - when the individual state all says to the organism my life is more important to me & refuses to attack the microbe

It is decadence because it is a rebellion against truth - against reality - When the part loses sight of purpose of its existence - its raison d'etre - denys the very law of its nature & substitutes ~~false~~ for the lie of all importance - The attempt ~~to~~ twist the iron law of reality to some name calling - must end in

Form



① desire — birth of the spirit

② manifestation of harmony

③ of rhythm — the cause

④ death of the Spirit

⑤ death of the body

The great experiment of Socialism over Capitalism & the great revelation of glory in Europe to the realization that

"First Things Come First"!!

a volume can be written under this title epitomizing & revealing it in all its complexity wherein lies the real essence & real expression (art) are unquestionably & necessarily in the rank of First Things.

The wrong place for the life of the whole The whole belly of stirring as a Lord belching forth clouds of Young Sun of a star poised for life that sweeps empires & epochs of the strong & the weak of pleasure placed apart — melting natures

The fertilizers & rich soil for the birth of a spirit

Future elevate an equal footing — ~~[illegible]~~ in spite of mass shifting folly — that life will grow on —

A work of art is true creation — an independent living being — ~~that~~ soul & body / that laughs & cries.

Does no reason why as the art of medicine becomes more & more founded on scientific principals and correlations that the machine won't also invade this field — giving rise to mechanical doctors — These doctors could perform complete clinical & physical even psychological diagnosis of the patient — in the flash of it mechanical brain — formulate the diagnosis & prescribe the treatment & medicine from the widest sources of the latest medical theory — much beyond the memory of any doctor in particular general practitioners and in the provinces

Where the patient can have "specialized" a doctor could be called in

⇒ the electronic way

In this sense 99 % of all the arts & the organizers (human life) except the most highly intuitive where the human spirit has an indispensable element i.e the fine arts — will become mechanized i.e all the workers whose work consists of giving fixed answers to fixed questions — will undoubtedly be replaced by machines — doctors, Engineers & all intellectual laborers that do no more than dispersal textbook formulas — Today still the only way & even tomorrow the machine will be used by the intellectual laborer for dispersal

The human being will be prepared for research

Your Book — the Evolution of the spiritual nature & Wealth of Mankind.

after Darwin & Marx — concepts of the Physical Evolution of the species & Material Evolution of Mans Society

Psychical Evolution of the Species
Spiritual Evolution of Mans Society

The mechanical doctor will be a room — The patient will deposit Name fees — have whole body X rayed — Blood pressure — blood count & samples — metabolism analysis — fat analysis — muscle — skin texture — temperature etc — a thousand physical tests taken — Eye color — Can with push buttons reply to complete

by feeling all body lines

series of psychic questions — age — weight & sex race — & previous diseases — included in data —

Machine analyses & classifies all information — comparing it to the form of complete health analyses made of patient when well & was age & throughout life — Illness is diagnosed — a standard diagnosis card is typed out (automatically) Treatment directions — in all general & specific treatments — and that special or up to date medicines & medicine brought forward couple with applicators — in 5 minutes the whole analyses & medicines are plotted through to patient (free) he takes them & goes on his way —

The machine contains the latest conducts the world medical wisdom — & the best of all the worlds medicines — just as a modern battle sums up the best of modern Scientific & historical principals.

O Leader —

Are you going to be proud just because
Are you going to be smart with books
Are you going to be smart with muscles
Are you going to be hailed by the stars
O Leader — work, study — give
Build the only thing that is
to exalt glorious —
The hearts of proud men rested
from the earth trembling
against the sun
There is no such thing as "he
got it" — he taught — in regard to
spiritual talents are gone
star seed to superstar
Success is gaudy-coated
But life is mysterious & graduated
Talent is laid in many doses of
graduateness as is physical strength

Why look at your face & try to
imagine it effluvely in the
terms of the latest philosophy
— electrons — muscles etc
tearing the remote the fact of
your living consciousness with
its nature of oneness — You
can't end life in conceptions — they
change with life goes on — Why
try to deny the integrated Soul
of the person that is a person
only to lose our selves in a
maze of lifeless superficial
artificially imposed concepts —

— A great deal of simple-
richly central didactic fun
entitled an exposition of — called

"The Ideology of Socialism"

Fundamental
Differences in world outlook of Socialism
& Federalism

(scientific examples substantiating the materialist point of view

Spirit (God) unmoved mover source

Flows downward

matter - nature physical World

Hegelian dialectical idealism as to theory of the conflict of "ideas" & their syntheses - manifested (after) in the material world

Marxian dialectical materialism considers matter the fundamental reality of the universe - & the struggle & synthesis of material forces - manifested itself or is reflected in spiritual qualities which evolve into higher spheres of consciousness (of man) as the level of material interaction proceeds to higher levels.

Spirit - consciousness (of man) social man and man animals plants first elements

Flows upward

matter

Marx extended the theory of dialectical materialism to the new field of social science and concluded that means of material necessities life from nature material production was the basis of all societies - and that men enter into relations with one another according to their relation to the process of production existing at the time - Men become grouped into classes - each one struggle for its own benefit The ruling class creates as superstructure of laws, art & religion

i.e. ideology to justify its material position (interests) -

~~This ideology~~

This ideology is like the clothing that fits on a growing body - at first it protects speeds up the productive process - brings a higher level of consciousness - articulation to previously unknown - subconscious process - this ~~multiplying~~ helping the ~~no material~~ given productive forces to achieve the highest "rendimento" - ~~it protects~~ like a suit - it protects adds to the life of the individual in the case society - ~~The~~ But the body - the material productive forces of society continually ~~wears~~ wears out (have throughout history & with in the future)

like the growing body of a boy until the very suit that once protected him & added to his life now chokes him - ~~destroys~~ diminishes

~~The~~ In nature quantity material change - suddenly raises forth a qualitative - change - a new element a new organism - a new idea aesthetic harmony is born (a new organic unity - one might say)

This in nature have gone from higher to lower - forever in jumps & leaps achieving higher levels of consciousness.

In society the growing productive forces strangled by antiquated ideology suddenly bursts its ideology chains and creates a new one which liberates its greater energies - This when evolution ~~is transformed~~ becomes revolution - ~~Each~~ ideology ~~is the creation of the class~~ ~~Each class creates~~ But the struggle manifests itself in men - because men are the essential ~~moving~~ thinking - energic units of society.

~~his life forces~~

Humanity ~~to divide~~ was once ~~one~~ ~~common class~~ classless - i.e. men of primitive tribes each contributed to the social wealth & ~~did consumed~~ according to their abilities & obtain their share according to their need - With development of higher productive techniques men were split into groups - termed classes - which function more & less ~~as~~ one unit - in terms of its own interests -

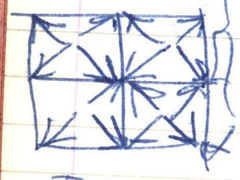
The classes were general two
the owners & the slaves (Slave Society)
The nobility & the serfs (Feudal Society)
The Bourgeoisie & the Proletariat (capitalist Society)

all this preceding forms ~~of~~ ~~class~~ of one group exploiting the the labor energies of another
One class robbing the life of another ~~subsequently to increase~~ thereby increasing their own

~~To last~~ Each new society is issued forth by revolution in which the new class which represents the new needs of productive forces overthrow the old class that has been restraining them Society then proceeds to higher levels of productive energy - ~~this~~ e.g. according to materialism - ~~[illegible]~~ more ergo for social man - ~~as the~~ through revolution of the new class against the old -

~~Each society grows within the~~ womb of the old -
now we have capitalism. due to ~~industry~~ ~~to, nature~~ need was economic liberty individualism - freedom from the ~~state~~ fetters of serfdom & to ~~the~~ divine right ideology (Catholic) To justify economic individualism was created the ideology of cultural individualism - (liberalism) - (protestantism) which

The goal
in the individual - egotism - / one's glory rather than value
in industry - profit -
in nation - power & glory over other nations
the maximum amount
of material & spiritual wealth
of society is believed to be
automatically achieved by the
free interplay & competition of all
units -
of man against man
idea against idea
Family against family
Business Firm against business Firm
ultimate State against state.



- T

But production of both material
& spiritual wealth has become
predominantly social in nature
- Thousands men working in
factories - Science - Aneps
- International trade of materials
& technique etc.

The old individualistic liberal ideology
is now longer a true articulation

the struggle for these would (supposedly)
automatically yield the greatest well
being for the greatest number of human beings
of the reality hence it is stifling the
creative forces - which must
either expand in a healthy growth
or become inverted & destroy the
base of society from within -
decay - material poverty war
& spiritual degeneration.

War is one of the most odious & destructive
manifestation of the disintegration
of an immoral - mobbund & obsolete
capitalist ideology

It is the readjustment through
force & violence by different
groups of capitalists of the altered
state of material power - +
its the only means other
than socialism of resolving the
problem of over production
War is the great consumer of goods.
as well a procurement of more colonies

Imperialism – the highest & most moderne stage of capitalism

for cheap raw materials and protected markets – therefor the greatest profits.

25, ~~000~~ million men were killed in World War +
52 Million in World War –

Capitalism ~~of~~ by virtue of its criminal restraint of material & spiritual energies of mankind is responsible for the deaths of hundreds of thousands of people everyday + through starvation, disease, war violence – & ignorance.

The proletariat who have all to gain by the socialization of the production & distribution of social wealth & nothing to lose – are the class that will struggle for and assure forth Socialism

The change

Socialism will be one of the greatest changes of social history – after thousands of years of wasteful class struggle – a society will become once again classless as it was in prehistoric times but on an unspeakably higher level –
& it will be real birth of humanity
Social man – into consciousness

It will be greatest, realest & truest recognition of the reality of the unity & mutual interest of humanity –

an expression ~~of~~ to the extent of the economic interdependence of humanity – & and ~~appreciation~~ the first real possibility for man act in accordance with new & larger perspectives – concepts about ~~nature~~ the Universe & man's place in it as revealed by science

The horizon is no longer strictly anthropomorphic - mans Universe is now filled with atoms electrons elements millions of species of plants & animals — ~~of~~ peopled with elemental forces of the oceans the winds — climate ~~space~~ telepic geologic forces ~~&~~ ice ages & and contraction of the earths crust thrusting up mountain ranges ~~emitte~~ peopled with planets stars & great glaxies of millions of millions stars —

each & all of which ~~struggling~~ caught in the inertia of its own necessity struggling for its own predominance & yet all contained within some yet dimly perceived harmony. & in the ~~so~~ grandeur prospective

high plane of
of dimensions, space, ~~&~~ billions of years of time — humanity is but one tiny element which must struggle passionately & energetically for its — survival — i e continued growth — (as death is only alternative of growth in a world of continuous change) anthropomorphic fatherly white bearded God particularly interested in mans fate — doting over him protectively & lovingly as his favorite child (creation) — is no ~~one~~ more — he lives no longer in the consciousness of men — ~~& nothing yet has taken his place~~ — Man is made alone in a ~~totally~~ universe whose design if any exists does not hold him in consideration but ~~who~~ which uses man as it sees its own ~~ends~~ (unless by man) purposes

eventually ~~exhaust~~ completely obliterating him as element – (a reality) in the completely universe. Hence man must not ~~waste~~ his puttering their energies away struggling against one – another – nor ~~should~~ must he content to realize only 1/10 their potential energies (life force) as they do under capitalism – but must strive to actuate all their potential energies – struggling against the other elements of the universe – mastering them through ~~work~~ muscular & cerebral work – & subjugating them to the control of mankind. ~~All~~ Social man in the interest of his survival (The wave yields us quarter but expresses all its energy – so must man)

Life is the / or humanity is the source of all criteria – it is the source of the beautiful, the good & the true.

In Socialism & communism War, poverty & will be eliminated mankind resolving the problem of his material – physical needs, will ~~pass~~ will be free to devote himself (concentrate his attention & energies) to his spiritual development – a road that has no end –

Socialist ideology – having a clear criteria of value – The most life for the greatest number of human beings – is forever fed of the vague ~~&~~ moral & confusion of bourgeois ideology

That which yields this increased life is good beautiful & true – That which diminishes human life

so ugly, bad & false. Thus
socialist there exists black &
white instead of infinite gray
of bourgeois liberals —
There exists good & bad,
beautiful & ugly
true & false
in very real concrete terms
& by the same token there
exists happiness &
unhappiness. There is a
level of well being and state
of growth above which man
is happy — & beneath
which he is unhappy —
This in place of all natural
logic that man does nothing
that happiness is nothing but
relative hence unreal &
that man does nothing but
prodd from one level of
unhappiness to another.

One must not confuse the
terms happiness & desire —
Desire is forever born anew
— & when it is born & when
has the possibility to worked for
and to finally satisfied —
man is happy — desire
is the essential manifestation of
vitality of growth & life — & the
the more passionate and acute its
nature the more alive & happy
is man — & the preceding thus
desire is born in a complex of
situation within which it can be
satisfied.
Desire springing fresh and anew
in the context of fulfillment is the greatest
source of happiness not the
unhappiness — it is in the
equilibrium of dynamics — in

the harmony of movement - that man who is a living growing organism - living a universal of continuous change & evolution finds his happiness -

rather than the static equilibrium called forth by a static concept of reality - the universe & man's place in it.

Eventually mans individual will be absorbed in the newest & latest organism on earth "Social man" A new entity has made its appearance in the Universe.

Law its bones.
Machinery all its muscles
Human clothing its skin
Radio - television & electricity its nerves
art its imagination
Science its intellect

& its destiny unknown.

You must express this whole new "weltanschauung" (world outlook) in the latest most complete forms of total experience art
i.e. Stereo, vision, color, sound, smell, touch taste - cinema -
or the equivalent possibilities offered in your time.
A series of 7 - 3 hour films containing all the intellectual clarity & dramatic passion of the world view.
To be seen by all of humanity in a series of 7 projections (or 5 or 10) in 30 many days.
The Bible
The Divine Commedy
of the new age!!

Forgive me for my immodesty. I'd cannot achieve this as I probably can't & will not — it is at least the goal for which I — and large groups of socially organized Scientists, Philosophers, Artists & workmen should & will strive for:

~~an (overall) opinion~~

An articulation expression - a raising to the level of full consciousness (i.e. passionate understanding) of the new reality will serve greatly free & stimulate the life forces (universal) of Social Man (Humanity)

That is the goal - the "raison d'etre"!!

Three elements to be observed in a work of art

The object	The Subject	The means & aesthetic forms
The sense impression - & immediate form of the thing itself - whether - an object or an idea	The personality ~~thought~~ world view of the artist - His spiritual response interpretation	The technical tools - materials by which the state of soul caused by the preceding two can be concretized preserved & communicated to other men

Life - geography science - people situations & ~~art~~ about -

Practical Work

A good idea would be to publish
in America a book analogous
to the Italian book
"Letters of the condemned to
Death of Italian Resistance"
a collection of great breaking
& revealing letters written by men
a few hours before their execution
— each with a brief biography of
the man —
Introduction
In american edition Foto should
be added where possible.

It should be called
"Letters from Korea"
(The living, the wounded, the
captured and the dead)
& the criteria of selection should
be the horror, confusion, lack of
conviction & sense of injustice of the Korean War

Aside from the [redacted] calculated
aim of the Upper Bourgeoisie
to create Bourgeois through the
force of money — the fear of danger
— art, for in America, is bourgeois
in realistic nature because of
the nature of the artists and their
creative processes. ~~It only does~~
To devote oneself to art even to
~~understand~~ know that it exists and
understand its significance requires
education — to practice it requires
energy. Only the sons of bourgeois
get an adequate education, only
the sons of the bourgeoisie have
the time and money [redacted] to
create works of art. But
the most interesting and indisputable
fact is notwithstanding the artist's
sincerity and good intentions, he
can only draw from his world outlook
and experiences. His world outlook

Silvering particularly under the letters

of the revolution

Family life
has been by bourgeois ~~upbringing~~
education — and ~~in most~~
~~cases~~ his experience must be
that necessarily of a white
American Upper bourgeois.
~~White man~~ If he is serious &
sincere in his work he will
dig into the well of his experience
but what comes up can only be
the story of white American
traveling through Europe
sleeping with a series of silly
women — lording it over &
persecuting the natives of Africa
& Asia (his colonies) & that's
it — all else is unknown to him
unfelt —

Hence the spontaneous
creation of bourgeois art by
bourgeois artists coming up from
the bottom melts the conscious
policy of monetary force of the

capitalists coming from the top
To close a wall of ~~class~~ bourgeois
ideology which completely ~~hides~~
~~the~~ hides the truth from the people
vitiating their energies in
hopeless dreams and false solutions.

~~To~~ ~~create~~ a fierce superprofits —
~~The good meat~~ factory products
must be sold at the highest price
and the workers paid the lowest
wages. ~~But the~~ as a result the workers are 95%
of the population — and thus
constitute the domestic as well as
foreign market — do not earn enough
money to buy the goods — he
can't afford them — Hence the ~~phenomenon~~
markets become glutted and the
phenomenon of overproduction with
its subsequent depressions &
~~solution~~ through fascism & war
temporary relief sets in!

Supposing

1 hrs of 1 mans work is considered 1 Work Unit

1 mans work for 8 hrs (1 day) = 8 Work units

100 mans work for 1 day = 100 × 8 = 800 Work Units

Supposing in a given factory a given quantity of product takes 100 workmen 10 days to produce

Supposing we give 1 work unit the real monetary value of 1 dollar

thus 100 workmen × 8 hrs × 10 days = 8,000 work units

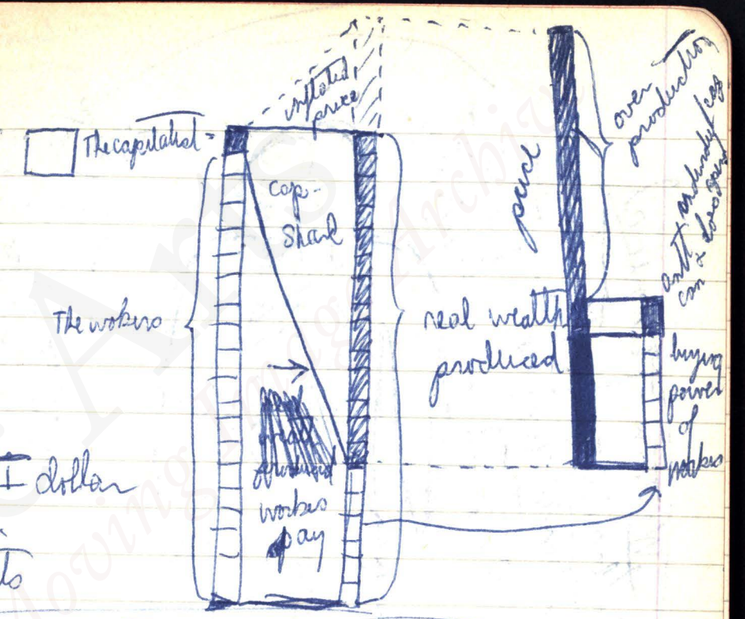
8,000 = real value of $8,000

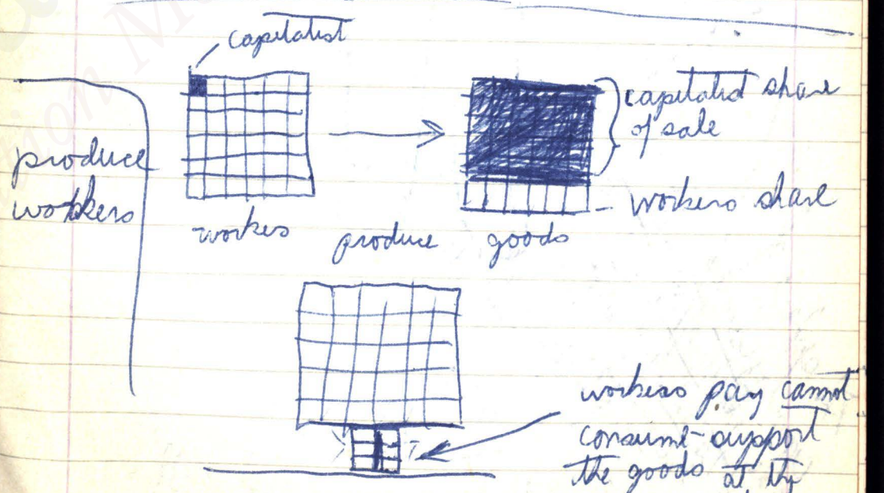
but the capitalist asks to make his profit - asks $12,000 for the and pays $4,000 to his

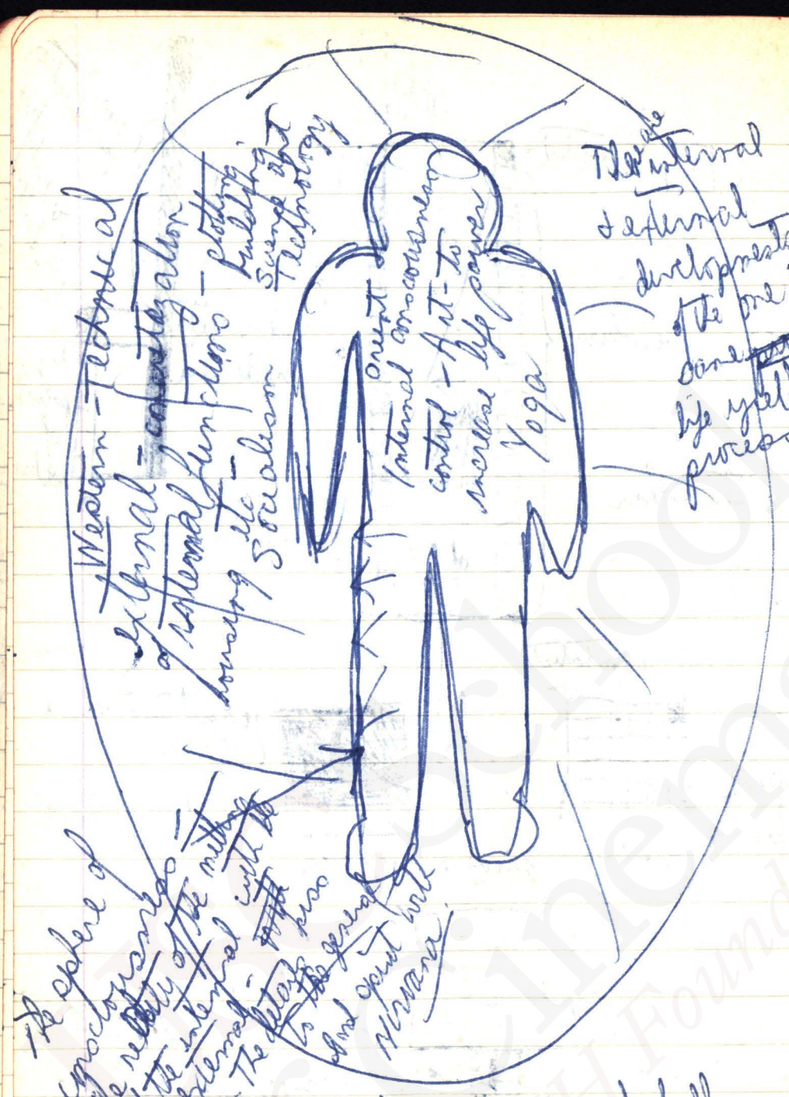
To make a surplus of $8,000

With the $4,000 the workers cannot buy a product costing $12,000

This process is produced generally through a country or an epoch capitalism - crisis must set in -







External art
of achieving & developing
East

Fundamental process

External process
of achieving & developing
West the central
basic process

perception ← sight → painting cinema etc
hearing of ears ← hearing → radio - Foto - Mikro -
Fever - sweat - Body temperature → clothing housing heating
muscle tension
Digestion - absorption ← Nutrition → cooking - spices
Farming - conserving - condensing concentrated

Man

i.e. one is the way of becoming conscious
East { of the ~~internal~~ processes within the human
body & (developing) ~~them~~ to the maximum
(to extend life) without the aid of external objects

West { is the becoming conscious of
processes - in nature - i.e.
outside the human body
in order to control & develop
them to extend life.

These in turn actually become
the internal processes of the new organ,
social man

That
a reciprocal dialectical equilibrium will & must be established between the internal & external acts that most extends the life of collective ~~individual~~ & man.

d/ too much is delegated without individual man becomes weakened — & if individual man dies social man dies —
the body & personality became obsolete

d/ too much is developed within the individual — the connective tissue of the society disappears & in the advanced situation of specialized modern society — many individual men die — (War — disease — starvation (abortion — crime & suicide) & the great majority are reduced to primitive barbarism — semi living — the social organism also disappears

How will
The correct mutual dialectic equilibrium be established in regard to the problem of nutrition — Naturalism must be a guiding principle.
Soft digestable fruits, cereals, vegetables & meat will be developed that need no cooking —
others cooked in pressure cooking
in regard to art
means individual perceptual & contemplative talents will be developed & the means for them to express — externally & concretely them will be opened & developed etc —

We must still always stick close to the reality of individual man — it is the most solid conception built up so far through history and yet the concept of social man is never & in dealing with it we are liable ~~spiritual~~ social to most errors — idealism — caution

An artistic life - like any other work of art is a life conscious of its aims - controlling (the processes) of means to realize the objective - This requires above all - thought - then discipline & vigorous steady action.

Both Society & Individual man dialectically contribute to the moral 1- Consciousness of goal
Scientific 2- consciousness and Procurement of means
artistic 3. Action - execution - realization
organization

Individual man - can through this process achieve artistic life. (harmony - dynamic creative equilibrium) life giving

& Social man will do the same

The acts of social life.

The east has long ago created the conscious concept of individual man & developed the means of his

The West is now in the process of creating the reality - & above all conscious concept of "social man" & developing the means of his artistic living.

Research - into the reasons & process of developing of all social Animals

- these terms, because in other words just as we have studied animal physiology in order to better understand & control human physiology we should likewise study all the multifarious forms of social organization found in animal & plant life - to determine basic laws so as to better understand & control the physiology of Social Man for his increased artistic living

a very interesting Documentary

"The social organization of animals & plants — & lessons learned & applicable to human society —

The why & how of Social organization in the animal kingdom — advantages & disadvantages of that species struggle for survival (ie increased life)

Dilettantism to the increasing of men — Professionalism to the ~~control~~ understanding & control of natural forces — without & away from Dilettantism in all things — to ~~pro~~ serious & ~~pro~~ sober, industrious professionalism !!

Your object for the next 4 years principal 26 → 30

Not only in the ~~In the necessity~~ & pleasure but in the necessity of love — (creative work ~~another~~ form of love) — is the proof of the fulfillment of necessity

The crux of the matter is that most don't do what gives them pleasure as individuals ideals to think they will to do but as materialists think — the experience pleasure because the do — (acts which contribute to life-growth) acts which are in most cases as determined & necessary expression of their within man structure & the natural character the world about them — as, the every one of million algae will send to the right shaft down for water & the left up for sun & air — not because the shoots — get pleasure — but their natures demand the action for living-growth — & the sensation of pleasure is the reward of the achievement

Social man

Functioning - physical, mental
emotional, sexual -
selling, keeping etc -
organism integrates & develops
~~the~~ the processes & structures
involved in its own ~~a~~ ~~action~~
functioning -

There are however 2 forms
of functioning

Exterior	Interior
exterior is where the motivating forces come from without	where the motivating forces come from within
message	involvement
motivating	fascinating
Emotions	~~experience~~ emotion directly
moved through Art	from life & expressing it
Scholarship	Thinking
etc.	

Both forms develop - but the interior in a much healthier & profound way & where ever possible is to be preferred to the exterior /

In a way all works of art, machines etc - ~~l~~ are truer portraits of man than the figure of man - daughters Lapland man in his usual chaotic setting -

They are so because the ~~are physical manifestations of the~~ realizations of the essence of mans intelligent, passionate & spiritual yearning for greater life - a machine & work of art is nothing but man crystallized into pure & more lucid more consistently expressed

Rhythmic form -

This is the ultimate beauty & glory of all man moulded objects — they more than any direct image — reflect the soul — the basic more diffused (through ~~eye~~ time & space) reality of man — They are man's greater power, thinking desiring willing artistic man — & this is the ultimate justification of the documentarists concentration & mans works (~~the~~ the man of deeper & sustained love rather than limit himself to the strictly anthropomorphic man —

The film that reveals man's science his works (art) his dreams & history reveals the truest portrait of man.

These & all external forms are more the spirit of man manifest - Concretized curiosity - desire etc. Synthesis - art etc.

They are ~~nothing~~ nothing but ~~matter~~ - an extended form of ~~man~~ (our great reality) Man. (the life)

As omnipotent, dynamic & alive machines might be — they are nothing without — man —

Without man — ~~they~~ they could not "create" - without man they ~~cannot exist~~ or for an instant Here is their source they soul — so God is probably his.

Art - science - machinery civilization is impossible without man — but man has been possible without them

The philosophy of history is the exposition

Physical fatigue has 2 fundamental forms—

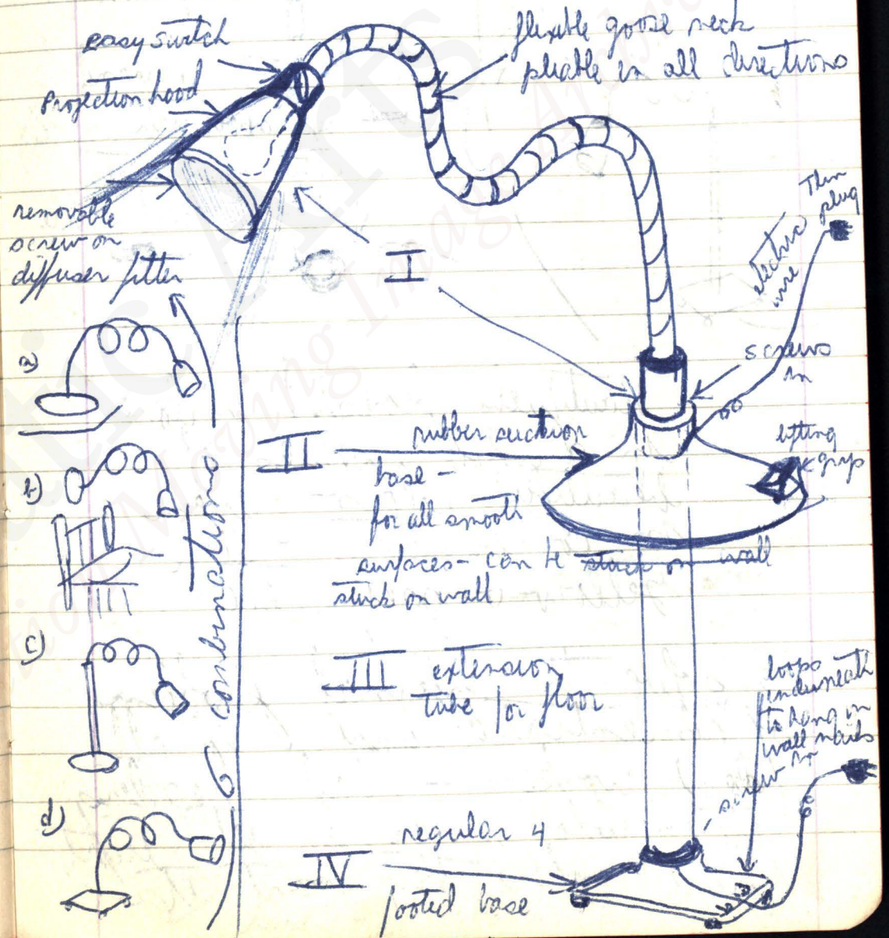
1. External muscular system fatigue

II. Internal organs - fatigue -

The first type is healthy (within limits) the second disastrous—

City dwellers rightfully avoiding bed until they have a real need for rest - unable to create healthy muscular fatigue through exercise, create internal organ fatigue by staying late - This is a perverted, unhealthy & destructive manifestation of what should be a healthy & enjoyable process (a sensation) of physical fatigue.

at last - a good all purpose functional lamp (in 4 variable parts)



e

f

Combinations

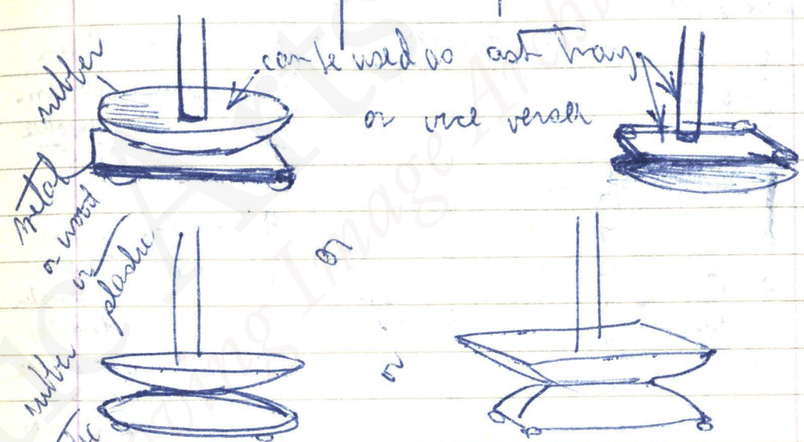
extra long cable with thin plug that can be dropped through tube

possibly with a wind ~~out~~ up spool with stop clip — to take up slack of wire

beautifully finished & done in a whole series of beautiful colors — even in combinations — like yellow & grey etc.

To solve the ~~general~~ problem of concentrated light for all desk workers — bed reading etc — who never can get light just where they want it —

can try idea of making 2 bases into I



or

Therefore — a 3 piece universal lamp

The cause of depression - Profits & ~~overproduction~~ & incapacity to absorb exchanged production

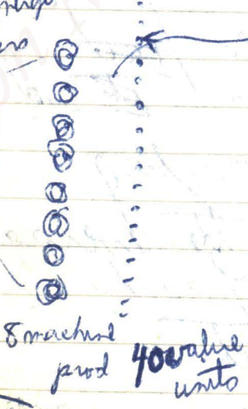
16 value
units

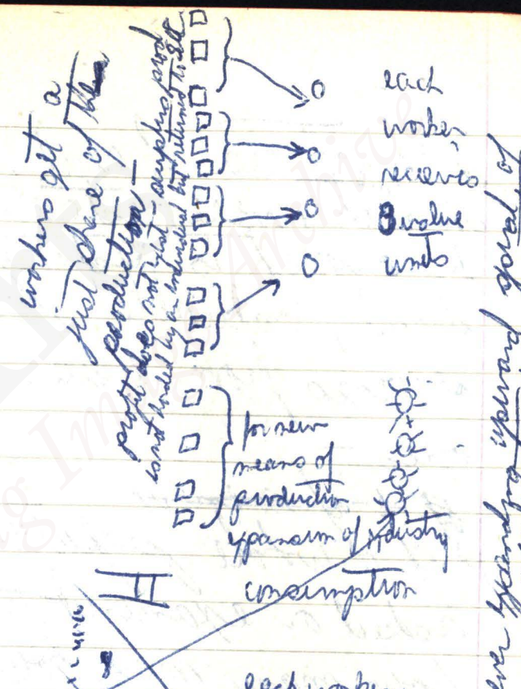
production → I

4 workers
now consume
8 value units



8 machine prod 40 value units

II

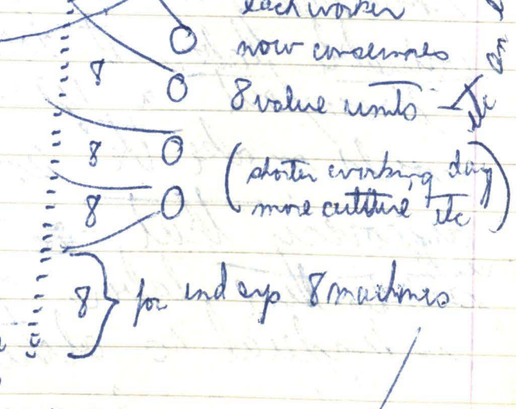


each worker receives 8 value units

for new means of production

expansion of industry

consumption



each worker now consumes 8 value units - etc

(shorter working day more culture etc)

8 } for ind exp 8 machines

III

V

etc - etc into the dizzy spiral of depression.

If a criteria of real social wealth were established by which to distinguish socially valuable goods & services from useless or harmful ones —

& if such a whole population were asked or examined to determine how many man hours of socially valuable labor it does throughout a year we would make the amazing discovery that the average socially productive labor of each individual is about

1 hour a day & not more

If the survey were made about the globe the average would probably be about 20 minutes a day per individual.

Now if society were so organized that each individual did only 3 hours of socially productive labor a day — The social real wealth of mankind would be trebled or quadrupled (or even multiplied by 9 times)

We would have 9 times as much wealth - by only working (at real work) 3 hours a day) with our conscences free - our social conscription paid & no goods - instead of running around hamstrung all day - by working 10 hours a day at nothing - deluding ourselves - never satisfied & never happy

The criteria of socially valuable labor can only be established in terms of a clear, complete & profound conception of what the healthy human being requires to be in perfect health from cradle to grave — material & spiritual needs.

I

II a clear conception of the highest, most rational, intelligent efficient organization of productive forces possible in terms of Science, technology, organizational science & population capacity i.e. natural resources — Technical & population ability organized to produce the values of + anything working against & outside substituting for or outside

Criteria / The criteria of socially valuable labor can only be established in terms of a clear, complete & profound conception of what the human being requires to be in perfect health from cradle to grave — material & spiritual needs.

the concepts of I & II should be considered socially useless unreal values — (goods & services)

Naturally concepts I + II are forever enlarging - expanding —
The distinction between necessity & luxury is purely relative & theoretical
The line of necessity is forever invading the land of luxury —

necessity → | → luxury

air heat food rest exercise sex friendship shared culture
(from material to spiritual)

→ Growth & development — for the whole human race is the real necessity —
Given any set of values the next one then becomes necessary etc.
The line dividing necessity from luxury must be brought to the same point for the whole human race before it can progress soundly.

The big picture is what we need dramatically realistically for our minds — the proper equilibrium & perspective of truth — Internation humanity with its 2 billion souls evolving through thousands of years of time — in this perspective — ~~the~~ Wars, catastrophes & dark ages seem less spectacular — the slow development — spreading & awakening of humanity is ever on the road (to it would) ~~on~~ This is certainly the perspective as seen by Stalin — any other is stiff to ~~the~~ influence of dictator concerned in individualism —

From these last 4 months of frustration, worry & suffering I have understood that society as well as nature is completely indifferent to the desires of individual men —

Between man — and Society & nature — exists chaos — The/ones Each conflict ~~is~~ (resolved into a greater) are elements of a greater harmony — The areas of chaos & harmony — of freedom & necessity must be studied — their interrelations clarified —

The building

Civilization ~~is~~ is the struggle to make society & nature more friendly to desires, needs & happiness of individual man —

The spirit of individual man is reaching out — ~~creating~~ digesting organizing — subjugating ~~to~~ ~~independent~~

indifferent forces of society & nature to its needs.

Forces are refined - response is made more immediate flexible, forces are refined - essentials are extracted - energy ~~wasted~~ exploited more efficiently -

Just as the ~~fixed~~ fixed amorphous material quantity of the egg - is by human specialization & organization (driven by - 2 acquires a greater quantity of spiritual energy - so - essentially ~~so~~ is evolution of civilization - Men & matter do not necessarily increase - but their organization & specialization increases their quality i.e the quantity of their spiritual energy.

as ~~matter~~ matter & mind - are merely two ~~separately~~ human conceived aspects of the same thing.

The word quantity is allied to matter the word quality ~~allied~~ to spirit

Instead of saying changes of quantity give rise to sudden changes of quality I believe it would be richer & more meaningful & accurate to say -

although life & reality are one & indivisible to the limited consciousness of man ~~matter is arranged until it~~ reality ~~arranges itself~~ passes through phases of material arrangement until the spiritual ~~age~~ quality - ~~inherent &~~ ever present but incumbent in the ~~same~~ ~~change~~ arrangement suddenly ~~being brings~~ ~~man~~ ~~logs~~ manifests itself through a lags of attention & consciousness & perception of the human mind - Whereupon once the new quality so apprehended & categorized it stored safely away &

attention once again returns to the rearrangement of matter — to which as yet no sentiment no idea — ~~[illegible]~~ in the human soul corelates — no general concept relates or explains — until suddenly in a mental leap man sees & understands a new entity — he beholds form — a new level of psychic spiritual being is born — a new foundation for dynamo possibilities.

~~[illegible]~~ The problem remains to explain why perception occurs at certain instances & not others — What is it about nature — reality ~~[illegible]~~ stating in our hearts & minds that suddenly — ~~[illegible]~~ makes contact into the reality without us.

The moment of consciousness — of knowing seeing feeling — ~~[illegible]~~ the fusion of internal & external elements into "form"
What explains — & this phenomenon — its time its manner — its object?

This not idealist motor as I do not see the origin of form ~~[illegible]~~ in human man — who is a carnal ~~[illegible]~~ being capable of transmitting emanations of from the prime ~~[illegible]~~ source of spirit — the immoved mover — God!

But ~~[illegible]~~ obverse nature whether man on the same plane as nature without him — seeing them as completely interfused reality that finds its harmony & explanation in a concept embracing them both in equal manner / ~~[illegible]~~ / E. we must conceive the process of "Form" in

same manner we perceive photogenesis — as the meeting point of elements inside & outside a plant that has meaning if only observed in a much greater perspective — which gives no preference — to the sun — the air — the chemicals inside the plant as creators of the process — all being equally essential & without which not only photosynthesis but all of reality including our mode of perception would be different.

?

Maturity is the recognition of forces indifferent to and overwhelmingly more powerful than the petty plans of the individual.

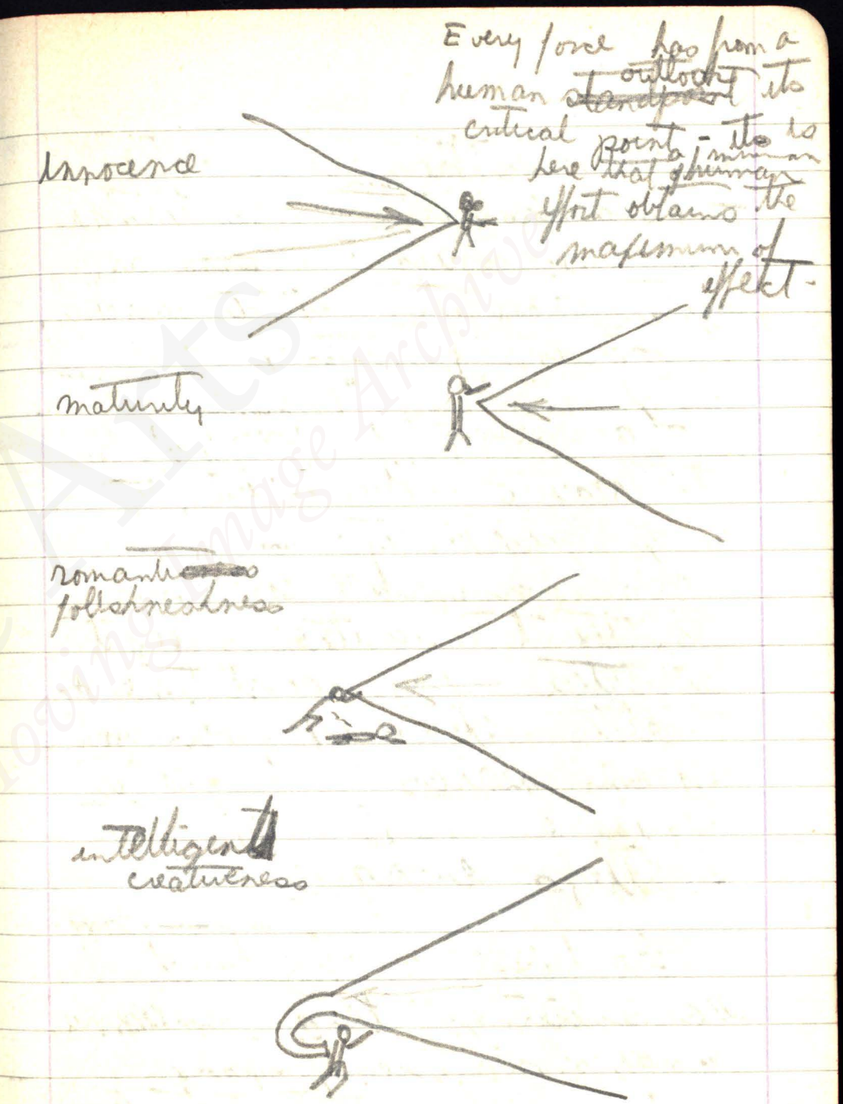
The desire for greater life that propels each individual forward is arrayed against two relatively indifferent - often hostile realities — Nature & society. The mute forces moving through these two spheres are tremendous carrying human destinies before them as a blade of grass is crushed by a glacier.

[illegible]

Intelligence is the application of man power at just the right critical point - absorbing - directing & turning natural & societal [illegible] forces into means to fight them head on, to ingenious folly — & leads only to elimination.

as Marx said - "Freedom

as the recognition of necessity -
~~Hamlet~~ Romantics dash themselves
hopelessly against ~~storm~~ advancing
titanic realities of the machine /
the growing proletariat -
Marx said ~~story~~ "recognizing these
as the realities - lets make
its force our slave - turn it
to our advantage -
- once our intelligence has
given the tiny curbs of direction
the titanic forces of nature &
society instead being our masters
are our slaves - we ride to
glory on the wave of the
swelling energies -
One second of intense thought
clear understanding - imagination
- ~~&~~ & natures forces
forever reap to the fruits
for us -



in Nature - the same law that makes you sick will make you well
in society the same law that
makes you poor can make
you rich -

Understanding is what is needed -
- is actually a moment of real thought
of accepting & adjusting preconception
to reality is the most difficult
of things to do - to change
means to break - to give in
to humble the ego - deflect
inertia - but once done
is the source of greatest
joy & pride!

If the fish ~~stays~~ sales are good in
the fall & bad in the spring
don't bash your head
against a brick wall in
the fall - romantically thinking
smiling & friendship can turn
back - & will the great natural

tide of the situation - you
will only lose time & energy -
defeat is inevitable - but
put your documentaries
away wait a few
months & sell when the
season is good -

A good idea for a book -
"The Right Speaks"
The standard argument against
socialist ideas is that they are
merely propaganda coming from the
leftist press & that each side is
false & biased. The amazing thing
is however - that a discerning
reader could construct the
socialist line merely by selecting
& placing side by side statements
of Western press, radio, literature
& cinema. Truth is truth & it
is difficult to suppress completely
- it pops out surprisingly from the the

The Truth about Communism

mouths of the most inveterate liers
The falseness, the inconsistency,
in insincerity, the [redacted]
ignorance, or stupidity of
Capitalist world can be revealed
by none better than themselves.

The book could be organized in
many different ways -
covering from 1848 to the Present
during 1900 to the present
Rus Rev 1917 (Rev) to the present
crash 1929 to the present
the last or 1933 to the present
20 years

it - could be organized according
to ideas, countries, sources
personalities -
It could be only press - literature
radio - films - or any combination -
I believe the best - most mageable
practical significant form would be

Introduction

Right press 1917 to Present
organized according to idea -
at the heading of each chapter
should be an introduction
stating the "official" communist line
with quotations from Marx, Engels
Lenin - Stalin etc - & the official
~~Right~~ Capitalist line - possibly a
quotation of some spokesman.
The book should be strung together
by historical survey exploding the
by ~~light~~ charge of the world situation
balance of power & public & official
opinion

Rev - Crash
period - 1917 - 1929
1929 - 1939
with crash War
historical 1945 - 1953
introductory victory present
& charged situation & strategy - subdivided into
heading - contested ideas -
followed by quote - with coverage

The truth labo tho

Poetry is the expression of spiritual truth –

Factories the outskirts of town, railroad yards – the poor, the hungry, the destitute, the old weather-beaten barns are more beautiful than the sleek the new because reveal openly candidly directly – the truth – of their world – They bear the imprint of all the forces of the world, war nervous tension distrust struggle ~~spread~~ elements spread wide ~~among~~ of treasure – omnipresent yet – these things like a work of art reveal the inner deeper reality of their world – directly & with major power

– There is a unity, a harmony – but it is not made ~~by~~ or op of man

It is easy to understand how any man constructs an egocentric world ~~It is easy to~~ understand the absurdity of it. Man must centralize his concepts & egocentralize his actions

Stereo

pebble screen for stereo projection
each projector sitting one side
– no glasses

central m/f

chestnut angle projector
mirror spread wide illuminate need for 2 projectors

Each eye must see a distinct and separate image without glasses.

combatting without hesitation
The Unity the poetry of art is the glimpse of man into the greater harmony

It is a great privilege
a grave and noble opportunity
to have the tremendously expressive
means of stereo sound cinema
to express the staggering new
truths of our time —

an honor and privilege
to be allowed
with the great & noble lives
of the human beings who
are struggling valiantly
against tremendous obstacles
to illuminate the mysteries of
the life & to expand the very soul!!
